Manuscripts should be sent to one of the following editors:

JOHN N. ABELSON
Division of Biology 147–75
California Institute of Technology
Pasadena, California 91125
FAX: (818) 796-7066

ERNESTO CARAFOLI
Laboratorium für Biochemie
ETH-Zentrum
CH-8092 Zurich
Switzerland
FAX: 41-1-632-1213

I. C. GUNSALUS
Environmental Research Laboratory
1 Sabine Island Drive
Building #37
Gulf Breeze, Florida 32561-5299
FAX: (904) 934-9201

AKIRA ICHIHARA
2-7-55 Minamiyaso
Tokushima 770
Japan
FAX: 81-886-32-4104

JAMES D. JAMIESON
Department of Cell Biology
Yale University School of Medicine
333 Cedar Street
P.O. Box 333
New Haven, Connecticut 06510
FAX: (203) 785-6936

YASUO KAGAWA
Department of Biochemistry
Jichi Medical School
Minamikawachi-Machi Kawachi-gun
Tochigi-ken 329-04, Japan
FAX: 81-28-544-1827

M. DANIEL LANE
Department of Biological Chemistry
The Johns Hopkins University
725 No. Wolfe Street
Baltimore, Maryland 21205
FAX: (410) 955-0903

WILLIAM J. LENNARZ
Department of Biochemistry and
Cell Biology
State University of New York
Stony Brook, New York 11794-5215
FAX: (516) 632-8575

MASAMI MURAMATSU
Department of Biochemistry
Saitama Medical School
Moroyama, Iruma
Saitama 350-04, Japan
FAX: 0492-94-9751

BENNETT M. SHAPIRO
Merck Research Laboratories
RY80K, P.O. Box 2000
Rahway, New Jersey 07065-0900
FAX: (908) 594-6645

BIOCHEMICAL AND BIOPHYSICAL RESEARCH COMMUNICATIONS
(ISSN 0006-291X)

Published semimonthly by Academic Press, Inc., 6277 Sea Harbor Drive, Orlando, FL 32887-4900

1994: Volumes 198–205. Price: $1152.00 U.S.A. and Canada; $1407.00 all other countries
1995: Volumes 206–217. Price: $1359.00 U.S.A. and Canada; $1652.00 all other countries

All prices include postage and handling.

Information concerning personal subscription rates may be obtained by writing to the Publishers. All correspondence and subscription orders should be addressed to the office of the Publishers at 6277 Sea Harbor Drive, Orlando, FL 32887-4900. Send notices of change of address to the office of the Publishers at least 6 to 8 weeks in advance. Please include both old and new addresses. POSTMASTER: Send change of address to *Biochemical and Biophysical Research Communications*, 6277 Sea Harbor Drive, Orlando, FL 32887-4900.

CUMULATIVE TABLE OF CONTENTS FOR VOLUMES 198–205

Volume 198, Number 1, January 14, 1994

Regulatory Effect of Phorbol Esters on Sphingosine Kinase in BALB/C 3T3 Fibroblasts (Variant A31): Demonstration of Cell Type-Specific Response—A Preliminary Note *Nachman Mazurek, Tamar Megidish, Sen-itiroh Hakomori, and Yasuyuki Igarashi* 1

Plasmin Converts Pro-form of Group I Phospholipase A_2 into Receptor Binding, Active Forms *Toru Nakano, Hiroko Fujita, Norihisa Kikuchi, and Hitoshi Arita* 10

Suppression of Neointimal Smooth Muscle Cell Accumulation *in Vivo* by Antisense cdc2 and cdk2 Oligonucleotides in Rat Carotid Artery *Jun-ichi Abe, Wei Zhou, Jun-ichi Taguchi, Noriko Takuwa, Keisaburo Miki, Hiroshi Okazaki, Kiyoshi Kurokawa, Mamoru Kumada, and Yoh Takuwa* 16

Heparin-Binding EGF-like Growth Factor Is a Potent Mitogen for Rat Hepatocytes *Nobuyuki Ito, Sumio Kawata, Shinji Tamura, Shinichi Kiso, Humihiro Tsushima, Deborah Damm, Judith A. Abraham, Shigeki Higashiyama, Naoyuki Taniguchi, and Yuji Matsuzawa* 25

Histone-Induced Condensation of Rat Testis Chromatin: Testis-Specific H1t versus Somatic H1 Variants *Filomena De Lucia, M. Rosaria Faraone-Mennella, Maria D'Erme, Piera Quesada, Paola Caiafa, and Benedetta Farina* 32

An Upper Limit for the Effect of 60 Hz Magnetic Fields on Bioluminescence from the Photobacterium *Vibrio fischeri* *Michael P. Greenbaum* 40

Noncovalent Interaction between Poly(ADP-Ribose) and Cellular Proteins: An Application of a Poly(ADP-Ribose)–Western Blotting Method to Detect Poly (ADP-Ribose) Binding on Protein-Blotted Filter *Tadashige Nozaki, Mitsuko Masutani, Tetsuya Akagawa, Takashi Sugimura, and Hiroyasu Esumi* 45

Regulation of Alternative Pathway Complement Activation by Glycosaminoglycans: Specificity of the Polyanion Binding Site on Factor H *Seppo Meri and Michael K. Pangburn* 52

Protein Tyrosine Phosphatase Inhibition by Angiotensin II in Rat Pheochromocytoma Cells through Type 2 Receptor, AT_2 *Kyoko Takahasi, Smriti Bardhan, Yoshikazu Kambayashi, Heigoro Shirai, and Tadashi Inagami* 60

p561ck Phosphorylation by Ca^{2+}/Calmodulin-Dependent Protein Kinase Type II *Molly M. Bland, O. Bradley McDonald, and Ana C. Carrera* 67

Microsatellite Mutation ($CAG_{24 \blacktriangleright 18}$) in the Androgen Receptor Gene in Human Prostate Cancer *Mark P. Schoenberg, Janette M. Hakimi, Suping Wang, G. Steven Bova, Jonathan I. Epstein, Kenneth H. Fischbeck, William B. Isaacs, Patrick C. Walsh, and Evelyn R. Barrack* 74

Stimulatory Effect of IL-l-β on Catecholamine Secretion from Cultured Bovine Adrenal Medullary Cells *Nobuyuki Yanagihara, Kouichiro Minami, Fumihiko Shirakawa, Yasuhito Uezono, Hideyuki Kobayashi, Sumiya Eto, and Futoshi Izumi* 81

The Association between CD45 and *lck* Does Not Require CD4 or CD8 and Is Independent of T Cell Receptor Stimulation *Susan E. Ross, Burkhart Schraven, Frederick D. Goldman, John Crabtree, and Gary A. Koretzky* 88

Interactions between Growth Hormone and Nutrition in Hypophysectomized Rats: Skeletal Muscle Myosin Heavy Chain mRNA Levels *Paul T. Loughna and Peter C. Bates* 97

An S1 Nuclease-Sensitive Region in the PDGF A-Chain Gene Promoter Contains a Positive Transcriptional Regulatory Element *Zhao-Yi Wang, Qing-Qing Qiu, and Thomas F. Deuel* 103

Mediation of the Physiological Response of Platelets by Interactions of Spectrin and Protein 4.1 with the Cytoskeleton *Yoichiro Matsuoka, Masakatsu Nishikawa, Hideki Toyoda, Yoshifumi Hirokawa, Shoji Ando, Takeo Yano, Kazushi Tanabe, and Ryuichi Yatani* 111

Human Retinal Pigmented Epithelial Cells Produce Nitric Oxide in Response to Cytokines *O. Goureau, D. Hicks, and Y. Courtois* 120

Ferric Reductases in *Escherichia coli*: The Contribution of the Hemoglobin-like Protein *Michel Eschenbrenner, Jacques Coves, and Marc Fontecave* 127

The 100-kDa Protein, Whose Phosphorylation Precedes the Fusion of Chick Embryonic Myoblasts, Is the Eukaryotic Elongation Factor-2 *Young Ju Jeon, Hye Seon Kim, Hye Sun Kim, Man-Sik Kang, Chin Ha Chung, and Doo Bong Ha* 132

Homology of 1-Aminocyclopropane-1-carboxylate Synthase, 8-Amino-7-oxononanoate Synthase, 2-Amino-6-caprolactam Racemase, 2,2-Dialkylglycine Decarboxylase, Glutamate-l-semialdehyde 2,1-Aminomutase, and Isopenicillin-*N*-epimerase with Aminotransferases *Perdeep K. Mehta and Philipp Christen* 138

Dual Role of Calsequestrin as Substrate and Inhibitor of Casein Kinase-1 and Casein Kinase-2 *Sergio Salvatori, Sandra Furlan, and Flavio Meggio* 144

Transient Thiol Expression and Thiol Disulfide Cluster-Receptor Communications: A Molecular Basis for Blastocyst–Uterine Interactions during Implantation *Monzy Thomas, Sudhir Jain, G. Pradeep Kumar, and Malini Laloraya* 150

Localization of Rabphilin-3A, a Putative Target Protein for *Rab*3A, at the Sites of Ca^{2+}-Dependent Exocytosis in PC12 Cells *Ken Wada, Akira Mizoguchi, Kozo Kaibuchi, Hiromichi Shirataki, Chizuka Ide, and Yoshimi Takai* 158

The α_1-Subunit of Skeletal Muscle L-Type Ca Channels Is the Key Target for Regulation by A-Kinase and Protein Phosphatase-lC *Xiao-lan Zhao, Luis M. Gutierrez, Chan Fong Chang, and M. Marlene Hosey* 166

Electrostatic Activation of Rat Phenylalanine Hydroxylase *Bruce A. Citron, Michael D. Davis, and Seymour Kaufman* 174

Molecular Cloning of a cDNA Coding for a Region of an Apoprotein from the "Insoluble" Mucin Complex of Rat Small Intestine *Gunnar C. Hansson Dan Baeckström, Ingemar Carlstedt, and Karin Klinga-Levan* 181

Activation of Respiratory Burst Oxidase Is Accompanied by Desensitization of $p47^{phox}$ in Nucleoside-Triphosphate Binding along with Its Translocation to Cell Membrane *Hiroyuki Mizunari, Tadatoshi Kuratsuji, Hideo Namiki, and Shohko Tsunawaki* 191

Identification of Two Phosphorylation Motifs in Bovine Osteopontin *Esben S. Sørensen and Torben E. Petersen* 200

Comparison of Substrate and Inhibitor Specificity of Arginase and Nitric Oxide (NO) Synthase for Arginine Analogs and Related Compounds in Murine and Rat Macrophages *A. Hrabák, T. Bajor, and Ágnes Temesi* 206

Laminar Flow Stimulates ATP- and Shear Stress-Dependent Nitric Oxide Production in Cultured Bovine Endothelial Cells *Risa Korenaga, Joji Ando, Hiroko Tsuboi, Weidong Yang, Ichiro Sakuma, Teruhiko Toyo-oka, and Akira Kamiya* 213

Reduced Phospholipase A_2 Activity Is Not Accompanied by Reduced Arachidonic Acid Release *Howard Goldberg, Peter Maxwell, Nashrudeen Hack, and Karl Skorecki* 220

Conformational Study on an Insect Neuropeptide of the AKH/RPCH Family by Combined ^{1}H NMR Spectroscopy and Molecular Mechanics *Igor Z. Zubrzycki and Gerd Gäde* 228

Occurrence of Specific Sterols in *Pneumocystis carinii* *M. Florin-Christensen, J. Florin-Christensen, Y-P. Wu, L. Zhou, A. Gupta, H. Rudney, and E. S. Kaneshiro* 236

Stabilization of Interleukin-2 Receptor α Chain mRNA by HTLV-I Rex in Mouse L Cells: Lower Amounts of Rex Do Not Stabilize the mRNA *Hiroshi Kanamori, Tatsuhiko Kodama, Akiyo Matsumoto, Hiroshige Itakura, and Yoshio Yazaki* 243

Interaction of a Novel Tn(GalNAcα1→Ser/Thr) Glycoprotein with Gal, GalNAc, and GlcNAc-Specific Lectins *Albert M. Wu, June H. Wu, and F-shiun Shen* 251

Butyrate-Induced Apoptosis in Lymphoid Cells Preceded by Transient Over-expression of HSP70 mRNA *Igor Filippovich, Natasha Sorokina, Kum Kum Khanna, and Martin F. Lavin* 257

Abnormal Physical Architecture of the Lipophilic Domains of Human Sperm Membrane in Oligospermia: A Logical Cause for Low Fertility Profiles *Sumita Sinha, G. Pradeep Kumar, and Malini Laloraya* 266

Histatin as a Synergistic Stimulator with Epidermal Growth Factor of Rabbit Chondrocyte Proliferation *Yukitaka Murakami, Hideki Nagata, Satoshi Shizukuishi, Kazuhisa Nakashima, Tokutaro Okawa, Masaharu Takigawa, and Akira Tsunemitsu* 274

Characterization of Interactions of Nitric Oxide with Human Hemoglobin A by Infrared Spectroscopy *Vijaya Sampath, Xiao-jian Zhao, and Winslow S. Caughey* 281

Expressed Sequence Tags Identify a Human Isolog of the *Suil* Translation Initiation Factor *Chris Fields and Mark D. Adams* 288

Insulin-like Growth Factor Binding Protein 3 (IGF-BP3) Inhibits Estrogen-Stimulated Breast Cancer Cell Proliferation *Susan E. Pratt and Michael N. Pollak* 292

PDGF Induces the Glutathione-Dependent Enzyme PGH_2/PGE_2 Isomerase in NIH3T3 and pEJ Transformed Fibroblasts *Michael J. Kelner and Slavomir F. Uglik* 298

The Relative Abundance of Type 1 to Type 2 Cyclo-oxygenase mRNA in Human Amnion at Term *Donna Slater, Louise Berger, Robert Newton, Gudrun Moore, and Phillip Bennett* 304

The Interaction of Calmodulin and Polylysine as Studied by ^{1}H NMR Spectroscopy and Sedimentation Equilibrium Centrifugation *Robert W. Hardy, Jay M. McDonald, Edward E. Remsen, D. André d'Avignon, and David B. Sacks* 309

cDNA Cloning and Chromosomal Mapping of Human *N*-Acetylglucosaminyltransferase V *Hiroyuki Saito, Atsushi Nishikawa, Jianguo Gu, Yoshito Ihara, Hidenobu Soejima, Yoshinao Wada, Chihiro Sekiya, Norio Niikawa, and Naoyuki Taniguchi* 318

Cloning and Expression of a Human Glucagon Receptor *Douglas J. MacNeil, James L. Occi, Patricia J. Hey, Catherine D. Strader, and Michael P. Graziano* 328

Molecular Cloning and Tissue-Specific Expression of Fructose 6-Phosphate 2-Kinase: Fructose 2,6-Bisphosphatase of Rat Brain *Fusao Watanabe, Akiko Sakai, Eisuke Furuya, and Kosaku Uyeda* 335

Substituted 3-oxo-1,2,5-Thiadiazolidine 1,1-Dioxides: A New Class of Potential Mechanism-Based Inhibitors of Human Leukocyte Elastase and Cathepsin G *William C. Groutas, Rongze Kuang, and Radhika Venkataraman* 341

Lactose as Affinity Eluent and a Synthetic Sulfated Copolymer as Inhibitor, in Conjunction with Synthetic and Natural Acceptors, Differentiate Human Milk Lewis-Type and Plasma-Type α-L-Fucosyltransferases *E. V. Chandrasekaran, John M. Rhodes, Rakesh K. Jain, and Khushi L. Matta* 350

Attenuation of Human Leukocyte Adherence to Endothelial Cell Monolayers by Tyrosine Kinase Inhibitors *Patrick E. McGregor, Devendra K. Agrawal, and John D. Edwards* 359

Dynamic of α-l-Adrenoceptor-Mediated Degradation of Membrane Phospholipids in Cultured Rat Cardiomyocytes *Alessandra Bordoni, PierLuigi Biagi, Carlo Alfonso Rossi, and Silvana Hrelia* 366

Carboxyl Methylation of Protein Phosphatase 2A from *Xenopus* Eggs Is Stimulated by cAMP and Inhibited by Okadaic Acid *Monique Floer and Jeff Stock* 372

Angiotensin-Converting Enzyme and Genetic Hypertension: Cloning of Rat cDNAs and Characterization of the Enzyme *George Koike, Jose E. Krieger, Howard J. Jacob, Masashi Mukoyama, Richard E. Pratt, and Victor J. Dzau* 380

Evidence for the Presence of Topoisomerase-like Activity in Mitochondria of *Saccharomyces cerevisiae* *Vanishree Murthy and K. Pasupathy* 387

Annetocin: An Oxytocin-Related Peptide Isolated from the Earthworm, *Eisenia foetida* *T. Oumi, K. Ukena, O. Matsushima, T. Ikeda, T. Fujita, H. Minakata, and K. Nomoto* 393

Rapid Desensitization of Agonist-Induced Calcium Mobilization in Transfected PC 12 Cells Expressing the Rat Neurotensin Receptor *Emmanuel Hermans, Philippe Gailly, Jean-Noël Octave, and Jean-Marie Maloteaux* 400

ERRATA

Volume 196, Number 1, October 15,1993: Etsuko Mori, Tadashi Baba, Akihiro Iwamatsu, and Tsuneatsu Mori, "Purification and Characterization of a 38-kDa Protein, sp38, with Zona Pellucida-Binding Property from Porcine Epididymal Sperm," pp. 196–202 408

Volume 196, Number 1, October 15, 1993: Masatake Shimokawa, Katsuhiko Yanagisawa, Hiroshi Nishiye, and Tadashi Miyatake, "Identification of Amyloid Precursor Protein in Synaptic Plasma Membrane," pp. 240–244 409

Volume 196, Number 1, October 15, 1993: Stéphane Robert, Dominique Domurado, Daniel Thomas, and Joël Chopineau, "Fatty Acid Acylation of RNase A Using Reversed Micelles as Microreactors," pp. 447–454 410

Volume 198, Number 2, January 28, 1994

The Motilin Antagonist ANQ-11125 Blocks Motilide-Induced Contractions *in Vitro* in the Rabbit *T. L. Peeters, I. Depoortere, M. J. Macielag, R. Dharanipragada, M. S. Marvin, J. R. Florance, and A. Galdes* 411

Inhibition of UDP-GlcNAc:Galβ1-3GalNAc-R (GlcNAc to GalNAc) β6-*N*-Acetylglucosaminyltransferase from Acute Myeloid Leukemia Cells by Photoreactive Nitrophenyl Substrate Derivatives *Dale Toki, Maria A. Granovsky, Folkert Reck, William Kuhns, Michael A. Baker, Khushi L. Matta, and Inka Brockhausen* 417

Coexistence of Folded and Extended Conformations of a Tripeptide Containing α, α-Di-*n*-propylglycine in Crystals *Sudhanand Prasad, Shomenath Mitra, E. Subramanian, D. Velmurugan, R. Balaji Rao, and P. Balaram* 424

Primary Structure of the Large Subunit of Trifunctional β-Oxidation Complex from Pig Heart Mitochondria *Song-Yu Yang, Xue-Ying He, James Styles, Ming Jiang Luo, Horst Schulz, and Marshall Elzinga* 431

The Attenuated Elevation of Cytoplasmic Calcium Concentration Following the Uptake of Low Density Lipoprotein in Type C Niemann–Pick Fibroblasts *Toshiharu Yamamoto, Toshiharu Tokoro, and Yoshikatsu Eto* 438

Ion Channel Activity of a Synthetic Peptide with a Primary Structure Corresponding to the Presumed Pore-Forming Region of the Voltage Dependent Potassium Channel *Kohki Shinozaki, Kazunori Anzai, Yutaka Kirino, Sannamu Lee, and Haruhiko Aoyagi* 445

Dietary Deprivation of B-Vitamins Reflected in Murine Splenocyte Proliferation *in Vitro* *Kathleen S. Matthews, Emilia Mrowczynski, and Randall Matthews* 451

Identification of a Second Poly(A) Polymerase in *Escherichia coli* *Miklos P. Kalapos, Gong-jie Cao, Sidney R. Kushner, and Nilima Sarkar* 459

Cyclosporin, a Sensitive Peptidyl–Prolyl *cis–trans* Isomerase in a Halophilic Archaeum, *Halobacterium cutirubrum* *Kyo Nagashima, Satoshi Mitsuhashi, Kei Kamino, and Tadashi Maruyama* 466

Molecular Basis for Developmental Changes of GM-CSF Gene Inducibility in Embryonal Carcinoma Cells *Toshio Heike, Ryuhta Nishikomori, Masahiko Kawai, Akio Tsuboi, Naoko Arai, and Haruki Mikawa* 473

Induction of Pituitary Sensitivity to Interleukin-1: A New Function for Corticotropin-Releasing Hormone *Linda C. Payne, Douglas A. Weigent, and J. Edwin Blalock* 480

Krabbe Disease: Isolation and Characterization of a Full-Length cDNA for Human Galactocerebrosidase *Norio Sakai, Koji Inui, Naoko Fujii, Hisao Fukushima, Junji Nishimoto, Itaru Yanagihara, Yuji Isegawa, Akihiro Iwamatsu, and Shintaro Okada* 485

Detection of Circular and Linear Transcripts of *Sry* in Preimplantation Mouse Embryos: Differences in Requirement for Reverse Transcriptase *Timothy R. Boyer and Robert P. Erickson* 492

Tyrosine Phosphorylation and Activation of Mitogen-Activated Protein Kinases by Thrombin in Human Platelets: Possible Involvement in Late Arachidonic Acid Release *Shigeru Nakashima, Yuji Chatani, Mitsuhiro Nakamura, Naomi Miyosohi, Michiaki Kohno, and Yoshinori Nozawa* 497

Glial Conditioned Medium Alters the Expression of Amyloid Precursor Protein in SH-SY5Y Neuroblastoma Cells *Yuichi Hirose, Yoshinori Imai, Kazuyuki Nakajima, Nagisa Takemoto, Shigeo Toya, and Shinichi Kohsaka* 504

Inducible L-Arginine-Dependent Nitric Oxide Synthase Activity in Bovine Bone Marrow-Derived Macrophages *Heiko Adler, Ernst Peterhans, Jacques Nicolet, and Thomas W. Jungi* 510

Glutathione Conjugation with the Pyrrolizidine Alkaloid, Jacobine *Stephen R. Dueker, Michael W. Lamé, A. Daniel Jones, Dexter Morin, and H. J. Segall* 516

Correlation of the Insulin Receptor Substrate-1 with Insulin-Responsive Deoxyglucose Transport in 3T3-L1 Adipocytes *K. Michael Rice and Charles W. Garner* 523

Aluminum Promotes the Aggregation of Alzheimer's Amyloid β-Protein *in Vitro* *Masahiro Kawahara, Kazuyo Muramoto, Kazuo Kobayashi, Hiroshi Mori, and Yoichiro Kuroda* 531

Inhibition of Cell Cycle Oscillation of DNA Replication by a Selective Inhibitor of cdc2 Kinase Family, Butyrolactone I, in *Xenopus* Egg Extracts *Akira Someya, Nobuo Tanaka, and Akira Okuyama* 536

Effects of Bile Acids and Steroid/Thyroid Hormones on the Expression of Cholesterol 7α-Hydroxylase mRNA and the *CYP7* Gene in HepG2 Cells *Maurizio Crestani, Walid G. Karam, and John Y. L. Chiang* 546

Developmental Regulation of Expression of Multiple γ-Glutamyl Transpeptidase mRNAs in the Postnatal Rat Epididymis *Michael A. Palladino and Barry T. Hinton* 554

Novel Fucose-Rich Glycosaminoglycans from Squid Ink Bearing Repeating Unit of Trisaccharide Structure $(\text{-6GalNAc}\alpha\text{1-3GlcA}\beta\text{1-3Fuc}\alpha\text{1-})_n$ *Yoshiaki Takaya, Hidemitsu Uchisawa, Kenkoh Hanamatsu, Fumiaki Narumi, Bun-ichi Okuzaki, and Hajime Matsue* 560

Increase of Hepatic mRNAs of Profilin, Actin, and Extracellular Matrix Proteins after Carbon Tetrachloride Treatment and Partial Hepatectomy in Rats *Hayato Nakamura, Keiji Hirata, Kenzo Yamashiro, Kenji Hiranuma, Kiyotaka Shibata, Ken Higashi, Tsubasa Morita, and Hideyasu Hirano* 568

Purification and Partial Characterization of a Heat-Resistant, Cytosolic Neuropeptidase from Rat Liver *Roman M. Janas, David L. Marks, and Nicholas F. LaRusso* 574

Topoisomerase II-Independent Doxorubicin-Induced Cytotoxicity in an Extremely Doxorubicin-Resistant Cell Line *James A. Bonner and Vichaivood Liengswangwong* 582

Cell Type and Stimulus Specific Regulation of Chemokine Gene Expression *Yoshihiro Ohmori and Thomas A. Hamilton* 590

Gene Organization and 5′-Flanking Region Sequence of Conglutinin: A C-Type Mammalian Lectin Containing a Collagen-like Domain *Nobuko Kawasaki, Nobuyuki Itoh, and Toshisuke Kawasaki* 597

All Five Cloned Human Somatostatin Receptors (hSSTRl–5) Are Functionally Coupled to Adenylyl Cyclase *Y. C. Patel, M. T. Greenwood, A. Warszynska, R. Panetta, and C. B. Srikant* 605

Eclosion Hormone-Mediated Signal Transduction in the Silkworm Abdominal Ganglia: Involvement of a Cascade from Inositol(1,4,5)trisphosphate to Cyclic GMP *Yasuhiko Shibanaka, Hideaki Hayashi, Ichiro Umemura, Yuko Fujisawa, Megumi Okamoto, Michihiro Takai, and Norihisa Fujita* 613

Chemical Synthesis and Structure–Function Studies of Margatoxin, a Potent Inhibitor of Voltage-Dependent Potassium Channel in Human T Lymphocytes *Maria A. Bednarek, Randal M. Bugianesi, Reid J. Leonard, and John P. Felix* 619

Functional Coupling of Human Adenosine Receptors to a Ligand-Dependent Reporter Gene System *Maria J. Castafñión and Walter Spevak* 626

Identification of a Nonsense Mutation in ALD Protein cDNA from a Patient with Adrenoleukodystrophy *Atsushi Uchiyama, Yasuyuki Suzuki, Xiang-Qian Song, Toshiyuki Fukao, Atsushi Imamura, Shunji Tomatsu, Nobuyuki Shimozawa, Naomi Kondo, and Tadao Orii* 632

The Putative Rat Choline Transporter CHOTI Transports Creatine and Is Highly Expressed in Neural and Muscle-Rich Tissues *Patrick Schloss, Wolfgang Mayser, and Heinrich Betz* 637

Structure–Function Relationship in the Serotransferrin: The Role of the pH on the Conformational Change and the Metal Ions Release *A. Congiu Castellano, M. Barteri, M. Castagnola, A. Bianconi, E. Borghi, and S. Della Longa* 646

CCAAT/Enhancer Binding Proteins α and β Are Transcriptional Activators of the Brown Fat Uncoupling Protein Gene Promoter *Pilar Yubero, Charles Manchado, Anne-Marie Cassard-Doulcier, Teresa Mampel, Octavi Viñas, Roser Iglesias, Marta Giralt, and Francesc Villarroya* 653

Oligomeric Casein Kinase II Isoforms Are Expressed in Bovine Tissues and Adrenocortical Cells in Culture *Odile Filhol, Claude Cochet, Pétra Loue-Mackenbach, and Edmond M. Chambaz* 660

A Variant mRNA Species Encoding a Truncated Form of Fas Antigen in the Rat Liver *Kotohiko Kimura, Toru Wakatsuki, and Mikio Yamamoto* 666

X-Ray Crystal Structure of Cross-Linked Subtilisin Carlsberg in Water vs Acetonitrile *Paul A. Fitzpatrick, Dagmar Ringe, and Alexander M. Klibanov* 675

The Exon–Intron Structure and Chromosomal Localization of the Mouse Macrophage Mannose Receptor Gene *Mrcl*: Identification of a Ricin-like Domain at the N-Terminus of the Receptor *Neil Harris, Luanne L. Peters, Eva M. Eicher, Miriam Rits, Dara Raspberry, Quentin G. Eichbaum, Michael Super, and R. Alan B. Ezekowitz* 682

Localization of Osteogenic Protein-1 (Bone Morphogenetic Protein-7) during Human Embryonic Development: High Affinity Binding to Basement Membranes *Slobodan Vukicevic, Visnja Latin, Ping Chen, Roberta Batorsky, A. H. Reddi, and T. Kuber Sampath* 693

The Ryanodine Receptor from Canine Heart Sarcoplasmic Reticulum Is Associated with a Novel FK-506 Binding Protein *Anthony P. Timerman, Thottala Jayaraman, Greg Wiederrecht, Hitoshi Onoue, Andrew R. Marks, and Sidney Fleischer* 701

Identification of a New Adult Human Liver Sulfotransferase with Specificity for Endogenous and Xenobiotic Estrogens *Kathleen J. Forbes-Bamforth and Michael W. H. Coughtrie* 707

Aromatic Stacking and Bending of the DNA Helix by the Individual Repeat Units of the Carboxy-Terminal Domain of RNA Polymerase II *Xiaofen Huang, Daniel F. Shullenberger, and Eric C. Long* 712

Erythroid Differentiation-Inducing Activity of Protoporphyrin IX and Its Analogs on Human Leukemia K562 Cell Line *Osamu Nakajima, Yuichi Hashimoto, and Shigeo Iwasaki* 720

Caffeine Inhibits Agonists-Induced Cytoplasmic Ca^{2+} Oscillations in Single Rat Hepatocytes *Antonio Sanchez-Bueno, Isabel Marrero, and Peter H. Cobbold* 728

Receptors Specific for Amadori-Modified Glycated Albumin on Murine Endothelial Cells *Van-Yu Wu and Margo Panush Cohen* 734

Parathyroid Hormone-Related Protein Is Produced by Cultured Endothelial Cells: A Possible Role in Angiogenesis *Edith Rian, Rune Jemtland, Ole Kr. Olstad, Marit J. Endresen, William A. Grasser, Mark A. Thiede, Tore Henriksen, Elisabet Bucht, and Kaare M. Gautvik* 740

The *Drosophila melanogaster* Homolog of Ribosomal Protein L27a *Jeremy Garwood and Jean-Antoine Lepesant* 748

Molecular Cloning and DNA Sequence of Rat Amelogenin and a Comparative Analysis of Mammalian Amelogenin Protein Sequence Divergence *W. A. Bonass, P. A. Robinson, J. Kirkham, R. C. Shore, and C. Robinson* 755

Fenofibric Acid Modulates the Human Apolipoprotein A-IV Gene Expression in HepG2 Cells *S. Bovard-Houppermans, A. Ochoa, J. C. Fruchart, and M. M. Zakin* 764

UV Induction of Excision Repair Enzymes Detected in Protein Extracts from *Schizosaccharomyces pombe* *Jean-Philippe Jaeg, Khalil Bouayadi, Patrick Calsou, and Bernard Salles* 770

Differential Subcellular Localization of Two Isoforms of p70 S6 Protein Kinase *Paul J. Coffer and James R. Woodgett* 780

Proteolytic Processing of Farnesylated Peptides: Assay and Partial Purification from Pig Brain Membranes of an Endopeptidase Which Has the Characteristics of EC 3.4.24.15 *T. N. Akopyan, Y. Couedel, M. Orlowski, M.-C. Fournie-Zaluski, and B. P. Roques* 787

New Cytochrome P450-Dependent Reactions from Wheat: Terminal and Subterminal Hydroxylation of Oleic Acid by Microsomes from Naphthalic Acid Anhydride and Phenobarbital-Induced Wheat Seedlings *Franck Pinot, Carole Alayrac, Charles Mioskowski, Francis Durst, and Jean-Pierre Salaün* 795

Identification of a P-Glycoprotein-Related Protein (Mini-P-Glycoprotein) Which Is Overexpressed in Multidrug Resistant Cells *Kazuo Kawai, Itsuo Kusano, Masaru Ido, Minoru Sakurai, Taizo Shiraishi, and Ryuichi Yatani* 804

The *Dbl* Oncogene Product as a GDP/GTP Exchange Protein for the *Rho* Family: Its Properties in Comparison with Those of *Smg* GDS *Hideaki Yaku, Takuya Sasaki, and Yoshimi Takai* 811

Volume 198, Number 3, February 15, 1994

Molecular Cloning of the Rat Complement-Regulatory Protein, 5I2 Antigen *Chikai Sakurada, Hachiro Seno, Natsuki Dohi, Hisao Takizawa, Masaru Nonaka, Noriko Okada, and Hidechika Okada* 819

The Growth Regulation of Neurofibroma Cells in Neurofibromatosis Type-1: Increased Responses to PDGF-BB and TGF-βl *Takafumi Kadono, Yosinao Soma, Kazuhiko Takehara, Hidemi Nakagawa, Yasumasa Ishibashi, and Kanako Kikuchi* 827

Inducible Nitric Oxide Synthase Is Increased in Murine Lung Epithelial Cells by Cytokine Stimulation *R. A. Robbins, D. R. Springall, J. B. Warren, O. J. Kwon, L. D. K. Buttery, A. J. Wilson, I. M. Adcock, V. Riveros-Moreno, S. Moncada, J. Polak, and P. J. Barnes* 835

Okazaki DNA Fragments Contain Equal Amounts of Lagging-Strand and Leading-Strand Sequences *Tzu-Chien V. Wang and Sheau-Hu Chen* 844

Isolation of a Putative Hydroxyacyl Enzyme Intermediate of an Epoxide Hydrolase *Bruce D. Hammock, Franck Pinot, Jeffery K. Beetham, David F. Grant, Michael E. Arand, and Franz Oesch* 850

IFN-γ Induces IL-12 mRNA Expression by a Murine Macrophage Cell Line, J774 *A. Yoshida, Y. Koide, M. Uchijima, and T. O. Yoshida* 857

Protein-Binding DNA Regions inside and in the Vicinity of the Cytochrome P450bm-3 Gene from *Bacillus megaterium* *E. K. Gaidamakova, V. A. Karginov, and S. P. Kovalenko* 862

Cytosol Treated with GTPγS Disintegrates Lysosomes *in Vitro* *Yoshimichi Sai, Kunizo Arai, and Shoji Ohkuma* 869

Group II Phospholipase A_2 in Invasive Gastric Cancer Cell Line Is Induced by Interleukin 6 *Shin-ichi Yamashita, Michio Ogawa, Toshihiko Abe, Jun-ichi Yamashita, Kiyoshi Sakamoto, Hitoshi Niwa, and Ken-ichi Yamamura* 878

Two Subunits of *Eco*RII Restriction Endonuclease Interact with Two DNA Recognition Sites *Olga V. Petrauskene, Elisavetta A. Karpova, Elisavetta S. Gromova, and Wilhelm Guschlbauer* 885

Expression of Nerve Growth Factor Family Neurotrophins in a Mouse Osteoblastic Cell Line *Tohru Nakanishi, Kojiro Takahashi, Chiharu Aoki, Kiyoshi Nishikawa, Takako Hattori, and Shigehiko Taniguchi* 891

Design and Synthesis of Two New Peptide Substrates for the Specific and Sensitive Monitoring of Casein Kinases 1 and 2 *Oriano Marin, Flavio Meggio, and Lorenzo A. Pinna* 898

G_{12} and G_{13} α-Subunits Are Immunochemically Detectable in Most Membranes of Various Mammalian Cells and Tissues *Karsten Spicher, Frank Kalkbrenner, Andrea Zobel, Rainer Harhammer, Bernd Nürnberg, Ariane Söling, and Günter Schultz* 906

Oxidative Stress Transforms Acetylcholinesterase to a Molten Globule-like State *Lev Weiner, David Kreimer, Esther Roth, and Israel Silman* 915

Glucose Transporters (GLUT 1, 2, and 4) in Fat, Muscle, and Liver in a Rat Model of Endotoxic Shock *W. Patrick Zeller, Masakatsu Goto, Jennifer Parker, Joseph R. Cava, Michael E. Gottschalk, James P. Filkins, and Cecilia Hofmann* 923

Evidence for a Nicotinamide Nucleotide Transhydrogenase in *Klebsiella pneumoniae* *U. Fristedt, J. Rydström, and B. Persson* 928

Selective Opioid Dipeptides *P. A. Temussi, S. Salvadori, P. Amodeo, C. Bianchi, R. Guerrini, R. Tomatis, L. H. Lazarus, D. Picone, and T. Tancredi* 933

Altered Protoxin Activation by Midgut Enzymes from a *Bacillus thuringiensis*-Resistant Strain of *Plodia interpunctella* *Brenda Oppert, Karl J. Kramer, Donovan E. Johnson, Susan C. MacIntosh, and William H. McGaughey* 940

Thyroid Peroxidase Expression and DNA Polymorphisms in Thyroid Cancer *Patricia A. Smanik, Linda J. Fithian, and Sissy M. Jhiang* 948

Expression of Prostaglandin-Endoperoxide Synthase 1 and Prostaglandin-Endoperoxide Synthase 2 in Human Osteoblasts *Artur J. de Brum-Fernandes, Stéphane Laporte, Martin Heroux, Maximilien Lora, Caroline Patry, Henri-André Ménard, Réjean Dumais, and Richard Leduc* 955

Identification of Methionine 134 and Alanine 146 in the Second Transmembrane Segment of the Human Tachykinin NK_3 Receptor as Residues Involved in Species-Selective Binding to SR 48968 *Lan-Hsin Wu, Marsha A. Vartanian, Dale L. Oxender, and Fu-Zon Chung* 961

The Nonpeptide Tachykinin NK_2 Receptor Antagonist SR 48968 Interacts with Human, but Not Rat, Cloned Tachykinin NK_3 Receptors *Fu-Zon Chung, Lan-Hsin Wu, Marsha A. Vartanian, Keith J. Watling, Steven Guard, Geoffrey N. Woodruff, and Dale L. Oxender* 967

Characterization of the Ras-Related Rap2A Protein Expressed in the Baculovirus–Insect Cell System: Processing of the Protein in Insect Cells and Comparison with the Bacterially Produced Unprocessed Form *Evdokia Pasheva, Isabelle Janoueix-Lerosey, Armand Tavitian, and Jean de Gunzburg* 973

An Endothelial Cell-Surface Form of Annexin II Binds Human Cytomegalovirus *J. Fraser Wright, Alexander Kurosky, and Safia Wasi* 983

Cloning of a Complete Protein-Coding Sequence of Human Platelet-Type Phosphofructokinase Isozyme from Pancreatic Islet *Kazuhiro Eto, Hiroshi Sakura, Kazuki Yasuda, Takaki Hayakawa, Eiji Kawasaki, Ryozo Moriuchi, Shigenobu Nagataki, Yoshio Yazaki, and Takashi Kadowaki* 990

Cloning and Expression of the EP3 Subtype of Human Receptors for Prostaglandin E_2 *Jinhong Yang, Menghang Xia, Edward J. Goetzl, and Songzhu Arn* 999

Synthesis and Spectral Characterization of 5′-Phosphopyridoxyl-DL-7-azatryptophan, a Photophysical Probe of Protein Structure and Dynamics *A. V. Smirnov, R. L. Rich, and J. W. Petrich* 1007

Identification of Differentially Expressed Members of Tobacco Homeobox Families by Differential PCR *Xin-Hua Feng and Shain-Dow Kung* 1012

Mapping of a Transcription Element Critical for Expression of the Fibroblast Growth Factor Receptor 1 Gene *Hiroshi Saito, Haruhiko Kouhara, Tasuku Harada, Seigou Miyake, Haruo Sugiyama, Tadamitsu Kishimoto, and Bunzo Sato* 1020

Gene Structure, Polymorphism, and Mapping of the Human Endothelial Nitric Oxide Synthase Gene *Sophie Nadaud, Alain Bonnardeaux, Mark Lathrop, and Florent Soubrier* 1027

Stimulatory Effect of Angiotensin II on the Proliferation of Mouse Spleen Lymphocytes *in Vitro* Is Mediated via Both Types of Angiotensin II Receptors *Jolanta Kunert-Radek, Henryk Stępián, Jan Komorowski, and Marek Pawlikowski* 1034

Rhodopsin's Secondary Structure Revisited: Assignment of Structural Elements *Arthur M. A. Pistorius and Willem J. de Grip* 1040

Cell Adhesion Activity of a 30-kDa Major Secreted Protein from Human Bladder Carcinoma Cells *Kotaro Akaogi, Yukie Okabe, Kayano Funahashi, Yoshino Yoshitake, Katsuzo Nishikawa, Hidetaro Yasumitsu, Makoto Umeda, and Kaoru Miyazaki* 1046

Molecular Cloning of a Mouse Counterpart for Human TGF-β Type I Receptor *Toshifumi Tomoda, Toshiyuki Kudoh, Takafumi Noma, Atsushi Nakazawa, Masa-aki Muramatsu, and Ken-ichi Arai* 1054

A Mouse TGF- βType I Receptor That Requires Type II Receptor for Ligand Binding *Atsushi Suzuki, Noriko Shioda, Toshihiko Maeda, Masazumi Tada, and Naoto Ueno* 1063

Inhibition of the DNA Unwinding and ATP Hydrolysis Activities of the Bacteriophage T4 DDA Helicase by a Sequence-Specific DNA-Protein Complex *Ira P. Maine and Thomas Kodadek* 1070

A Possible Interpretation for a Wide Range of Resting Membrane Potentials in Human Term Placental Cells *TatsuoYamamoto* 1078

Nucleotide Sequence and Expression of a Gentamicin Resistance Gene Isolated from the R Plasmid in *Serratia marcescens* *Jae Sung Jung, Tae Chin Cheong, Myung Sun Cho, Yung Chil Hah, and Jae Hoon Chung* 1084

Purification and Characterization of a 100-kDa Glycyrrhizin (GL)-Binding Protein (gp 100) as an Effective Phosphate Acceptor for CK-II and the Effect of GL on the Phosphorylation of gpl00 by CK-II *in Vitro* *Kenzo Ohtsuki, Masamichi Oh-Ishi, Atsushi Karino, Motoki Kanekatsu, and Fazel Shamsa* 1090

Cloning of cDNAs for Fructose 6-Phosphate 2-Kinase/Fructose 2,6-Bisphosphatase from Frog Skeletal Muscle and Liver, and Their Expression in Skeletal Muscle *Akiko Sakai, Fusao Watanabe, and Eisuke Furuya* 1099

Feeding Conjugated Linoleic Acid to Animals Partially Overcomes Catabolic Responses Due to Endotoxin Injection *C. C. Miller, Y. Park, M. W. Pariza, and M. E. Cook* 1107

Molecular Cloning and Functional Expression of a Human Peroxisomal Acyl-Coenzyme A Oxidase *Toshifumi Aoyama, Kenji Tsushima, Masayoshi Souri, Takehiko Kamijo, Yasuyuki Suzuki, Nobuyuki Shimozawa, Tadao Orii, and Takashi Hashimoto* 1113

Human Liver Thermolabile Phenol Sulfotransferase: cDNA Cloning, Expression, and Characterization *Thomas C. Wood, Ibrahim A. Aksoy, Saime Aksoy, and Richard M. Weinshilboum* 1119

On the Specificity of a Bacteriophage-Borne Endoglycanase for the Native Capsular Polysaccharide Produced by *Klebsiellapneumoniae* SKI and Its Derived Polymers *Paola Cescutti and Sergio Paoletti* 1128

Identification of Two Rh mRNA Isoforms Expressed in Immature Erythroblasts *Fuminori Umenishi, Eiji Kajii, and Shigenori Ikemoto* 1135

BR140, a Novel Zinc-Finger Protein with Homology to the TAF250 Subunit of TFIID *Katie A. Thompson, Bingcheng Wang, W. Scott Argraves, Filippo G. Giancotti, David P. Schranck, and Erkki Ruoslahti* 1143

Novel Exon I of the Aromatase Gene Specific for Aromatase Transcripts in Human Brain *Shin-ichiro Honda, Nobuhiro Harada, and Yasuyuki Takagi* 1153

Purification and Characterization of Hepatocyte Growth Factor (HGF)-Converting Enzyme: Activation of Pro-HGF *Kensaku Mizuno, Yoshiaki Tanoue, Ichiro Okano, Tomoyuki Harano, Katsumi Takada, and Toshikazu Nakamura* 1161

Cloning and Nucleotide Sequence of a cDNA of the Human Erythrocyte NADPH-Flavin Reductase *Keiko Chikuba, Toshitsugu Yubisui, Komei Shirabe, and Masazumi Takeshita* 1170

Detection of C-Type Natriuretic Peptide (CNP) in Human Circulation and Marked Increase of Plasma CNP Level in Septic Shock Patients *Norio Hama, Hiroshi Itoh, Gotaro Shirakami, Shin-ichi Suga, Yasato Komatsu, Takaaki Yoshimasa, Issei Tanaka, Kenjiro Mori, and Kazuwa Nakao* 1177

Potentiation of Glucocorticoid-Mediated Induction of the Mouse Mammary Tumor Virus Promoter in Mammary Carcinoma Cells by Activation of Protein Kinase C *Steven K. Nordeen* 1183

Enhanced Expression of pS3 mRNA and Protein in the Regressing Rat Ventral Prostate Gland *Xuejun Zhang, Marc Colombel, Anthony Raffo, and Ralph Buttyan* 1189

Localization of the Histamine H_2 Receptor and Gene Transcripts in Rat Stomach: Back to Parietal Cells *Jorge Diaz, Maria-Luisa Vizuete, Elisabeth Traiffort, Jean-Michel Arrang, Martial Ruat, and Jean-Charles Schwartz* 1195

Mutagenesis of the Nuclear Localization Sequence in FGF-1 Alters Protein Stability but Not Mitogenic Activity *Stanley Friedman, Xi Zhan, and Thomas Maciag* 1203

Differential, LFA-1-Sensitive Effects of Antibodies to Nectadrin, the Heat-Stable Antigen, on B Lymphoblast Aggregation and Signal Transduction *Guni Kadmon, Friedrich von Bohlen und Halbach, Melitta Schachner, and Peter Altevogt* 1209

The Small GTP-Binding Protein rac Is Not Recruited to the Plasma Membrane upon NADPH Oxidase Activation in Human Neutrophils *Véronique Le Cabec, Heidi Möhn, Gérard Gacon, and Isabelle Maridonneau-Parini* 1216

Insulin-like Growth Factors (IGFs) and IGF Binding Protein 3 Display Disulfide Isomerase Activity *Joost A. Koedam and Jan Leo van den Brande* 1225

A New Meiotic Protein Factor Which Enhances Activity of Meiotic DNA Polymerase from *Coprinus cinereus* *Keiko Gomi and Kengo Sakaguchi* 1232

Generation of Selenium-Containing Abzyme by Using Chemical Mutation *Gui-min Luo, Zhen-qi Zhu, Lan Ding, Gui Gao, Qi-an Sun, Zhi Liu, Tong-shu Yang, and Jia-cong Shen* 1240

Antisense RNA to the First N-Glycosylation Gene, ALG7, Inhibits Protein N-Glycosylation and Secretion by *Xenopus* Oocytes *M. A. Kukuruzinska, V. Apekin, M. S. Lamkin, A. Hiltz, A. Rodriguez, C. C. Lin, M. A. Paz, and F. G. Oppenheim* 1248

Kinetic Properties of Ash/Grb2-Interacting GDP/GTP Exchange Protein *Hiroyuki Nakanishi, Satoshi Orita, Kozo Kaibuchi, Kenji Miura, Hiroaki Miki, Tadaomi Takenawa, and Yoshimi Takai* 1255

Isolation and Characterization of a 36-kDa Microfibril-Associated Glycoprotein by the Newly Synthesized Isoquinolinesulfonamide Affinity Chromatography *Ryoji Kobayashi, Akihiro Mizutani, and Hiroyoshi Hidaka* 1262

Biologically Active BMP-2 in Early *Xenopus laevis* Embryos *Akihito Shoda, Kazuo Murakami, and Naoto Ueno* 1267

Purification, Characterization, and Partial Sequence Analysis of a New 25-kDa Actin-Binding Protein from Bovine Aorta: An SM22 Homolog *Ryoji Kobayashi, Tetsuo Kubota, and Hiroyoshi Hidaka* 1275

Proliferative Effect of Parathyroid Hormone-Related Protein on the Hypercalcemic Walker 256 Carcinoma Cell Line *Javier Benítez-Verguizas and Pedro Esbrit* 1281

ERRATUM

Volume 196, Number 2, October 29, 1993: L. Shannon Holliday, Michael R. Bubb, and Edward D. Korn, "Rabbit Skeletal Muscle Actin Behaves Differently Than *Acanthamoeba* Actin When Added to Soluble Extracts of *Acanthamoeba castellanii*," pp. 569–575 1290

Author Index for Volume 198 1291

Volume 199, Number 1, February 28, 1994

The *Streptococcus pyogenes* Hyaluronan Synthase: Sequence Comparison and Conservation among Various Group A Strains *Paul L. DeAngelis, Ning Yang, and Paul H. Weigel* 1

Segmental Differentiation of Permeability, Protein Glycosylation, and Morphology of Cultured Bovine Lung Vascular Endothelium *Jan E. Schnitzer, Alma Siflinger-Birnboim, Peter J. Del Vecchio, and Asrar B. Malik* 11

Synthetic Macrophage Activating Peptides Derived from the N-Terminus of Human MCF *C. Michael Jones, Carlos J. Reyes, Richard G. Cook, George A. Krudy, and Paul R. Rosevear* 20

Molecular Cloning and Characterization of G-CSF-Induced Gene cDNA *Miyuki Shimane, Kenzaburo Tani, Kazuo Maruyama, Satoshi Takahashi, Keiya Ozawa, and Shigetaka Asano* 26

Import of the Mammalian Cytochrome P450 (scc) Precursor into Plant Mitochondria *V. N. Luzikov, L. A. Novikova, J. Whelan, M. Hugosson, and E. Glaser* 33

Partial Sequence Analysis of the Hepatitis C Viral Genome in Singapore Patients *Ann Siew-Gek Lee, Keng-Yeen Ng, Melissa Kie-Lin Chee, Anantharaman Vathsala, Hui-Lin Choong, Han-Seong Ng, and Chong-Jin Oon* 37

Alcoholysis of ε-Decalactone with Polyethylene Glycol-Modified Lipase in 1,1,1-Trichloroethane *Makoto Furukawa, Yoh Kodera, Takeshi Uemura, Misao Hiroto, Ayako Matsushima, Hideyuki Kuno, Hajime Matsushita, and Yuji Inada* 41

Stimulation of Calf Thymus DNA Polymerase α Activity by Nucleolar Protein B23 *Masaharu Takemura, Naoya Ohta, Yukio Furuichi, Takao Takahashi, Shonen Yoshida, Mark O. J. Olson, and Hayato Umekawa* 46

Isolation and Mapping of a Cosmid Clone Containing the Human NAT 2 Gene *Sabine Franke, Ingrid Klawitz, Eckart Schnakenberg, Birgit Rommel, Wim Van de Ven, Jörn Bullerdiek, and Werner Schloot* 52

Carp Parvalbumin Binds to and Directly Interacts with the Sarcoplasmic Reticulum for Ca^{2+} Translocation *Hideki Ushio and Shugo Watabe* 56

Alteration in Rabbit Brain Endoplasmic Reticulum Ca^{2+} Transport by Free Oxygen Radicals *in Vitro* *Peter Račay, Gabriela Bezáková, Peter Kaplán, Ján Lehotský, and Viera Mézešová* 63

Lymphotoxin Lacks Effects on 75-kDa Receptors in Cytotoxicity on U-937 Cells *Sanju Iwamoto, Isao Shibuya, Ken Takeda, and Minoru Takeda* 70

Adult Human Osteoblast-like Cells Do Not Express Insulin-like Growth Factor-I *Peter Ström, Sverker Ljunghall, and Håkan Melhus* 78

Identification of Natural Killer-Enhancing Factor as a Major Antioxidant in Human Red Blood Cells *Hungyi Shau and Anthony Kim* 83

The Myotonin-Protein Kinase Phosphorylates Tyrosine Residues in Normal Human Skeletal Muscle *Pierre Etongué-Mayer, Robert Faure, Jean-Pierre Bouchard, Marie-Christine Thibault, and Jack Puymirat* 89

Rottlerin, a Novel Protein Kinase Inhibitor *Michael Gschwendt, Hans-Joachim Müller, Kirsten Kielbassa, Regine Zang, Walter Kittstein, Gabriele Rincke, and Friedrich Marks* 93

Dietary Lipids and 5′-Nucleotidase Activity of Rat Cell Plasma Membranes *Alessandra Baracca, Vanni Barzanti, Giorgio Lenaz, and Giancarlo Solaini* 99

cDNA Cloning and Expression of Timothy Grass (*Phleum pratense*) Pollen Profilin in *Escherichia coli*: Comparison with Birch Pollen Profilin *Rudolf Valenta, Tanja Ball, Susanne Vrtala, Michael Duchêne, Dietrich Kraft, and Otto Scheiner* 106

Bovine Seminal Ribonuclease Destabilizes Negatively Charged Membranes *José M. Mancheño, María Gasset, Mercedes Oñaderra, José G. Gavilanes, and Giuseppe D'Alessio* 119

Biochemical and Immunological Characterization of the Acrosome Reaction-Inducing Substance (ARIS) of HFF *W. Miska, P. Fehl, and R. Henkel* 125

The Hybrid Rat Cytochrome P450 Containing the First Five Exons of the CYP11B1 and the Last Four Exons from the CYP11B2 Enzyme Retains 11β-Hydroxylase Activity, but the Alternative Hybrid Is Inactive *Ming-yi Zhou, Celso E. Gomez-Sanchez, Di Xue, and Mark F. Foecking* 130

Rise in Cytosolic Ca^{2+} Abolishes in Preadipose Cells the Expression of Lipoprotein Lipase Stimulated by Growth Hormone *Sylvie Barcellini-Couget, Georges Vassaux, Raymond Negrel, and Gérard Ailhaud* 136

Macrophage Differentiation Marker MyD88 Is a Member of the *Toll*/IL-1 Receptor Family *Dan Hultmark* 144

Effects of N^G-Methyl-L-arginine, N^G-Nitro-L-arginine, and Aminoguanidine on Constitutive and Inducible Nitric Oxide Synthase in Rat Aorta *Ghislaine A. Joly, Mary Ayres, Frank Chelly, and Robert G. Kilbourn* 147

Cell-Free Hemoglobin Reverses the Endotoxin-Mediated Hyporesponsivity of Rat Aortic Rings to α-Adrenergic Agents *Robert G. Kilbourn, Ghislaine Joly, Bob Cashon, Joe DeAngelo, and Joe Bonaventura* 155

Attenuation of the Neurotoxic Effect of Aβ Amyloid Peptide by Apolipoprotein E *J. S. Whitson, M. P. Mims, W. J. Strittmatter, T. Yamaki, J. D. Morrisett, and S. H. Appel* 163

Cloning and Expression of a Human Glutamate Transporter *Hideshi Kawakami, Kohichi Tanaka, Takayashu Nakayama, Ken Inoue, and Shigenobu Nakamura* 171

Selective Inhibition of Collagen Synthesis by Okadaic Acid in Cultured Human Fibroblasts *In-San Kim, Rang-Woon Park, Kun-Young Sohn, and Joon-Seung Jo* 177

Tissue-Specific *trans*-Activation of Renin Gene by Targeted Expression of Adenovirus E1A in Transgenic Mice *Akiyoshi Fukamizu, Masashi Sagara, Fumihiro Sugiyama, Ken-ichi Yagami, and Kazuo Murakami* 183

E2F1, B-MYB, and Selective Members of Cyclin/CDK Subunits Are Targets for Protein Kinase C-Mediated Bimodal Growth Regulation in Vascular Endothelial Cells *Wei Zhou, Noriko Takuwa, Mamoru Kumada, and Yoh Takuwa* 191

Purification and Characterization of Thiol-Specific Antioxidant Protein from Human Red Blood Cell: A New Type of Antioxidant Protein *Yoo-Shick Lim, Mee-Kyung Cha, Chul-Ho Yun, Ha-Kun Kim, Kangwha Kim, and Il-Han Kim* 199

Analysis of NF1 Gene Mutations in Neurofibromatosis Type 1 Patients in Japan *Nobuaki Hatta, Takahiko Horiuchi, and Shigeru Fujita* 207

Extended Kinetic Analysis of Ribonuclease T1 Variants Leads to an Improved Scheme for the Reaction Mechanism *Jan Backmann, Carola C. Doray, Hans-Peter Grunert, Olfert Landt, and Ulrich Hahn* 213

Recombinant Human Leukemia Inhibitory Factor Is Mitogenic for Human Bone-Derived Osteoblast-like Cells *Dean B. Evans, Bruno Gerber, and Jean H. M. Feyen* 220

Single 5-HT$_3$ Receptor-Gated Ion Channel Events Resolved in N1E-115 Mouse Neuroblastoma Cells *Johannes A. van Hooft, André R. Kooyman, Arie Verkerk, Regina G. D. M. van Kleef, and Henk P. M. Vijverberg* 227

The Nitric Oxide Donor, Sodium Nitroprusside, Increased Intranuclear and Cytosolic Free Calcium Concentration in Single PU5-1.8 Cells *S. K. Kong, Y. M. Choy, and C. Y. Lee* 234

The Effect of KN-62, Ca^{2+}/Calmodulin-Dependent Protein Kinase II Inhibitor on Cell Cycle *Hiroyuki Minami, Shigeo Inoue, and Hiroyoshi Hidaka* 241

Chemoenzymic Preparation of a Glycoconjugate Polymer Having a Sialyloligosaccharide: Neu5Acα(2→3)Galβ(1→4)GlcNAc *Shin-Ichiro Nishimura, Kyung Bok Lee, Koji Matsuoka, and Yuan Chuan Lee* 249

Structure of the Mouse Peroxisome Proliferator-Activated Receptor α Gene *K. L. Gearing, A. Crickmore, and J.-Å. Gustafsson* 255

Expression of the *p53* Tumor Suppressor Gene Product Is a Determinant of Chemosensitivity *Russell D. Petty, Ian A. Cree, Lesley A. Sutherland, Elizabeth M. Hunter, David P. Lane, Paul E. Preece, and Peter E. Andreotti* 264

Direct Involvement of cAMP-Dependent Protein Kinase in the Regulation of Alkaline Phosphatase Activity by Parathyroid Hormone (PTH) and PTH-Related Peptide in Osteoblastic UMR-106 Cells *Junichi Kano, Toshitsugu Sugimoto, Masaaki Fukase, and Kazuo Chihara* 271

Regulation of Human Insulin Receptor RNA Splicing in HepG2 Cells: Effects of Glucocorticoid and Low Glucose Concentration *Svante Norgren, Luo-Sheng Li, and Holger Luthman* 277

Site-Directed Mutagenesis of Glutamic Acid 172 to Glutamine Completely Inactivated Human *O*^{6}-Alkylguanine-DNA-alkyltransferase *Joseph A. Rafferty, Julie Tumelty, Milan Škorvaga, Rhoderick H. Elder, Geoffrey P. Margison, and Kenneth T. Douglas* 285

Role of Protein Kinase C Isozymes in Activation of Human Immunodeficiency Virus Type 1 in Chronically Infected Promonocytic Cells: Evidence against a Role of PKCβ1 *Choong H. Kim, Sun J. Lim, Sastry Gollapudi, and Sudhir Gupta* 292

Molecular Cloning and Sequencing of Porcine Somatostatin Receptor 2 *Kazuya Matsumoto, Yutaka Yokogoshi, Yuichi Fujinaka, Chenyu Zhang, and Shiro Saito* 298

Fibrils from Synthetic Amyloid-Related Peptides Enhance Development of Experimental AA-Amyloidosis in Mice *Katarzyna Ganowiak, Per Hultman, Ulla Engström, Åsa Gustavsson, and Per Westermark* 306

Unusual Generation of Hydroxyl Radicals in Hepatic Copper–Metallothionein of LEC (Long–Evans Cinnamon) Rats in the Presence of Hydrogen Peroxide *Hiromu Sakurai, Hiromi Satoh, Akihiko Hatanaka, Takashi Sawada, Kazuya Kawano, Takuroh Hagino, and Katsuyuki Nakajima* 313

A Leukocyte Lipid Up-Regulates the Avidity of Lymphocyte Function-Associated Antigen-1 *Daniel H. S. Lee, J. Philip MacIntyre, Elizabeth Wang, Donna J. Hudson, Armana Ishaque, Jacqueline A. Conant, Barbara L. Pope, and Catherine Y. Lau* 319

Glyburide Enhances Insulin Gene Expression and Glucose-Induced Insulin Release in Isolated Rat Islets *Eiji Yamato, Hiroshi Ikegami, Yasuhiro Tahara, Masahiro Fukuda, Tepyon Cha, Yoshihiko Kawaguchi, Yoshihiko Fujioka, Yoshihiko Noma, Kenji Shima, and Toshio Ogihara* 327

Activation of Macrophage PtdIns-PLC by Phorbol Ester and Vanadate: Involvement of Reactive Oxygen Species and Tyrosine Phosphorylation *Rachel Goldman and Uriel Zor* 334

Apidaecin-Type Peptide Antibiotics Function through a Nonporeforming Mechanism Involving Stereospecificity *Peter Casteels and Paul Tempst* 339

Antioxidants Reverse the Antiproliferative Effect of High Glucose and Advanced Glycosylation End Products in Cultured Rat Mesangial Cells *Howard Trachtman, Stephen Futterweit, Jonathan Prenner, and Samuel Hanon* 346

Binding of [^{3}H] SR 49059, a Potent Nonpeptide Vasopressin V_{1a} Antagonist, to Rat and Human Liver Membranes *Claudine Serradeil-Le Gal, Danielle Raufaste, Eleonore Marty, Corinne Garcia, Jean-Pierre Maffrand, and Gerard Le Fur* 353

The Short-Chain Homologue of Dihydrolipoic Acid, Tetranordihydrolipoate, Protects against Iron-Induced Lipid Peroxidation in the Aqueous Phase *Teruyuki Kawabata, Soon-Chee Yap, and Lester Packer* 361

Conversion to Ca^{2+}-Independent Form of Ca^{2+}/Calmodulin Protein Kinase II in Rat Pancreatic Acini *Rui-Dong Duan, Yi-Jun Guo, and John A. Williams* 368

Vinblastine-Dependent Down-Modulation of TNF Receptors in Human Osteosarcoma Cells Is Mediated by Protein Kinase C Activity *Daniel Boscoboinik, Tommaso Galeotti, and Angelo Azzi* 374

Vasculotropin/Vascular Endothelial Growth Factor Induces Differentiation in Cultured Osteoblasts *Véronique Midy and Jean Plouët* 380

Isolation and Characterization of a Novel Ribosome-Inactivating Protein, β-Kirilowin, from the Seeds of *Trichosanthes kirilowii* *T. X. Dong, T. B. Ng, H. W. Yeung, and R. N. S. Wong* 387

A Long-Lasting Vitamin C Derivative, Ascorbic Acid 2-Phosphate, Increases Myogenin Gene Expression and Promotes Differentiation in L6 Muscle Cells *Yasuhide Mitsumoto, Zhi Liu, and Amira Klip* 394

Ethanol Impairs Insulin Receptor Substrate-1-Mediated Signal Transduction during Rat Liver Regeneration *Yutaka Sasaki and Jack R. Wands* 403

Molecular Cloning and Sequence Analysis of the *proC* Gene Encoding Δ^1-Pyrroline-5-carboxylate Reductase from an Extremely Thermophilic Eubacterium *Thermus thermophilus* *Takayuki Hoshino, Takehide Kosuge, Yuki Hidaka, Kazuyuki Tabata, and Tadaatsu Nakahara* 410

Production of Matrix Metalloproteinases and a Metalloproteinase Inhibitor by Swarm Rat Chondrosarcoma *Marsha A. Moses and Yuen Shing* 418

Volume 199, Number 2, March 15, 1994

Complete 5′ Noncoding Region Is Necessary for the Efficient Internal Initiation of Hepatitis C Virus RNA *Shuetsu Fukushi, Kazuhiko Katayama, Chie Kurihara, Narihiro Ishiyama, Fuminori B. Hoshino, Takao Ando, and Akira Oya* 425

Efficient Encapsulation of Proteins within Liposomes for Slow Release *in Vivo* *James Meyer, Lane Whitcomb, and David Collins* 433

Characterization of NF(P), the Nuclear Factor That Interacts with the Regulatory P Sequence (5′-CGAAAATTTCC-3′) of the Human Interleukin-4 Gene: Relationship to NF-κB and NF-AT *Ikuo Matsuda, Esteban S. Masuda, Akio Tsuboi, Shaida Behnam, Naoko Arai, and Ken-ichi Arai* 439

Effects of Nitric Oxide on Red Blood Cells: Changes in Erythrocyte Resistance to Hypotonic Hemolysis and Potassium Efflux by Experimental Maneuvers That Decrease Nitric Oxide *C. Caramelo, A. Riesco, J. Outeiriño, I. Millás, G. Blum, B. Monzú, V. Casado, L. Sánchez, J. R. Mosquera, S. Casado, and A. López Farré* 447

Enhancement of Phorbol Ester-Induced Production of Tumor Necrosis Factor α by Thalidomide *Koji Nishimura, Yuichi Hashimoto, and Shigeo Iwasaki* 455

The Role of a Phosphatidylcholine-Specific Phospholipase C in the Production of Diacylglycerol for Nitric Oxide Synthesis in Macrophages Activated by IFN-γ and LPS *William A. Sands, James S. Clark, and F. Y. Liew* 461

Novel Subtype of Human Angiotensin II Type I Receptor: cDNA Cloning and Expression *Hiroaki Konishi, Shun'ichi Kuroda, Yoshiyuki Inada, and Yukio Fujisawa* 467

Novel Subtype of Human Angiotensin II Type I Receptor: Analysis of Signal Transduction Mechanism in Transfected Chinese Hamster Ovary Cells *Shun'ichi Kuroda, Hiroaki Konishi, Miki Okishio, and Yukio Fujisawa* 475

Little or No Expression of the Cholecystokinin-A Receptor Gene in the Pancreas of Diabetic Rats (Otsuka Long–Evans Tokushima Fatty=OLETF Rats) *Akihiro Funakoshi, Kyoko Miyasaka, Atsuo Jimi, Takako Kawanai, Yutaka Takata, and Akira Kono* 482

Analysis of Amino Acid Substitution during Divergent Evolution: The 400 by 400 Dipeptide Substitution Matrix *Gaston H. Gonnet, Mark A. Cohen, and Steven A. Benner* 489

Properties of the Catalytic Domain of CDC25, a *Saccharomyces cerevisiae* GDP/GTP Exchange Factor: Comparison of Its Activity of Full-Length and C-Terminal Truncated RAS2 Proteins *Eric Jacquet, Maria Carla Parrini, Alberto Bernardi, Enzo Martegani, and Andrea Parmeggiani* 497

Nitric Oxide Production Depends on Preceding Tetrahydrobiopterin Synthesis by Endothelial Cells: Selective Suppression of Induced Nitric Oxide Production by Sepiapterin Reductase Inhibitors *G. Schoedon, N. Blau, M. Schneemann, G. Flury, and A. Schaffner* 504

A Novel Strategy for the Investigation of Clonality in Precancerous Disease States and Early Stages of Tumor Progression *Mark Sternlicht, Carol Mirell, Suzi Safarians, and Sanford H. Barsky* 511

Peripheral Blood Lymphocytes Display Reduced K^+ Channel Activity in Aged Humans *György Panyi, Géza Berecki, Rezső Gáspár, Ildikó Seres, Tamás Fülöp, and Sándor Damjanovich* 519

Cell Death Protection by 3-Aminobenzamide and Other Poly(ADP-Ribose)polymerase Inhibitors: Different Effects on Human Natural Killer and Lymphokine-Activated Killer Cell Activities *Daniela Monti, Andrea Cossarizza, Stefano Salvioli, Claudio Franceschi, Gabriella Rainaldi, Elisabetta Straface, Roberto Rivabene, and Walter Malorni* 525

Topoisomerase I Inhibition Enhances Vitamin D-Responsive Expression of the Receptor for Lipopolysaccharide Binding Protein CD14 *F. Jakob, J. Seufert, C. Sarrazin, D. Schneider, J. Köhrle, and H. P. Tony* 531

Expression of the Soluble Lectin L-14 Gene Is Induced by TSH in Thyroid Cells and Suppressed by Retinoic Acid in Transformed Neural Cells *L. Chiariotti, G. Benvenuto, P. Salvatore, B. M. Veneziani, G. Villone, A. Fusco, T. Russo, and C. B. Bruni* 540

Immunocytochemical Detection of Parathyroid Hormone-Related Protein in Vascular Endothelial Cells *Michiro Ishikawa, Yasuyoshi Ouchi, Masahiro Akishita, Koichi Kozaki, Kenji Toba, Atsushi Namiki, Tetsu Yamaguchi, and Hajime Orimo* 547

Regulated Expression of Brachyury(T), NKX1.1, and PAX Genes in Embryoid Bodies *G. Yamada, C. Kioussi, F. R. Schubert, Y. Eto, K. Chowdhury, F. Pituello, and P. Gruss* 552

Improvements to the Differential Display Method for Gene Analysis *Lunjun Mou, Harvey Miller, Jing Li, Eugenia Wang, and Lorraine Chalifour* 564

A New Italian Case of Lipoprotein Lipase Deficiency: A $Leu^{365} \rightarrow Val$ Change Resulting in Loss of Enzyme Activity *G. Pepe, G. Chimienti, F. Resta, V. Di Perna, C. Tarricone, M. Lovecchio, A. M. Colacicco, and A. Capurso* 570

Site-Directed Mutagenesis of Two Highly Conserved Residues near the Active Site of Phosphofructo-1-kinase *Rong-Lan Zheng and Robert G. Kemp* 577

Modulation of 12-*O*-Tetradecanoylphorbol-13-Acetate-Induced Epidermal Ornithine Decarboxylase Activity by Calcium and Verapamil in Mouse *Chandradhar Dwivedi, Rebecca K. Baer, and Donnita M. Jarvis* 582

Lysyl Oxidase cDNA of Myofibroblast from Mouse Fibrotic Liver *Claude Jourdan-le Saux, Claudine Gleyzal, Jean-Marie Garnier, Marie Peraldi, Pascal Sommer, and Jean-Alexis Grimaud* 587

Molecular Cloning of Rat Mast Cell Protease 1 and Development of Specific Probes for Its Gene Transcript *Agnès Rouleau, Monique Garbarg, Jean-Charles Schwartz, and Martial Ruat* 593

Internalization of the $\alpha_5\beta_1$ Integrin Does Not Depend on "NPXY" Signals *Lucile Vignoud, Yves Usson, Fiorella Balzac, Guido Tarone, and Marc R. Block* 603

Point Mutations of the Thyrotropin Receptor Determining Structural Requirements for Its Ability to Bind Thyrotropin and to Stimulate Adenylate Cyclase Activity *Bengt Gustavsson, Bengt Westermark, and Nils-Erik Heldin* 612

Cloning and Sequencing of cDNA Coding for *Cry j* I, a Major Allergen of Japanese Cedar Pollen *Toshio Sone, Naoki Komiyama, Kimiko Shimizu, Takahiro Kusakabe, Keiko Morikubo, and Kohsuke Kino* 619

Regions of the Human Neurokinin A Receptor Involved in the Generation of Second Messengers and in Receptor Desensitization *Serene M. Josiah, Curt R. Cyr, Vi Chu, Martin Grumet, Jeffrey P. Gardner, and Richard M. Kris* 626

Involvement of Protein Kinase C in the Inhibition of Nitric Oxide Production from Murine Microglial Cells by Glucocorticoid *Chang-Duk Jun, Hoon-Ryu, Jae-Young Um, Tae-Young Kim, Jong-Moon Kim, Shin-Sung Kang, Hyung-Min Kim, and Hun-Taeg Chung* 633

Rat Heart Fatty Acid-Binding Protein Content Is Increased in Experimental Diabetes *J. F. C. Glatz, E. van Breda, H. A. Keizer, Y. F. de Jong, J. R. T. Lakey, R. V. Rajotte, A. Thompson, G. J. van der Vusse, and G. D. Lopaschuk* 639

Nuclear Translocation of Heat Shock Protein 72 in Liver Cells of Halothane-Exposed Rats *W. Q. Lin, R. A. Van Dyke, H. M. Marsh, and J. R. Trudell* 647

The Role of Individual $Fc\gamma$ Receptors in Aggregated IgG-Stimulated Protein Tyrosine Phosphorylation in the Human Neutrophil *Stéphane Richard, Andrey S. Shaw, Henry J. Showell, and Patricia A. Connelly* 653

Insulin Action on Whole Body Glucose Utilization and on Muscle Glucose Transporter Translocation in Mice *Rhonda O. Deems, Richard W. Deacon, Toolsie Ramlal, Allen Volchuk, Amira Klip, and Douglas A. Young* 662

Whole Blood and Plasma Concentrations of 4-Hydroxy-2-nonenal in Watanabe Heritable Hyperlipidemic versus New Zealand White Rabbits *Michael Kinter, Candy S. Robinson, Lisa C. Grimminger, Peter J. Gillies, Edward J. Shimshick, and Carlos Ayers* 671

Structure–Function Analysis of *Bacillus anthracis* Edema Factor by Using Monoclonal Antibodies *Stephen F. Little, Stephen H. Leppla, Joseph W. Burnett, and Arthur M. Friedlander* 676

The Inhibition of Sugar-Induced Structural Alterations in Collagen by Aspirin and Other Compounds *Nageena S. Malik and Keith M. Meek* 683

cDNA Sequences Encoding Human Fructose 1, 6-Bisphosphatase from Monocytes, Liver, and Kidney: Application of Monocytes to Molecular Analysis of Human Fructose 1, 6-Bisphosphatase Deficiency *Yoshiharu Kikawa, Manabu Inuzuka, Tomoko Takano, Yousuke Shigematsu, Akio Nakai, Yoshiki Yamamoto, Byun Young Jin, Junichi Koga, Akira Taketo, and Masakatsu Sudo* 687

On the Analysis of Bovine Trypsin by Electrospray-Mass Spectrometry *D. S. Ashton, A. E. Ashcroft, C. R. Beddell, D. J. Cooper, B. N. Green, and R. W. A. Oliver* 694

Ca^{2+}-Dependent Activation of Phospholipases C and D from Mouse Peritoneal Macrophages by a Selective Trigger of Ca^{2+} Influx, γ-Hexachlorocyclohexane *Eric Pinelli, Claudie Cambon, Hélène Tronchère, Hugues Chap, Justin Teissié, and Bernard Pipy* 699

A Novel Heparin-Binding Protein, HBp15, Is Identified as Mammalian Ribosomal Protein L22 *Yoshinori Fujita, Tetsuji Okamoto, Mitsuhide Noshiro, Wallace L. McKeehan, John W. Crabb, Ronald G. Whitney, Yukio Kato, J. Denry Sato, and Kazuaki Takada* 706

Effect of Isoquinolinesulfonamides on Heat Shock Gene Expression during Heating at 41°C in Human Carcinoma Cell Lines *Yong J. Lee, Christine M. Berns, Geza Erdos, and Peter M. Corry* 714

Run Down of Calcium Current Is Related to Intracellular Sodium *Xiao-liang Wang, Zheng Hua, and Li-ming Zhang* 720

Inherited Enhancement of Hydroxyl Radical Generation and Lipid Peroxidation in the S Strain Rats Results in DNA Rearrangements, Degenerative Diseases, and Premature Aging *R. I. Salganik, N. A. Solovyova, S. I. Dikalov, O. N. Grishaeva, L. A. Semenova, and A. V. Popovsky* 726

GR Transcripts Are Localized during Early *Xenopus laevis* Embryogenesis and Overexpression of GR Inhibits Differentiation after Dexamethasone Treatment *Xiangming Gao, Brenda I. Stegeman, Peter Lanser, Johanna G. Koster, and Olivier H. J. Destrée* 734

Modulation of the Osteoclast Ca^{2+} Receptor by Extracellular Protons: Possible Linkage between Ca^{2+} Sensing and Extracellular Acidification *Olugbenga A. Adebanjo, Vijai S. Shankar, Michael Pazianas, Ali Zaidi, Bruce Simon, Christopher L.-H. Huang, and Mone Zaidi* 742

A Novel Human Homolog of a Dead-Box RNA Helicase Family *Yoshihiko Kitajima, Hitomi Yatsuki, Rong Zhang, Sachiko Matsuhashi, and Katsuji Hori* 748

Aminoethylcysteine Ketimine Decarboxylated Dimer Inhibits Mitochondrial Respiration by Impairing Electron Transport at Complex I Level *Laura Pecci, Gabriella Montefoschi, Mario Fontana, and Doriano Cavallini* 755

Synergism between Platelet Activating Factor and C- C Chemokines for Arachidonate Release in Human Monocytes *Silvano Sozzani, Monica Rieppi, Massimo Locati, Dan Zhou, Federico Bussolino, Paul Proost, Jo Van Damme, and Alberto Mantovani* 761

Crystallization of Monodisperse Maltoporin from Wild-Type and Mutant Strains of Various Enterobacteriaceae *Thomas A. Keller, Thomas Ferenci, Alexey Prilipov, and Jürg P. Rosenbusch* 767

Identification of Mouse Mammary Fibroblast-Derived Mammary Growth Factor as Hepatocyte Growth Factor *Masato Sasaki, Masahiro Nishio, Tetsuo Sasaki, and Jumpei Enami* 772

Insulin Receptor Kinase Phosphorylates Protein Tyrosine Phosphatase Containing Src Homology 2 Regions and Modulates Its PTPase Activity *in Vitro* *Hiroshi Maegawa, Satoshi Ugi, Masaaki Adachi, Yuji Hinoda, Ryuichi Kikkawa, Akira Yachi, Yukio Shigeta, and Atsunori Kashiwagi* 780

Bundling of Actin Filaments by Myosin Light Chain Kinase from Smooth Muscle *Kohichi Hayakawa, Tsuyoshi Okagaki, Sugie Higashi-Fujime, and Kazuhiro Kohama* 786

Potent Activation of Phospholipase D by Phenylarsine Oxide in Rat Basophilic Leukemia (RBL-2H3) Cells *Takahiko Kumada, Shigeru Nakashima, Hideo Miyata, and Yoshinori Nozawa* 792

Effect of Myosin Light Chain Kinase Inhibitor Wortmannin on the Wound Repair of Cultured Gastric Mucosal Cells *Sumio Watanabe, Xian-En Wang, Miyoko Hirose, and Nobuhiro Sato* 799

Induction of Apoptotic Cell Death in Differentiating Neuroblastoma SH-SYSY Cells by Colchicine *Yuzo Nakagawa-Yagi* 807

Structural Analysis of cDNAs for Subunits of Human Mitochondrial Fatty Acid β-Oxidation Trifunctional Protein *Takehiko Kamijo, Toshifumi Aoyama, Atsushi Komiyama, and Takashi Hashimoto* 818

The Ligand-Binding Site of the Estradiol Receptor Resides in a Noncovalent Complex of Two Consecutive Peptides of 17 and 7 kDa *Hubert H. Thole and Peter W. Jungblut* 826

Two Isoforms of the Rat Kidney EP_3 Receptor Derived by Alternative RNA Splicing: Intrarenal Expression Co-localization *Kazuhisa Takeuchi, Nobuyuki Takahashi, Takaaki Abe, and Keishi Abe* 834

A New Human Slow Skeletal Troponin T (TnTs) mRNA Isoform Derived from Alternative Splicing of a Single Gene *Françoise Samson, Laurence Mesnard, Mirta Mihovilovic, Tamara G. Potter, Jean-Jacques Mercadier, Allen D. Roses, and John R. Gilbert* 841

Two Isoforms of G Protein-Coupled Receptor Kinase 4 Identified by Molecular Cloning *Michele Sallese, Maria Stella Lombardi, and Antonio De Blasi* 848

Increased P-Type ATPase Activity in *Leishmania tropica* Resistant to Methotrexate *A. Sanchez, S. Castanys, and F. Gamarro* 855

Chromosomal Assignment of the Human S_A Gene to 16p13.11 and Demonstration of Its Expression in the Kidney *Nilesh J. Samani, Scott A. Whitmore, Michael A. Kaiser, Janet Harris, Chee G. See, David F. Callen, and David Lodwick* 862

Different Sensitivity of α_2A-C10 and α_2C-C4 Receptor Subtypes in Coupling to Inhibition of cAMP Accumulation *Christian C. Jansson, Juha-Matti Savola, and Karl E. O. Åkerman* 869

Calcitonin Directly Acts on Mouse Osteoblastic MC3T3-E1 Cells to Stimulate mRNA Expression of c-fos, Insulin-like Growth Factor-1, and Osteoblastic Phenotypes (Type 1 Collagen and Osteocalcin) *Tatsuya Kobayashi, Toshitsugu Sugimoto, Kiyofumi Saijoh, Masaaki Fukase, and Kazuo Chihara* 876

Incorporation of Phospholipid Analogs into the Plasma Membrane Affects ATP-Induced Vesiculation of Human Erythrocyte Ghosts *Peter Müller, Thomas Pomorski, and Andreas Herrmann* 881

Sphinganine Potentiation of Dimethyl Sulfoxide-Induced Granulocytic Differentiation, Increase of Alkaline Phosphatase Activity, and Decrease of Protein Kinase C Activity in a Human Leukemia Cell Line (HL-60) *Benjamin Yat-Ming Yung, Te-Fang Hsiao, Lillian Li-Lin Wei, and Eric Ka-Wai Hui* 888

A Novel Protein Kinase with Leucine Zipper-like Sequences: Its Catalytic Domain Is Highly Homologous to That of Protein Kinase C *Hideyuki Mukai and Yoshitaka Ono* 897

Identification of Adenosine A_2 Receptor-cAMP System in Human Aortic Endothelial Cells *Tamio Iwamoto, Satoshi Umemura, Yoshiyuki Toya, Takehiro Uchibori, Kentaro Kogi, Nobuyoshi Takagi, and Masao Ishii* 905

Multiple-Channel Fractal Information Coding of Mammalian Nerve Signals *K. Svozil, D. Felix, and K. Ehrenberger* 911

The Importance of the Hydroxyl Moieties for Inhibition of the Ca^{2+}-ATPase by Trilobolide and 2,5-DI(*TERT*-butyl)-1,4-benzohydroquinone *Matthew Wictome, Miroslav Holub, J. Malcolm East, and Anthony G. Lee* 916

Epidermal Growth Factor and Insulin-like Growth Factor I Differently Influence the Directional Accumulation and Transfer of 2-Aminoisobutyrate (AIB) by Human Placental Trophoblast in Two-Sided Culture *David L. Bloxam, Bridget E. Bax, and Christopher M. R. Bax* 922

Ipriflavone Directly Inhibits Osteoclastic Activity *Carlina V. Albanese, Amelia Cudd, Luigi Argentino, Alberta Zambonin-Zallone, and Iain MacIntyre* 930

The Protein Kinase C Inhibitor Ilmofosine (BM 41 440) Arrests Cells in G2 Phase and Suppresses CDC2 Kinase Activation through a Mechanism Different from That of DNA Damaging Agents *Johann Hofmann, Patrick M. O'Connor, Joany Jackman, Christian Schubert, Florian Ueberall, Kurt W. Kohn, and Hans Grunicke* 937

Activation of the Non-actomyosin Component of Aortic Wall Contraction by Phorbol Ester *Andrey N. Shapovalov and Michail F. Shuba* 944

Anaplerotic Effect of Propionyl Carnitine in Rat Heart Mitochondria *V. Tassani, F. Cattapan, L. Magnanimi, and A. Peschechera* 949

Activation of the Gene for Type-B Natriuretic Factor in Mouse Stem Cell Cultures Induced for Cardiac Myogenesis *Poppo H. Boer* 954

Porcine Luteal Cells Express Monocyte Chemoattractant Protein-1 (MCP-1): Analysis by Polymerase Chain Reaction and cDNA Cloning *K. Hosang, I. Knoke, J. Klaudiny, F. Wempe, W. Wuttke, and K. H. Scheit* 962

Sequence Analysis and Expression of Phospholipase A_2 from Taiwan Cobra *Fu-Ming Pan, Maw-Sheng Yeh, Wen-Chang Chang, Chin-Chun Hung, and Shyh-Horng Chiou* 969

Effect of Erythropoietin on DNA Synthesis, Proto-oncogene Expression, and Phospholipase C Activity in Rat Vascular Smooth Muscle Cells *Jean Gogusev, Ding-Liang Zhu, Thierry Hérembert, Fatima Ammarguellat, Pierre Marche, and Tilman Drueke* 977

Activation of Macrophages by Alzheimer β Amyloid Peptide *Andis Klegeris, Douglas G. Walker, and Patrick L. McGeer* 984

Endothelin-1 Stimulates Cytosolic Phospholipase A_2 in Chinese Hamster Ovary Cells Stably Expressing the Human ET_A or ET_B Receptor Subtype *Herbert Schramek, Yizheng Wang, Martha Konieczkowski, Patricia M. Rose, John R. Sedor, and Michael J. Dunn* 992

Molecular Cloning, Tissue Expression of Human Xanthine Dehydrogenase *Ping Xu, Thomas P. Huecksteadt, Roger Harrison, and John R. Hoidal* 998

Regulation of Alternative Splicing of the Fibronectin IIICS Domain by Cytokines *N. G. McKay, D. J. Hunter, N. E. Haites, and D. A. Power* 1005

Alteration in Expression of MUC2 and MUC3 mRNA Levels in HT29 Colonic Carcinoma Cells *David R. Mack and Michael A. Hollingsworth* 1012

Regulation of Undulin Synthesis and Gene Expression in Human Fat-Storing Cells by Acetaldehyde and Transforming Growth Factor-β1: Comparison with Fibronectin *Alessandro Casini, Elisabetta Ceni, Renata Salzano, Detlef Schuppan, Stefano Milani, Giulia Pellegrini, and Calogero Surrenti* 1019

Induction of Thyrotropin Receptor (TSH-R) Autoantibodies and Thyroiditis in Mice Immunized with the Recombinant TSH-R *S. Costagliola, L. Alcalde, M. Tonacchera, J. Ruf, G. Vassart, and M. Ludgate* 1027

Processing of Interleukin-1β in Synovial Cells Freshly Isolated from Patients with Rheumatoid Arthritis *Yoshiro Kobayashi, Yoshikata Ichijo, Hidemasa Nagatake, Naoko Watanabe, Keiko Nishizawa, and Makoto Goto* 1035

Phosphorylation of NM23/Nucleoside Diphosphate Kinase by Casein Kinase 2 *in Vitro* *Matthias Engel, Olaf-G. Issinger, Ioan Lascu, Thomas Seib, Steven Dooley, Klaus D. Zang, and Cornelius Welter* 1041

Identification of a TGF-β Responsive Element in the Human Elastin Promoter
Valeria Marigo, Dino Volpin, Gaetano Vitale, and Giorgio M. Bressan 1049

Single-Molecule Analysis of the Actomyosin Motor Using Nano-Manipulation
Akihiko Ishijima, Yoshie Harada, Hiroaki Kojima, Takashi Funatsu, Hideo Higuchi, and Toshio Yanagida 1057

Calcineurin Activates Transcription from the GM-CSF Promoter in Synergy with Either Protein Kinase C or NF-κB/AP-1 in T Cells *Akio Tsuboi, Masa-aki Muramatsu, Akito Tsutsumi, Ken-ichi Arai, and Naoko Arai* 1064

SS33410, an Inhibitor for Inflammation, Blocks the Intracellular Transport of VSV G Glycoprotein in BHK Cells *Dae-Hyun Seog, Makari Yamasaki, and Akira Takatsuki* 1073

Asymmetrical Lipid Charge Changes the Subconducting State of the Potassium Channel from Sarcoplasmic Reticulum *Kazunori Anzai, Chika Takano, Keiko Tanaka, and Yutaka Kirino* 1081

ERRATA

Volume 198, Number 1, January 14, 1994: Nobuyuki Ito, Sumio Kawata, Shinji Tamura, Shinichi Kiso, Humihiro Tsushima, Deborah Damm, Judith A. Abraham, Shigeki Higashiyama, Naoyuki Taniguchi, and Yuji Matsuzawa, "Heparin-Binding EGF-like Growth Factor Is a Potent Mitogen for Rat Hepatocytes," pp. 25–31 1088

Volume 198, Number 2, January 28, 1994: Van-Yu Wu and Margo Panush Cohen, "Receptors Specific for Amadori-Modified Glycated Albumin on Murine Endothelial Cells," pp. 734–739 1088

Volume 199, Number 3, March 30, 1994

Calcium-Dependent Proteinase Activity in Root Cultures of *Arabidopsis*
A. S. N. Reddy, F. Safadi, Jill R. Beyette, and Donald L. Mykles 1089

Cloning and Sequencing of Phenylethylamine Oxidase from *Arthrobacter globiformis,* and Implication of Tyr-382 as the Precursor to Its Covalently Bound Quinone Cofactor *Katsuyuki Tanizawa, Ryuichi Matsuzaki, Eiichi Shimizu, Takamitsu Yorifuji, and Toshio Fukui* 1096

Corticotropin-Releasing Factor Stimulates Ca^{2+} Influx in Cultured Rat Astrocytes
Kazuhiro Takuma, Toshio Matsuda, Takashi Yoshikawa, Jun-ichi Kitanaka, Masayuki Gotoh, Kenji Hayata, and Akemichi Baba 1103

Preparation of a Subtractive cDNA Library Enriched in cDNAs Which Expressed at a High Level in Cultured Senescent Human Fibroblasts *Hidetoshi Tahara, Eiji Hara, Naohiro Tsuyama, Kinichiro Oda, and Toshinori Ide* 1108

Expression of Fibroblast Growth Factor Gene Family and Its Receptor Gene Family in the Human Upper Gastrointestinal Tract *Shinya Iida, Osamu Katoh, Akira Tokunaga, and Masaaki Terada* 1113

Regulation of Calcium Channel in Sarcoplasmic Reticulum by Calsequestrin
Takashi Kawasaki and Michiki Kasai 1120

IP_3-Activated Calcium-Permeable Channels in the Inside Out Patches of Cultured Cerebellar Purkinje Cells *Miyuki Kuno, Nobuaki Maeda, and Katsuhiko Mikoshiba* 1128

Molecular Cloning and the Functional Expression of Two Isoforms of Human Metabotropic Glutamate Receptor Subtype S *Reiko Minakami, Fujika Katsuki, Tomoyoshi Yamamoto, Koji Nakamura, and Hiroyuki Sugiyama* 1136

Structure and Expression of Two Plant Genes Encoding Chromoplast-Specific Proteins: Occurrence of Partially Spliced Transcripts *J. Deruère, F. Bouvier, J. Steppuhn, A. Klein, B. Camara, and M. Kuntz* 1144

Insulin and Lipogenesis in Rat Adipocytes. II. Effect of High Levels of Insulin and Glucose on Lipid Synthesis in Isolated Rat Adipocytes *Luz Marina Morales, Gilberto Campos, Elena Ryder, and Angel Casanova* 1151

Effects of Sialic Acid and Sialoglycoconjugates on Cytosolic Phospholipases A_2 from Bovine Brain *Hsiu-Chiung Yang, Akhlaq A. Farooqui, and Lloyd A. Horrocks* 1158

2-Aminopurine Overrides a Late Telophase Delay Created by Ectopic Expression of the PITSLREβ1 Protein Kinase *Jialing Xiang, Jill M Lahti, and Vincent J. Kidd* 1167

A Soluble Neurite Outgrowth Molecule in Bovine Brain *Noriaki Ishioka, Junko Sato, and Susumu Kurioka* 1174

Mycobacterium tuberculosis Induces Expression of P-Glycoprotein in Promonocytic U1 Cells Chronically Infected with HIV Type 1 *Sastry Gollapudi, Muniswamy Reddy, Pattisapu Gangadharam, Takashi Tsuruo, and Sudhir Gupta* 1181

Role of Plasma Membrane Ganglioside Sialidase of Human Neuroblastoma Cells in Growth Control and Differentiation *Jürgen Kopitz, Carolina von Reitzenstein, Claudia Mühl, and Michael Cantz* 1188

Detection of *Choristoneura fumiferana* Brush Border Membrane-Binding Molecules Specific to *Bacillus thuringiensis* δ-Endotoxin by Crossed Affinity Immunoelectrophoresis *Anthony S. D. Pang* 1194

A Neural Protein Associated with Paraneoplastic Neurologic Syndrome and Small Cell Lung Carcinoma Derived from the Hippocampus *Koichiro Sakai, Mika Gofuku, Yoko Kitagawa, Tomoko Ogasawara, Masashi Yamasaki, Chang-Sung Koh, Nobuo Yanagisawa, and Genjiro Hirose* 1200

Inhibition of Isoprenoid Biosynthesis Induces Apoptosis in Human Promyelocytic HL-60 Cells *Dolores Pérez-Sala and Faustino Mollinedo* 1209

Protein Kinase C Is Crucial for the Stimulation of Sodium-Dependent Phosphate Transport by Parathyroid Hormone-Related Peptide in Osteoblast-like Cells *Makoto Arao, Toru Yamaguchi, Toshitsugu Sugimoto, Masaaki Fukase, and Kazuo Chihara* 1216

Stereochemical Course of Hydrolysis Catalysed by *Cellulomonas fimi* CenE, a Member of a New Family of β-1,4-Glucanases *Hua Shen, Peter Tomme, Andreas Meinke, Neil R. Gilkes, Douglas G. Kilburn, R. Antony J. Warren, and Robert C. Miller, Jr.* 1223

Purification of Gonadotropin Surge-Inhibiting Factor from Sertoli Cell-Enriched Culture Medium *Susan Tio, Dirk Koppenaal, C. Wayne Bardin, and C. Yan Cheng* 1229

Evidence That c-src Is Involved in the Process of Osteoclastic Bone Resorption *T. J. Hall, M. Schaeublin, and M. Missbach* 1237

Nitric Oxide Production by Activated Human Neutrophils Exposed to Sodium Azide and Hydroxylamine: The Role of Oxygen Radicals *Michèle Markert, Béatrice Carnal, and Jacques Mauël* 1245

Cell Death Protection by 3-Aminobenzamide: Impairment of Cytoskeleton Function in Human NK Cell-Mediated Killing *Walter Malorni, Gabriella Rainaldi, Elisabetta Straface, Roberto Rivabene, Andrea Cossarizza, Stefano Salvioli, Daniela Monti, and Claudio Franceschi* 1250

Formylmethanofuran Synthesis by Formylmethanofuran Dehydrogenase from *Methanobacterium thermoautotrophicum* Marburg *Alain Wasserfallen* 1256

Thrombin Receptor Agonist Peptide Decreases Thrombomodulin Activity in Cultured Human Umbilical Vein Endothelial Cells *Yoshikazu Maruyama, Ikuro Maruyama, and Yasuko Soejima* 1262

Nitric Oxide Toxicity in Islet Cells Involves Poly(ADP-Ribose) Polymerase Activation and Concomitant NAD^+ Depletion *Jürgen Radons, Birgit Heller, Alexander Bürkle, Bettina Hartmann, Maria-L. Rodriguez, Klaus-D. Kröncke, Volker Burkart, and Hubert Kolb* 1270

Kinetics of Human Apohemoglobin Dimer Dissociation *Daniel P. Moulton and Melisenda J. McDonald* 1278

The Role of Reactive Oxygen Species in the Degradation of Lindane and DDT *S. Prakash, G. S. Tandon, T. D. Seth, and P. C. Joshi* 1284

Characterization of the Dihemic Cytochrome C_{549} from the Marine Denitrifying Bacterium *Pseudomonas nautica* 617 *Lígia M. Saraiva, Stéphane Besson, Guy Fauque, and Isabel Moura* 1289

Complete Amino Acid Sequence and Comparative Molecular Modeling of HPR from *Streptococcus mutans* Ingbritt *S. G. Dashper, L. Kirszbaum, N. L. Huq, P. F. Riley, and E. C. Reynolds* 1297

Sodium Channel Subtypes in the Rat Display Functional Differences in the Presence of Veratridine *Adrian M. Corbett and Melanie A. Vander Klok* 1305

[D-Arg^1, D-Phe^5, D-Trp^{7,9}, Leu^{11}] Substance P Induces Apoptosis in Lung Cancer Cell Lines *in Vitro* *Julie G. Reeve and Norman M. Bleehen* 1313

Na^+-Dependent High-Affinity Uptake of Choline into Cultured Fibroblasts *Patrick Schloss, Wolfgang Mayser, Anja Niehuis, and Heinrich Betz* 1320

Modulation of Calpastatin Specificity in Rat Tissues by Reversible Phosphorylation and Dephosphorylation *F. Salamino, R. De Tullio, M. Michetti, P. Mengotti, E. Melloni, and S. Pontremoli* 1326

Characterization of the Nucleotide and DNA Coeffector Binding Sites of the Herpes Simplex Virus Type 1 (HSV- 1) Encoded Helicase–Primase Complex and UL9 Origin Binding Protein *David L. Earnshaw and Richard L. Jarvest* 1333

Different Expression of β-N-Acetylhexosaminidase in Mouse Tissues *M. A. Della Fazia, T. Beccari, G. Servillo, M. P. Viola-Magni, and A. Orlacchio* 1341

Synthetic cDNA Encoding the Rat AT_{1a} Receptor: A Useful Tool for Structure-Function Relationship Analysis *Sophie Conchon, Catherine Monnot, Marie-Emmanuelle Sirieix, Claire Bihoreau, Pierre Corvol, and Eric Clauser* 1347

Activation of Helix–Loop–Helix Proteins Id1, Id2, and Id3 during Neural Differentiation *Yuka Nagata and Kazuo Todokoro* 1355

Isolation of a Yeast Tropomyosin-Related cDNA Clone That Encodes a Novel Transmembrane Protein Having a C-Terminal Highly Basic Region *Kenji Miyado, Motoya Katsuki, and Shun'ichiro Taniguchi* 1363

Homologous Dinucleotide (GT or TG) Deletion in Japanese Patients with Chronic Granulomatous Disease with p47-Phox Deficiency *Mayumi Iwata, Hiroyuki Nunoi, Hajime Yamazaki, Takashi Nakano, Hisao Niwa, Satoru Tsuruta, Shouichi Ohga, Shinobu Ohmi, Shiro Kanegasaki, and Ichiro Matsuda* 1372

A Novel Cytosolic Component, p40^{phox}, of Respiratory Burst Oxidase Associates with p67^{phox} and Is Absent in Patients with Chronic Granulomatous Disease Who Lack p67^{phox} *Shohko Tsunawaki, Hiroyuki Mizunari, Masato Nagata, Osamu Tatsuzawa, and Tadatoshi Kuratsuji* 1378

Calcium-Binding Activity of Nucleobindin Mediated by an EF Hand Moiety *Keiji Miura, Yoshikazu Kurosawa, and Yoshiyuki Kanai* 1388

The *Bacillus subtilis* SRP54 Homologue, Ffh, Has an Intrinsic GTPase Activity and Forms a Ribonucleoprotein Complex with Small Cytoplasmic RNA *in Vivo* *Kouji Nakamura, Mitsuru Nishiguchi, Kiyofumi Honda, and Kunio Yamane* 1394

Evidence for Multiple Inducible Cytochrome P450 Isozymes in Sencar Mouse Skin by Pyridine *Rajesh Agarwal, Frank K. Jugert, Sikandar G. Khan, David R. Bickers, Hans F. Merk, and Hasan Mukhtar* 1400

Effects of Estrogen and Estrogen Receptor in Normal Human Melanocytes *Shiou-Hwa Jee, Sheng-Yih Lee, Hsien-Ching Chiu, Chih-Cheng Chang, and Tong J. Chen* 1407

Photophysical Alterations of Erythrocyte Membrane by 4,5′,8-Trimethylpsoralen: Membrane Response toward Psoralen Phototherapy *Manish Nivsarkar, G. Pradeep Kumar, and Malini Laloraya* 1413

Nicotine Downregulates α_2 Isoform of Na,K-ATPase at the Blood–Brain Barrier and Brain in Rats *Liang Wang, J. Gordon McComb, Martin H. Weiss, Alicia A. McDonough, and Berislav V. Zlokovic* 1422

Involvement of a DNA Binding Protein, MDR-NF1/YB-1, in Human MDRl Gene Expression by Actinomycin D *Keizoh Asakuno, Kimitoshi Kohno, Takeshi Uchiumi, Takeshi Kubo, Seiji Sato, Mitsuo Isono, and Michihiko Kuwano* 1428

Characterization of Rat Pituitary Cells by Their Responses to Hypothalamic Releasing Hormones *Kanji Kasahara, Keiichi Tasaka, Nobuyuki Masumoto, Jirou Mizuki, Masahiro Tahara, Akira Miyake, and Osamu Tanizawa* 1436

Inhibition of Matrix Metalloproteinases by Peptidyl Hydroxamic Acids *Shinjiro Odake, Yasuo Morita, Tadanori Morikawa, Naoki Yoshida, Hisae Hori, and Yutaka Nagai* 1442

A Possible Involvement of Tyrosine Kinase in TRH-Induced Prolactin Secretion in GH3 Cells *Yuuki Kanda, Koji Koike, Masahide Ohmichi, Takeshi Sawada, Kenji Hirota, and Akira Miyake* 1447

Hepatocyte Growth Factor Accelerates the Wound Repair of Cultured Gastric Mucosal Cells *Sumio Watanabe, Miyoko Hirose, Xian-En Wang, Kohei Maehiro, Toshio Murai, Osamu Kobayashi, Akihito Nagahara, and Nobuhiro Sato* 1453

Clearance of Circulating Endothelin-1 by ETB Receptors in Rats *Takahiro Fukuroda, Toru Fujikawa, Satoshi Ozaki, Kiyofumi Ishikawa, Mitsuo Yano, and Masaru Nishikibe* 1461

Activation of *src* Family Kinase *lck* Following CD28 Crosslinking in the Jurkat Leukemic Cell Line *Avery August and Bo Dupont* 1466

Identification of the Third Major Genotype of Hepatitis C Virus in France *Ji-Su Li, Ludmila Vitvitski, Shu-Ping Tong, and Christian Trépo* 1474

Thyroid Hormone Influences β Myosin Heavy Chain (βMHC) Expression *J. G. Edwards, J. J. Bahl, I. L. Flink, S.-Y. Cheng, and E. Morkin* 1482

Porphyromonas gingivalis Trypsin-like Protease: A Possible Natural Ligand for the Neutrophil Formyl Peptide Receptor *Amitabha Lala, Atsuo Amano, Hakimuddin T. Sojar, Stephen J. Radel, and Ernesto De Nardin* 1489

The Intracellular Region Adjacent to Plasma Membrane (Residues 684–692) of the Thyrotropin Receptor Is Important for Phosphoinositide Signaling but Not for Agonist-Induced Adenylate Cyclase Activation *Shinji Kosugi and Toru Mori* 1497

Partial and Complete Regression of Breast Cancer in Patients in Relation to Dosage of Coenzyme Q_{10} *Knud Lockwood, Sven Moesgaard, and Karl Folkers* 1504

The Binding of Fibronectin to Entactin Is Mediated through the 29-kDa Amino Terminal Fragment of Fibronectin and the G2 Domain of Entactin *Jyh-Cheng Hsieh, Chuanyue Wu, and Albert E. Chung* 1509

Oxidative Stress Induces NFκB DNA Binding and Inducible NOS mRNA in Human Epithelial Cells *Ian M. Adcock, Carolanne R. Brown, Ojung Kwon, and Peter J. Barnes* 1518

Glucose Transporter GLUT1 mRNA Expression in the Ontogeny of Glucose Incorporation in Mouse Preimplantation Embryos *Yutaka Morita, Osamu Tsutsumi, Yoshitomo Oka, and Yuji Taketani* 1525

Author Index for Volume 199 1532

Volume 200, Number 1, April 15, 1994

Activation of p72^{syk} by Thrombin in a Cell-Free System *Kiyonao Sada, Shigeru Yanagi, and Hirohei Yamamura* 1

Kinetic Analysis of Novel Inhibitors of Inositol Polyphosphate Metabolism *Philip M. Hansbro, Paul S. Foster, Changsheng Liu, Barry V. L. Potter, and Michael A. Denborough* 8

Decline of Protein Kinase C Activation in Response to Growth Stimulation during Senescence of IMR-90 Human Diploid Fibroblasts *Zee-Fen Chang and Duen-Yi Huang* 16

Cloning of the cDNA for the Deleted Syk Kinase Homologous to ZAP-70 from Human Basophilic Leukemia Cell Line (KU812) *Shintaro Yagi, Katsuhiro Suzuki, Akira Hasegawa, Ko Okumura, and Chisei Ra* 28

Induction of Cecropin-like and Attacin-like Antibacterial but Not Antiviral Activity in *Heliothis virescens* Larvae *Donald D. Ourth, Timothy D. Lockey, and Harold E. Renis* 35

Identification of the Maltose Transport Protein of *Saccharomyces cerevisiae* *Peter J. A. Van den Broek, Carla C. M. Van Leeuwen, Ruud A. Weusthuis, Erik Postma, Johannes P. Van Dijken, Ronald H. Karssies, and Reinout Amons* 45

Apoptosis in Dog Thyroid Cells *S. Dremier, J. Golstein, R. Mosselmans, J. E. Dumont, P. Galand, and B. Robaye* 52

Actin May Contribute to the Power Stroke in the Binary Actomyosin System *Enrico Grazi, Ermes Magri, Christine Schwienbacher, and Giorgio Trombetta* 59

A Chicken Transferrin Binding Protein Is Heat Shock Protein 108 *Gary R. Hayes, Benjamin S. Himpler, Karen X. B. Weiner, and John J. Lucas* 65

Binding of Anti-trifluoroacetyl Antibodies to Isolated Hepatocytes Observed by Digital Fluorescence Microscopy *M. Niederstadt, A. Stier, and J. R. Trudell* 71

Bovine Histidine-Rich Glycoprotein Is a Substrate for Bovine Plasma Factor XIIIa *Torben Halkier, Hanne Andersen, Astrid Vestergaard, and Staffan Magnusson* 78

A New Kind of Immobilized Lipase in Organic Solvent and Its Structure Model *H. Yang, S. G. Cao, L. Ma, Z. T. Ding, S. D. Liu, and Y. H. Cheng* 83

Characterization of the Macrophage Migration Inhibitory Factor-Binding Site of Sarcolectin and Its Relationship to Human Serum Albumin *Fu-Yue Zeng, Volker Gerke, and Hans-J. Gabius* 89

Expression of Functional Influenza Virus A Polymerase Proteins and Template from Cloned cDNAs in Recombinant Vaccinia Virus Infected Cells *Hong Zhang and Gillian M. Air* 95

Stabilization of β-Ribbon Structures in Peptides Using Disulfide Bonds *Alfred M. Aberle, Hemender K. Reddy, Norbert V. Heeb, and Krishnan P. Nambiar* 102

Transcription of Ligninase H8 by *Phanerochaete chrysosporium* under Nutrient Nitrogen Sufficient Conditions *Carl G. Johnston and S. D. Aust* 108

Ascorbate Based Novel High Affinity Alternate Reductants and Competitive Inhibitors of Dopamine β-Monooxygenase *Kandatege Wimalasena Silpadipathiyalage Dharmasena, and D. Shyamali Wimalasena* 113

cDNA and Deduced Amino Acid Sequence of a Dwarf Goat Liver Cytochrome P450 Fragment Belonging to the CYP2C Gene Subfamily *Wilma M. Zeilmaker, Gerben A. E. van't Klooster, Johanna Fink Gremmels-Gehrmann, Adelbert S. J. P. A. M. van Miert, and G. J. M. Jean Horbach* 120

Regulation of Inducible Nitric Oxide Synthase mRNA Levels by LPS, INF-γ, TGF-β, and IL-10 in Murine Macrophage Cell Lines and Rat Peritoneal Macrophages *Sarah E. Chesrown, Joan Monnier, Gary Visner, and Harry S. Nick* 126

Blocking Antibodies Specific for Human Albumin Interfere with the Hemolytic Activity of the Membrane Attack Complex of Complement *Jeri J. Houle and Edward M. Hoffmann* 135

Nitric Oxide Mediates Suppression of Cartilage Proteoglycan Synthesis by Interleukin-1 *Dilek Taskiran, Maja Stefanovic-Racic, Helga Georgescu, and Christopher Evans* 142

Evaluating Predictions of Secondary Structure in Proteins *Thomas F. Jenny and Steven A. Benner* 149

Isolation of Three Novel POU-Domain Containing cDNA Clones from Lactating Mouse Mammary Gland *Birgit Jehn, Gustavo Chicaiza, Finian Martin, and Rolf Jaggi* 156

Pyrrolidine Dithiocarbamate Differentially Affects Interleukin 1β- and cAMP-Induced Nitric Oxide Synthase Expression in Rat Renal Mesangial Cells *Wolfgang Eberhardt, Dieter Kunz, and Josef Pfeilschifter* 163

Ligand (T_3) Dependent and Independent Effects of Thyroid Hormone Receptors upon Human TRH Gene Transcription in Neuroblastoma Cells *Pei Feng, Qiao-Ling Li, Teturou Satoh, and John F. Wilber* 171

Functional Expression of Rat Peroxisomal Acyl-CoA Oxidase in *Spodoptera frugiperda* Cells *Ruiyin Chu, Nobuteru Usuda, M. Kumudavalli Reddy, Chien Liu, Takashi Hashimoto, Keith Alvares, M. Sambasiva Rao, and Janardan K. Reddy* 178

Hyperphosphorylation of Human TAU by Brain Kinase PK40^{erk} beyond Phosphorylation by cAMP-Dependent PKA: Relation to Alzheimer's Disease *Barbara J. Blanchard, Rama devi Raghunandan, Hanno M. Roder, and Vernon M. Ingram* 187

The Hormone Binding Domain of the Mineralocorticoid Receptor Can Regulate Heterologous Activities *in cis* *Catherine P. Fankhauser, Pierre-André Briand, and Didier Picard* 195

The Putative Fifth Human Serum Amyloid A Protein (SAA)-Related Gene "*SAA5*" Is Defined by *SAA3* *Grant C. Sellar and Alexander S. Whitehead* 202

Adaptation of a Cholesterol Deficient Human T Cell Line to Growth with Lanosterol *Thomas M. Buttke and Steven Van Cleave* 206

Light-Activated Release of Nitric Oxide from Vascular Smooth Muscle of Normotensive and Hypertensive Rats *Eugeniusz Kubaszewski, Anthony Peters, Steve McClain, David Bohr, and Tadeusz Malinski* 213

Identification of Mutations in DNA Polymerase β mRNAs from Patients with Werner Syndrome *Yujiro Sadakane, Kenji Maeda, Yasuo Kuroda, and Katsuji Hori* 219

Insulin and Glucocorticoids Regulate IGFBP-1 Expression via a Common Promoter Region *D. G. Robertson, E. M. Marino, P. M. Thulé, C. K. Seneviratne, and L. J. Murphy* 226

Characterization of Chemically Crosslinked Human Factor VIIIa *Egon Persson and Mirella Ezban* 233

Human Lysosomal Alpha-Mannosidase: Isolation and Nucleotide Sequence of the Full-Length cDNA *Vicki L. Nebes and Martin C. Schmidt* 239

In Situ Modification of the Phospholipid Environment of Native Rabbit Sarcoplasmic Reticulum Membranes *Balázs Szalontai, László Vigh, Ferenc Joó, Laurence Senak, and Richard Mendelsohn* 246

Molecular Cloning of a cDNA Encoding a Novel Fatty Acid-Binding Protein from Rat Skin *Rikio Watanabe, Hiroshi Fujii, Shoji Odani, Jun Sakakibara, Ayako Yamamoto, Masaaki Ito, and Teruo Ono* 253

The Angiotensin II AT_1 Receptor Is Tyrosine and Serine Phosphorylated and Can Serve as a Substrate for the SRC Family of Tyrosine Kinases *William G. Paxton, Mario B. Marrero, Janet D. Klein, Patrick Delafontaine, Bradford C. Berk, and Kenneth E. Bernstein* 260

Characterization and Sequencing of an Uncoupled Lactose Carrier Mutant of *Escherichia coli* *Michael E. Matos and T. Hastings Wilson* 268

Uromodulin (Tamm-Horsfall Protein) Is a Leukocyte Adhesion Molecule *Gigi Toma, James M. Bates, Jr., and Satish Kumar* 275

The Effect of Long-Term Ovarian Hormone Deficiency on Transforming Growth Factor-β and Bone Matrix Protein mRNA Expression in Rat Femora *K. C. Westerlind, T. J. Wronski, G. L. Evans, and R. T. Turner* 283

Cooperative Interaction between Ets and AP-1 Transcription Factors Regulates Induction of Glutathione *S*-Transferase Ya Gene Expression *Svetlana Bergelson and Violet Daniel* 290

Accumulation of Human Apolipoprotein-E in Rat Plasma after *in Vivo* Intramuscular Injection of Naked DNA *Vito M. Fazio, Sergio Fazio, Monica Rinaldi, M. Valeria Catani, Sergio Zotti, Silvia A. Ciafrè, Davide Seripa, Giorgio Ricci, and Maria Giulia Farace* 298

Calmodulin Regulates the Expression of CDKS, Cyclins, and Replicative Enzymes during Proliferative Activation of Human T Lymphocytes *Josep Colomer, Antonia López-Girona, Neus Agell, and Oriol Bachs* 306

The Genomic Organization of Human Angiotensin II Type 1 Receptor *Deng-Fu Guo, Hiroaki Furuta, Masato Mizukoshi, and Tadashi Inagami* 313

Identification of Cyclic AMP Response Element in the Human Renin Gene *D. Lynne Smith, Brian J. Morris, Yung S. Do, Ronald E. Law, Kathy J. Shaw, and Willa A. Hseuh* 320

Insulin Receptor Autophosphorylation and Exogenous Substrate Phosphorylation: Role of Receptor C-Terminus and Effects of Mild Reduction
Stella Clark and Nicky Konstantopoulos 330

Formation of PGF_2-Isoprostanes during the Oxidative Modification of Low Density Lipoprotein *N. K. Gopaul, J. Nourooz-Zadeh, A. I. Mallet, and E. E. Änggård* 338

Lipoxygenase-Catalyzed Oxidation of Catecholamines
M. A. Rosei, C. Blarzino, C. Foppoli, L. Mosca, and R. Coccia 344

Neoglycoprotein Conjugated Liposomes as Macrophage Specific Drug Carrier in the Therapy of Leishmaniasis *Labanyamoy Kole, Kakali Sarkar, Sąshi B. Mahato, and Pijush K. Das* 351

A Specific Binding Protein form *Tenebrio molitor* for the Insecticidal Toxin of *Bacillus thuringiensis* Subsp. *Tenebrionis* *Carol J. Belfiore, Ratna K. Vadlamudi, and Lee A. Bulla, Jr.* 359

A Method to Increase the Sensitivity of Mutation Specific Oligonucleotide Hybridization Using Asymmetric Polymerase-Chain Reaction (PCR)
Victor N. Gorelov, H.-D. Röher, and Peter E. Goretzki 365

Modulation of the Suppression Efficiency and Amino Acid Identity of an Artificial Yeast Amber Isoleucine Transfer RNA in *Escherichia coli* by a G-U Pair in the Anticodon Stem *Volker Büttcher, Bruno Senger, Sylvie Schumacher, Joseph Reinbolt, and Franco Fasiolo* 370

Interleukin-8 Production by $CD16^-CD56^{bright}$ Natural Killer Cells in the Human Early Pregnancy Decidua *Sigeru Saito, Tadashi Kasahara, Shigekiyo Sakakura, Masahiro Enomoto, Hideshi Umekage, Naoya Harada, Takeshi Morii, Kiyoshi Nishikawa, Nobuhiro Narita, and Motohiko Ichijo* 378

Steady State Fluorescence Energy Transfer Measurements of Human α-Apohemoglobin Structure *Shawn M. O'Malley and Melisenda J. McDonald* 384

Oxidized-LDL Induce the Expression of Heat Shock Protein 70 in Human Endothelial Cells *Weimin Zhu, Paola Roma, Fabio Pellegatta, and Alberico L. Catapano* 389

Endothelin-1 Release from Endothelial Cells in Culture Is Elevated Both Acutely and Chronically by Short Periods of Mechanical Stretch
Heather Macarthur, Timothy D. Warner, Elizabeth G. Wood, Roger Corder, and John R. Vane 395

The Amino-Terminal Half of the Cytoplasmic Tail of the Thyrotropin Receptor Is Essential for Full Activities of Receptor Function
Shinji Kosugi and Toru Mori 401

Reduced Cholesterol Efflux to Mildly Oxidized High Density Lipoprotein
Diane W. Morel 408

Different NH_2-Terminal Form with 12 Additional Residues of α_2-Plasmin Inhibitor from Human Plasma and Culture Media of Hep G2 Cells
Takatoshi Koyama, Yukiya Koike, Shigeo Toyota, Fuminori Miyagi, Naotaka Suzuki, and Nobuo Aoki 417

Osteonectin/SPARC Regulates Cellular Secretion Rates of Fibronectin and Laminin Extracellular Matrix Proteins *Kyoko Kamihagi, Masahiko Katayama, Rieko Ouchi, and Ikunoshin Kato* 423

A Regulatory Subunit of Smooth Muscle Myosin Bound Phosphatase
Setsuya Okubo, Masaaki Ito, Yoshiyuki Takashiba, Kazuhito Ichikawa, Masatoshi Miyahara, Hiroyuki Shimizu, Tokuji Konishi, Hiroshi Shima, Minako Nagao, David J. Hartshorne, and Takeshi Nakano 429

Ygelp, a Eukaryotic Grp-E Homolog, Is Localized in the Mitochondrial Matrix and Interacts with Mitochondrial Hsp70 *Masato Nakai, Yuji Kato, Eri Ikeda, Akio Toh-e, and Toshiya Endo* 435

Identification of an Alternatively Spliced Form of the Murine Homologue of B7
Manabu Inobe, Peter S. Linsley, Jeffrey A. Ledbetter, Yumiko Nagai, Masatada Tamakoshi, and Toshimitsu Uede 443

ADP-Ribosylation of Human Serum Proteins Promoted by Endogenous NAD Glycohydrolase Activity *R. Nurten, I.Üstündağ, N. Sayhan, and E. Bermek* 450

Purification and Characterization of 2-Keto-3-deoxy-6-phosphogluconate Aldolase from *Azotobacter vinelandii*: Evidence That the Enzyme Is Bifunctional towards 2-Keto-4-hydroxy Glutarate Cleavage *Taha S. M. Taha and Thomas L. Deits* 459

Effects of IFN-β on Growth of Human Prostatic JCA-1 Cells
Y. Nakajima, S. Konno, L. Perruccio, Y. Chen, J. M. Wu, S. An, J. Chiao, M. Choudhury, C. Mallouh, and J. Muraki 467

The Pig as a Model for Studying AH Receptor and Other PAH-Binding Proteins in Man
Pierre Lesca, Renger Witkamp, Patrick Maurel, and Pierre Galtier 475

Refolding of the Isolated Extracellular Domain of the Erythropoietin Receptor
Roberto Bessalle, Alan D'Andrea, and Gerald Fasman 482

Molecular Analysis of a Potentially Phorbol-Regulatable Region of the Human Topoisomerase IIα Gene Promoter *Paul T. Loflin, Daniel Hochhauser, Ian D. Hickson, Fernando Morales, and Leonard A. Zwelling* 489

Involvement of Type 2C Phosphatase in the Dephosphorylation of 26 kDa Phosphoprotein in Rat Parotid Acinar Cells *Noriko Yokoyama, Miki Hara-Yokoyama, Takayasu Kobayashi, Shinri Tamura, Shunsuke Furuyama, and Hiroshi Sugiya* 497

Naftidrofuryl, a Putative Activator of Neuron Survival, Stimulates the Expression of Neurofilament Heavy Subunit in Cultivated Spinal Cord Neurons from Chicken
J. F. Leterrier, A. Maher, J. Eyer, J. P. Gou, K. Haddad, and A. Pouplard-Berthelaix 504

Drugs Transported by P-Glycoprotein Inhibit a 40pS Outwardly Rectifying Chloride Channel *Christine E. Bear* 513

Interferon-α Inhibits Cyclin E- and Cyclin D1-Dependent CDK-2 Kinase Activity Associated with RB Protein and E2F in Daudi Cells
Kerong Zhang and Rakesh Kumar 522

Depletion of Retinyl Esters in the Lungs Coincides with Lung Prenatal Morphological Maturation *S. K. Geevarghese and F. Chytil* 529

Increased Expression of *c-met* Messenger RNA Following Acute Gastric Injury in Rats
Masahiko Tsujii, Sunao Kawano, Shingo Tsuji, Toshifumi Ito, Nobuhiko Hayashi, Masayoshi Horimoto, Eiji Mita, Kouichi Nagano, Eiji Masuda, Norio Hayashi, Hideyuki Fusamoto, and Takenobu Kamada 536

Identification of Rab 5 but Not Rab 3A in Rat Pancreatic Zymogen Granule Membranes
Andreas C. C. Wagner, Mathias Z. Strowski, and John A. Williams 542

Possible Gene Dose Effect of a Mutant Cardiac β-Myosin Heavy Chain Gene on the Clinical Expression of Familial Hypertrophic Cardiomyopathy *Hirofumi Nishi, Akinori Kimura, Haruhito Harada, Kyo Adachi, Yoshinori Koga, Takehiko Sasazuki, and Hironori Toshima* 549

Plasma HDL Levels Are Regulated by the Catabolic Rate of Large Particles of Lipoprotein Containing APO-A-1 *Keijiro Saku, Rui Liu, Takao Ohta, Shiro Jimi, Ichiro Matsuda, and Kikuo Arakawa* 557

Tyrosine Phosphorylation of Shc Is Induced by IL-3, IL-5, and GM-CSF *Marion Dorsch, Hanno Hock, and Tibor Diamantstein* 562

Acute Elevation of Intracellular pH Translocates Protein Kinase C Activities in Rat Pinealocytes *Anthony K. Ho and Constance L. Chik* 569

Suicide Inactivation of Human Prostatic Acid Phosphatase and a Phosphotyrosine Phosphatase *Qingping Wang, Ute Dechert, Frank Jirik, and S. G. Withers* 577

Antigenic Alteration of a Anomalous Human Luteinizing Hormone Caused by Two Chorionic Gonadotropin-Type Amino-Acid Substitutions *Kiyoji Okuda, Takashi Yamada, Hirosumi Imoto, Hideyuki Komatsubara, and Osamu Sugimoto* 584

Involvement of Ribonuclease III in the Enhancement of Expression of the *speF–potE* Operon Encoding Inducible Ornithine Decarboxylase and Polyamine Transport Protein *Keiko Kashiwagi, Risa Watanabe, and Kazuei Igarashi* 591

Effects of Cytokines and Growth Factors on Phosphorylated Fetuin Biosynthesis by Adult Rat Hepatocytes in Primary Culture *Tomokazu Ohnishi, Osamu Nakamura, Naokatu Arakaki, Hiroomi Miyazaki, and Yasushi Daikuhara* 598

Molecular Cloning of Human Hippocalcin cDNA and Chromosomal Mapping of Its Gene *Ken Takamatsu, Masaaki Kobayashi, Shigeharu Saitoh, Masatoshi Fujishiro, and Tetsuya Noguchi* 606

Platelet-Derived Growth Factor Is a Potent Stimulator of Expression of Intercellular Adhesion Molecule-1 in Human Arterial Smooth Muscle Cells *Nobuhiro Morisaki, Kentaro Takahashi, Ritsuko Shiina, Mika Zenibayashi, Masako Otabe, Sho Yoshida, and Yasushi Saito* 612

Stoichiometry of Mitochondrial Transcripts and Regulation of Gene Expression by Mitochondrial Transcription Factor A *Heike L. Garstka, Michael Fäcke, Javier Ramos Escribano, and Rudolf J. Wiesner* 619

Subtypes of Endothelin ET_A and ET_B Receptors Mediating Venous Smooth Muscle Contraction *Sri Agus Sudjarwo, Masatoshi Hori, Takeo Tanaka, Yuzuru Matsuda, Toshikazu Okada, and Hideaki Karaki* 627

B_2 Bradykinin Receptors in NG108-15 Cells: cDNA Cloning and Functional Expression *Shigeru Yokoyama, Yasuhiro Kimura, Megumi Taketo, Joel A. Black, Bruce R. Ransom, and Haruhiro Higashida* 634

Adrenomedullin Stimulates Cyclic AMP Formation in Rat Vascular Smooth Muscle Cells *Yuko Ishizaka, Yushiro Ishizaka, Miho Tanaka, Kazuo Kitamura, Kenji Kangawa, Naoto Minamino, Hisayuki Matsuo, and Tanenao Eto* 642

Molecular Characterization of the *USO1* Gene Product Which Is Essential for Vesicular Transport in *Saccharomyces cerevisiae* *Dae-Hyun Seog, Masahiro Kito, Katsuhide Igarashi, Koji Yoda, and Makari Yamasaki* 647

Synergistic Cytotoxicity of Carboplatin and Divicine on Murine Erythroleukemic Cells *Michela Tonetti, Laura Sturla, Tiziana Bistolfi, Umberto Benatti, and Antonio De Flora* 654

Reduction of erbB2 Gene Product in Mamma Carcinoma Cell Lines by erbB2 mRNA-Specific and Tyrosine Kinase Consensus Phosphorothioate Antisense Oligonucleotides *J. Bertram, M. Killian, W. Brysch, K.-H. Schlingensiepen, and M. Kneba* 661

ERRATA

Volume 197, Number 3, December 30, 1993: Hans-Peter Nothacker and Cornelis J. P. Grimmelikhuijzen, "Molecular Cloning of a Novel, Putative G Protein-Coupled Receptor from Sea Anemones Structurally Related to Members of the FSH, TSH, LH/CG Receptor Family from Mammals," pp. 1062–1069 668

Volume 198, Number 1, January 14, 1994: Hiroyuki Saito, Atsushi Nishikawa, Jianguo Gu, Yoshito Ihara, Hidenobu Soejima, Yoshinao Wada, Chihiro Sekiya, Norio Niikawa, and Naoyuki Taniguchi, "cDNA Cloning and Chromosomal Mapping of Human *N*-Acetylglucosaminyltransferase V^+," pp. 318–327 668

Volume 198, Number 2, January 28, 1994: Kohki Shinozaki, Kazunori Anzai, Yutaka Kirino, Sannamu Lee, and Haruhiko Aoyagi, "Ion Channel Activity of a Synthethic Peptide with a Primary Structure Corresponding to the Presumed Pore-Forming Region of the Voltage Dependent Potassium Channel," pp. 445–450 670

Volume 200, Number 2, April 29, 1994

Comparison of the ATPase Activities of Bovine Heart and Liver Mitochondrial ATP Synthases with Different Tissue-Specific γ Subunit Isoforms *C. Matsuda, E. Muneyuki, H. Endo, M. Yoshida, and Y. Kagawa* 671

Pseudo-noncompetitive Antagonism by BQ123 of Intracellular Calcium Transients Mediated by Human ET_A Endothelin Receptor *Aiji Sakamoto, Masashi Yanagisawa, Gozoh Tsujimoto, Kazuwa Nakao, Teruhiko Toyo-oka, and Tomoh Masaki* 679

Differential Role of Hydrogen Peroxide and Organic Peroxides in Augmenting Asbestos-Mediated DNA Damage: Implications for Asbestos-Induced Carcinogenesis *Nayyara Mahmood, Sikander G. Khan, Mohammad Athar, and Qamar Rahman* 687

A Novel Mutation in Cu/Zn Superoxide Dismutase Gene in Japanese Familial Amyotrophic Lateral Sclerosis *Ryoichi Nakano, Shuzo Sato, Takashi Inuzuka, Kenji Sakimura, Masayoshi Mishina, Hitoshi Takahashi, Fusahiro Ikuta, Yoshiaki Honma, Junichi Fujii, Naoyuki Taniguchi, and Shoji Tsuji* 695

Temperature Changes Associated with Excitation of the Electric Organ in the African Electric Catfish *I. Tasaki and P. M. Byrne* 704

β-Amyloid Peptide Free Radical Fragments Initiate Synaptosomal Lipoperoxidation in a Sequence-Specific Fashion: Implications to Alzheimer's Disease *D. Allan Butterfield, Kenneth Hensley, Marni Harris, Mark Mattson, and John Carney* 710

Metabolism of Chylomicron Remnants in Transgenic Mice Expressing Apolipoprotein E in the Intestine *Hitoshi Shimano, Yoshio Namba, Junichi Ohsuga, Koji Yamamoto, Masako Shimada, Takanari Gotoda, Kenji Harada, Yoshio Yazaki, and Nobuhiro Yamada* 716

Semiartificial Hydroxylating Enzymes Created by Flavins Binding to Cytochrome P450 2B4 and by Bleomycin Binding to NADPH-Cytochrome P450 Reductase *Valentin Yu. Uvarov, Victoria V. Shumyantseva, Elena A. Bykhovskaya, Ludmila N. Kolyada, and Alexander I. Archakov* 722

Selective Targeting of Nitric Oxide Synthase Inhibitors to System y^+ in Activated Macrophages *A. R. Baydoun and G. E. Mann* 726

Freezing of Mammalian Livers with Glycerol and Antifreeze Proteins *B. Rubinsky, A. Arav, J-S. Hong, and C. Y. Lee* 732

In Vitro Effects of CINC/gro, a Member of the Interleukin-8 Family, on Interleukin-6 Secretion by Rat Posterior Pituitary Cells *Takeshi Sawada, Koji Koike, Yoshiki Sakamoto, Ataru Nohara, Yuuki Kanda, Zhen Xian Zhang, Masahide Ohmichi, Masaaki Yamaguchi, Kenji Hirota, and Akira Miyake* 742

Adenylated Dinucleotide Binding to the Adenosine 5′,5‴-P1,P4-Tetraphosphate Mouse Heart Receptor *Richard H. Hilderman, Jack E. Lilien, James K. Zimmerman, Denise H. Tate, Marcy A. Dimmick, and Graham B. Jones* 749

Prostaglandin $F_{2\alpha}$ Receptor Is Coupled to Gq in cDNA-Transfected Chinese Hamster Ovary Cells *Seiji Ito, Kazuichi Sakamoto, Noriko Mochizuki-Oda, Toshihiko Ezashi, Keiko Miwa, Emiko Okuda-Ashitaka, Valery I. Shevchenko, Yoshiaki Kiso, and Osamu Hayaishi* 756

Transcriptional Control of the Stearoyl-CoA Desaturase-1 Gene by Polyunsaturated Fatty Acids *K. T. Landschulz, D. B. Jump, O. A. MacDougald, and M. D. Lane* 763

Human Intestinal VIP Receptor: Cloning and Functional Expression of Two cDNA-Encoding Proteins with Different N-Terminal Domains *Alain Couvineau, Christiane Rouyer-Fessard, Dalila Darmoul, Jean-José Maoret, Isabel Carrero, Eric Ogier-Denis, and Marc Laburthe* 769

The Purified COOH-Terminal Domain of the Insulin Receptor Carries Activity to Stimulate Protein Kinase Activity or Autophosphorylation of the β Subunit Domain of Insulin Receptor *Junko Kasuya, Shu-Lian Li, Stephen Orr, Ken Siddle, and Yoko Fujita-Yamaguchi* 777

Isolation and Characterization of a Phospholipase A_2 Inhibitor from the Blood Plasma of the Thailand Cobra *Naja naja kaouthia* *Naoki Ohkura, Seiji Inoue, Kiyoshi Ikeda, and Kyozo Hayashi* 784

NGF-Induced Stabilization of GAP-43 mRNA Is Mediated by Both 3′ Untranslated Region and a Segment Encoding the Carboxy-Terminus Peptide *Kazuhisa Nishizawa* 789

Tyrosine Phosphorylation of a 58-kDa Protein Induced by Morphine in SK-N-SH Cells *Koichi Nakano, Takeshi Osugi, Che-Hui Kuo, Hiroshi Higuchi, and Naomasa Miki* 797

Promoter Analysis of Human Inducible Nitric Oxide Synthase Gene Associated with Cardiovascular Homeostasis *Youichi Nunokawa, Nobuhiro Ishida, and Shoji Tanaka* 802

Hepatocyte Growth Factor and Its Variant with a Deletion of Five Amino Acids Are Distinguishable in Their Biological Activity and Tertiary Structure *Nobuyuki Shima, Eisuke Tsuda, Masaaki Goto, Kazuki Yano, Hitoshi Hayasaka, Masatsugu Ueda, and Kanji Higashio* 808

Major Defect of Carbohydrate-Deficient-Glycoprotein Syndrome Is Not Found in the Synthesis of Dolichyl Phosphate or *N*-Acetylglucosaminyl-pyrophosphoryl-dolichol *Etsuko Yasugi, Miyuki Nakasuji, Taeko Dohi, and Mieko Oshima* 816

Interleukin-6-Induced Tyrosine Phosphorylation of Multiple Proteins in Murine Hematopoietic Lineage Cells *Tadashi Matsuda, Yojiro Yamanaka, and Toshio Hirano* 821

Botulinum Neurotoxin Type G Proteolyses the Ala^{81}–Ala^{82} Bond of Rat Synaptobrevin 2 *Shinji Yamasaki, Thomas Binz, Tetsuya Hayashi, Elizabeth Szabo, Naomi Yamasaki, Mel Eklund, Reinhard Jahn, and Heiner Niemann* 829

Molecular Cloning and Expression of a Novel Human Gene That Is Highly Homologous to Human FK506-Binding Protein 12kDa (hFKBP-12) and Characterization of Two Alternatively Spliced Transcripts *Hirofumi Arakawa, Hiroki Nagase, Naoko Hayashi, Tsutomu Fujiwara, Michio Ogawa, Sadahito Shin, and Yusuke Nakamura* 836

Identification and Characterization of the SecA Protein Homologue in the Cyanobacterium *Synechococcus* PCC79422 *Masato Nakai, Tetsuya Nohara, Daigo Sugita, and Toshiya Endo* 844

Effect of Dexamethasone on the Carbohydrate Chains of the Insulin Receptor *Albert S. B. Edge, Avraham Karasik, Kazunori Yamada, and C. Ronald Kahn* 852

Effects of SH-Group Reagents on Ca^{2+} and K^+ Channel Currents of Pancreatic B-Cells *Peter Krippeit-Drews, Stefan Britsch, Florian Lang, and Gisela Drews* 860

Annexins Possess Functionally Distinguishable Ca^{2+} and Phospholipid Binding Domains *Joel D. Ernst, Alison Mall, and Gordon Chew* 867

Overexpression of the Yeast ATP Synthase Subunit D in *Escherichia coli*: Use of Polyclonal Antibodies Directed against Recombinant Subunit D *Nathalie Norais, Jacques Vaillier, and Jean Velours* 877

Immunological and Functional Localization of Both F-Type and P-Type ATPases in Cyanobacterial Plasma Membranes *Andrea Neisser, Susanne Fromwald, Alice Schmatzberger, and Günter A. Peschek* 884

Decreased Proinflammatory Cytokines and Increased Antioxidant Enzyme Gene Expression by ω-3 Lipids in Murine Lupus Nephritis *Bysani Chandrasekar and Gabriel Fernandes* 893

Specific Binding of Estrogen to Osteoclast Surfaces *Kristen D. Brubaker and Carol V. Gay* 899

On the Structure of Mitochondrial Porins and Its Homologies with Bacterial Porins *Giuseppe Rauch and Oscar Moran* 908

A New Two-Step Precipitation Method Removes Free-SDS and Thiol Reagents from Diluted Solutions, and Then Allows Recovery and Quantitation of Proteins *Ugo Carraro, Denise Doria, Corrado Rizzi, and Marco Sandri* 916

ras Transformation Alters the Composition of Extracellular Matrix Proteoglycans in Rat Fibroblasts *Manuel Romarís, Joan Villena, Anna Molist, Ascensión Heredia, and Anna Bassols* 925

Isolation and Identification of Aptamers from Defibrotide That Act as Thrombin Antagonists *in Vitro* *Franzpeter Bracht and Karsten Schrör* 933

A Rapid and Sensitive PCR Screening Method for Point Mutations Associated with Mitochondrial Encephalomyopathies *Peter Seibel, Adrian Flierl, Michael Kottlors, and Heinz Reichmann* 938

Identification of Novel cDNAs Encoding Human Kexin-like Protease, PACE4 Isoforms *Akihiko Tsuji, Kazuya Higashine, Chiemi Hine, Kenji Mori, Yasuhiro Tamai, Hideaki Nagamune, and Yoshiko Matsuda* 943

A Rapid and Simple Method for the Measurement of Nitrite and Nitrate in Plasma by High-Performance Capillary Electrophoresis *A. M. Leone, P. L. Francis, P. Rhodes, and S. Moncada* 951

Distribution of TRH-Potentiating Peptide (PS4) and Its Receptors in Rat Brain and Peripheral Tissues *Ali Ladram, Marc Bulant, Jean-Jacques Montagne, and Pierre Nicolas* 958

Strand Scission in DNA Induced by *S*-Nitrosothiol with Hydrogen Peroxide *Jeen-Woo Park and Hye K. Kim* 966

KSAYRFamide: A Novel FMRFamide-Related Heptapeptide from the Free-Living Nematode, *Panagrellus redivivus*, Which Is Myoactive in the Parasitic Nematode, *Ascaris suum* *A. G. Maule, C. Shaw, J. W. Bowman, D. W. Halton, D. P. Thompson, T. G. Geary, and L. Thim* 973

The *Enterococcus faecalis* Extracellular Metalloendopeptidase (EC 3.4.24.30; Coccolysin) Inactivates Human Endothelin at Bonds Involving Hydrophobic Amino Acid Residues *Pirkko-Liisa Mäkinen and Kauko K. Mäkinen* 981

Transfected Human Somatostatin Receptor Type 2, SSTR2, Not Only Inhibits Adenylate Cyclase but Also Stimulates Phospholipase C and Ca^{2+} Mobilization *Hideaki Tomura, Fumikazu Okajima, Mohammed Akbar, Mohammed Abdul Majid, Kimie Sho, and Yoichi Kondo* 986

Alternative RNA Splicing of Calcitonin/Calcitonin Gene-Related Peptide Minigene Transcripts in a Thyroid C-Cell Line *Gilbert J. Cote* 993

Extracellular Matrix Regulates and L-Ascorbic Acid 2-Phosphate Further Modulates Morphology, Proliferation, and Collagen Synthesis of Perisinusoidal Stellate Cells *Haruki Senoo and Ryu-ichiro Hata* 999

Molecular Cloning and Characterization of the Rat Fifth Melanocortin Receptor *Nathalie Griffon, Virginie Mignon, Patricia Facchinetti, Jorge Diaz, Jean-Charles Schwartz, and Pierre Sokoloff* 1007

Alternative Splicing of CD44 Pre-mRNA in Human Colorectal Tumors *Laura Finn, Graeme Dougherty, Gene Finley, Arnold Meisler, Michael Becich, and David L. Cooper* 1015

Chiral Discrimination of Enantiomeric 2′-Deoxythymidine 5′-Triphosphate by HIV-1 Reverse Transcriptase and Eukaryotic DNA Polymerases *Toyofumi Yamaguchi, Naoko Iwanami, Koichi Shudo, and Mineo Saneyoshi* 1023

Coronary Atherosclerotic Smooth Muscle Cells Overexpress Human Parathyroid Hormone-Related Peptides *Toshiyuki Nakayama, Akira Ohtsuru, Hiroshi Enomoto, Hiroyuki Namba, Shin-ichiro Ozeki, Yoshisada Shibata, Tadaaki Yokota, Masakiyo Nobuyoshi, Masahiro Ito, Ichiro Sekine, and Shunichi Yamashita* 1028

Phosphorylation of Farnesol by a Cell-Free System from *Botryococcus braunii* *Hitoshi Inoue, Tatsumi Korenaga, Hiroshi Sagami, Tanetoshi Koyama, and Kyozo Ogura* 1036

Identification and Characterization of Parathyroid Hormone/Parathyroid Hormone-Related Peptide Receptor in Cultured Astrocytes *Hitoshi Hashimoto, Hiroshi Aino, Nobuya Ogawa, Shigekazu Nagata, and Akemichi Baba* 1042

Specific, Nonangiotensin, [^{125}I]CGP 42112 Binding Sites in Rat Spleen Macrophages *Ana María de Oliveira, Mohan Viswanathan, Frank M. J. Heemskerk, Fernando M. A. Correa, and Juan M. Saavedra* 1049

Identification of an HIV-1 Nef Peptide That Binds to HLA Class II Antigens *Barbara A. Torres and Howard M. Johnson* 1059

cDNA Sequence and Genomic Organization of Mouse Secretin *Michael S. Lan, Wataru Kajiyama, Giulia Donadel, Jia Lu, and Abner L. Notkins* 1066

The Ontogeny of Dopachrome Isomerase Isozyme Patterns in the Tobacco Hornworm *Manduca sexta* *Kaliappan Nellaiappan, Gerry Nicklas, and Manickam Sugumaran* 1072

Role of BSP/Bilirubin Binding Protein and Bilitranslocase in Glutathione Uptake in Rat Basolateral Liver Plasma Membrane Vesicles *Adriana M. Torres, Neil Kaplowitz, and Claudio Tiribelli* 1079

Ionic Lead, a Unique Metal Ion as an Inhibitor for Cytochrome P450IA2 (CYP1A2) Expression in the Rat Liver *Masakuni Degawa, Hiroshi Arai, Masako Kubota, and Yoshiyuki Hashimoto* 1086

Detergent Effects in Rabbit Liver Microsomal UDP-glucuronosyltransferase Studied by Means of a Continuous Spectrophotometric Assay with *p*-Nitrophenol *S. T. Martin and S. D. Black* 1093

Hepatocyte Growth Factor Regulates Transforming Growth Factor α in HepG2 Hepatic Cells *Goshi Shiota, Toshikazu Nakamura, and Emmett V. Schmidt* 1099

Nitric Oxide Destroys Zinc–Sulfur Clusters Inducing Zinc Release from Metallothionein and Inhibition of the Zinc Finger-Type Yeast Transcription Activator LAC9 *Klaus-D. Kröncke, Karin Fehsel, Thomas Schmidt, Frank T. Zenke, Ingo Dasting, Joachim R. Wesener, Hans Bettermann, Karin D. Breunig, and Victoria Kolb-Bachofen* 1105

Neuropeptide Y Potentiates the Luteinizing Hormone (LH) Response to LH-Releasing Hormone in Men *Hajime Watanobe, Takeshi Nigawara, Jiichi Anzai, Satoru Sakihara, Kazunori Kageyama, Ryo Nasushita, Shinsuke Sasaki, Satoshi Habu, and Kazuo Takebe* 1111

The Primary Structure of a Human MAP Kinase-Activated Protein Kinase 2 *You-Li Zu, Fengying Wu, Annette Gilchrist, Youxi Ai, Mark E. Labadia, and Chi-Kuang Huang* 1118

Competitive PCR Demonstrates That 9-*cis*-Retinoic Acid Induces Cellular Retinoic Acid-Binding Protein-II More Efficiently Than All-*trans*-Retinoic Acid in Human Osteosarcoma Cells *Håkan Melhus, Anders Gobl, and Sverker Ljunghall* 1125

Myeloblastin/Proteinase 3 Belongs to the Set of Negatively Regulated Primary Response Genes Expressed during *in Vitro* Myeloid Differentiation *Tao Chen, Roland Meier, Andrew Ziemiecki, Martin F. Fey, and Andreas Tobler* 1130

Effects of α-Lipoic Acid and Dihydrolipoic Acid on Expression of Proto-oncogene *c-fos* *Masashi Mizuno and Lester Packer* 1136

PKC Activity in Rat C_6 Glioma Cells: Changes Associated with Cell Cycle and Simvastatin Treatment *Maurizio R. Soma, Roberta Baetta, Stefania Bergamaschi, Maria Rita De Renzis, Cecilia Davegna, Fiorenzo Battaini, Remo Fumagalli, and Stefano Govoni* 1143

Tonoplast K^+ Channels in *Arabidopsis thaliana* Are Activated by Cytoplasmic ATP *Roberta Colombo, Raffaella Cerana, and Laura Giromini* 1150

Distinct Inhibition by Non-peptide and Peptide Arginine Vasopressin Antagonists of Vasopressin-Induced Activation of Mitogen-Activated Protein Kinase in Cultured Rat Vascular Smooth Muscle Cells *Koji Okada, Ryuhei Sasaki, San-e Ishikawa, and Toshikazu Saito* 1155

Tremor and *Zitter*, Causative Mutant Genes for Epilepsy with Spongiform Encephalopathy in Spontaneously Epileptic Rat(SER), Are Tightly Linked to Synaptobrevin-2 and Prion Protein Genes, Respectively *Takashi Kuramoto, Masayuki Mori, Junzo Yamada, and Tadao Serikawa* 1161

Volume 200, Number 3, May 16, 1994

The Photoreceptor G-Protein Transducin (G_t) Is a Substrate for Ubiquitin-Dependent Proteolysis *Martin Obin and Allen Taylor* 1169

Distribution of α1C-Adrenergic Receptor mRNA in Adult Rat Tissues by RNase Protection Assay and Comparison with α1B and α1D *D. Gregg Rokosh, Beth A. Bailey, Alexandre F. R. Stewart, Larry R. Karns, Carlin S. Long, and Paul C. Simpson* 1177

Apolipoprotein E and Cholesterol Affect Neuronal Calcium Signalling: The Possible Relationship to β-Amyloid Neurotoxicity *Henrike Hartmann, Anne Eckert, and Walter E. Müller* 1185

Role of CdS Quantum Crystallites in Cadmium Resistance in *Candida glabrata* *Rajesh K. Mehra, Priti Mulchandani, and Thomas C. Hunter* 1193

A Sustained, Cytoplasmic Transgene Expression System Delivered by Cationic Liposomes *Xiang Gao, Daniel Jaffurs, Paul D. Robbins, and Leaf Huang* 1201

Possible Difference in Glycosylation of the Thyrotropin Receptor among Species *Shinji Kosugi, Takashi Akamizu, and Toru Mori* 1207

Molecular Cloning, Expression, and Characterization of a Fifth Melanocortin Receptor *Ira Gantz, Yoshimasa Shimoto, Yoshitaka Konda, Hiroto Miwa, Chris J. Dickinson, and Tadataka Yamada* 1214

Overexpression and Characterization of a Recombinant Form of Rat Calcineurin A *Alice Haddy and Frank Rusnak* 1221

Nicotiana tabacum Contains a Putative Mineralocorticoid Receptor *M. K. Agarwal, M. Mirshahi, S. Braq, A. Jullienne, N. Leblanc, F. Stibon, and J. Guern* 1230

Fluorescence Postlabeling Assay of RNA Modification *R. Jain, T. V. Isac, and M. Sharma* 1239

Regulation of Recombinant Human Granulocyte Colony-Stimulation Factor Production Using Herpes Simplex Virus 1 Thymidine Kinase Gene *Yoshiyasu Aoki, Kenzaburo Tani, Keisuke Takahashi, Masafumi Fukushima, Keiya Ozawa, and Shigetaka Asano* 1245

Expression of Retinoid X Receptors in P19 Embryonal Carcinoma Cells and Embryonic Stem Cells *Gerard Bain and David I. Gottlieb* 1252

Distribution and Regulation of RAB3C, a Small Molecular Weight GTP-Binding Protein *Yi-Chi Su, Lung-Sen Kao, Ying-Yueh Chu, Yu Liang, Ming-Hsien Tsai, and Yijuang Chern* 1257

Molecular Cloning and Characterization of the Promoter for Human Type-1 Angiotensin II Receptor Gene *Ryoichi Takayanagi, Keizo Ohnaka, Yoshiyuki Sakai, Shoichiro Ikuyama, and Hajime Nawata* 1264

The Phosphorylated Forms of the Transcription Factor, Egr-1, Bind to DNA More Efficiently than Non-phosphorylated *Ruo-Pan Huang and Eileen D. Adamson* 1271

Isolation and Structure of Cat Superfast Myosin Light Chain-2 cDNA and Evidence for the Identity of Its Human Homologue *Han Qin, Brian J. Morris, and Joseph F. Y. Hoh* 1277

Alterations in CD45 Glycosylation Pattern Accompanying Different Cell Proliferation States *Tomohiko Ohta, Koichi Kitamura, Abby L. Maizel, and Akiko Takeda* 1283

The Rat, Mouse, and Human Genes Encoding the Receptor for Parathyroid Hormone and Parathyroid Hormone-Related Peptide Are Highly Homologous *X.-F. Kong, E. Schipani, B. Lanske, H. Joun, M. Karperien, L. H. K. Defize, H. Jüppner, J. T. Potts, Jr., G. V. Segre, H. M. Kronenberg, and A. B. Abou-Samra* 1290

Ca^{2+} Influx Gated by Inositol-3,4,5,6-Tetrakisphosphate in NIH/3T3 Fibroblasts *Minako Hashii, Masato Hirata, Shoichiro Ozaki, Yoshinori Nozawa, and Haruhiro Higashida* 1300

Identification of Novel Single-Stranded DNA Binding Proteins Recognizing Octamer Motif *Naoki Ogawa, Hiroyoshi Ariga, and Sanae M. M. Iguchi-Ariga* 1307

Differential Glycosylation of the Glucose Transporter Coincides with Enhanced Sugar Transport in Respiration Deficient Cells *Susan E. Pratt and Ralph J. Germinario* 1313

Enzyme Kinetics of Lipolysis Revisited: The Role of Lipase Interfacial Binding *Alejandro G. Marangoni* 1321

Molecular Cloning and Expression of Rat Prostaglandin E Receptor EP_2 Subtype *Takehiro Sando, Takeshi Usui, Issei Tanaka, Kiyoshi Mori, Yutaka Sasaki, Yoshihiro Fukuda, Tsunehisa Namba, Yukihiko Sugimoto, Atsushi Ichikawa, Shuh Narumiya, and Kazuwa Nakao* 1329

Receptor-Mediated Endocytosis of Thrombin–Antithrombin III Complex by the Human Monocytoid Cell Line U937 *Hiroyuki Takeya, Takashi Hamada, Masane Kume, and Koji Suzuki* 1334

Enhancement of β-Adrenergic Receptor Activation of Maxi-K^+ Channels by GM1 Ganglioside *Shih-fang Fan, Shuya Wang, and C. Y. Kao* 1341

Expression of Prostate Specific Antigen on the Surface of a Filamentous Phage *Riitta Eerola, Petri Saviranta, Hans Lilja, Kim Pettersson, Timo Lövgren, and Matti Karp* 1346

The Activity of Parafusin Is Distinct from That of Phosphoglucomutase in the Unicellular Eukaryote *Paramecium* *Anders P. Andersen, Elzbieta Wyroba, Milaniya Reichman, Hong Zhao, and Birgit H. Satir* 1353

Nucleotide Sequence Analysis of mRNAs Predicts That Rat Pituitary and Gonadal Gonadotropin-Releasing Hormone Receptor Proteins Have Identical Primary Structure *Mohieddine Moumni, Marie-Laure Kottler, and Raymond Counis* 1359

Cellular Localization of High-Molecular-Mass Heat Shock Proteins in Murine Cells *Takumi Hatayama, Eiji Nishiyama, and Kunihiko Yasuda* 1367

Low Levels of Mitochondrial Transcription Factor A in Mitochondrial DNA Depletion *Nils-Göran Larsson, Anders Oldfors, Elisabeth Holme, and David A. Clayton* 1374

Functional Coupling between the Cyclic Adenosine Monophosphate Pathway and Cholecystokinin Secretion in RIN Cells *Sylvie Aucouturier, Christine Bernard, Colette Roche, Jacques Philippe, Jean-Alain Chayvialle, and Jean-Claude Cuber* 1382

Presence of Functional Cyclic AMP Responsive Element in the 3′-Untranslated Region of the Human Thrombomodulin Gene *Ryushi Tazawa, Katsuya Yamamoto, Ken Suzuki, Kazuhiro Hirokawa, Shinsaku Hirosawa, and Nobuo Aoki* 1391

1,10-Phenanthroline and *Xenopus laevis* Teratology *Henrik Jörnvall, Kenneth H. Falchuk, Giuseppe Geraci, and Bert L. Vallee* 1398

Xenopus laevis Vitellogenin Is a Zinc Protein *Marcelo Montorzi, Kenneth H. Falchuk, and Bert L. Vallee* 1407

Malotilate, a Hepatoprotectant, Suppresses CYP2E1 Expression in Rats *Sang Geon Kim, Ji Yeon Kwak, Jong Wook Lee, Raymond F. Novak, Sang Shin Park, and Nak Doo Kim* 1414

Secretion of Recombinant Rat Annexin 5 by Insect Cells in a Baculovirus Expression System *Kazuaki Takehara, Shouhei Uchida, Nobuyuki Marumoto, Tamae Asawa, Sachiko Osugi, Shiro Kurusu, Inoru Hashimoto, and Mitsumori Kawaminami* 1421

Are the Steady State Kinetics of Glutathione Transferase Always Dependent on the Deprotonation of the Bound Glutathione? New Insights in the Kinetic Mechanism of GST P 1-1 *Anna Maria Caccuri, Paolo Ascenzi, Mario Lo Bello, Giorgio Federici, Andrea Battistoni, Paola Mazzetti, and Giorgio Ricci* 1428

The Gradient of Basic Fibroblast Growth Factor Concentration in Human Pancreatic Cancer Cell Invasion *Yasuhisa Hasegawa, Moriatsu Takada, Masahiro Yamamoto, and Yoichi Saitoh* 1435

Sphingolipid Activator Protein D (*sap*-D) Stimulates the Lysosomal Degradation of Ceramide *in Vivo* *A. Klein, M. Henseler, C. Klein, K. Suzuki, K. Harzer, and K. Sandhoff* 1440

Molecular Cloning and Expression of the Gene Encoding Human Angiotensin II Type 2 Receptor *Satoshi Tsuzuki, Toshihiro Ichiki, Hiroshi Nakakubo, Yutaka Kitami, Deng-Fu Guo, Heigoro Shirai, and Tadashi Inagami* 1449

Effects of Colupulone, a Component of Hops and Brewers Yeast, and Chromium on Glucose Tolerance and Hepatic Cytochrome P450 in Nondiabetic and Spontaneously Diabetic Mice *Gilbert J. Mannering, Janice A. Shoeman, and Don W. Shoeman* 1455

Characterization of Modified Staphylococcal Protein A Containing Phospholipid Monolayer on Both Solution and Slide Surfaces *Bin Lu, Ning Yie, Chun L. Lu, and Yu Wei* 1463

Human Monocyte Chemotactic Proteins-2 and -3 (MCP-2 and MCP-3) Attract Human Eosinophils and Desensitize the Chemotactic Responses toward RANTES *Norio Noso, Paul Proost, Jo Van Damme, and Jens-Michael Schröder* 1470

Carboxy-Terminal Region of *Escherichia coli* SecA ATPase Is Important to Promote Its Protein Translocation Activity *in Vivo* *Thavamani Rajapandi and Donald Oliver* 1477

Muscarinic K^+ Channels Are Activated by $\beta\gamma$ Subunits and Inhibited by the GDP-Bound Form of α Subunit of Transducin *Mitsuhiko Yamada, Yee-Kin Ho, Rehwa Ho Lee, Kenji Kontani, Katsunobu Takahashi, Toshiaki Katada, and Yoshihisa Kurachi* 1484

Absence of Glucose Uptake by Liver Microsomes: An Explanation for the Complete Latency of Glucose Dehydrogenase *Angela Romanelli, Jean-François St-Denis, Hubert Vidal, Sophie Tchu, and Gérald van de Werve* 1491

The Primary Structure of Rat Ribosomal Protein S15a *Yuen-Ling Chan, Joe Olvera, Veronica Paz, and Ira G. Wool* 1498

Effects of Dietary Cholesterol on Hepatic Metabolism of Free Fatty Acid and Secretion of VLDL in the Hamster *Thomas V. Fungwe, Lauren M. Cagen, Henry G. Wilcox, and Murray Heimberg* 1505

Pharmacological Characterization of Tachykinin-Induced Intracellular Calcium Rise in a Human NK2 Receptor Transfected Cell Line *N. Subramanian, C. Ruesch, and C. Bertrand* 1512

Characterization, Expression, and Evolution of Mouse β_2-Glycoprotein I (Apolipoprotein H) *Grant C. Sellar, Diana M. Steel, Alexander Zafiropoulos, Liam T. Seery, and Alexander S. Whitehead* 1521

Regulation of p42 and p44 MAP Kinase Isoforms in Rat-1 Fibroblasts Stably Transfected with α_2C10 Adrenoreceptors *Neil G. Anderson and Graeme Milligan* 1529

N-Protein Kinase C Isoenzymes May Be Involved in the Regulation of Various Neutrophil Functions *Katharina Wenzel-Seifert, Christoph Schächtele, and Roland Seifert* 1536

Biodegradation of Malachite Green and Rhodamine B by Caecal Microflora of Rats *Sudhir Singh, Mukul Das, and Subhash K. Khanna* 1544

Characterization of 5′-AMP-Activated Protein Kinase in Human Liver Using Specific Peptide Substrates and the Effects of 5′-AMP Analogues on Enzyme Activity *Jane E. Sullivan, Frank Carey, David Carling, and Raj K. Beri* 1551

Identification of the Mouse Helper T Lymphocyte Differentiation Antigen 3G11 as the Ganglioside IV^3 $(NeuAc)_2$-$GgOse_4Cer$ *Frank Dittrich, Kyoko Hayakawa, Manfred Nimtz, Frank Ebel, and Peter F. Mühlradt* 1557

D-Amino Acid Residues as Substrate Specificity Determinants for Casein Kinase II *Reet Toomik, Marika Eller, Pia Ekman, Ulf Ragnarsson, and Lorentz Engström* 1564

Insulin-Stimulated Tyrosine Phosphorylation of Protein Kinase Cα: Evidence for Direct Interaction of the Insulin Receptor and Protein Kinase C in Cells *Feng Liu and Richard A. Roth* 1570

The Role of Cysteine-949 in the Binding of Transforming Growth Factor-β1 and Transforming Growth Factor-β2 to α_2-Macroglobulin *Kendall P. Crookston and Steven L. Gonias* 1578

Superoxide Reduction of a Disulfide: A Model of Intracellular Redox Modulation? *Douglas A. Peterson, Stephen L. Archer, and E. Kenneth Weir* 1586

CPTK71, a Cytosolic Protein-Tyrosine Kinase Previously Purified from Bovine Platelets, Is Identical with $p72^{syk}$ *Misao Tsubokawa, Shigeru Yanagi, Kiyonao Sada, Shun-ichi Nakamura, Hitoshi Saito, and Hirohei Yamamura* 1592

Soluble Amyloid β-Protein Is a Marker of Alzheimer Amyloid in Brain But Not in Cerebrospinal Fluid *Massimo Tabaton, Maria Grazia Nunzi, Run Xue, Marianne Usiak, Lucila Autilio-Gambetti, and Pierluigi Gambetti* 1598

Role of Carboxylmethylation in Chemoattractant Receptor-Stimulated G Protein Activation and Functional Responses *Eleanor D. Lederer, Alfred A. Jacobs, Jerald L. Hoffman, George Harding, Janet D. Robishaw, and Kenneth R. McLeish* 1604

Oxidation of Pyridine Nucleotides and Depletion of ATP and ADP during Calcium- and Inorganic Phosphate-Induced Mitochondrial Permeability Transition *Melani K. Savage and Donald J. Reed* 1615

Human Liver Estrogen Sulfotransferase: Identification by cDNA Cloning and Expression *Ibrahim A. Aksoy, Thomas C. Wood, and Richard Weinshilboum* 1621

Selective Inhibition of the 12-Lipoxygenase Pathway of Arachidonic Acid Metabolism by L-Arginine or Sodium Nitroprusside in Intact Human Platelets *Mikiya Nakatsuka and Yoichi Osawa* 1630

Stability of a Potential Blood Substitute, HbXL99α, under High Pressure *Rhoda Elison Hirsch, Joel M. Friedman, John P. Harrington, and Suzanne F. Scarlata* 1635

A Unique Antigenic Determinant on Collagen II Closely Associated with Age-Related Abnormal Modification *Chunlin Yang, Yahya Acil, and Peter K. Müller* 1641

Hydroxyl Radicals as an Early Signal Involved in Phorbol Ester-Induced Monocytic Differentiation of HL60 Cells *Kuender D. Yang and Meng-Fang Shaio* 1650

Competitive Inhibition of HIV-1 Protease by 4-Hydroxy-benzopyran-2-ones and by 4-Hydroxy-6-phenylpyran-2-ones *Peter J. Tummino, Donna Ferguson, Lynn Hupe, and Donald Hupe* 1658

Structure and Function of the 5′ Flanking Sequences of the Human α Class Glutathione *S*-Transferase Genes *Takashige Suzuki, Stewart Smith, and Philip G. Board* 1665

Differences in Immunomodulating Effects between Wild and Cultured *Panax ginseng* *Masashi Mizuno, Junko Yamada, Hirofumi Terai, Nobuyuki Kozukue, Yonq Shun Lee, and Hironobu Tsuchida* 1672

Association of Protochlorophyllide with the *Puf*Q Protein of *Rhodobacter capsulatus* *Shafique Fidai, Shivayogeppa B. Hinchigeri, and William R. Richards* 1679

Identification of Secreted β-Amyloid Precursor Protein Binding Sites on Intact Human Fibroblasts *Kelly L. Johnson-Wood, Thomas Henriksson, Peter Seubert, Tilman Oltersdorf, Ivan Lieberburg, and Dale B. Schenk* 1685

HPRT Yeast Artificial Chromosome Transfer into Human Cells by Four Methods and an Involvement of Homologous Recombination *Morimasa Wada, Yoshikazu Ihara, Masaaki Tatsuka, Hiromi Mitsui, Kimitoshi Kohno, Michihiko Kuwano, and David Schlessinger* 1693

Evidence That Impaired Intracellular Collagen Synthesis Reduces Proliferation in Cultured Rat Hepatocytes *Hitoshi Ikeda, Itsuro Ogata, and Kenji Fujiwara* 1701

Cyclic Hexapeptide Endothelin Receptor Antagonists Highly Potent for Both Receptor Subtypes ET_A and ET_B *Takashi Kikuchi, Tetsuya Ohtaki, Akira Kawata, Takashi Imada, Taiji Asami, Yasushi Masuda, Tsukasa Sugo, Keiji Kusumoto, Kazuki Kubo, Toshifumi Watanabe, Mitsuhiro Wakimasu, and Masahiko Fujino* 1708

Prenylated Proteins in Regenerating Rat Liver *Giovannella Bruscalupi, Flavia Castellano, Silvia Sacco, and Anna Trentalance* 1713

Functional Regions of Ornithine Decarboxylase Antizyme *Tamotsu Ichiba, Senya Matsufuji, Youichi Miyazaki, Yasuko Murakami, Keiji Tanaka, Akira Ichihara, and Shin-ichi Hayashi* 1721

Molecular Cloning and Expression of Human Prostacyclin Synthase *Atsuro Miyata, Shuntaro Hara, Chieko Yokoyama, Hiroyasu Inoue, Volker Ullrich, and Tadashi Tanabe* 1728

Production of Human PTH(1–34) via a Recombinant DNA Technique *Shizue Nakagawa, Yuri Tamakashi, Yoshihiro Ishibashi, Masahiro Kawase, Shigehisa Taketomi, Osamu Nishimura, and Tsunehiko Fukuda* 1735

Muscle Homeodomain Protein MHox Inhibits Ternary Complex Formation at the c-*fos* Serum Response Element *Jing-Tyan Ma and Sun-Yu Ng* 1742

Metastatic Potential in Nude Mice of Chinese Hamster Ovary Cells Expressing Human Carcinoembryonic Antigen *Junko Hashino, Yoshiaki Fukuda, Shinzo Oikawa, Hiroshi Nakazato, and Toshihiro Nakanishi* 1748

Molecular Cloning of Human E-Cadherin Suggests a Novel Subdivision of the Cadherin Superfamily *David L. Rimm and Jon S. Morrow* 1754

Cellular Uptake as a Determinant of Cytotoxicity of Quaternized Ellipticines to Human Brain Tumor Cells *David T. Vistica, Susan Kenney, Miriam L. Hursey, and Michael R. Boyd* 1762

ERRATA

Volume 197, Number 2, December 15, 1993: Sergio Capaccioli, Giovanni Di Pasquale, Enrico Mini, Teresita Mazzei, and Alessandro Quattrone, "Cationic Lipids Improve Antisense Oligonucleotide Uptake and Prevent Degradation in Cultured Cells and in Human Serum," pp. 818–825 1769

Volume 198, Number 3, February 15, 1994:Akiko Sakai, Fusao Watanabe, and Eisuke Furuya, "Cloning of cDNAs for Fructose 6-Phosphate 2-Kinase/Fructose 2,6-Bisphosphatase from Frog Skeletal Muscle and Liver, and Their Expression in Skeletal Muscle," pp. 1099–1106. 1769

Volume 201, Number 1, May 30, 1994

The Effect of Polyamine Depletion on the Cytotoxic Response to PUVA, Gamma Rays, and UVC in V70 Cells *in Vitro* *Jerry R. Williams, Robert A. Casero, and Larry E. Dillehay* 1

Inhibition of Metal-Catalyzed Oxidation Systems by a Yeast Protector Protein in the Presence of Thioredoxin *Soo Jin Kwon, Jeen-Woo Park, Won-Ki Choi, Il Han Kim, and Kanghwa Kim* 8

Salmonella typhimurium Activates Human Immunodeficiency Virus Type 1 in Chronically Infected Promonocytic Cells by Inducing Tumor Necrosis Factor-α Production *Augusto Andreana, Sastry Gollapudi, Choong H. Kim, and Sudhir Gupta* 16

Release of TEA Blockade of Maxi-K^+ Channels by Isoproterenol *Shih-fang Fan, Shuya Wang, and C. Y. Kao* 24

In Human Neutrophils the Binding to Immunocomplexes Induces the Tyrosine Phosphorylation of Fcγ/R2 but This Phosphorylation Is Not an Essential Signal for Fc-Mediated Phagocytosis *Stefano Dusi, Marta Donini, Vittorina Della Bianca, Giorgio Gandini, and Filippo Rossi* 30

Regulation of Ferritin Synthesis in Macrophages by Oxygen and a Sulfhydryl-Reactive Agent *Hideyo Sato, Mineko Yamaguchi, and Shiro Bannai* 38

Purification and Characterization of a Novel Metalloprotease from Human Brain with the Ability to Cleave Substrates Derived from the N-Terminus of β-Amyloid Protein *Christoph Schönlein, Jürgen Löffler, and Gerda Huber* 45

Bioassay Discrimination between Nitric Oxide ($NO^{\cdot}$) and Nitroxyl (NO^-) Using L-Cysteine *Rubén Zamora Pino and Martin Feelisch* 54

Expression and cDNA Cloning of Human HMGI-C Phosphoprotein *Umesh A. Patel, Antonella Bandiera, Guidalberto Manfioletti, Vincenzo Giancotti, Kai-Yin Chau, and Colyn Crane-Robinson* 63

High Glucose Condition Activates Protein Tyrosine Phosphatases and Deactivates Insulin Receptor Function in Insulin-Sensitive Rat 1 Fibroblasts *Rie Ide, Hiroshi Maegawa, Ryuichi Kikkawa, Yukio Shigeta, and Atsunori Kashiwagi* 71

A Biosynthetic Control on Structures Serving as Ligands for Selectins: The Precursor Structures, 3-Sialyl/Sulfo Galβ1,3/4GlcNAcβ-0-R, Which Are High Affinity Substrates for α1,3/4-L-Fucosyltransferases, Exhibit the Phenomenon of Substrate Inhibition *E. V. Chandrasekaran, John M. Rhodes, Rakesh K. Jain, Ralph J. Bernacki, and Khushi L. Matta* 78

The G_{M2} Activator Protein Does Not Play a Critical Role in Endosome and Lysosome Membrane Fusion *Bei Xie and Don Mahuran* 90

The Prevention of Collagen Breakdown in Bovine Nasal Cartilage by TIMP, TIMP-2, and a Low Molecular Weight Synthetic Inhibitor *A. J. Ellis, V. A. Curry, E. K. Powell, and T. E. Cawston* 94

The Primary Structure of Rat Ribosomal Protein L13 *Joe Olvera and Ira G. Wool* 102

The Primary Structure of Rat Ribosomal Protein L15 *Yuen-Ling Chan, Joe Olvera, and Ira G. Wool* 108

The Disbalance of α- and β-Globins in Anemic Belgrade Rat Red Blood Cells *Jelena Marjanović, Suzana Savković, Gordana Nikčević, Vladimir Glišin, Zoran Ivanović, Pavle Milenković, and Zvezdana Popović* 115

Glutathione *S*-Transferase-*sspA* Fusion Binds to *Escherichia coli* RNA Polymerase and Complements Δ*sspA* Mutation Allowing Phage P1 Replication *M. D. Williams, T. X. Ouyang, and M. C. Flickinger* 123

Involvement of Histidine Residues in the Catalytic Mechanism of Hydrogenases *Isabelle Mus-Veteau and Françoise Guerlesquin* 128

Regulation of Protein Kinase C in NG108-15 Cell Differentiation *Fiorenzo Battaini, Gabriele Garbillo, Stefania Bergamaschi, Marco Parenti, William C. Wetsel, Stefano Govoni, and Marco Trabucchi* 135

Endogenous Nitric Oxide Modulates Endothelin-1 Induced Contraction of Bovine Oviduct *M. Rosselli, B. Imthurn, E. Macas, P. J. Keller, and R. K. Dubey* 143

A Novel 34-kDa Glutathione-Binding Protein in Mature Rat Ovary *Erica Toft, Mats Söderström, Margot Bengtsson Ahlberg, and Joseph W. DePierre* 149

The Cleavage of Phosphoenolpyruvate by Vanadate *Manuel Aureliano, Jacqueline Leta, Vítor M. C. Madeira, and Leopoldo de Meis* 155

Expression of Soluble Active Human β1,4 Galactosyltransferase in *Saccharomyces cerevisiae* *Ralf Kleene, Christian H. Krezdorn, Gabriele Watzele, Bernd Meyhack, Guido F. Herrmann, Christian Wandrey, and Eric G. Berger* 160

Inhibitors of Sterol Synthesis: 3β-Hydroxy-25,26,26,26,27,27,27-heptafluoro-5α-cholestan-15-one, an Analog of a Potent Hypocholesterolemic Agent in Which Its Major Metabolism Is Blocked *Shankar Swaminathan, Abdul U. Siddiqui, Frederick D. Pinkerton, Nicolas Gerst, William K. Wilson, and George J. Schroepfer, Jr.* 168

Differential Expression of Members of the *N*-Formylpeptide Receptor Gene Cluster in Human Phagocytes *Melissa Durstin, Ji-Liang Gao, H. Lee Tiffany, David McDermott, and Philip M. Murphy* 174

Anti-β2 Subunit Antisense Oligonucleotides Modulate the Surface Expression of the α1 Subunit of N-Type ω-CTX Sensitive Ca^{2+} Channels in IMR 32 Human Neuroblastoma Cells *Paola Tarroni, Maria Passafaro, Antonella Pollo, Maurizio Popoli, Francesco Clementi, and Emanuele Sher* 180

Secondary Structure of Noxiustoxin and Charybdotoxin from Hydropathy Power Spectra *R. Sacile, C. Ruggiero, P. Ballestrero, L. D. Possani, G. Prestipino, and G. Rauch* 186

Identification of Transmembrane Domains of the Red Cell Calcium Pump with a New Photoactivatable Phospholipidic Probe *Pablo R. Castello, Ariel J. Caride, F. Luis González Flecha, Horacio N. Fernández, Juan P. F. C. Rossi, and José M. Delfino* 194

Cloning and Sequencing of the Equine Testicular Follitropin Receptor *Philippe Robert, Sophie Amsellem, Sylvie Christophe, Jean-Louis Benifla, Dominique Bellet, Ahmet Koman, and Jean-Michel Bidart* 201

Evidence for a Site-Specific Endonuclease in Yeast Mitochondria Which Recognizes the Sequence 5′GCCGGC *Uthayashanker R. Ezekiel and H. Peter Zassenhaus* 208

Binding of IFNγ and Its C-Terminal Peptide to a Cytoplasmic Domain of Its Receptor That Is Essential for Function *Brian E. Szente and Howard M. Johnson* 215

Rat Contrapsins Are the Type II Acute Phase Proteins: Regulation by Interleukin 6 on the mRNA Level *Tomasz Kordula, Marcin Bugno, Wladyslaw Lason, Ryszard Przewlocki, and Aleksander Koj* 222

Identification of a New Class of ET_A Selective Endothelin Antagonists by Pharmacophore Directed Screening *Ming Fai Chan, Ilya Okun, Fiona Lytton Stavros, Emily Hwang, Manfred W. Wolff, and V. N. Balaji* 228

The Role of Glutathione in the Toxicity of a Novel Cyanobacterial Alkaloid Cylindrospermopsin in Cultured Rat Hepatocytes *Maria T. Runnegar, Shou-Ming Kong, Ya-Zhen Zhong, Jun-Li Ge, and Shelly C. Lu* 235

Use of Single-Cysteine Mutants to Probe the Location of the Disulfide Bond in LamB Protein from *Escherichia coli* *Richard Ling and Mary Luckey* 242

Functional Expression of Recombinant Human Luteinizing Hormone/Human Choriogonadotropin Receptor Shigeo Igarashi, Takashi Minegishi, *Kazuto Nakamura, Manabu Nakamura, Mari Tano, Kaoru Miyamoto, and Yoshito Ibuki* 248

13-Hydroxyoctadecadienoic Acid (13-HODE) Reverses Epidermal Hyperproliferation via Selective Inhibition of Protein Kinase C-β Activity *Yunhi Cho and Vincent A. Ziboh* 257

Selective Induction of Apoptosis in Myeloid Leukemic Cell Lines by Monoacetone Glucose-3 Butyrate *C. Calabresse, L. Venturini, G. Ronco, P. Villa, L. Degos, D. Belpomme, and C. Chomienne* 266

Plant Nitrate Reductase Gene Fragments Enhance Nitrite Production in Activated Murine Macrophage Cell Lines *John G. Bruno, Jill E. Parker, and Johnathan L. Kiel* 284

Competitive Inhibition of HIV-1 Protease by Warfarin Derivatives *Peter J. Tummino, Donna Ferguson, and Donald Hupe* 290

Site-Directed Mutagenesis of the Histamine H_1-Receptor Reveals a Selective Interaction of Asparagine ^{207} with Subclasses of H_1-Receptor Agonists *Rob Leurs, Martine J. Smit, Cornelis P. Tensen, Anton M. Ter Laak, and Hendrik Timmerman* 295

Isolation of a cDNA for the Catalytic Subunit of Rat Liver Glucose-6-phosphatase: Regulation of Gene Expression in FAO Hepatoma Cells by Insulin, Dexamethasone, and cAMP *Alex J. Lange, Doriane Argaud, M. Raafat El-Maghrabi, Wansong Pan, Subir R. Maitra, and Simon J. Pilkis* 302

A Possible Yeast Homolog of Human Active-Gene-Repairing Helicase *ERCC6* *Meng-Er Huang, Jean-Claude Chuat, and Francis Galibert* 310

Characterization of Recombinant Mouse Perforin Expressed in Insect Cells Using the Baculovirus System *Chau-Ching Liu, Pedro M. Persechini, and John Ding-E Young* 318

Specificity of Vascular Endothelial Cell Growth Factor Receptor Ligand Binding Domains *Richard L. Kendall, Guan Wang, Jerry DiSalvo, and Kenneth A. Thomas* 326

A 28-kDa Protein with Disintegrin-like Structure (Jararhagin-C) Purified from *Bothrops jararaca* Venom Inhibits Collagen- and ADP-Induced Platelet Aggregation *Yoshiko Usami, Yoshihiro Fujimura, Shuji Miura, Hiroko Shima, Eri Yoshida, Akira Yoshioka, Kazuyuki Hirano, Masami Suzuki, and Koiti Titani* 331

Enhancement of Adenylate Cyclase Stimulation by Prostaglandin E Receptor EP3-Subtype Isoforms with Different Efficiencies *Akira Harazono, Yukihiko Sugimoto, Atsushi Ichikawa, and Manabu Negishi* 340

Fur (Ferric Uptake Regulation) Protein Interaction with Target DNA: Comparison of Gel Retardation, Footprinting, and Electron Microscopy Analyses *Dominique Fréchon and Eric Le Cam* 346

The Heterologous Expression and Characterization of Human Prostaglandin G/H Synthase-2 (COX-2) Donna B. Miller, Deborah Munster, James S. Wasvary, *J. Peter Simke, Jane V. Peppard, Benjamin R. Bowen, and Paul J. Marshall* 356

Opposite Effects of the Overexpression of Protein Kinase Cγ and δ on the Growth Properties of Human Glioma Cell Line U251 MG *Kazuhiko Mishima, Shigeo Ohno, Nobuyuki Shitara, Kazuko Yamaoka, and Koichi Suzuki* 363

Oxidation of Low Molecular Weight Chloroalkanes by Cytochrome P450$_{CAM}$ *Mark R. Lefever and Lawrence P. Wackett* 373

Cloning and Characterization of the Human Thromboxane Synthase Gene Promoter *Kuan-Der Lee, Seung Joon Baek, and Rong-Fong Shen* 379

Inverse Expression of Two Laminin Binding Proteins, 67LR and Galectin-3, Correlates with the Invasive Phenotype of Trophoblastic Tissue *Frédéric A. Van Den Brule, Judith Price, Mark E. Sobel, René Lambotte, and Vincent Castronovo* 388

Nonnuclear Effects of the Steroid Hormone 1α, 25(OH)$_2$-Vitamin D$_3$: Analogs Are Able to Functionally Differentiate between Nuclear and Membrane Receptors *Murray C. Dormanen, June E. Bishop, Marion W. Hammond, William H. Okamura, Ilka Nemere, and Anthony W. Norman* 394

Evidence for Transcapillary Transport of Reduced Glutathione in Vascular Perfused Guinea-Pig Brain *Berislav V. Zlokovic, Jasmina B. Mackic, J. Gordon McComb, Martin H. Weiss, Neil Kaplowitz, and Ram Kannan* 402

Prohibitin Expression during Cellular Senescence of Human Diploid Fibroblasts *X.-T. Liu, C. A. Stewart, R. L. King, D. A. Danner, R. T. Dell'Orco, and J. K. McClung* 409

Taste Receptor Proteins Directly Extracted by Liposome from Intact Epithelium of Bullfrog Tongue *Mikihiko Nakamura, Kaoru Tsujii, Yoshihisa Katsuragi, Kenzo Kurihara, and Junzo Sunamoto* 415

Cloning and Expression of a cDNA Encoding the Homologue of Ran/TC4 GTP-Binding Protein from *Plasmodium falciparum* *Franklyn F. Dontfraid and Debopam Chakrabarti* 423

Stage-Specific Changes in Protein Phosphorylation during Spore Germination in *Dictyostelium*: Role of Calmodulin *Michael A. Lydan, David A. Cotter, and Danton H. O'Day* 430

Activation of Soluble Guanylyl Cyclase by a Factor Other Than Nitric Oxide or Carbon Monoxide Contributes to the Vascular Hyporeactivity to Vasoconstrictor Agents in the Aorta of Rats Treated with Endotoxin *Chin-Chen Wu, Csaba Szabó, Shiu-Jen Chen, Christoph Thiemermann, and John R. Vane* 436

Isolation of a Lipid-Soluble Histamine Release Factor from Human Platelets *Amanda E. I. Proudfoot, Raffaella Gatto, Timothy N. C. Wells, and Kevin B. Bacon* 443

Human Melanoma Cells Express Functional Endothelin-1 Receptors *Joseph J. Yohn, Christopher Smith, Troy Stevens, Talia A. Hoffman, Joseph G. Morelli, David L. Hurt, Masashi Yanagisawa, Madeleine A. Kane, and Martin R. Zamora* 449

Characterization of the G-Protein-Linked Orphan Receptor GPRN1/RDC1 *Norman M. Law and Steven A. Rosenzweig* 458

Identification of *dnaK* Multigene Family in *Synechococcus* sp. PCC7942 *Kaori Nimura, Hirofumi Yoshikawa, and Hideo Takahashi* 466

Free Radical Bombing of Spermatozoa in Spermatic Granuloma: An Attempt to Prevent Autoimmune Switch-On *Suvro Chatterjee, Malini Laloraya, and G. Pradeep Kumar* 472

Molecular Cloning and Nucleotide Sequence of Complementary DNA for Human Hepatic Cytosolic Acetoacetyl-Coenzyme A Thiolase *Xiang-Qian Song, Toshiyuki Fukao, Seiji Yamaguchi, Shoko Miyazawa, Takashi Hashimoto, and Tadao Orii* 478

ERRATUM
Volume 199, Number 3, March 30, 1994: J. Deruère, F. Bouvier, J. Steppuhn, A. Klein, B. Camara, and M. Kuntz, "Structure and Expression of Two Plant Genes Encoding Chromoplast-Specific Proteins: Occurrence of Partially Spliced Transcripts," pp. 1144–1150 486

Volume 201, Number 2, June 15, 1994

The Effect of Sulfite on the ATP Hydrolysis and Synthesis Activity of Membrane-Bound H$^+$-ATP Synthase from Various Species *Ronald H. A. Bakels, Hendrika S. Van Walraven, John E. Van Wielink, Ingrid Van Der Zwet-De Graaff, Bea E. Krenn, Klaas Krab, Jan A. Berden, and Ruud Kraayenhof* 487

Mouse Macrophage Derived Monocyte Chemotactic Protein-3: cDNA Cloning and Identification as MARC/FIC *Sven Thirion, Guy Nys, Pierre Fiten, Stefan Masure, Jo Van Damme, and Ghislain Opdenakker* 493

Apoptosis of Human Adipocytes *in Vitro* *Johannes B. Prins, Neal I. Walker, Clay M. Winterford, and Donald P. Cameron* 500

Adenosine Acts as an Endogenous Activator of the Cellular Antioxidant Defense System *Sanjay B. Maggirwar, David N. Dhanraj, Satu M. Somani, and Vickram Ramkumar* 508

Reconstitution of the Isobutene-Forming Reaction Catalyzed by Cytochrome P450 and P450 Reductase from *Rhodotorula minuta:* Decarboxylation with the Formation of Isobutene *Hideo Fukuda, Takao Fujii, Eiki Sukita, Masato Tazaki, Shizuo Nagahama, and Takahira Ogawa* 516

Mutation of Aspartate Residues in the Third Extracellular Loop of the Rat B_2 Bradykinin Receptor Decreases Affinity for Bradykinin *Elizabeth A. Novotny, Donna L. Bednar, Maureen A. Connolly, Jane R. Connor, and Thomas M. Stormann* 523

Identification and Possible Localization of cGMP-Dependent Protein Kinase in Bovine Aortic Endothelial Cells *Lee Ann MacMillan-Crow, Joanne E. Murphy-Ullrich, and Thomas M. Lincoln* 531

Isolation and Characterization of Vascular Endothelial Cells Derived from Mice Lacking Endothelin-1 *Koji Maemura, Hiroki Kurihara, Yukiko Kurihara, Ryozo Nagai, and Yoshio Yazaki* 538

Effect of the Order of Antibody Variable Regions on the Expression of the Single-Chain HyHEL10 Fv Fragment in *Escherichia coli* and the Thermodynamic Analysis of Its Antigen-Binding Properties *Kouhei Tsumoto, Yuichiro Nakaoki, Yoshitaka Ueda, Kyoko Ogasahara, Katsuhide Yutani, Kimitsuna Watanabe, and Izumi Kumagai* 546

The Heat Shock Transcription Factor in Liver Exists in a Form That Has DNA Binding Activity but No Transcriptional Activity *Ryoya Takahashi, Ahmad R. Heydari, Astrid Gutsmann, Marian Sabia, and Arlan Richardson* 552

Caffeine Biotransformation in Human Hepatocyte Lines Derived from Normal Liver Tissue *Eve A. Roberts, Katryn N. Furuya, Bing K. Tang, and Werner Kalow* 559

Translation Initiation from Non-AUG Codons in COS1 Cells Is mRNA Species Dependent *Kailash C. Gupta, Etsuro Ono, Edgardo V. Ariztia, and Mutsumi Inaba* 567

Ki-*ras* and c-*myc* Oncogene Expression Measured by Coamplification Polymerase Chain Reaction *Takuji Sugimoto, Fumine Tsukamato, Masahide Fujita, and Shinichiro Takai* 574

Effects of Suramin on Expression of Proliferation-Associated Nuclear Antigens in DU-145 Prostate Carcinoma Cells *Liang Qiao, John G. Pizzolo, and Myron R. Melamed* 581

Potent Inhibition of Cdc2 Kinase Activity by the Flavonoid L86-8275 *Michael D. Losiewicz, Bradley A. Carlson, Gurmeet Kaur, Edward A. Sausville, and Peter J. Worland* 589

Multiple Binding Sites on the Superantigen, Staphylococcal Enterotoxin B, Imparts Versatility in Binding to MHC Class II Molecules *Jeanne M. Soos and Howard M. Johnson* 596

Potent Transforming Activity of the G_{13} α Subunit Defines a Novel Family of Oncogenes *Ningzhi Xu, Tatyana Voyno-Yasenetskaya, and J. Silvio Gutkind* 603

The Rat Amyloid Precursor Protein Promoter Contains Two DNA Regulatory Elements Which Influence High Level Gene Expression *Peter W. Hoffman and Jeffrey M. Chernak* 610

Identification of Two Distinct Promoters in the Chicken Caldesmon Gene *Hajime Yano, Ken'ichiro Hayashi, Masaki Haruna, and Kenji Sobue* 618

Erythrocyte Tropomodulin Binds to the N-Terminus of hTM5, a Tropomyosin Isoform Encoded by the γ-Tropomyosin Gene *Lanping Amy Sung and Jim J.-C. Lin* 627

TFPACD, a Novel Bifunctional Reagent for Reacting with DCCD Sites in Proteins: Studies Using *Escherichia coli* ATP Synthase *A. S. Phadke, R. Aggeler, J. F. W. Keana, and R. A. Capaldi* 635

Dopamine Inhibits TRH-Induced MAP Kinase Activation in Dispersed Rat Anterior Pituitary Cells *Masahide Ohmichi, Koji Koike, Ataru Nohara, Yuuki Kanda, Toshiki Sakamoto, Zhen Xian Zhang, Kenji Hirota, and Akira Miyake* 642

Expression of TGF-βs and TGF-β Type II Receptor mRNAs in Mouse Folliculogenesis: Stored Maternal TGF-β2 Message in Oocytes *Peter Schmid, David Cox, Herman van der Putten, Gary K. McMaster, and Graeme Bilbe* 649

Expression of Matrilysin mRNA in Colorectal Adenomas and Its Induction by Truncated Fibronectin *Hiroyuki Yamamoto, Fumio Itoh, Yuji Hinoda, Akinori Senota, Mitsuru Yoshimoto, Hideaki Nakamura, Kohzoh Imai, and Akira Yachi* 657

Kinetin Delays the Onset of Aging Characteristics in Human Fibroblasts *Suresh I. S. Rattan and Brian F. C. Clark* 665

Growth Inhibition of SV40-Transformed Human Keratinocytes by TGF-βs Is Not Linked to Dephosphorylation of the Rb Gene Product *Manabu Koike, Keiko Ishino, Nam-ho Huh, and Toshio Kuroki* 673

Ubiquitin Gene Expression in Skeletal Muscle Is Increased by Tumor Necrosis Factor-α *Cèlia García-Martínez, Marta Llovera, Neus Agell, Francisco J. López-Soriano, and Josep M. Argilés* 682

Dimaprit Analogs Inhibit Tyrosinase via a Disulfide Breakdown Product Independently of the Histamine H_2 Receptor *G. A. Fechner, J. J. Jacobs, and P. G. Parsons* 687

Baculovirus Mediated High Level Expression of Human Placental Aromatase (CYP19A1) *Randy O. Sigle, Mark A. Titus, Nobuhiro Harada, and Sidney D. Nelson* 694

Genetic Tests to Reveal Tat Homodimer Formation and Select Tat Homodimer Inhibitor *Piero A. Battaglia, Fatima Longo, Carmela Ciotta, Maria F. Del Grosso, Elena Ambrosini, and Franca Gigliani* 701

The Interpretation of the Time-Resolved Fluorescence Anisotropy of Diphenylhexatriene-Phosphatidylcholine Using the Compound Motion Model *Johan M. Muller, Ernst E. van Faassen, and Gijsbert van Ginkel* 709

Proteolytic Degradation of Microtubule-Associated Protein τ by Thrombin *Ole Frilev Olesen* 716

Concentration of Serum Amyloid P Component in the CSF as a Possible Marker of Cerebral Amyloid Deposits in Alzheimer's Disease *P. N. Hawkins, M. N. Rossor, J. Ruth Gallimore, B. Miller, E. G. Moore, and M. B. Pepys* 722

Cloning and Sequence Analysis of the Gene Encoding Pyruvate Kinase in *Trypanoplasma borelli* *Isabelle Ernest, Fred R. Opperdoes, and Paul A. M. Michels* 727

Phospholipase D Is Activated by Phorbol Ester but Not CSF-1 in Murine Bone Marrow-Derived Macrophages *Anthony Jaworowski, Stella Argyriou, Permeen Yusoff, and John A. Hamilton* 733

Phosphorylation of c-Raf-1 by Protein Kinase A Interferes with Activation *Kira Schramm, Monika Niehof, Gerald Radziwill, Christian Rommel, and Karin Moelling* 740

The Nitric Oxide-Scavenging Properties of Ginkgo Biloba Extract EGb 761 *Lucia Marcocci, John J. Maguire, Marie Therese Droy-Lefaix, and Lester Packer* 748

Interferon-γ Induces Resistance in Primary Monocytes against Human Immunodeficiency Virus Type-1 Infection *Subhash Dhawan, Alonso Heredia, Renu B. Lal, Larry M. Wahl, Jay S. Epstein, and Indira K. Hewlett* 756

Nitric Oxide Limits Transcriptional Induction of Nitric Oxide Synthase in CNS Glial Cells *Song Kyu Park, Hsin Lee Lin, and Sean Murphy* 762

The Yeast Plasma Membrane Uracil Permease Is Stabilized against Stress-Induced Degradation by a Point Mutation in a Cyclin-like "Destruction Box" *Jean Marc Galan, Christiane Volland, Danièle Urban-Grimal, and Rosine Haguenauer-Tsapis* 769

A Calcium-Activated Potassium Channel in Growth Plate Chondrocytes: Regulation by Protein Kinase A *Kathryn J. Long and Kenneth B. Walsh* 776

Ligand Blot Identification of a *Manduca sexta* Midgut Binding Protein Specific to Three *Bacillus thuringiensis* CryIA-Type ICPs *Amparo C. Martínez-Ramírez, Sergio González-Nebauer, Baltasar Escriche, and M. Dolores Real* 782

Intracellular Proteolysis and Limited Diversity of the *Bacillus thuringiensis* CryIA Family of the Insecticidal Crystal Proteins *Brian D. Almond and Donald H. Dean* 788

Autoproteolytic Activation of the Mouse Prohormone Convertase mPC1 *Laurie J. Goodman and Cornelia M. Gorman* 795

Cloning and Expression Kinetics of Porcine Vascular Cell Adhesion Molecule *Yvonne T. M. Tsang, Dorian O. Haskard, and Martyn K. Robinson* 805

IGF-I Induces the Uncoupling Protein Gene Expression in Fetal Rat Brown Adipocyte Primary Cultures: Role of C/EBP Transcription Factors *Carmen Guerra, Manuel Benito, and Margarita Fernández* 813

Intrinsic Fluorescence of *Escherichia coli* RNA Polymerase as a Probe for Its Conformational Changes during Transcription Initiation *Ranjan Sen and Dipak Dasgupta* 820

Protein Tyrosine Phosphorylation Triggered by Human FCγRII *Ziting Liu, Deborah Pudiak, and Richard J. Looney* 829

Fluorogenic Peptides Containing Only α-Amino Acids *Wei Wang and T. Chyau Liang* 835

Introns Determine the Time of Appearance of PCNA mRNA in 3T3 Cells Stimulated by Growth Factors *Renée-Hélène Charollais, Ewa Surmacz, and Renato Baserga* 841

Sequence Analysis of the Third *dnaK* Homolog Gene in *Synechococcus* sp. PCC7942 *Kaori Nimura, Hirofumi Yoshikawa, and Hideo Takahashi* 848

Signaling via MHC Class II Molecules Selectively Induces IL-1β over IL-1 Receptor Antagonist Gene Expression *Reem Al-Daccak, Khalil Mehindate, Patrice E. Poubelle, and Walid Mourad* 855

Human and Rat Osteoblast-like Cells Express Stathmin, a Growth-Regulatory Protein *Rajiv Kumar and James D. Haugen* 861

Site-Directed Substitutions Suggest That His-418 of β-Galactosidase (*Escherichia coli*) Is a Ligand to Mg^{2+} *Nathan J. Roth and Reuben E. Huber* 866

Role of Zinc-Coordination and of the Glutathione Redox Couple in the Redox Susceptibility of Human Transcription Factor Sp1 *Lea Knoepfel, Christian Steinkühler, Maria-Teresa Carrì, and Giuseppe Rotilio* 871

A Stable Leukocyte-Derived Factor Inhibits Platelet Aggregation *James J. Liu, Bing Xie, Ian L. Smith, Colin I. Johnston, and Brian F. Buxton* 878

Nitric Oxide Is Present in Exhaled Breath in Humans: Direct GC–MS Confirmation *A. M. Leone, L. E. Gustafsson, P. L. Francis, M. G. Persson, N. P. Wiklund, and S. Moncada* 883

Delivery of Plasmid DNA to Glial Cells Using pH-Sensitive Immunoliposomes *Eric G. Holmberg, Quentin R. Reuer, Eldon E. Geisert, and Jesse L. Owens* 888

Molecular Cloning of the Human Histamine H1 Receptor Gene *Hiroyuki Fukui, Katsumi Fujimoto, Hiroyuki Mizuguchi, Kazuichi Sakamoto, Yoshiyuki Horio, Setsuo Takai, Kiyomi Yamada, and Seiji Ito* 894

Epidermal Growth Factor Counteracts Insulin-Induced Expression of Glucokinase in Hepatocytes *Guy W. Beresford and Loranne Agius* 902

Increase of Phosphotyrosine Levels in Mouse Urine and Liver during Liver Regeneration after Partial Hepatectomy *Hiroyuki Kataoka, Kiyohiko Nakai and Masami Makita* 909

Zinc Content of Promatrilysin, Matrilysin, and the Stromelysin Catalytic Domain *Dulce Soler, Tsutomu Nomizu, Willis E. Brown, Ming Chen, Qi-Zhuang Ye, Harold E. Van Wart, and David S. Auld* 917

Cytokines Induce Nitric Oxide Production in Mouse Osteoblasts *Petros D. Damoulis and Peter V. Hauschka* 924

Changes in Carnitine Palmitoyltransferase-I mRNA Abundance Produced by Hyperthyroidism and Hypothyroidism Parallel Changes in Activity *Randall L. Mynatt, Edwards A. Park, Fayanne E. Thorngate, Hriday K. Das, and George A. Cook* 932

Cloning and Expression of the Gene Encoding the 7Fe Type Ferredoxin from a Thermophilic Hydrogen Oxidizing Bacterium, *Bacillus schlegelii* *Shigetoshi Aono, Satoshi Nakamura, Rikizo Aono, and Ichiro Okura* 938

Gene Targeting Constructs: Effects of Vector Topology on Co-expression Efficiency of Positive and Negative Selectable Marker Genes *Andreas Zimmer, Anne Zimmer, and Kay Reynolds* 943

Stimulation of Transcription Factors NFκB and AP1 in Endothelial Cells Subjected to Shear Stress *Qiuxia Lan, Kwesi O. Mercurius, and Peter F. Davies* 950

Proline–Protein Interactions: Protection of Structural and Functional Integrity of M_4 Lactate Dehydrogenase *Chadalavada S. V. Rajendrakumar, Boojala V. B. Reddy, and Arjula R. Reddy* 957

Developmental Expression of the Glucose-Dependent Insulinotropic Polypeptide Gene in Rat Intestine *Yoshifumi Higashimoto and Rodger A. Liddle* 964

Induction of the Cytochrome P450 3A Subfamily in Rat Liver Correlates with the Binding of Inducers to a Microsomal Protein *Matthew C. Wright and Alan J. Paine* 973

Changes in Homeobox-Containing Gene Expression during Ectopic Bone Formation Induced by Bone Morphogenetic Protein *Tadahiro Iimura, Shinichiro Oida, Kohsuke Takeda, Yutaka Maruoka, and Satoshi Sasaki* 980

Inhibition of *Sendai* Virus Hemagglutinin Neuraminidase by the Fusion Protein *Franco Dallocchio, Maurizio Tomasi, and Tiziana Bellini* 988

Molecular Cloning and Characterization of Murine Cyclin E *Ivan Damjanov, Jin Shan, Rong Fu Wang, Andrea Damjanov, and Julie A. DeLoia* 994

Antisense *src* Expression Inhibits U937 Human Leukemia Cell Proliferation in Conjunction with Reduction of c-*myb* Expression *Masato Waki, Akira Kitanaka, Hiroshi Kamano, Terukazu Tanaka, Yoshitsugu Kubota, Hiroaki Ohnishi, Jiro Takahara, and Shozo Irino* 1001

Antibodies Elicited by the Primary Response Are Useful as Ligands for Immunoaffinity Chromatography *Atsushi Enomoto, Naoshi Kamata, and Kozo Nakamura* 1008

Oxidized Low Density Lipoprotein Increases U937 Cell 5-Lipoxygenase Activity: Induction of 5-Lipoxygenase Activating Protein *Alex Fair and Kirkwood A. Pritchard, Jr.* 1014

cDNA Cloning and Expression of *Cry j* II, the Second Major Allergen of Japanese Cedar Pollen *Naoki Komiyama, Toshio Sone, Kimiko Shimizu, Keiko Morikubo, and Kohsuke Kino* 1021

Adrenoleukodystrophy Gene Encodes an 80-kDa Membrane Protein *Takuro Kobayashi, Takeshi Yamada, Taeko Yasutake, Nobue Shinnoh, Ikuo Goto, and Toru Iwaki* 1029

In Vivo Pharmacokinetics of Nitroxides in Mice *Andrei M. Komarov, Joy Joseph, and Ching-San Lai* 1035

Phospholipase C-γ_1 Is Present on the Surface of Human Colorectal Cancer Cells *Timothy J. Yeatman, Weiguang Mao, Richard C. Karl, and Julie Y. Djeu* 1043

Appearance of a Novel Ca^{2+} Influx Pathway in Sf9 Insect Cells Following Expression of the Transient Receptor Potential-like (*trpl*) Protein of *Drosophila* *Yanfang Hu, Luis Vaca, Xi Xhu, Lutz Birnbaumer, Diana L. Kunze, and William P. Schilling* 1050

The N-Terminal Region of Mature Mitochondrial Aspartate Aminotransferase Can Direct Cytosolic Dihydrofolate Reductase into Mitochondria *in Vitro* *Sergio Giannattasio, Amalia Azzariti, Ersilia Marra, and Ernesto Quagliariello* 1059

An Improved Matrix-Type Controlled Release System for Basic Fibroblast Growth Factor *M. J. Hickey and W. A. Morrison* 1066

Microsomal Localization of Cyclin A and cdk2 in Proliferating Rat Liver Cells *Anna Castro, Montserrat Jaumot, Marcel Vergés, Neus Agell, and Oriol Bachs* 1072

Cooperative Binding of Zinc to an Aminoacyl-tRNA Synthetase *Min-Xian Wu, Shelby J. Filley, and Kelvin A. W. Hill* 1079

Binding and Bioeffects of Ipriflavone on a Human Preosteoclastic Cell Line *S. Benvenuti, M. Petilli, U. Frediani, A. Tanini, G. Fiorelli, S. Bianchi, P. A. Bernabei, C. Albanese, and M. L. Brandi* 1084

Interaction between Cytochrome P450 2B1 and Cytochrome b_5: Inhibition by Synthetic Peptides Indicates a Role for P450 Residues Lys-122 and Arg-125 *Yoshiaki Omata, Hiroshi Sakamoto, Richard C. Robinson, Matthew R. Pincus, and Fred K. Friedman* 1090

Detection of α-Urease Dissociation by Fluorescence Emission Spectroscopy *S. Omar and M. Beauregard* 1096

Tyrosine Phosphorylation of Phospholipase C-γ2 Is Involved in the Activation of Phoshoinositide Hydroloysis by Fc Receptors in Human Neutrophils *Stefano Dusi, Marta Donini, Vittorina Della Bianca, and Filippo Rossi* 1100

D-Ribose and Deoxy-D-Ribose Induce Apoptosis in Human Quiescent Peripheral Blood Mononuclear Cells *D. Barbieri, E. Grassilli, D. Monti, S. Salvioli, M. G. Franceschini, A. Franchini, E. Bellesia, P. Salomoni, P. Negro, M. Capri, L. Troiano, A. Cossarizza, and C. Franceschi* 1109

Molecular Determinants of Calcium-Dependent Inactivation in Cardiac L-Type Calcium Channels *Shuqin Zong, Jiuying Zhou, and Tsutomu Tanabe* 1117

A New LIM Protein Containing an Autoepitope Homologous to "Senescent Cell Antigen" *Ann Rearden* 1124

Formation of 8-Hydroxy-2'-deoxyguanosine in Epidermis of Hairless Mice Exposed to Near-UV *Yukari Hattori-Nakakuki, Chikako Nishigori, Keisei Okamoto, Sadao Imamura, Hiroshi Hiai, and Shinya Toyokuni* 1132

Evidence That Human Bone Cells in Culture Contain Binding Sites for Osteogenic Protein-1 *Rashmi Malpe, David J. Baylink, T. Kuber Sampath, and Subburaman Mohan* 1140

Cyclic Peptide Inhibitors of Phosphatidylinositol 3-Kinase p85 SH2 Domain Binding *Terrence R. Burke, Jr., Motoyoshi Nomizu, Akira Otaka, Mark S. Smyth, Peter P. Roller, Randi D. Case, Gert Wolf, and Steven E. Shoelson* 1148

Evidence That α-Fetoprotein Suppresses the Immunological Function in Transgenic Mice *Tadashi Yamashita, Akio Nakane, Tomomasa Watanabe, Ichiro Miyoshi, and Noriyuki Kasai* 1154

Endothelial Cells Actively Synthesize and Secrete Adrenomedullin *Shin Sugo, Naoto Minamino, Kenji Kangawa, Kaoru Miyamoto, Kazuo Kitamura, Junichiro Sakata, Tanenao Eto, and Hisayuki Matsuo* 1160

Two Histidines Are Essential for the Activity of the β-Galactosidase from *Lactobacillus delbrückii* subsp. Bulgaricus *Keith Moon, Sienna Yoast, Anthony L. Palombella, Stanley E. Mainzer, and Brian F. Schmidt* 1167

Kupffer Cells Cytotoxicity against Hepatoma Cells Is Related to Nitric Oxide *Keiya Aono, Ken-ichi Isobe, Izumi Nakashima, Shinji Kondo, Masahiko Miyachi, and Yuji Nimura* 1175

Effect of Thyrotropin on Inositol Phospholipids Pathway in Human Thyroid Nontoxic Goiter *Piotr Mośko, Wiesław Zarzycki, Leokadia Jaroszewicz, and Ida Kinalska* 1182

Dexamethasone Suppresses Elastin Gene Expression in Human Skin Fibroblasts in Culture *Veli-Matti Kähäri* 1189

Interaction of Human P1 and P2 Protamines with DNA *F. Bianchi, R. Rousseaux-Prevost, C. Bailly, and J. Rousseaux* 1197

Presence of a Retinoid Responsive Element in the Promoter Region of the Human Cytochrome P4501A1 Gene *F. Vecchini, M. C. Lenoir-Viale, C. Cathelineau, J. Magdalou, B. A. Bernard, and B. Shroot* 1205

Photocleavable Nitrobenzyl–Protein Conjugates *Stephen Thompson, Julia A. Spoors, Marie-Claude Fawcett, and Colin H.Self* 1213

Tight Hormonal Control of PRP Gene Expression in Endocrine Pancreatic Cells *Fouad Atouf, Raphael Scharfmann, and Paul Czernichow* 1220

Molecular Cloning of a Novel mRNA (Neuronatin) That Is Highly Expressed in Neonatal Mammalian Brain *Rajiv Joseph, Dexian Dou, and Wayne Tsang* 1227

β_2-Microglobulin Modified with Advanced Glycation End Products Induces Interleukin-6 from Human Macrophages: Role in the Pathogenesis of Hemodialysis-Associated Amyloidosis *Yoshiyasu Iida, Toshio Miyata, Reiko Inagi, Satoshi Sugiyama, and Kenji Maeda* 1235

Staphylococcal Protein A Containing Phospholipid Monolayers on Aqueous and Solid Surfaces *Bin Lu, Ning Yie, and Yu Wei* 1242

Hypothyroidism Increases TRH and TRH Precursor Levels in Rat Anterior Pituitary *Gilles Croissandeau, Dominique Grouselle, J. Yuan Li, Maria Roche, Françoise Peillon, and Michèle Le Dafniet* 1248

A Sequence from a Tryptophan-Hyperproducing Strain of *Corynebacterium glutamicum* Encoding Resistance to 5-Methyltryptophan *David M. Heery, Richard Fitzpatrick, and L. Kieran Dunican* 1255

Photoreleased Intracellular Ca^{2+} Evokes Reversible Mechanical Responses in Supporting Cells of the Guinea-Pig Organ of Corti *D. Dulon, C. Blanchet, and E. Laffon* 1263

Concanamycin A: A Powerful Inhibitor of Enveloped Animal Virus Entry into Cells *Rosario Guinea and Luis Carrasco* 1270

Identification of Novel Phosphorylation Sites in the β-Subunit of Translation Initiation Factor eIF-2 *Gavin I. Welsh, Nigel T. Price, Bellinda A. Bladergroen, Graham Bloomberg, and Christopher G. Proud* 1279

Isolation and Characterization of a Rat Luteal cDNA Encoding 20α-Hydroxysteroid Dehydrogenase *J. Mao, W. R. Duan, C. T. Albarracin, T. G. Parmer, and G. Gibori* 1289

Cloning, Expression, and Characterization of Human α Adrenergic Receptors α_{1a}, α_{1b}, and α_{1c} *David H. Weinberg, Prashant Trivedi, Carina P. Tan, Sudha Mitra, Ann Perkins-Barrow, Doreen Borkowski, Catherine D. Strader, and Marvin Bayne* 1296

Sensitivity of (138 Glu→Lys) Mutated Human Immunodeficiency Virus Type 1 (HIV-1) Reverse Transcriptase (RT) to HIV-1-Specific RT Inhibitors *Jan Balzarini, Jörg-Peter Kleim, Günther Riess, Maria-José Camarasa, Erik De Clercq, and Anna Karlsson* 1305

Binding of Benzoquinoid Ansamycins to p100 Correlates with Their Ability to Deplete the *erb*B2 Gene Product p185 *Penny Miller, Rodney C. Schnur, Elsa Barbacci, Mikel P. Moyer, and James D. Moyer* 1313

Occurrence of a P450 Showing High Homology to Yeast Lanosterol 14-Demethylase ($P450_{14DM}$) in the Rat Liver *Yuri Aoyama, Yoshihiko Funae, Mitsuhide Noshiro, Tadao Horiuchi, and Yuzo Yoshida* 1320

17 β Hydroxysteroid Dehydrogenase 1 "Pseudogene" Is Differentially Transcribed: Still a Candidate for the Breast–Ovarian Cancer Susceptibility Gene (BRCA1) *Isabelle Touitou, Qiu-Qiong Cai, and Henri Rochefort* 1327

Effect of Menthol on Cytosolic Ca^{2+} Levels in Canine Airway Epithelium in Culture *Satomi Takeuchi, Jun Tamaoki, Mitsuko Kondo, and Kimio Konno* 1333

Zn-α_2-Glycoprotein Is a Novel Adhesive Protein *Masaru Takagaki, Kouichi Honke, Taiji Tsukamoto, Shigeki Higashiyama, Naoyuki Taniguchi, Akira Makita, and Iwao Ohkubo* 1339

Spectral Intermediate in the Reaction of Ferrous Cytochrome $P450_{cam}$ with Superoxide Anion *Kazuo Kobayashi, Tomonori Iwamoto, and Kazuhiko Honda* 1348

Ethanol Treatment Up Regulates the Expression of Mitochondrial Manganese Superoxide Dismutase in Rat Liver *O. R. Koch, M. E. De Leo, S. Borrello, G. Palombini, and T. Galeotti* 1356

Identification of Human Melanoma Cellular and Secreted Ligands for Galectin-3 *Hidenori Inohara and Avraham Raz* 1366

Butyrylcholinesterase Amphiphilic Forms of the Mucosal Cells of Rat Intestine Bind Heparin *Jean-Pierre Sine, Jean-Pierre Toutant, and Bernard Colas* 1376

The Seventh Transmembrane Domain of Gastrin/CCK Receptors Contributes to Non-peptide Antagonist Binding *Theo Mantamadiotis and Graham S. Baldwin* 1382

Close Colocalization of CD4 and a Serine Esterase Tryptase TL_2 on the Cell Surface of Human Monocytoid and $CD4^+$ Lymphoid Cells *Masahiro Inoue, Tomoaki Hoshino, Toshihide Fukuma, Yasuharu Niwa, and Hiroshi Kido* 1390

Common Structural Patterns of Cytokine Outer Surfaces *Alexander I. Denesyuk, Vladimir P. Zav'yalov, and Timo Korpela* 1396

Modeling of Interhelical Contacts in Interferons-β, -γ, and Dimeric Interleukin-5 *Alexander I. Denesyuk, Vladimir P. Zav'yalov, and Timo Korpela* 1401

Serum Response Factor Associated ETS Proteins: Ternary Complex Factors and PEA3-Binding Factor *Shu-Hui Liu and Sun-Yu Ng* 1406

Isolation of Multiple Isoforms of α-Fibrinogenase from the Western Diamondback Rattlesnake, *Crotalus atrox*: N-Terminal Sequence Homology with Ancrod, an Antithrombotic Agent from Malayan Viper *Chin-Chun Hung and Shyh-Horng Chiou* 1414

Inhibition of 3'Azido-3'Deoxythymidine-Resistant HIV-1 Infection by Dehydroepiandrosterone *in Vitro* *Jyh-Yuan Yang, Arthur Schwartz, and Earl E. Henderson* 1424

Ser-143 Is an Essential Active Site Residue in Histidine Ammonia Lyase of *Pseudomonas putidaDennis Hernandez and Allen T. Phillips* 1433

Dithiothreitol Stimulates Insulin Receptor Autophosphorylation at the Juxtamembrane Domain *Jan Engl, Margaret Moule, and Cecil C. Yip* 1439

Nuclear Localization of Tumor Necrosis Factor-α in Human Osteoblast-like Cells *Fotinos S. Panagakos and Suriender Kumar* 1445

Site Selectivity in the Glycation of αA- and αB-Crystallins by Glucose *E. C. Abraham, M. Cherian, and J. B. Smith* 1451

Effects of Tri-Calciphor (Trimer of 16, 16-Dimethyl-15-dehydroprostaglandin B_1 on Glucose Metabolism in Liver Cells *Rafael Villalobos-Molina and Thomas M. Devlin* 1457

Evidence for Compound I Formation in the Reaction of Cytochrome P450cam with *m*-Chloroperbenzoic Acid *Tsuyoshi Egawa, Hideo Shimada, and Yuzuru Ishimura* 1464

Calyculin A, Okadaic Acid, and W-7 Interfere with a Distal Step in Pancreatic Acinar Signal Transduction *Alexander Meyer-Alber, Isabelle Fetz, Ingo H. Waschulewski, Michael Höcker, Ulrich R. Fölsch, and Wolfgang E. Schmidt* 1470

Dietary Ellagic Acid Inhibits the Enzymatic Activity of CYP1A1 without Altering Hepatic Concentrations of CYP1A1 or CYP1A1 mRNA *David H. Barch, Lynn M. Rundhaugen, Paul E. Thomas, and Paul Kardos* 1477

Regulation of Cholecystokinin Secretion by Calcium-Dependent Calmodulin Kinase II: Differential Effects of Phenylalanine and cAMP *Veronica Prpic, Srisaila Basavappa, Rodger A. Liddle, and Allen W. Mangel* 1483

Phosphorylation States of Actin Filament Adenine Nucleotides in Detergent-Extracted Neuronal Cytoskeletal Fractions *James M. Angelastro and Daniel L. Purich* 1490

Genetic Instability of Microsatellite Markers in Region q22.3–q31 of Chromosome 9 in Skin Squamous Cell Carcinomas *Peter G. Zaphiropoulos, Peter Söderkvist, Mari-Anne Hedblad, and Rune Toftgård* 1495

Construction and Serological Characterization of a Recombinant Human Single Chain T-Cell Receptor *Douglas F. Lake, Ralph M. Bernstein, Evan M. Hersh, Hulya Kaymaz, Samuel F. Schluter, and John J. Marchalonis* 1502

Inverse Relationship between Catenation and Superhelicity in Newly Replicated Simian Virus 40 Daughter Chromosomes *Paskasari A. Permana, Christopher A. Ferrer, and Robert M. Snapka* 1510

Increased Coexpression of CFTR and S-100 Calcium Binding Proteins MRP8 and MRP14 mRNAs in Cystic Fibrosis Human Tracheal Gland Cells *Wanda Renaud, Marc Merten, and Catherine Figarella* 1518

Study of 5′-Flanking Region of Human Cu/Zn Superoxide Dismutase *Hong Tae Kim, Young Ho Kim, Jung wha Nam, Han Joo Lee, Hyune Mo Rho, and Guhung Jung* 1526

Antisense *src* Expression Inhibits Proliferation and Erythropoietin-Induced Erythroid Differentiation of K562 Human Leukemia Cells *Akira Kitanaka, Masato Waki, Hiroshi Kamano, Terukazu Tanaka, Yoshitsugu Kubota, Hiroaki Ohnishi, Jiro Takahara, and Shozo Irino* 1534

Peroxisomal Acyl-Coenzyme A Oxidase Is a Rate-Limiting Enzyme in a Very Long-Chain Fatty Acid β-Oxidation System *Toshifumi Aoyama, Masayoshi Souri, Takehiko Kamijo, Seiichi Ushikubo, and Takashi Hashimoto* 1541

BiP Is a Substrate for src Kinase *in Vitro* *Anthony Carlino, Hector Toledo, Vincent Vidal, Betty Redfield, Jeffrey Strassman, M. Abdel-Ghany, Efraim Racker, Herbert Weissbach, and Nathan Brot* 1548

Separation and Partial Characterization of Soluble Fatty Acid α-Hydroxylase from *Sphingomonas paucimobilus* *Isamu Matsunaga, Emi Kusunose, Ikuya Yano, and Kosuke Ichihara* 1554

Gene Replacement of the p53 Gene with the *lacZ* Gene in Mouse Embryonic Stem Cells and Mice by Using Two Steps of Homologous Recombination *Yoichi Gondo, Kenji Nakamura, Kazuki Nakao, Toshikuni Sasaoka, Ken-ichi Ito, Minoru Kimura, and Motoya Katsuki* 1561

Increased Plasma and Lipoprotein Lipid Peroxidation in apo E-Deficient Mice *Tony Hayek, Judith Oiknine, J. Gerald Brook, and Michael Aviram* 1567

Author Index for Volume 201 1575

Volume 202, Number 1, July 15, 1994

Glucocorticoids Inhibit the Proliferation of Mucosal Cells and Enhance the Expression of a Gene for Pepsinogen and Other Markers of Differentiation in the Stomach Mucosa of the Adult Rat *Shinko Tsukada, Masao Ichinose, Masae Tatematsu, Noriaki Tezuka, Satoshi Yonezawa, Nobuyuki Kakei, Masashi Matsushima, Kazumasa Miki, Kiyoshi Kurokawa, Takashi Kageyama, Kenji Takahashi, and Hiroshi Fukamachi* 1

Hunt for Singlet Oxygen under *in Vivo* Conditions *Dezső Gál* 10

TPA-Induced Differentiation of Human Rhabdomyosarcoma Cells Involves Dephosphorylation and Nuclear Accumulation of Mutant p53 *Antonia Germani, Carlo Fusco, Stefano Martinotti, Antonio Musarò, Mario Molinaro, and Bianca Maria Zani* 17

Synthetic Peptide Corresponding to 30 Amino Acids of the C-Terminal of Neuron-Specific Enolase Promotes Survival of Neocortical Neurons in Culture *Tatsuya Hattori, Keiko Ohsawa, Yoshikuni Mizuno, Kanefusa Kato, and Shinichi Kohsaka* 25

Potassium Channels of Pig Articular Chondrocytes Are Blocked by Propofol *Jerzy W. Mozrzymas, Massimo Visintin, Franco Vittur, and Fabio Ruzzier* 31

Presence of Dityrosine Bridges in Thyroglobulin and Their Relationship with Iodination *Antonio Leonardi, Renato Acquaviva, Michele Marinaccio, Domenico Liguoro, Federico Fogolari, Bruno Di Jeso, Silvestro Formisano, and Eduardo Consiglio* 38

Induction of the Putative Copper ATPases, CopA and CopB, of *Enterococcus hirae* by Ag^+ and Cu^{2+}, and Ag^+ Extrusion by CopB *Alex Odermatt, Reto Krapf, and Marc Solioz* 44

Structural Comparison of Human and Rat Prostate-Specific Acid Phosphatase Genes and Their Promoters: Identification of Putative Androgen Response Elements *Pirjo Virkkunen, Pirjo Hedberg, Jorma J. Palvimo, Elli Birr, Katja Porvari, Minna Ruokonen, Päivi Taavitsainen, Ollie A. Jänne, and Pirkko Vihko* 49

Spectroscopic Study of Hydroxyproline Transport in Rat Kidney Mitochondria *Anna Atlante, Salvatore Passarella, and Ernesto Quagliariello* 58

Characterization of the Human α_2-Macroglobulin Gene Promoter: Identification of a Novel, Triple TRE/RARE/ERE Response Element *Gert Matthijs, Jean-Jacques Cassiman, Herman Van Den Berghe, and Peter Marynen* 65

Site-Directed Mutagenesis of Human Myeloperoxidase: Further Indentification of Residues Involved in Catalytic Activity and Heme Interaction *Alain Jacquet, Lida Garcia-Quintana, Virginie Deleersnyder, Roger Fenna, Alex Bollen, and Nicole Moguilevsky* 73

Molecular Cloning of a Novel Human cDNA Homologous to CDC10 in *Saccharomyces cerevisiae* *Shuichi Nakatsuru, Kazunori Sudo, and Yusuke Nakamura* 82

Diploid Expression and Translational Regulation of Rat Acrosin Gene *Karim Nayernia, Kerstin Reim, Heike Oberwinkler, and Wolfgang Engel* 88

Expression of a Calcium Binding Protein pEL98 (*mts*1) during Differentiation of Human Promyelocytic Leukemia HL-60 Cells *Keizo Takenaga, Yohko Nakamura, and Shigeru Sakiyama* 94

Fragmentation of Human Heart Mitochondrial DNA Associated with Premature Aging *Kazumi Katsumata, Mika Hayakawa, Masashi Tanaka, Satoru Sugiyama, and Takayuki Ozawa* 102

Retrotransposition of the *Drosophila* LINE I Element Can Induce Deletion in the Target DNA: A Simple Model Also Accounting for the Variability of the Normally Observed Target Site Duplications *Silke Jensen, Marie-Pierre Gassama, and Thierry Heidmann* 111

Involvement of Ca^{2+} in the Formation of High-Molecular-Weight DNA Fragments in Thymocyte Apoptosis *Boris Zhivotovsky, Björn Cedervall, Shunai Jiang, Pierluigi Nicotera, and Sten Orrenius* 120

Selective Inhibition of Dexamethasone-Induced Apoptosis in Rat Thymocytes by Herbimycin A *Eibai Lee, Midori Miura, Miho Yoshinari, Hiroe Iwai, and Kimio Kariya* 128

Characterization of the Cross-Linking Site of Disintegrins Albolabrin, Bitistatin, Echistatin, and Eristostatin on Isolated Human Platelet Integrin GPIIb/IIIa *Juan J. Calvete, Mary Ann McLane, Gwendolyn J. Stewart, and Stefan Niewiarowski* 135

Asymmetric Expression of Protein Kinase CK2 Subunits in Human Kidney Tumors *G. Stalter, S. Seimer, E. Becht, M. Ziegler, K. Remberger, and O.-G. Issinger* 141

^1H NMR and Spin-Labeled EPR Studies on the Interaction of Calmodulin with Jujuboside A *Yuxiang Zhou, Yuan Li, Zhigang Wang, Yaohua Ou, and Xin Zhou* 148

In Vitro Effects of CINC/gro, a Member of the Interleukin-8 Family, on Hormone Secretion by Rat Anterior Pituitary Cells *Takeshi Sawada, Koji Koike, Yuuki Kanda, Yoshiki Sakamoto, Ataru Nohara, Masahide Ohmichi, Kenji Hirota, and Akira Miyake* 155

The Production of CINC/gro, a Member of the Interleukin-8 Family, in Rat Anterior Pituitary Gland *Koji Koike, Yoshiki Sakamoto, Takeshi Sawada, Masahide Ohmichi, Yuuki Kanda, Ataru Nohara, Kenji Hirota, Hiroshi Kiyama, and Akira Miyake* 161

Biotransformation of Sodium Nitroprusside into Dinitrosyl Iron Complexes in Tissue of Ascites Tumors of Mice *Andrei L. Kleschyov, Konstantin R. Sedov, Peter I. Mordvintcev, and Anatoly F. Vanin* 168

Inhibition of Rat Liver Arginase by an Intermediate in NO Biosynthesis, N^G-Hydroxy-L-arginine: Implications for the Regulation of Nitric Oxide Biosynthesis by Arginase *Farzaneh Daghigh, Jon M. Fukuto, and David E. Ash* 174

Induction of Polyspermy in Sea Urchin Eggs by Antibodies Raised against a Hamster Sperm Protein *Robert Sullivan, Louise Coutu, and François Dubé* 181

Isolation, Partial Characterization, and Complement-Inhibiting Activity of a New Glycoprotein from *Cuscuta europea* *Zhivko D. Zhelev, Spaska A. Stanilova, and Brian G. Carpenter* 186

Spin Trapping of Nitric Oxide by Nitronylnitroxides: Measurement of the Activity of NO Synthase from Rat Cerebellum *Yakov Yu. Woldman, Valery V. Khramtsov, Igor A. Grigor'ev, Igor A. Kiriljuk, and Darkhan I. Utepbergenov* 195

Sugar–DNA Molecular Recognition: Specific Interaction of α-1,4-Glucopyranose Chains with DNA in the Minor Groove *A. Gopala Krishna, D. Balasubramanian, and K. N. Ganesh* 204

Increased Phospholipase D Activity in Multidrug-Resistant Breast Cancer Cells *Clement J. Welsh, Grace Chao Yeh, and James M. Phang* 211

Induction of P450 3A by Ethylbenzene without Altering RNA Levels *Wei Yuan, George F. Cawley, Charles S. Eyer, and Wayne L. Backes* 218

Transcription of the MRP RNA Gene in Frog Stage I Oocytes Requires a Novel *cis*-Element *Toshimitsu Koike, Naohiro Inohara, Ikuo Sato, Taro Tamada, Yasuo Kagawa, and Shigeo Ohta* 225

Extracellular ATP Promotes Cellular Growth of Glomerular Mesangial Cells Mediated via Phospholipase C *San-e Ishikawa, Midori Kawasumi, Ikuyo Kusaka, Norio Komatsu, Noriaki Iwao, and Toshi-kazu Saito* 234

Incorporation of a Potentially Helix-Breaking D-Phe–Pro Sequence into the Center of a Right-Handed 16-Residue Peptide Helix *R. Gurunath and P. Balaram* 241

Augmentation by Converting Enzyme Inhibition of Accelerated Endothelin Release from Rat Mesenteric Arteries Following Nephrectomy *Shang-Jin Shi, Hiromi Rakugi, Koichi Higashimori, Bing-Bing Jiang, Jitsuo Higaki, Hiroshi Mikami, and Toshio Ogihara* 246

Evidence for a Two-Proton-Dependent Redox Equilibrium in an Archaeal Rieske Iron–Sulfur Cluster *Stefan Anemüller, Christian L. Schmidt, Günter Schäfer, Eckart Bill, Alfred X. Trautwein, and Miguel Teixeira* 252

Tetracycline/H^+ Antiporter Was Degraded Rapidly in *Escherichia coli* Cells When Truncated at Last Transmembrane Helix and This Degradation Was Protected by Overproduced GroEL/ES *Ken Sato, Masa H. Sato, Akihito Yamaguchi, and Masasuke Yoshida* 258

The Novel Class III Antiarrhythmics NE-10064 and NE-10133 Inhibit I_{sK} Channels Expressed in *Xenopus* Oocytes and I_{Ks} in Guinea Pig Cardiac Myocytes *Andreas E. Busch, Kevin Malloy, William J. Groh, Michael D. Varnum, John P. Adelman, and James Maylie* 265

Regulation of Glutathione *S*-Transferase Gene Expression and Activity by Dietary Selenium *Merrill J. Christensen, Brett L. Nelson, and Christian D. Wray* 271

Novel q Class Glutathione *S*-Transferases Yrs–Yrs′ and Yrs′–Yrs′ in Rat Liver Cytosol: Their Potent Activity toward 5-Sulfoxymethylchrysene, a Reactive Metabolite of the Carcinogen 5-Hydroxymethylchrysene *Akira Hiratsuka, Takahito Okada, Takahito Nishiyama, Masashi Fujikawa, Kenichiro Ogura, Haruhiro Okuda, Tetsuro Watabe, and Tadashi Watabe* 278

Role of Extracellular Matrix in Wound Repair by Cultured Gastric Mucosal Cells *Hideaki Mikami, Sumio Watanabe, Miyoko Hirose, and Nobuhiro Sato* 285

Processing of β/A4 Amyloid Precursor Protein Is Altered in the Hippocampus of Reserpinized Rat Brain *Hiroshi Komachi, Yasufumi Shiraski, Tadashi Miyatake, and Katsuhiko Yanagisawa* 293

Induction of Photoresponse by the Hydrolysis of Polyphosphoinositides in the *Hermissenda* Type B Photoreceptor *Manabu Sakakibara, Daniel L. Alkon, Takeshi Kouchi, Hiroko Inoue, and Tohru Yoshioka* 299

Ionic Currents Evoked by Acetylcholine in Isolated Acinar Cells of the Guinea Pig Nasal Gland *DaZheng Wu, Hiroshi Sunose, Katsuhisa Ikeda, Motoaki Ishigaki, and Tomonori Takasaka* 307

The Primary Structure of Rat Ribosomal Protein S23 *Yoshihisa Kitaoka, Joe Olvera, and Ira G. Wool* 314

Thrombin Receptor-Activating Peptide Does Not Stimulate Platelet Procoagulant Activity *Christopher A. Goodwin, Caroline P. D. Wheeler-Jones, Vijay V. Kakkar, John J. Deadman, Kalwant S. Authi, and Michael F. Scully* 321

A 92-kDa Gelatinase (MMP-9) Cleavage Site in Native Type V Collagen *Christopher Niyibizi, Roger Chan, Jiann-Jiu Wu, and David Eyre* 328

Receptor-Specific Uptake and Degradation of Acetylated, Oxidized, and Native LDL in the Human Monocytic Mono Mac 6sr Cell Line *Rupert Scheithe, Nina Hrboticky, H. W. Löms Ziegler-Heitbrock, and Peter C. Weber* 334

The Identification of *Escherichia coli ispB (cel)* Gene Encoding the Octaprenyl Diphosphate Synthase *Ken-ichi Asai, Shingo Fujisaki, Yukinobu Nishimura, Tokuzo Nishino, Kazunori Okada, Tsuyoshi Nakagawa, Makoto Kawamukai, and Hideyuki Matsuda* 340

Motilin Induces the Endothelium-Dependent Relaxation of Smooth Muscle and the Elevation of Cytosolic Calcium in Endothelial Cells *in Situ* *Yoshihiro Higuchi, Junji Nishimura, and Hideo Kanaide* 346

Synergistic Effect of Choline and Carnitine on Acetylcholine Synthesis in Neuroblastoma NB-2a Cells *Agnieszka Wawrzeńczyk, Katarzyna A. Nałęcz, and Maciej J. Nałęcz* 354

Evidence for a Sodium-Dependent Calcium Influx in Isolated Rat Hepatocytes Undergoing ATP Depletion *Rita Carini, Giorgio Bellomo, Mario U. Dianzani, and Emanuele Albano* 360

Susceptibility of Monoclonal IGG Paraproteins to Plasmic Cleavage Using Glycerin-Stabilized Human Plasmin *Joseph V. Chuba* 367

IL-10 Inhibits HIV-1 Replication and Is Induced by Tat *Rizwan Masood, Yanto Lunardi-Iskandar, Tarsem Moudgil, Ya Zhang, Ronald E. Law, Chi-ling Huang, Raj K. Puri, Alexandra M. Levine, and Parkash S. Gill* 374

Shifts in Contractile Regulatory Protein Subunits Troponin T and Troponin I in Cardiac Hypertrophy *Jagdish Gulati, Arvind Babu Akella, Srdjan D. Nikolic, Vito Starc, and Francis Siri* 384

Human Growth Hormone Increases Cytosolic Free Calcium in Cultured Human IM-9 Lymphocytes: A Novel Mechanism of Growth Hormone Transmembrane Signaling *Mapoko M. Ilondo, Pierre De Meyts, and Pierre Bouchelouche* 391

Endoglycoceramidase Treatment Inhibits Synchronous Oscillations of Intracellular Ca^{2+} in Cultured Cortical Neurons *Kazuyo Muramoto, Masahiro Kawahara, Kazuo Kobayashi, Makoto Ito, Tatsuya Yamagata, and Yoichiro Kuroda* 398

Development-Related and Cell-Type-Specific Nuclear Localization of Annexin XI: Immunolocalization Analysis in Rat Tissues *Naoto Mamiya, Satoshi Iino, Akihiro Mizutani, Shigeru Kobayashi, and Hiroyoshi Hidaka* 403

Isolation of Endogenous Hemorphin-Related Hemoglobin Fragments from Bovine Brain *Andrey A. Karelin, Marina M. Philippova, Elena V. Karelina, and Vadim T. Ivanov* 410

Evidence That Pioglitazone Increases Intracellular Free Magnesium Concentration in Freshly Isolated Rat Adipocytes *Jerry Nadler and Stephen Scott* 416

Stimulation of Follistatin Production by Epidermal Growth Factor in Cultured Rat Hepatocytes *Makoto Kanzaki, Zhang You-Qing, Tetsuya Mine, and Itaru Kojima* 422

Transcriptional Regulation of Cathepsin B Expression in B16 Melanomas of Varying Metastatic Potential *Fang Qian, Shu-Jin Chan, Charles Achkar, Donald F. Steiner, and Allen Frankfater* 429

Interaction of Tacrolimus (FK506) and Its Metabolites with FKBP and Calcineurin *K. Tamura, T. Fujimura, K. Iwasaki, S. Sakuma, T. Fujitsu, K. Nakamura, K. Shimomura, T. Kuno, C. Tanaka, and M. Kobayashi* 437

A New Variant of Muscle Phosphofructokinase Deficiency in a Japanese Case with Abnormal RNA Splicing *Tomoya Hamaguchi, Hiromu Nakajima, Tamio Noguchi, Akira Ono, Norio Kono, Seiichiro Tarui, Masamichi Kuwajima, and Yuji Matsuzawa* 444

Differential Regulation of Constitutive and Inducible Nitric Oxide Production by Inflammatory Stimuli in Murine Endothelial Cells *R. Walter, A. Schaffner, and G. Schoedon* 450

A Reappraisal of the Effect of Extracellular Calcium on Osteoclastic Bone Resorption *Tony J. Hall* 456

Molecular Scanning of the Glycogen Synthase and Insulin Receptor Substrate-1 Genes in Japanese Subjects with Non-Insulin-Dependent Diabetes Mellitus *Kotaro Shimokawa, Hiroko Kadowaki, Hiroshi Sakura, Shuichi Otabe, Ryoko Hagura, Kinori Kosaka, Yoshio Yazaki, Yasuo Akanuma, and Takashi Kadowaki* 463

Lymphocytes and Promonocytes Attach to the Synthetic [$\text{Tyr}^{5,12}$, Lys^{7}]-Polyphemusin II Peptide (T22) *Benjamin S. Weeks, Motoyoshi Nomizu, Akira Otaka, Christi A. Weston, Akiko Okusu, Hirokazu Tamamura, Akiyoshi Matsumoto, Naoki Yamamoto, and Nobutaka Fujii* 470

Effect of Staurosporine on the Transcription of HSP70 Heat Shock Gene in HT-29 Cells *Geza Erdos and Yong J. Lee* 476

Localization of Activin and Follistatin Proteins in the *Xenopus* Oocyte *Hideho Uchiyama, Takanori Nakamura, Shinji Komazaki, Koji Takio, Makoto Asashima, and Hiromu Sugino* 484

Identification of Cellular Proteins That Bind the Central Conserved Region of p53 *Masato Takimoto, Kannika Sermsuvitayawong, and Kenichi Matsubara* 490

Constrained Analogues of the Calcitonin Gene-Related Peptide *J. M. L. Hakala, T. Valo, S. Vihavainen, J. Hermonen, P. Heino, M. Halme, and A. M. Koskinen* 497

Characteristics of Porcine Coronary Artery Endothelial Cells in Culture: Comparison with Aortic Endothelium *Akemi Ohbayashi, Takaki Hiraga, Minoru Okubo, Toshio Murase, Hiroshi Matsushita, and Mitsuru Hara* 504

The Gene Responsible for LEC Hepatitis, Located on Rat Chromosome 16, Is the Homolog to the Human Wilson Disease Gene *Nobuya Sasaki, Yoshihide Hayashizaki, Masami Muramatsu, Yoichi Matsuda, Yohsuke Ando, Takashi Kuramoto, Tadao Serikawa, Takachika Azuma, Akihiro Naito, Takashi Agui, Tadashi Yamashita, Ichiro Miyoshi, Noritoshi Takeichi, and Noriyuki Kasai* 512

Effect of High-Fat Diet on Gene Expression of GLUT4 and Insulin Receptor in Soleus Muscle *Youngbum Kim, Tomohiro Tamura, Soh Iwashita, Kumpei Tokuyama, and Masashige Suzuki* 519

Characterization of γ-Crystallins from a Hybrid Teleostean Fish: Multiplicity of Isoforms as Revealed by cDNA Sequence Analysis *F.-M. Pan, W.-C. Chang, Y.-K. Chao, and S.-H. Chiou* 527

Oxygen-Dependent Regulation of *Vitreoscilla* Globin Gene: Evidence for Positive Regulation by FNR *Meenal Joshi and Kanak L. Dikshit* 535

Interleukin-1 Receptor Antagonist Prevents Low-Dose Streptozotocin-Induced Diabetes in Mice *J.-O. Sandberg, A. Andersson, D. L. Eizirik, and S. Sandler* 543

Cloning and Analysis of MAGE-1-Related Genes *Min Ding, Raymond J. Beck, Christopher J. Keller, and Robert G. Fenton* 549

Calcium Binding Properties of Rabbit Liver Protein Disulfide Isomerase *Djamel Lebeche, Hector A. Lucero, and Benjamin Kaminer* 556

Atrial Natriuretic Peptide Gene Expression in the Rat Gastrointestinal Tract *William R. Gower, Jr., John R. Dietz, David L. Vesely, Charron L. Finley, Keith A. Skolnick, Peter J. Fabri, Denise R. Cooper, and Charles E. Chalfant* 562

EPR Evidence of Nitric Oxide Production by the Regenerating Rat Liver *M. Yu. Obolenskaya, A. F. Vanin, P. I. Mordvintcev, A. Mülsch, and K. Decker* 571

Decreased Myotonin–Protein Kinase in the Skeletal and Cardiac Muscles in Myotonic Dystrophy *R. Koga, Y. Nakao, Y. Kurano, T. Tsukahara, A. Nakamura, S. Ishiura, I. Nonaka, and J. Arahata* 577

Fatty Acid Hydroxylase of the Fungus *Fusarium oxysporum* Is Possibly a Fused Protein of Cytochrome P450 and Its Reductase *Norikazu Nakayama and Hirofumi Shoun* 586

Some Structural Features of Cluster-Coordinating Cysteines of *Clostridium pasteurianum* Ferredoxin Are Revealed by 2D TOCSY ^{1}H NMR on the Oxidized Protein *Domenico Acquotti, Francesco Bonomi, Paola Brocca, Maria Luisa Ganadu, and Silvia Pagani* 591

Tyrosine Phosphorylation of Jak-Tyk Kinases in Malignant Plasma Cell Lines Growth-Stimulated by Interleukins 6 and 11 *Lloyd C. Berger, Teresa S. Hawley, John A. Lust, Samuel J. Goldman, and Robert G. Hawley* 596

Tamoxifen Aziridine, a Novel Affinity Probe for P-Glycoprotein in Multidrug-Resistant Cells *Ahmad R. Safa, Scott Roberts, Michael Agresti, and Robert L. Fine* 606

Cloning of a Novel Putative Protein Kinase Having a Leucine Zipper Domain from Human Brain *Usha R. Reddy and David Pleasure* 613

Substitution of Glutamic Acids for the Conserved Lysines in the α Domain Affects Metal Binding in both the α and β Domains of Mammalian Metallothionein *Peter K. Pan, Fu-ying Hou, Chris W. Cody, and P. C. Huang* 621

A Cloned Rat CD38-Homologous Protein and Its Expression in Pancreatic Islets *Qing Li, Yuichiro Yamada, Koichiro Yasuda, Yu Ihara, Yoshimasa Okamoto, Pamela J. Kaisaki, Rie Watanabe, Hitoshi Ikeda, Kinsuke Tsuda, and Yutaka Seino* 629

Establishment of the ELISA for Murine-Soluble GP130, a Signal Transducer for the IL-6 Family Cytokine and Its Detection in the Ascitic Fluids of Tumor-Bearing Mice *Tadashi Matsuda and Toshio Hirano* 637

Mechanism of Prolactin Action on the Dissociation of Prolactin from Rabbit Mammary Gland Receptor *Daisuke Etoh and Senkiti Sakai* 1395

CDC2 Activation Is Not Required for Thymocyte Apoptosis *Chris Norbury, Marion MacFarlane, Howard Fearnhead, and Gerald M. Cohen* 1400

Lipoteichoic Acid from *Streptococcus sanguis* Is a Natural Glucosyl Acceptor for Glucosyltransferases *Teh-hsing Chiu and John J. Baker* 1407

Taxol and Cisplatin Inhibit Proliferation of T47D Human Breast Cancer Cells *Sandhya Kodali, Michael Burkley, Koushik Nag, Craig R. Taylor, and V. K. Moudgil* 1413

Relationship between the Infectivity of Influenza Virus and the Ability of Its Fusion Peptide to Perturb Bilayers *Richard M. Epand and Raquel F. Epand* 1420

Somatic Mutations of the MTS (Multiple Tumor Suppressor) 1/CDK41 (Cyclin-Dependent Kinase-4 Inhibitor) Gene in Human Primary Non-Small Cell Lung Carcinomas *Naoko Hayashi, Yoshihisa Sugimoto, Eiju Tsuchiya, Michio Ogawa, and Yusuke Nakamura* 1426

Isolation of a Human κ Opioid Receptor cDNA from Placenta *Erik Mansson, Lance Bare, and Dingming Yang* 1431

Proline Mutations on the S4 Segment of Rat Brain Sodium Channel II *Oscar Moran, Alessandra Gheri, Olga Zegarra-Moran, Keiyi Imoto, and Franco Conti* 1438

Mutational Analysis of the Structure–Function Relationship in Interferon-α *Stefania Di Marco, Markus G. Grütter, John P. Priestle, and Michel A. Horisberger* 1445

A Novel Member, PC7, of the Mammalian Kexin-like Protease Family: Homology to PACE4A, Its Brain-Specific Expression, and Identification of Isoforms *Akihiko Tsuji, Chiemi Hine, Kenji Mori, Yasuhiro Tamai, Kazuya Higashine, Hideaki Nagamune, and Yoshiko Matsuda* 1452

Sterol-Mediated Regulation of SREBP-1a,1b,1c and SREBP-2 in Cultured Human Cells *Yoshiki Kawabe, Makoto Honda, Yoichiro Wada, Yoshio Yazaki, Tsukasa Suzuki, Yasuhiro Ohba, Hiroyuki Nabata, Akira Endo, Akiyo Matsumoto, Hiroshige Itakura, and Tatsuhiko Kodama* 1460

Molecular Cloning and Expression of a cDNA Encoding NGAL: A Lipocalin Expressed in Human Neutrophils *Jens R. Bundgaard, Henrik Sengeløv, Niels Borregaard, and Lars Kjeldsen* 1468

Elevated Glucose Concentrations Inhibit DNA Synthesis and Expression of c-myc in Cultured Hepatocytes *Olav F. Dajani, Magne Refsnes, Tormod K. Guren, Robert S. Horn, G. Hege Thoresen, and Thoralf Christoffersen* 1476

Thiabendazole Is an Inducer of Cytochrome P4501A1 in Cultured Rabbit Hepatocytes *Lionel Aix, Xavier Rey-Grobellet, Gilberte Larrieu, Pierre Lesca, and Pierre Galtier* 1483

Expression of Prostacyclin-Stimulating Factor, a Novel Protein, in Tissues of Wistar Rats and in Cultured Cells *Yasuhiro Ono, Toshihiko Hashimoto, Fumio Umeda, Mitsunori Masakado, Teruaki Yamauchi, Seiichi Mizushima, Mitsuko Isaji, and Hajime Nawata* 1490

Expression of Rh Blood Group Gene Transcripts in Human Leukocytes *Eiji Kajii, Fuminori Umenishi, Hiromitsu Nakauchi, and Shigenori Ikemoto* 1497

Erythrocyte Membrane Calcium Transport in Patients with Primary Hyperparathyroidism *Giuseppe Vezzoli, Maria Cristina Reina, Daniele Cusi, Paola Casirati, Laura Soldati, Tiziana Azzani, Roslyn Muirhead, and Giuseppe Bianchi* 1505

Extracellular ATP Increases NH_4^+ Permeability in Human Lymphocytes by Opening a P_{2Z} Purinoceptor-Operated Ion Channel *Joan R. Chen, Gary P. Jamieson, and James S. Wiley* 1511

Cleavage at the N-Terminal Site of Alzheimer Amyloid β/A4 Protein Is Essential for Its Secretion *Kei Maruyama, Yuuki Kawamura, Hideo Asada, Shoichi Ishiura, and Kunihiko Obata* 1517

Increased Activation of 2′,3′-Dideoxycytidine by Acivicin *Ram P. Agarwal* 1524

Demonstration of a Double-Stranded DNA-Stimulated Protein Kinase (DNA-PK) Inhibitory Activity in Human HL-60 Leukemia Cells *Shaojian An, Yuping Chen, William Wu, and Joseph M. Wu* 1530

Gene Transfer of TNF Receptor for Treatment of Cancer by TNF *Ken-ichi Isobe, Zuo-heng Fan, Nobuhiko Emi, and Izumi Nakashima* 1538

Circulating Nitrite/Nitrate Levels Increase with Follicular Development: Indirect Evidence for Estradiol-Mediated NO Release *M. Rosselli, B. Imthurn, E. Macas, P. J. Keller, and R. K. Dubey* 1543

A Downstream Regulatory Element Activates the Bovine Leukemia Virus Promoter *Endre Kiss-Tóth and Ildikó Unk* 1553

Noncytopathic Strains of Bovine Viral Diarrhea Virus Prime Bovine Bone Marrow-Derived Macrophages for Enhanced Generation of Nitric Oxide *Heiko Adler, Barbara Frech, Philipp Meier, Thomas W. Jungi, and Ernst Peterhans* 1562

Modeling the Peptide Receptor Interaction: Selectivity of the Oxytocin Receptor *J. M. L. Hakala* 1569

Observation of Two Different Chromophores in the Resting State of Monoamine Oxidase B by Fluorescence Spectroscopy *Jonathan C. G. Woo and Richard B. Silverman* 1574

Cytosolic Ca^{2+} Increase and Cell Damage in L6 Rat Myoblasts by HMG-CoA Reductase Inhibitors *Keiichi Nakahara, Toshihiko Yada, Masaru Kuriyama, and Mitsuhiro Osame* 1579

The Tyrosine Kinase Inhibitor, Genistein, Prevents α-Adrenergic-Induced Cardiac Muscle Cell Hypertrophy by Inhibiting Activation of the Ras-MAP Kinase Signaling Pathway *Jacqueline Thorburn and Andrew Thorburn* 1586

Characterization of a Tyrosyl Radical in Prostaglandin Endoperoxide Synthase-2 *Linda C. Hsi, Curtis W. Hoganson, Gerald T. Babcock, and William L. Smith* 1592

Tumor Necrosis Factor-α (TNF-α) Inhibits Expression of Mouse Placental Lactogen-II through TNF-α Type-I but Not Type-II Receptor *Masaaki Yamaguchi, Hirohisa Kurachi, Chikae Tadokoro, Masahiro Sakata, Yasuhiro Yoshimoto, Nobuyuki Masumoto, Keiichi Tasaka, and Akira Miyake* 1599

Association of Deletion and Homoplasmic Point Mutation of the Mitochondrial DNA in an Ocular Myopathy *Pascal Reynier, Dominique Figarella-Branger, Georges Serratrice, Bernadette Charvet, and Yves Malthièry* 1606

Low Oxygen Enhances Endothelin-1 (ET-1) Production and Responsiveness to ET-1 in Cultured Cardiac Myocytes *Hiroshi Kagamu, Takahiko Suzuki, Masaaki Arakawa, and Youji Mitsui* 1612

Wortmannin Inhibits Serum-Induced Activation of Phosphoinositide 3-Kinase and Proliferation of CHRF-288 Cells *Geeta S. Vemuri and Susan E. Rittenhouse* 1619

A New Point Mutation at Nucleotide Pair 3291 of the Mitochondrial $tRNA^{Leu(UUR)}$ Gene in a Patient with Mitochondrial Myopathy, Encephalopathy, Lactic Acidosis, and Stroke-like Episodes (MELAS) *Yu-ichi Goto, Kazuo Tsugane, Yuzo Tanabe, Ikuya Nonaka, and Satoshi Horai* 1624

Identification of the 65-kDa Phosphoprotein in Murine Macrophages as a Novel Protein: Homology with Human L-Plastin *Hiroto Shinomiya, Hajime Hirata, Shinji Saito, Hitoshi Yagisawa, and Masayasu Nakano* 1631

^{23}Na NMR Detects Protection by Glycine and Alanine against Hypoxic Injury in the Isolated Perfused Rat Kidney *Zoltán H. Endre, Gary J. Cowin, Patricia Stewart-Richardson, Michael Cross, Desley A. Willgoss, and Ronald G. Duggleby* 1639

Some Physicochemical and Enzymic Properties of Selenium-Containing Abzyme *Zhen-qi Zhu, Lan Ding, Gui-Min Luo, Zhi Liu, Qi-an Sun, Tong-shu Yang, and Jia-cong Shen* 1645

Thrombin-Induced Ca^{2+} Influx and Protein Tyrosine Phosphorylation in Endothelial Cells Is Inhibited by Herbimycin A *Hans-J. Kruse, Emil V. Negrescu, Peter C. Weber, and Wolfgang Siess* 1651

The 90-kDa Heat Shock Protein (hsp90) Induces the Condensation of the Chromatin Structure *Péter Csermely, Judit Kajtár, Miklós Hollósi, Jouko Oikarinen, and János Somogyi* 1657

Inducible Inhibition of Eukaryotic Gene Expression *Rosanna Pescini, Sami Alouani, Amanda Proudfoot, Christine Power, Jean-Jacques Mermod, John F. DeLamarter, and Rob Hooft van Huijsduijnen* 1664

Reversal of Phospholamban-Induced Inhibition of Cardiac Sarcoplasmic Reticulum Ca^{2+}-ATPase by Tannin *Michele Chiesi and Roland Schwaller* 1668

Expression of the Carbohydrate Recognition Domain of Lung Surfactant Protein D and Demonstration of Its Binding to Lipopolysaccharides of Gram-Negative Bacteria *Boon-Leong Lim, Jiu-Yao Wang, Uffe Holmskov, Hans-Jürgen Hoppe, and Kenneth B. M. Reid* 1674

Fluoride Activates G Protein-Dependent and -Independent Pathways in Dispersed Intestinal Smooth Muscle Cells *K. S. Murthy and G. M. Makhlouf* 1681

Macrophages Regulate Proliferation and Differentiation of Satellite Cells *Marcello Cantini, Maria Lina Massimino, Adonella Bruson, Claudia Catani, Luciano Dalla Libera, and Ugo Carraro* 1688

Tyrosine Kinase Inhibitors Attenuate "Capacitative" Ca^{2+} Influx in Rat Pancreatic Acinar Cells *David I. Yule, Edward T. Kim, and John A. Williams* 1697

Induction and Expression of Heparin-Binding EGF-like Growth Factor in Human Pancreatic Cancer *Michael S. Kobrin, Hitoshi Funatomi, Helmut Friess, Markus W. Buchler, Peter Stathis, and Murray Korc* 1705

Self-Aggregation of the Transmembrane Glycoprotein CD38 Purified from Human Erythrocytes *Luisa Franco, Elena Zocchi, Lesley Calder, Lucrezia Guida, Umberto Benatti, and Antonio De Flora* 1710

Vascular Endothelial Growth Factor Induces the Disorganization of Actin Stress Fibers Accompanied by Protein Tyrosine Phosphorylation and Morphological Change in BALB/C3T3 Cells *Taira Enomoto, Tetsuji Okamoto, and J. Denry Sato* 1716

Mg^{2+}-Induced Lipid-Phase Transition in Thylakoid Membranes Is Reversed by Anions *Anjana Jajoo, Alok Dube, and S. Bharti* 1724

Effect of Cigarette Smoke on Hepatic and Pulmonary Cytochromes P450 in Mouse: Evidence for CYP2E1 Induction in Lung *Pierre H. Villard, Eric Seree, Bruno Lacarelle, Marie C. Therene-Fenoglio, Yves Barra, Laurence Attolini, Bernard Bruguerole, Alain Durand, and Jacques Catalin* 1731

Somatostatin Regulates Somatostatin Receptor Subtype mRNA Expression in GH_3 Cells *John F. Bruno, Yun Xu, and Michael Berelowitz* 1738

Extracellular ATP Potentiates Nitric Oxide Synthase Expression Induced by Lipopolysaccharide in RAW 264.7 Murine Macrophages *Michela Tonetti Laura Sturla, Tiziana Bistolfi, Umberto Benatti, and Antonio De Flora* 430

Influence of Surface Charges on Redox Properties in High Potential Iron–Sulfur Proteins *Claudio Luchinat, Francesco Capozzi, Marco Borsari, Gianantonio Battistuzzi, and Marco Sola* 436

Genistein Enhances the ICAM-Mediated Adhesion by Inducing the Expression of ICAM-1 and Its Counterreceptors *Sinikka Tiisala, Marja-Leena Majuri, Olli Carpén, and Risto Renkonen* 443

Distinct Role of 2-*O*-, *N*-, and 6-*O*-Sulfate Groups of Heparin in the Formation of the Ternary Complex with Basic Fibroblast Growth Factor and Soluble FGF Receptor-1 *M. Rusnati, D. Coltrini, P. Caccia, P. Dell'Era, G. Zoppetti, P. Oreste, B. Valsasina, and M. Presta* 450

Delivery of Anti-GAP-43 Antibodies into Neuroblastoma Cells Reduces Growth Cone Size *Thomas B. Shea* 459

Neurotensin Receptor and Its mRNA Are Expressed in Many Human Colon Cancer Cell Lines but Not in Normal Colonic Epithelium: Binding Studies and RT–PCR Experiments *Jean-José Maoret, Dan Pospaï, Christiane Rouyer-Fessard, Alain Couvineau, Christian Laboisse, Thierry Voisin, and Marc Laburthe* 465

Cloning and Sequence Analysis of Murine Cytomegalovirus Protease and Capsid Assembly Protein Genes *Jeannette M. Loutsch, Nancy J. Galvin, Martin L. Bryant, and Barry C. Holwerda* 472

cDNA Cloning of a Novel Protein Tyrosine Phosphatase with Homology to Cytoskeletal Protein 4.1 and Its Expression in T-Lineage Cells *Motoyuki Sawada, Masato Ogata, Yasuhiro Fujino, and Toshiyuki Hamaoka* 479

Transforming Growth Factor-β Up Regulates Human Elastin Promoter Activity in Transgenic Mice *Stacy D. Katchman, Sylvia Hsu-Wong, Isabel Ledo, May Wu, and Jouni Uitto* 485

Amino Acid Polymorphisms of the Human L-Isoaspartyl/D-Aspartyl Methyltransferase Involved in Protein Repair *William Tsai and Steven Clarke* 491

Signals Transduced through the CD4 Molecule on T Lymphocytes Activate NF-κB *Narendra Chirmule, V. S. Kalyanaraman, and Savita Pahwa* 498

Detection of Soluble P-Glycoprotein in Culture Media and Extracellular Fluids *T. Ming Chu, Tsung H. Lin, and Elizabeth Kawinski* 506

Mutations in the P-Region of a Mammalian Potassium Channel (RCK1): A Comparison with the *Shaker* Potassium Channel *Jan Tytgat* 513

Association of Plakoglobin with APC, a Tumor Suppressor Gene Product, and Its Regulation by Tyrosine Phosphorylation *Tatsuhiro Shibata, Masahiro Gotoh, Atsushi Ochiai, and Setsuo Hirohashi* 519

An Oligogene Family Encodes Actins in the Housefly, *Musca domestica* *Timothy J. Hadden and Ann Sodja* 523

Loss of CYP2E1 and CYP1A2 Activity as a Function of Acetaminophen Dose: Relation to Toxicity *John E. Snawder, Amy L. Roe, R. Wayne Benson, and Dean W. Roberts* 532

Cadmium Resistance of Achlorophyllous *Euglena gracilis* Cells: Constitutive Overexpression of Two Heat-Shock Proteins *Jean-Philippe Barque, Hélène Chacun, Sandrine Marouby, and Jacqueline Bonaly* 540

Nuclear Orphan Receptor-Binding Retinoic Acid Response Elements in Keratinocytes *Tahmina Choudhuri Islam and Rune Toftgård* 545

Inhibition of c-myc Expression Induced by 4-Hydroxynonenal, a Product of Lipid Peroxidation, in the HL-60 Human Leukemic Cell Line *Giuseppina Barrera, Robert Muraca, Stefania Pizzimenti, Anna Serra, Claudia Rosso, Giuseppe Saglio, Maria Giulia Farace, Vito Michele Fazio, and Mario Umberto Dianzani* 553

Interleukin-4 Acts as a Potent Stimulator for Expression of Monocyte Chemoattractant JE/MCP-1 in Mouse Peritoneal Macrophages *Hirotaka Kikuchi, Shigemasa Hanazawa, Akira Takeshita, Yu Nakada, Yoshinori Yamashita, and Shigeo Kitano* 562

A Selective Agonist Affinity Label for A_3 Adenosine Receptors *Xiao-duo Ji, Carola Gallo-Rodriguez, and Kenneth A. Jacobson* 570

HSP70RY: Further Characterization of a Novel Member of the HSP70 Protein Family *Kimberly D. Dyer and Helene F. Rosenberg* 577

A Simple and Efficient Method of Protein Delivery into Cells Using Adenovirus *Prem Seth* 582

Advanced Glycation of Rat Liver Histone Octamers: An *in Vitro* Study *A. Gugliucci* 588

Structure and Chromosomal Locus of the Mouse Gene Encoding a Cerebellar Purkinje Cell-Specific Helix–Loop–Helix Factor *Hes*-3 *Teiji Sakagami, Kazuhiro Sakurada, Yuka Sakai, Tomomasa Watanabe, Shigetada Nakanishi, and Ryoichiro Kageyama* 594

Expression of Biologically Active Receptors for Natriuretic Peptides in the Human Uterus during Pregnancy *Hiroaki Itoh, Norimasa Sagawa, Masaaki Hasegawa, Hidetaka Nanno, Fuminori Kobayashi, Yoshiyuki Ihara, Takahide Mori, Yasato Komatsu, Shin-ichi Suga, Takaaki Yoshimasa, Hiroshi Itoh, and Kazuwa Nakao* 602

Antizyme Delays the Restoration by Spermine of Growth of Polyamine-Deficient Cells through Its Negative Regulation of Polyamine Transport *Yong He, Toshikazu Suzuki, Keiko Kashiwagi, and Kazuei Igarashi* 608

Molecular Cloning of the Human Ah Receptor Gene Promoter *Hidetaka Eguchi, Shin-ichi Hayashi, Junko Watanabe, Osamu Gotoh, and Kaname Kawajiri* 615

Tumor Necrosis Factor α and Interleukin-1β Induce Specific Subunits of NFκB to Bind the HIV-1 Enhancer: Characterization of Transcription Factors Controlling Human Immunodeficiency Virus Type 1 Gene Expression in Neural Cells *Simon Swingler, Alan Morris, and Andrew Easton* 623

Genomic Structure of Human Adrenomedullin Gene *Toshihiko Ishimitsu, Masayasu Kojima, Kenji Kangawa, Jun Hino, Hiroaki Matsuoka, Kazuo Kitamura, Tanenao Eto, and Hisayuki Matsuo* 631

cAMP, Ethanol, and CO_2 Production with the Addition of D-Glucose Anomer to Starved Yeast Cells *Kyuboem Han, Juan Hong, and Henry C. Lim* 640

Direct Typing of Polymorphic Microsatellites in the Colonial Tunicate *Botryllus schlosseri* (Ascidiacea) *Zeev Pancer, Harriet Gershon, and Baruch Rinkevich* 646

Amyloid Precursor Protein Secretion via Muscarinic Receptors: Reduced Desensitization Using the M1-Selective Agonist AF102B *Rachel Haring, David Gurwitz, Jacob Barg, Ronit Pinkas-Kramarski, Eliahu Heldman, Zipora Pittel, Ada Wengier, Haim Meshulam, Daniele Marciano, Yishai Karton, and Abraham Fisher* 652

Arbitrary Single Short Primers Identify Polymorphic DNA Markers That Distinguish Inbred Strains of Mice *Gangur Venugopal, Harsha N. Trivedi, and Shyam S. Mohapatra* 659

Increased Expression of mRNA for Hepatocyte Growth Factor-like Protein during Liver Regeneration and Inflammation *Jorge A. Bezerra, D. Wayne Laney, Jr., and Sandra J. Friezner Degen* 666

Reinitiation of Meiosis in Starfish Oocytes Requires an Increase in Nuclear Ca^{2+} *Luigia Santella and Keiichiro Kyozuka* 674

Relationship between Membrane Protein Phosphorylation and Intracellular Translocation of Casein Kinase in Human Erythrocytes *L. Bordin, G. Clari, B. Baggio, G. Gambaro, and V. Moret* 681

Human Dermal Microvascular Endothelial Cells Express the 140-kDa Isoform of Neural Cell Adhesion Molecule *Hitoshi Mizutani, William Roswit, John Hemperly, Thomas Lawley, Carolyn Compton, Robert Swerlick, and Thomas S. Kupper* 686

Ca^{2+}/Calmodulin-Dependent Protein Kinase Kinase Cascade *Ryotaro Sugita, Hideo Mochizuki, Tadashi Ito, Hisayuki Yokokura, Ryoji Kobayashi, and Hiroyoshi Hidaka* 694

Response to Glucose of Transcription Factor Binding to the Rat Insulin-1 Gene Promoter *Steven Goodison, Jun-ichi Miyazaki, and Stephen J. H. Ashcroft* 702

Insensitivity of Cathepsin D Gene to Estradiol in Endometrial Cells Is Determined by the Sequence of Its Estrogen Responsive Element *Florence Miralles, Corinne Gaudelet, Vincent Cavailles, Henri Rochefort, and Patrick Augereau* 711

Production and Secretion of Adrenomedullin from Vascular Smooth Muscle Cells: Augmented Production by Tumor Necrosis Factor-α *Shin Sugo, Naoto Minamino, Hiroki Shoji, Kenji Kangawa, Kazuo Kitamura, Tanenao Eto, and Hisayuki Matsuo* 719

Ethanol Increases Content and Activity of Human Cytochrome P4502E1 in a Transduced HepG2 Cell Line *Alfio Carroccio, Defeng Wu, and Arthur I. Cederbaum* 727

Biochemical Characterization of *Drosophila melanogaster* Acetylcholinesterase Expressed by Recombinant Baculoviruses *H. Chaabihi, D. Fournier, Y. Fedon, J. P. Bossy, M. Ravallec, G. Devauchelle, and M. Cérutti* 734

Rabbit FKBP-59/HBI Does Not Inhibit Calcineurin Activity *in Vitro* *Marie-Claire Lebeau, Igor Myagkikh, Nathalie Rouvière-Fourmy, Etienne Emile Baulieu, and Claude B. Klee* 750

Synthetic *RAB*3A Effector Domain Peptide Stimulates Inositol 1,4,5-Trisphosphate Production in Various Permeabilized Cells *Albrecht Piiper, Danuta Stryjek-Kaminska, and Stefan Zeuzem* 756

Leu 193 Mutation in the Cysteine Rich Region of the Insulin Receptor Inhibits the Cleavage of the Insulin Receptor Precursor but Not Insulin Binding *Yasumitsu Takata, Takeshi Imamura, Tetsuro Haruta, Katuya Egawa, Yoshihisa Takada, Tasuku Sawa, Guan Hu Yang, and Masashi Kobayashi* 763

Xenopus laevis Ribosomal Protein S11: Cloning and Sequencing of the cDNA and Primary Structure of the Protein *Flavia Annesi, Isabella Vespignani, Francesco Amaldi, and Paolo Mariottini* 768

Mechanosensitive Single Channel Calcium Currents in Rat Mesangial Cells *Victor Chen, Helena A. Guber, and Carlos E. Palant* 773

Increased Expression of Acidic Ribosomal Protein (P0) mRNA after Phorbol Ester Treatment of Cultured Rat Thyroid (FRTL-5) Cells *Tsukasa Saito, Masato Ikeda, Toyoshi Endo, Kunio Tsurugi, and Toshimasa Onaya* 780

Multiple Forms of Nuclear Deoxyribonuclease in Rat Thymocytes *Sei-ichi Tanuma and Daisuke Shiokawa* 789

clpX Encoding an Alternative ATP-Binding Subunit of Protease Ti (Clp) Can Be Expressed Independently from *clpP* in *Escherichia coli* *Soon Ji Yoo, Jae Hong Seol, Man-Sik Kang, Doo Bong Ha, and Chin Ha Chung* 798

Time-Course Curves of Enzyme Reactions with Dilute Substrates Can Be Determined from the Reverse Reactions *Shoko Kijima and Hiromasa Kijima* 805

Annexin I as a Potential Inhibitor of Insulin Receptor Protein Tyrosine Kinase *Vincent Melki, Françoise Hullin, Honoré Mazarguil, Josette Fauvel, Jeannie M. F. Ragab-Thomas, and Hugues Chap* 813

Direct Evidence for a Constitutive Internal Promoter in the Tryptophan Operon of *Corynebacterium glutamicum* *James P. O'Gara and L. Kieran Dunican* 820

Calstorin, a New Ca^{2+} Binding Protein of the Microsome Lumen Which Is Abundant in the Rat Brain *Gabriella Racchetti, Panayota Papazafiri, Pompeo Volpe, and Jacopo Meldolesi* 828

Comparison of Spectrometric and Autophotographic Methods for Determining DNA Concentrations *Howell W. Rogers* 834

Purification, Characterization, and Properties of an NADH Oxidase from *Desulfovibrio vulgaris* (Hildenborough) and Its Coupling to Adenylyl Phosphosulfate Reductase *Liang Chen, Jean Le Gall, and António V. Xavier* 839

Methylation- and Mutation-Dependent Stimulation of Alu Transcription *in Vitro* *Roseann L. Vorce, Brian Lee, and Bruce H. Howard* 845

Ca^{2+}/Calmodulin-Dependent Regulation of the Density of Na^{+} Channels in Embryonic Chick Skeletal Muscle Cells during Their Development in Culture *Ryohei Satoh, Yumiko Nakabayashi, and Masaakira Kano* 852

Thrombospondin (TSP) and Transforming Growth Factor Beta 1(TGF-β) Promote Human A549 Lung Carcinoma Cell Plasminogen Activator Inhibitor Type 1 (PAI-1) Production and Stimulate Tumor Cell Attachment *in Vitro* *D. Albo, J. P. Arnoletti, A. Castiglioni, M. S. Granick, M. P. Solomon, V. L. Rothman, and G. P. Tuszynski* 857

A Modified Form of the Cytochrome P450scc Precursor: A New Approach in Studies on Protein Import into Mitochondria *L. A. Novikova, A. S. Savel'ev, and V. N. Luzikov* 866

Tissue Inhibitor of Metalloproteinases (TIMP-1) Stimulates the Secretion of Collagenase from Human Skin Fibroblasts *Ian M. Clark, Liz K. Powell, and Tim E. Cawston* 874

Asp^{514} within the A1 Domain of Bovine von Willebrand Factor Is Required for Interaction with Platelet Glycoprotein IB *Dipali Sinha, Meenakshi Bakhshi, Satya Kunapuli, Renu Vora, Jerome L. Gabriel, Edward P. Kirby, and Andrei Z. Budzynski* 881

Ribozyme Targeting of HIV-1 LTR *M. Ventura, P. Wang, N. Franck, and S. Saragosti* 889

Direct Correlation between Cell Membrane Fluctuations, Cell Filterability, and the Metastatic Potential of Lymphoid Cell Lines *Leonid Mittelman, Shlomo Levin, Hendrik Verschueren, Patrick De Baetselier, and Rafi Korenstein* 899

The Thrombin Receptor Transmits Signals through a 33-kDa Protein Kinase in Human Platelets *Hiroyuki Ogawa, Masaru Ido, Hiroyuki Takeya, and Koji Suzuki* 907

Complete Sequence of the *Bacteroides fragilis* YCH46 Neuraminidase-Encoding Gene *Shigeru Akimoto, Tsuneko Ono, Hatsumi Tsutsui, Takemi Kinouchi, Keiko Kataoka, and Yoshinari Ohnishi* 914

G-CSF Induces Tyrosine Phosphorylation of the JAK2 Protein in the Human Myeloid G-CSF Responsive and Proliferative Cells, but Not in Mature Neutrophils *Kazuya Shimoda, Hiromi Iwasaki, Seiichi Okamura, Yuju Ohno, Akira Kubota, Fumitou Arima, Teruhisa Otsuka, and Yoshiyuki Niho* 922

Cigarette Smoking Increases Monocyte Adherence to Cultured Endothelial Cell Monolayer *P. S. Dovgan, X. Zhan, J. D. Edwards, M. Wilde, and D. K. Agrawal* 929

Quantitation of Interferon γ mRNA Levels in Psoralen/UVA-Treated HUT-78 Cells by Competitive PCR *Ghassan M. Saed and David P. Fivenson* 935

Insulin-Responsive Regions of the Rat Fatty Acid Synthase Gene Promoter *Siegmund S. Wolf, Gerhard Hofer, Karl-Friedrich Beck, Karim Roder, and Michael Schweizer* 943

Calcium Induced Change in Three-Dimensional Structure of Thin Filaments of Rabbit Skeletal Muscle as Revealed by Cryoelectron Microscopy *Takashi Ishikawa and Takeyuki Wakabayashi* 951

Inhibition of Herpes Simplex Virus 1 Reproduction with Hydrophobized Antisense Oligonucleotides *Sergey V. Vinogradov, Yulia Suzdaltseva, Valery Yu. Alakhov, and Alexander V. Kabanov* 959

Effect of Protein Kinase Inhibitors on the Invasion Process of Macrophages by *Trypanosoma cruzi* *Mauricio C. F. Vieira, Técia U. de Carvalho, and Wanderley de Souza* 967

Novel Isoprenoid Modified Proteins in *Halobacteria* *Hiroshi Sagami, Akihiro Kikuchi, Kyozo Ogura, Kazuhisa Fushihara, and Tokuzo Nishino* 972

Selective Defect of Sarcoglycan Complex in Severe Childhood Autosomal Recessive Muscular Dystrophy Muscle *Yuji Mizuno, Satoru Noguchi, Hideko Yamamoto, Mikiharu Yoshida, Atsushi Suzuki, Yasuko Hagiwara, Yukiko K. Hayashi, Kiichi Arahata, Ikuya Nonaka, Shunsaku Hirai, and Eijiro Ozawa* 979

Relationship between the MAP Kinase Activity and the Dual Effect of EGF on A431 Cell Proliferation *Naima Chajry, Pierre-Marie Martin, Gilles Pages, Claude Cochet, Karim Afdel, and Yolande Berthois* 984

Increase of Both Transcription and Translation Activities Following Separate Irradiation of the *in Vitro* System Components with the He–Ne Laser *Rosa A. Vacca, Ersilia Marra, Ernesto Quagliariello, and Margherita Greco* 991

Does Protein Kinase C Regulate Receptor Agonists-Mediated Elevation in the Cytosolic Ca^{2+} in Human Neutrophils? *Helena Tuominen, Lasse Leino, and Karl E. O. Åkerman* 998

Potassium Selective and Venturicidin Sensitive Conductances of F_0 Purified from Bovine Heart Mitochondria, Reconstituted in Planar Lipid Bilayers *Henk Miedema, Hendrika S. van Walraven, and Albertus H. de Boer* 1005

Biphasic Effect of Estrogen on Neuronal Constitutive Nitric Oxide Synthase via Ca^{2+}-Calmodulin Dependent Mechanism *Toshio Hayashi, Tomohiko Ishikawa, Kazuyoshi Yamada, Masafumi Kuzuya, Michitaka Naito, Hiroyoshi Hidaka, and Akihisa Iguchi* 1013

Structure and Expression of the Promoter for the Human Type II Transforming Growth Factor-β Receptor *Donald E. Humphries, Brian B. Bloom, Alan Fine, and Ronald H. Goldstein* 1020

Differential Decrease of Copper Content and of Copper Binding to Superoxide Dismutase in Liver, Heart, and Brain of Copper-Deficient Rats *L. Rossi, M. R. Ciriolo, E. Marchese, A. De Martino, M. Giorgi, and G. Rotilio* 1028

Differential Effects of Thyroid Hormone on the Expression of Sarcoplasmic Reticulum Ca^{2+}-ATPase Isoforms in Rat Skeletal Muscle Fibers *Alice Muller, Gerard C. van der Linden, Marian J. Zuidwijk, Warner S. Simonides, Willem J. van der Laarse, and Cornelis van Hardeveld* 1035

Mast Cell Activation Induces P-Selectin-Dependent Leukocyte Rolling and Adhesion in Postcapillary Venules *in Vivo* *H. Thorlacius, J. Raud, S. Rosengren-Beezley, M. J. Forrest, P. Hedqvist, and L. Lindbom* 1043

Simultaneous Measurement of $[Na^+]i$ and Ca^{2+} Transients in an Isolated Myocyte: Effects of Strophanthidin *Hajime Terada, Hideharu Hayashi, Hiroshi Satoh, Hideki Katoh, and Noboru Yamazaki* 1050

Cholinergic Stimulation Modulates Apoptosis and Differentiation of Murine Thymocytes via a Nicotinic Effect on Thymic Epithelium *I. Rinner, T. Kukulansky, P. Felsner, E. Skreiner, A. Globerson, M. Kasai, K. Hirokawa, W. Korsatko, and K. Schauenstein* 1057

Evidence for the Accumulation of Oxidative Stress during Cellular Ageing of Human Diploid Fibroblasts *Yoshimi Homma, Masaki Tsunoda, and Hiroshi Kasai* 1063

Association of the GPI-Anchored Leucocyte Surface Glycoproteins with Ganglioside GM3 *Bernhard Kniep, Tomáš Cinek, Pavla Angelisová, and Václav Hořejší* 1069

Characterization of Immunoglobulin M Antibodies Raised by *in Vitro* Immunization Specific to Soluble Human Caudate Nucleus and Cerebrospinal Fluid Acetylcholinesterase *Philipp Novales-Li* 1076

Location of the Binding Site for the Allosteric Activator IMP in the COOH-Terminal Domain of *Escherichia coli* Carbamyl Phosphate Synthetase *Jorge Bueso, Carol J. Lusty, and Vicente Rubio* 1083

Highly Frequent Homozygous Deletion of the p16 Gene in Esophageal Cancer Cell Lines *Hiroyasu Igaki, Hiroki Sasaki, Tatsuya Kishi, Hiromi Sakamoto, Yuji Tachimori, Hoichi Kato, Hiroshi Watanabe, Takashi Sugimura, and Masaaki Terada* 1090

Site-Directed Mutagenesis of the Histamine H_1 Receptor: Roles of Aspartic Acid^{107}, Asparagine^{198}, and Threonine^{194} *Kazumi Ohta, Hideyuki Hayashi, Hiroyuki Mizuguchi, Hiroyuki Kagamiyama, Katsumi Fujimoto, and Hiroyuki Fukui* 1096

A Chemically Synthesized Sialic Acid-Containing Glycoconjugate, 2-(tetradecylhexadecyl)-*O*-(5-acetamido-3,5-dideoxy-D-glycero-α-D-galacto-2-nonulopyranosylonic acid)-(2→3)-*O*-β-D-galactopyrannosyl-(1→4)-β-D-glucopyrannoside, Is a Potent Inhibitor of Cellular Immune Responses *Stephan Ladisch, Akira Hasegawa, Ruixiang Li, and Makoto Kiso* 1102

Identification of β-Trace as Prostaglandin D Synthase *Kikuko Watanabe, Yoshihiro Urade, Michael Mäder, Charles Murphy, and Osamu Hayaishi* 1110

Molecular Cloning and Characterization of a Novel Transglutaminase cDNA from a Human Prostate cDNA Library *Francis J. Grant, Denise A. Taylor, Paul O. Sheppard, Shannon L. Mathewes, William Lint, Erica Vanaja, Paul D. Bishop, and Patrick J. O'Hara* 1117

Combination of the Chemotherapeutic Agent 5-Fluorouracil with an Inhibitor of Its Catabolism Results in Increased Micronucleus Induction *Helga Stopper, Anja Kühnel, and Beate Podschun* 1124

Localization of Heparin-Binding, Neurite Outgrowth, and Antigenic Regions in Midkine Molecule *Hisako Muramatsu, Tatsuya Inui, Terutoshi Kimura, Shumpei Sakakibara, Xiao-jun Song, Hiroshi Maruta, and Takashi Muramatsu* 1131

Stoichiometry of *Sulfolobus* Ribosomal Protein L12e in 50S Subunits Determined by Quantification of Immunoblots *Carlos A. Casiano and Robert R. Traut* 1140

Purification and Molecular Cloning of Human Apolipoprotein F$^+$ *Joseph R. Day, John J. Albers, Teresa L. Gilbert, Theodore E. Whitmore, Walter J. McConathy, and Gertrud Wolfbauer* 1146

Requirement of the Human Immunodeficiency Virus Type 1 *env* Gene Sequence for TAR-Independent *trans* Activation by Tat from the Major Immediate–Early Promoter of Murine Cytomegalovirus *Yeon-Soo Kim* 1152

Exogenous Nitric Oxide Inhibits Proliferation of Cultured Vascular Endothelial Cells *Weidong Yang, Joji Ando, Risa Korenaga, Teruhiko Toyo-oka, and Akira Kamiya* 1160

Evidence That Cytochrome P450 2E1 Is Involved in the (ω-1)-Hydroxylation of Lauric Acid in Rat Liver Microsomes *Y. Amet, F. Berthou, T. Goasduff, J. P. Salaun, L. Le Breton, and J. F. Menez* 1168

Cisplatin Generates Superoxide Anion by Interaction with DNA in a Cell-Free System *Hidetaka Masuda, Toshiko Tanaka, and Umeo Takahama* 1175

E5510 Antagonizes Thrombin Receptor Signals by Inhibiting NF-κB Activation *Toshihiro Nakajima, Isao Kitajima, Hiroshi Shin, Wataru Matsumoto, Yasuko Soejima, and Ikuro Maruyama* 1181

Characterization of the Proline-Rich Region of Mouse MAPKAP Kinase 2: Influence on Catalytic Properties and Binding to the c-abl-SH3 Domain *in Vitro* *Kathrin Plath, Katrin Engel, Gabriele Schwedersky, and Matthias Gaestel* 1188

Phosphatidylcholine-Specific Phospholipase D Activity Is Elevated in v-Fps-Transformed Cells *You-Wei Jiang, Jianguo Song, Qun Zang, and David A. Foster* 1195
Isolation and Characterization of Cofactor-Independent Phosphoglycerate Mutase Gene from Maize *Pablo Pérez de la Ossa, Xavier Graña, Pilar Ruiz-Lozano, and Fernando Climent* 1204
Chinese Hamster Ovary Cells Resistant to Okadaic Acid Express a Multidrug-Resistant Phenotype *Hiroko Tohda, Akira Yasui, Takeshi Yasumoto, Michie Nakayasu, Hiroshi Shima, Minako Nagao, and Takashi Sugimura* 1210
High-Level Expression in *Escherichia coli* and Purification of Yeast Transcription Factor IIIA *Simone Ottonello, Andrea Ballabeni, Chiara Soncini, and Giorgio Dieci* 1217
Regional Expression of Epithelial Dipeptidyl Peptidase IV in the Human Intestines *Dalila Darmoul, Thierry Voisin, Alain Couvineau, Christiane Rouyer-Fessard, Rémi Salomon, Yangxi Wang, Dallas M. Swallow, and Marc Laburthe* 1224
The O-Chain of *Brucella abortus* Lipopolysaccharide Induces SDS-Resistant MHC Class II Molecules in Mouse B Cells *J-M. Escola, E. Moreno, P. Chavrier, and J-P. Gorvel* 1230
Involvement of Ecto-ATPase as an ATP Receptor in the Stimulatory Effect of Extracellular ATP on NO Release in Bovine Aorta Endothelial Cells *Kiyohito Yagi, Ikumi Nishino, Megumi Eguchi, Masahiko Kitagawa, Yoshiharu Miura, and Tadashi Mizoguchi* 1237
Short, Terminally Phosphorylated Oligoriboguanylic Acids Effectively Inhibit Cytopathicity Caused by Human Immunodeficiency Virus *Toshiaki Fujihashi, Toshiya Sakata, Akira Kaji, and Hideko Kaji* 1244
A Bacterial Nitric Oxide Synthase from a *Nocardia* Species *Yijun Chen and John P. N. Rosazza* 1251
Streptonigrin-Induced Topoisomerase II Sites Exhibit Base Preferences in the Middle of the Enzyme Stagger *François Leteurtre, Glenda Kohlhagen, and Yves Pommier* 1259
Expression of *trk*C in a Mouse Osteoblastic Cell Line and Its Response to Neurotrophin-3 *Tohru Nakanishi, Kazumi Ohyama, Chiharu Aoki, Akira Kudo, Takako Hattori, Kojiro Takahashi, Shigehiko Taniguchi, and Masaharu Takigawa* 1268
In Situ Localization of Rat Testis-Specific Calcineurin B Subunit Isoform β1 in the Developing Rat Testis *Kazuhiro Miyamoto, Hideki Matsui, Kazuhito Tomizawa, Yoshihiro Kuwata, Toshifumi Itano, Masaaki Tokuda, and Osamu Hatase* 1275
Transcriptional Regulation of the Human E-Cadherin Gene in Human Prostate Cancer Cell Lines: Characterization of the Human E-Cadherin Gene Promoter *Marion J. G. Bussemakers, Laurence A. Giroldi, Adrie van Bokhoven, and Jack A. Schalken* 1284
The Genes for the Calcium-Dependent Cell Adhesion Molecules P- and E-Cadherin Are Tandemly Arranged in the Human Genome *Marion J. G. Bussemakers, Adrie van Bokhoven, Maureen Völler, Frank P. Smit, and Jack A. Schalken* 1291
Lipopolysaccharide Primes Human Basophils for Enhanced Mediator Release: Requirement for Plasma Co-factor and CD14 *Mariko Iida, Koichi Hirai, Satoshi Shinohara, Masao Yamaguchi, Toshiaki Takaishi, Yoshio Sakamoto, Koji Ito, and Yutaka Morita* 1295

The Predisposing Gene of the Eker Rat Inherited Cancer Syndrome Is Tightly Linked to the Tuberous Sclerosis (TSC2) Gene *Okio Hino, Toshiyuki Kobayashi, Haruo Tsuchiya, Yasushi Kikuchi, Etsuko Kobayashi, Hiroaki Mitani, and Youko Hirayama* 1302

Molecular Cloning of Murine BST-1 Having Homology with CD38 and *Aplysia* ADP-Ribosyl Cyclase *Motoyuki Itoh, Katsuhiko Ishihara, Hitoshi Tomizawa, Hirokazu Tanaka, Yoshiko Kobune, Jun Ishikawa, Tsuneyasu Kaisho, and Toshio Hirano* 1309

Cell Surface Antigen CD38 Identified as Ecto-enzyme of NAD Glycohydrolase Has Hyaluronate-Binding Activity *Hiroshi Nishina, Kiyoshi Inageda, Katsunobu Takahashi, Shin-ichi Hoshino, Kazuhiko Ikeda, and Toshiaki Katada* 1318

Characterization of the Goat Lactoferrin cDNA: Assignment of the Relevant Locus to Bovine U12 Synteny Group *Fabienne Le Provost, Michèle Nocart, Gérard Guerin, and Patrice Martin* 1324

Heparin Selectively Inhibits Gene Expression of Matrix Metalloproteinase Transin in Cultured Mesangial Cells *Masanori Kitamura, Naoki Maruyama, Tetsuya Mitarai, Ryuji Nagasawa, Takashi Yokoo, and Osamu Sakai* 1333

Variations in the Size and Sulfation of Heparin Modulate the Effect of Heparin on the Binding of $VEGF_{165}$ to Its Receptors *Shay Soker, Dan Goldstaub, Carl M. Svahn, Israel Vlodavsky, Ben-Zion Levi, and Gera Neufeld* 1339

Alteration of the Subcellular Localization of Hepatitis B Virus Core Protein by Large but Not Small Surface Proteins *Chau-Ting Yeh, Jing-Hsiung Ou, Chia-Ming Chu, and Yun-Fan Liaw* 1348

Enhancement of Migration Activity in Cholesterol-Poor Endothelial Cells by Pretreating with HMG–CoA Reductase Inhibitors *Lijuan Ma, Ikuo Morita, Sei-itsu Murota* 1355

ERRATA

Volume 199, Number 1, February 28, 1994: Jan Backmann, Carola C. Doray, Hans-Peter Grunert, Olfert Landt, and Ulrich Hahn, "Extended Kinetic Analysis of Ribonuclease T1 Variants Leads to an Improved Scheme for the Reaction Mechanism," pp. 213–219 1362

Volume 201, Number 3, June 30, 1994: Shin Sugo, Naoto Minamino, Kenji Kangawa, Kaoru Miyamoto, Kazuo Kitamura, Junichiro Sakata, Tanenao Eto, and Hisayuki Matsuo, "Endothelial Cells Actively Synthesize and Secrete Adrenomedullin," pp. 1160–1166 1363

Volume 202, Number 2, July 29, 1994: Y. C. Chou, J. C. Perng, C. C. Juan, S. Y. Jang, C. F. Kwok, W. L. Chen, J. C. Fong, and L. T. Ho, "Endothelin-1 Inhibits Insulin-Stimulated Glucose Uptake in Isolated Rat Adipocytes," pp. 688–693 1363

Volume 203, Number 3, September 30, 1994

Identification and Localization of the Myotonic Dystrophy Gene Product in Skeletal and Cardiac Muscles *Sergio Salvatori, Donatella Biral, Sandra Furlan, and Oriano Marin* 1365

Cloning of Human and Mouse Brain cDNAs Coding for S1, the Second Member of the Mammalian Elongation Factor-1α Gene Family: Analysis of a Possible Evolutionary Pathway *Stephen Lee, David K. Ann, and Eugenia Wang* 1371

A Novel Effect of the New Antileukemic Drug, 2-Chloro-2′-deoxyadenosine, in Human Lymphocytes *M. Sasvári-Székely, Zs. Piróth, Z. Kazimierczuk, and M. Staub* 1378

Hydroxystearic Acid Effects on CDC2/Histone H1 Kinase Activity in C108 Carcinoma Cells *E. Casali, N. Gesmundo, G. Farruggia, A. Spisni, and L. Masotti* 1385

A Possible Role of Tyrosine Kinases in the Regulation of Muscarinic Receptor-Activated Cation Channels in Guinea-Pig Ileum *R. Inoue, Y. Waniishi, K. Yamada, and Y. Ito* 1392

Modulation of KC/gro Protein (Interleukin-8 Related Protein in Rodents) Release from Hepatocytes by Biologically Active Mediators *Yasushi Shiratori, Yohko Hikiba, Emmanuel Mawet, Yasuro Niwa, Masayuki Matsumura, Naoya Kato, Shuichiro Shiina, Minoru Tada, Yutaka Komatsu, Takao Kawabe, Haruhiko Yoshida, Ken'ichi Okano, and Masao Omata* 1398

Cloning and Sequencing of Rat Liver Carboxylesterase ES-3 (EGASYN) *Mariette Robbi and Henri Beaufay* 1404

Na⁺-Dependent Transport of Aminopeptidase-Resistant Sugar-Coupled Tripeptides in Rat Intestine *Takashi Mizuma, Norio Sakai, and Shoji Awazu* 1412

cDNA Cloning and Expression of Bovine Endothelin Converting Enzyme *Tsuyoshi Ikura, Tatsuya Sawamura, Takuma Shiraki, Hiroshi Hosokawa, Tsuneo Kido, Hajime Hoshikawa, Kohei Shimada, Kazuhiko Tanzawa, Shigeo Kobayashi, Soichi Miwa, and Tomoh Masaki* 1417

Expression and Regulation of Calcium-Independent Protein Kinase C in NG 108-15 Cell Differentiation *Fiorenzo Battaini, Alessia Pascale, Laura Lucchi, Marco Racchi, Stefania Bergamaschi, Marco Parenti, William C. Wetsel, Stefano Govoni, and Marco Trabucchi* 1423

Guanylin Activates Rat Colonic Particulate Guanylate Cyclase *Sharad Khare, David Wilson, Ramesh K. Wali, Xiao-Ying Tien, Marc Bissonnette, Sharon M. Niedziela, Merry J. G. Bolt, Michael D. Sitrin, and Thomas A. Brasitus* 1432

Identification of Fas Antigen Associated with Apoptotic Cell Death in Murine Ovary *Mao Wu Guo, Etsuko Mori, Ji Ping Xu, and Tsuneatsu Mori* 1438

Isolation and Functional Analysis of the Promoter of the Bovine Serum Albumin Gene *Susan C. Power, Silvia Cereghini, Anna Rollier, and Frank Gannon* 1447

Constitutive Mucin Secretion Linked to CFTR Expression *Rahul Kuver, N. Ramesh, Stella Lau, Christopher Savard, Sum P. Lee, and William R. A. Osborne* 1457

The Modification of Hemoglobin by a Long Crosslinking Reagent: Bis(3,5-dibromosalicyl) Sebacate *Qunying Zhang and Kenneth W. Olsen* 1463

Substrate Specificity of Ascorbate Oxidase: Unexpected Similarity to the Reduction Site of Dopamine β-Monooxygenase *Kandatege Wimalasena and Silpadipathiyalage Dharmasena* 1471

Molecular Cloning of Human Calmitine, a Mitochondrial Calcium Binding Protein, Reveals Identity with Calsequestrine *N. Bataille, N. Schmitt, P. Aumercier-Maes, B. Ollivier, B. Lucas-Heron, and P. Lestienne* 1477

Assignment of the True and Processed Genes for Human Glycine Decarboxylase to 9p23–24 and 4q12 *Masaharu Isobe, Hirohisa Koyata, Toshihiro Sakakibara, Keiko Momoi-Isobe, and Koichi Hiraga* 1483

Genistein, an Inhibitor of Protein Tyrosine Kinase, Is Also a Competitive Antagonist for P_1-Purinergic (Adenosine) Receptor in FRTL-5 Thyroid Cells *Fumikazu Okajima, Mohammed Akbar, Mohammed Abdul Majid, Kimie Sho, Hideaki Tomura, and Yoichi Kondo* 1488

Acetylcarnitine Inhibits Alcohol Dehydrogenase *Dileep S. Sachan and Youn-Soo Cha* 1496

Phosphorylation of Calponin by PKC Is Blocked by F-Actin *in Vitro* *Hiromitsu Nagumo, Katsuhiko Sakurada, Minoru Seto, and Yasuharu Sasaki* 1502

Microsomal Glutathione S-Transferase (GST) Isozymes in *Aspergillus ochraceus* TS: Induction by 3-Methylcholanthrene *Jharna Datta, Tapan K. Dutta, and Timir B. Samanta* 1508

ESR Spin Trapping Investigation on Peroxynitrite Decomposition: No Evidence for Hydroxyl Radical Production *Xianglin Shi and Yan Mao* 1515

Tetrahydrobiopterin Is a Secretory Product of Murine Vascular Endothelial Cells *R. Walter, A. Schaffner, N. Blau, L. Kierat, and G. Schoedon* 1522

Cyclin/cdk2 Complexes in the Nucleus of HeLa Cells *Montserrat Jaumot, Xavier Graña, Antonio Giordano, Prem Veer Reddy, Neur Agell, and Oriol Bachs* 1527

Deletion of Exon 18 Is a Frequent Mutation in Glycogen Storage Disease Type II *M. Van der Kraan, M. A. Kroos, M. Joosse, A. G. A. Bijvoet, M. Ph. Verbeet, W. J. Kleijer, and A. J. J. Reuser* 1535

Dissociation between Interleukin-1β-Induced Expression of mRNA for Superoxide Dismutase and Nitric Oxide Synthase in Insulin-Producing Cells *N. Bigdeli, A. Niemann, S. Sandler, and D. L. Eizirik* 1542

Hepatic Poly(ADP-ribose) Polymerase Activity in Rat Is Controlled by Thyroid Hormones *C. F. Cesarone, L. Scarabelli, P. Giannoni, and M. Orunesu* 1548

Induction of PC12 Cell Death, Apoptosis, by a Sialoglycopeptide from Bovine Brain *Yoko Kobayashi, Toshihiko Saheki, and Takao Shinozawa* 1554

The Aminoterminus of c-Raf-1 Binds a 28-kDa Cellular Protein *Monika Niehof, Peter Beimling, and Karin Moelling* 1560

Rescue of Yeast Defective in Mitochondrial ATP Synthase Subunit 8 by a Heterologous Gene from *Aspergillus nidulans* *Andrew F. L. Straffon, Phillip Nagley, and Rodney J. Devenish* 1567

Effect of Suramin on $p34^{cdc2}$ Kinase *in Vitro* and in Extracts from Human H69 Cells: Evidence for a Double Mechanism of Action *Krzysztof Bojanowski, Kazuto Nishio, Minoru Fukuda, Annette Kragh Larsen, and Nagahiro Saijo* 1574

Regional Expression of the *Cwnt*-4 Gene in Developing Chick Central Nervous System in Relationship to the Diencephalic Neuromere D2 and a Dorsal Domain of the Spinal Cord *Hidefumi Yoshioka, Hideyo Ohuchi, Tsutomu Nohno, Akira Fujiwara, Nobuya Tanda, Yasuhiko Kawakami, and Sumihare Noji* 1581

Nuclear Localization of $P185^{neu}$ Tyrosine Kinase and Its Association with Transcriptional Transactivation *Youming Xie and Mien-Chie Hung* 1589

Gene Expression of VIP Receptor in Rat Lymphocytes *Rosa P. Gomariz, Elvira Garrido, Javier Leceta, Carmen Martinez, Raquel Abalo, and Mario Delgado* 1599

Novel Endothelial Cell Activation Factor(s) Released from Activated Platelets Which Induce E-Selectin Expression and Tumor Cell Adhesion to Endothelial Cells: A Preliminary Note *Sen-itiroh Hakomori (with technical assistance from Miyuki Anderson)* 1605

N^{ω}-Hydroxy-L-arginine, an Intermediate in the L-Arginine to Nitric Oxide Pathway, Is a Strong Inhibitor of Liver and Macrophage Arginase *J.-L. Boucher, J. Custot, S. Vadon, M. Delaforge, M. Lepoivre, J.-P. Tenu, A. Yapo, and D. Mansuy* 1614

A Novel Cationic Amphiphile for Transfection of Mammalian Cells *Jean-Marie Ruysschaert, Abdelatif El Ouahabi, Véronique Willeaume, Georges Huez, Robert Fuks, Michel Vandenbranden, and Patrick Di Stefano* 1622

UV Radiation Induces DNA Fragmentation and Cell Death in B16 Melanoma Sensitized by Bromodeoxyuridine: Impaired c-jun Induction and Defective Tyrosine Phosphorylation Signaling *Mary Strasberg Rieber and Manuel Rieber* 1629

Inhibition of the Induction of Nitric Oxide Synthase by Spermine Is Modulated by Aldehyde Dehydrogenase *Garry J. Southan, Csaba Szabó, and Christoph Thiemermann* 1638

The C-Terminus of IFN-γ Is Sufficient for Intracellular Function *Brian E. Szente, Jeanne M. Soos, and Howard M. Johnson* 1645

Active Site Geometry in the High Oxido-reduction Potential Rusticyanin from *Thiobacillus ferrooxidans* *Frédéric Nunzi, Françoise Guerlesquin, William Shepard, Bruno Guigliarelli, and Mireille Bruschi* 1655

Studies on Congenital Hereditary Cataract and Microphthalmia of the Miniature Schnauzer Dog *Barkur S. Shastry and V. N. Reddy* 1663

Glutathione Peroxidase and Glutathione Reductase Activities toward Glutathione-Derived Antioxidants *J. M. Gaullier, P. Lafontant, A. Valla, M. Bazin, M. Giraud, and R. Santus* 1668

Molecular Characterization of HPH-1: A Mouse Mutant Deficient in GTP Cyclohydrolase I Activity *Markus Gütlich, Irmgard Ziegler, Klaus Witter, Benjamin Hemmens, Lothar Hültner, J. David McDonald, Thomas Werner, Wolfgang Rödl, and Adelbert Bacher* 1675

Synthesis of Proteoglycan during HL-60 Cell Differentiation *Carol A. Whyzmuzis, Joseph M. Wu, and Isidore Danishefsky* 1682

Molecular Cloning Reveals Alternative Splice Forms of Human α(E)-Catenin *David L. Rimm, Partow Kebriaei, and Jon S. Morrow* 1691

Activation of Phosphoinositide Catabolism and DNA Synthesis in Vascular Smooth Muscle Cells by LDL and Positively Charged Proteins: Evidence That Effects of LDL Are Not Specifically Dependent on the Polycationic Nature of Apo B *Thérèse Resink, Vsevolod Tkachuk, Alfred Hahn, and Valery Bochkov* 1700

An Enzymatic Activity in Bovine Brain That Catalyzes the Reversal of the C-Terminal Methyl Esterification of Protein Phosphatase 2A *Hongying Xie and Steven Clarke* 1710

A Newly Cloned Phospholipase A2-Activating Protein Elicits Ca^{2+} Oscillations and Pancreatic Amylase Secretion via Mediation of G Protein β/Phospholipase A2/Arachidonic Acid Cascades *Yasuhiro Tsunoda and Chung Owyang* 1716

Identification of Two Ryanodine Receptor Transcripts in Neonatal, Slow-, and Fast-Twitch Rabbit Skeletal Muscles *Francesco Zorzato, Roberta Sacchetto, and Alfredo Margreth* 1725

Ubiquitin-Mediated Degradative Pathway Degrades the Extracellular but Not the Intracellular Form of Amyloid β-Protein Precursor *Luisa Gregori, Ramaninder Bhasin, and Dmitry Goldgaber* 1731

Characterization of Activin A-, Activin AB-, and Activin B-Responding Cells by Their Responses to Hypothalamic Releasing Hormones *Keiichi Tasaka, Kanji Kasahara, Nobuyuki Masumoto, Jirou Mizuki, Kazuyuki Fukami, Akira Miyake, Takanori Nakamura, and Hiromu Sugino* 1739

Flavin-Supported Fatty Acid Oxidation by the Heme Domain of *Bacillus megaterium* Cytochrome $P450_{BM-3}$ *Shanthi Gonvindaraj, Huiying Li, and Thomas L. Poulos* 1745

Interaction between Ganglioside-Containing Liposome and Rat T-Lymphocyte: Confocal Fluorescence Microscopic Study *Eiichi Kato, Kazunari Akiyoshi, Tadahide Furuno, Mamoru Nakanishi, Akihiko Kikuchi, Kazunori Kataoka, and Junzo Sunamoto* 1750

Gene Transfer Using Purified Retroviral Integrase *Akiko Shoji-Tanaka, Toshiaki Mizuochi, and Katsutoshi Komuro* 1756

Identification of the Nucleolar Targeting Signal of Human Angiogenin *Junona Moroianu and James F. Riordan* 1765

Possible Involvement of GTP-Binding Proteins in 1a,25-Dihydroxyvitamin D_3 Induction of Tissue Transglutaminase in Mouse Peritoneal Macrophages *Isao Ishii and Michio Ui* 1773

Purification and Characterization of a Functional Soluble Fibroblast Growth Factor Receptor 1 *Guan Wang and Kenneth A. Thomas* 1781

Heterogeneity and Diversity of IgM and IgG Lupus Anticoagulants in an Individual with Systemic Lupus Erythematosus *Norihiko Nakamura, Chihiro Azuma, Takashi Akamizu, Hideo Sugawa, Fumihiko Matsuda, Nobuaki Mitsuda, Tasuku Honjo, Toru Mori, and Kenji Yamaji* 1789

The Octamer Motif Present in the Rex-1 Promoter Binds Oct-1 and Oct-3 Expressed by EC Cells and ES Cells *Edward Rosfjord and Angie Rizzino* 1795

In Vitro Antioxidant Activity of Calcium Antagonists against LDL Oxidation Compared with a-Tocopherol *Elisabetta Lupo, Rudolf Locher, Burkhard Weisser, and Wilhelm Vetter* 1803

Glucocorticoids Negatively Regulate the Transcription of *KC*, the Mouse Homolog of *MGSA/GRO* *Zheng-Wen Deng, Diane J. Denkinger, Kate E. Peterson, Thomas F. Deuel, and Rodney S. Kawahara* 1809

Role of Serine/Threonine Protein Kinases in the Induction of *JE*, a Platelet-Derived Growth Factor Inducible Gene *Rodney S. Kawahara, Zheng-Wen Deng, Diane J. Denkinger, and Thomas F. Deuel* 1815

Stable Expression of the Neuronal BI (Class A) Calcium Channel in Baby Hamster Kidney Cells *Tetsuhiro Niidome, Tetsuyuki Teramoto, Yoshiyuki Murata, Isao Tanaka, Toshio Seto, Kohei Sawada, Yasuo Mori, and Kouichi Katayama* 1821

Production of Monoclonal Antibodies Recognizing Cancer-Associated Antigens Expressed on Mucin-Type Sugar Chains *Akira Kurosaka, Ken Ikeda, Noriaki Sakuragi, and Seiichiro Fujimoto* 1828

Hepatocyte Nuclear Factor-3 (HNF-3) Binds to the Insulin Response Sequence in the IGF Binding Protein-1 (IGFBP-1) Promoter and Enhances Promoter Function *Terry G. Unterman, Ayeesha Fareeduddin, Matthew A. Harris, Rajendra G. Goswami, Anna Porcella, Robert H. Costa, and Raul G. Lacson* 1835

Human Type 2 Angiotensin II Receptor Gene: Cloned, Mapped to the X Chromosome, and Its mRNA Is Expressed in the Human Lung *George Koike, Masatsugu Horiuchi, Takehiko Yamada, Claude Szpirer, Howard J. Jacob, and Victor J. Dzau* 1842

Cystine-Rich Fish Antifreeze Is Produced as an Active Proprotein Precursor in Fall Armyworm Cells *Bernard P. Duncker, Sherry Y. Gauthier, and Peter L. Davies* 1851

Cardioprotective Effects of Alcohol: Mediation by Human Vascular Alcohol Dehydrogenase *Ana T. Bello, Nalini S. Bora, Louis G. Lange, and Puran S. Bora* 1858

Cardiac Angiotensin II Receptor Populations during Aortacaval Fistulae, AII and β Adrenergic Receptor Blockade *Tangela D. Poole, Maurice S. Holder, and Diane Gipson* 1865

Identification of a Retina-Specific Footprint within the Retina-Specific Regulatory Region of the Human Interphotoreceptor Retinoid-Binding Protein Gene *Gregory I. Liou, Suraporn Matragoon, Paul A. Overbeek, and Yijian Fei* 1875

Cloning and Sequencing of the Gene for the Lactose Carrier of *Citrobacter freundii* *Jong-In Lee, Noriko Okazaki, Tomofusa Tsuchiya, and T. Hastings Wilson* 1882

IL-1β Regulates the Expression of the G*i*2α Gene via Lipid Mediators in Guinea Pig Tracheal Muscle *Fusao Hirata, Joanna Y. Lee, Tohru Sakamoto, Akihiro Nomura, Yoshiyuki Uchida, Aiko Hirata, and Shizuo Hasegawa* 1889

Functional Difference between Two Isoforms of Rat Kidney Prostaglandin Receptor EP_3 Subtype *Kazuhisa Takeuchi, Nobuyuki Takahashi, Takaaki Abe, Osamu Ito, Eikatsu Tsutsumi, Yoshiyuki Taniyama, and Keishi Abe* 1897

Competition between Linker Histones and HMG1 for Binding to Four-Way Junction DNA: Implications for Transcription *Patrick Varga-Weisz, Kensal van Holde, and Jordanka Zlatanova* 1904

Activation of Mitogen-Activated Protein Kinase Cascade through Erythropoietin Receptor *Kazuo Todokoro, Masahide Sugiyama, Eisuke Nishida, and Kazuyasu Nakaya* 1912

Ancrod-Formed Fibrin Stimulates Prostacyclin Production of Human Umbilical Vein Endothelial Cells via *de Novo* Synthesis of Cyclooxygenase *Mei-Chi Chang, Chin-Yin Wang, and Tur-Fu Huang* 1920

Phosphorylation of Rabphilin-3A, a Putative Target Protein for *Rab*3A, by Cyclic AMP-Dependent Protein Kinase *Shin-ichiro Numata, Hiromichi Shirataki, Seiichi Hagi, Tomomi Yamamoto, and Yoshimi Takai* 1927

Volume 192, Number 3, May 14, 1993: Sarah J. Roberts-Thomson, Michael E. McManus, Robert H. Tukey, Frank F. Gonzalez, and Gerald M. Holder, "The Catalytic Activity of Four Expressed Human Cytochrome P450s toward Benzo[a]pyrene and the Isomers of Its Proximate Carcinogen," pp. 1373–1379 1935

Volume 201, Number 3, June 30, 1994: Tadashi Ito, Hisayuki Yokokura, Angus C. Nairn, Yuji Nimura, and Hiroyoshi Hidaka, "Ca^{2+}/Calmodulin-Dependent Protein Kinase V and I May Form a Family of Isoforms," pp. 1561–1566 1935
Author Index for Volume 203 1936

Volume 204, Number 1, October 14, 1994

Effect of Heme-Apoprotein Interactions on the Activity of Horseradish and Wheat Germ Peroxidases *Marcelo Fernández, Irene Rezzano, and Adriana Robinsohn* 1

Characterization of Monoclonal Antibodies to Chitinase A1 and Enhancement of Chitinase A1 Activity by Monoclonal Antibodies *Sakari Sekine, Yashushi Ito, Masayuki Hashimoto, Hirosato Tanaka, and Takeshi Watanabe* 7

Lactate Oxidation Coupled to Energy Production in Mitochondria-like Particles from *Setaria digitata*, a Filarial Parasite *V. M. Sivan and R. Kaleysa Raj* 17

Stimulation of Myoglobin-Dependent Lipid Peroxidation by Adriamycin *Lawrence C. Trost and Kendall B. Wallace* 23

Adriamycin-Induced Oxidation of Myoglobin *Lawrence C. Trost and Kendall B. Wallace* 30

Enhancer Function of a 53-bp Repetitive Element in the 5′ Flanking Region of the Human Neutrophil Elastase Gene *Kunihiko Yoshimura, Chin-Shyan Chu, and Ronald G. Crystal* 38

Cytotoxicity of 6-Biopterin to Human Melanocytes *Karin U. Schallreuter, Gerd Büttner, Mark R. Pittelkow, John M. Wood, Norma N. Swanson, and Christa Körner* 43

Identification of a Novel Member of the Nuclear Receptor Superfamily Which Is Closely Related to Rev-ErbA *Eva Enmark, Tommi Kainu, Markku Pelto-Huikko, and Jan-Åke Gustafsson* 49

Amidase Activity of Human Bence Jones Proteins *Kinji Matsuura, Kazuhiko Yamamoto, and Hyogo Sinohara* 57

An Acid Phosphatase from *Aspergillus ficuum* Has Homology to *Penicillium chrysogenum* PhoA *Kenneth C. Ehrlich, Beverly G. Montalbano, Edward J. Mullaney, H. Charles Dischinger, Jr., and Abul H. J. Ullah* 63

Inositol Tetrakisphosphate Stimulates a Novel ATP-Independent Ca^{2+} Uptake Mechanism in Cardiac Junctional Sarcoplasmic Reticulum *Eugene E. Quist, Brian H. Foresman, Ranga Vasan, and Carolyn W. Quist* 69

Rifampicin Prevents the Aggregation and Neurotoxicity of Amyloid β Protein *in Vitro* *Takami Tomiyama, Satoshi Asano, Yorimasa Suwa, Takuya Morita, Ken-ichiro Kataoka, Hiroshi Mori, and Noriaki Endo* 76

Bcl-2 Overexpression Abolishes Early Calcium Waving Preceding Apoptosis in NIH-3T3 Murine Fibroblasts *Lucia Magnelli, Marina Cinelli, Alessandra Turchetti, and Vincenzo P. Chiarugi* 84

Primary Rat Hepatocytes Express Cyclin D1 Messenger RNA during Their Growth Cycle and during Mitogenic Transitions Induced by Transforming Growth Factor-α *K. S. Koch, X. P. Lu, and H. L. Leffert* 91

α-Lipoic Acid Supplementation Prevents Symptoms of Vitamin E Deficiency *M. Podda, H. J. Tritschler, H. Ulrich, and L. Packer* 98

Nitric Oxide Inhibits the Expression of Protein Kinase C δ Gene in the Murine Peritoneal Macrophages *Chang-Duk Jun, Byung-Min Choi, So-Young Lee, Shin-Sung Kang, Hyung-Min Kim, and Hun-Taeg Chung* 105

Synergy between Phorbol Esters and Retinoic Acid in Inducing Protein Kinase C Activation *Haniaa Bouzinba-Segard, Xiao-Tang Fan, Mylène Perderiset, and Monique Castagna* 112

Replacement of Methionine as the Axial Ligand of *Achromobacter cycloclastes* Cytochrome C_{554} at High pH Values Revealed by Absorption, EPR, and MCD Spectroscopy *Lígia M. Saraiva, A. J. Thomson, Nick E. Le Brun, Ming-Y. Liu, William J. Payne, Jean LeGall, and Isabel Moura* 120

Potent Inhibition of Insulin Receptor Dephosphorylation by a Hexamer Peptide Containing the Phosphotyrosyl Mimetic F_2Pmp *Terrence R. Burke, Jr., Hemanta K. Kole, and Peter P. Roller* 129

The Pro-Peptide of the Proβ-Polypeptide Chain of Human β-Hexosaminidase Is Necessary for Proper Protein Folding and Exit from the Endoplasmic Reticulum *Carmelina Sagherian, Paul Thorner, and Don Mahuran* 135

A23187 Releases Bound Rather Than Free Calcium from Calcium-Loaded Liposomes *James W. Clack, Paul S. Brown, Jennifer M. Feldmann, and Frank A. Witzmann* 142

A Simplified Procedure for Synthesizing Nucleoside 1-Thiotriphosphates: dATP$_\alpha$S, dGTP$_\alpha$S, UTP$_\alpha$S, and dTTP$_\alpha$S *Abolfazl Arabshahi and Perry A. Frey* 150

Characterization of the Mechanism of Cellular and Cell Free Protein Synthesis Inhibition by an Anti-tumor Ribonuclease *Jih-Jing Lin, Dianne L. Newton, Stanislaw M. Mikulski, Hsiang-Fu Kung, Richard J. Youle, and Susanna M. Rybak* 156

Immunological Identity of Rat Liver Cytosolic Heme-Binding Protein with Purified and Recombinant Liver Fatty Acid Binding Protein by Western Blots of Two-Dimensional Gels *L. F. Epstein, N. M. Bass, S.-i. Iwahara, D. C. Wilton, and U. Muller-Eberhard* 163

Nitric Oxide Potently and Reversibly Deenergizes Mitochondria at Low Oxygen Tension *Matthias Schweizer and Christoph Richter* 169

Multiple Effector Coupling of Somatostatin Receptor Subtype SSTR1 *Akira Kubota, Yuichiro Yamada, Shinji Kagimoto, Koichiro Yasuda, Yoshimichi Someya, Yu Ihara, Yoshimasa Okamoto, Tohru Kozasa, Susumu Seino, and Yutaka Seino* 176

A *Chlorella* Virus Gene Promoter Functions as a Strong Promoter both in Plants and Bacteria *Amitava Mitra, Dan W. Higgins, and Nancy J. Rohe* 187

Cloning of cDNAs and the Molecular Evolution of a Bovine MHC Class II *DRA* Gene *Yoko Aida, Chikara Kohda, Akira Morooka, Yutaka Nakai, Keiji Ogimoto, Takeshi Urao, and Masatoshi Asahina* 195

Molecular Cloning of Rat Bone Morphogenetic Protein (BMP) Type 1A Receptor and Its Expression during Ectopic Bone Formation Induced by BMP
Kohsuke Takeda, Shinichiro Oida, Hidenori Ichijo, Tadahiro Iimura, Yutaka Maruoka, Teruo Amagasa, and Satoshi Sasaki 203

Glucocorticoid Induction of Rat Angiotensin II Type 1A Receptor Gene Promoter
Shuhsei Uno, Deng-Fu Guo, Masahide Nakajima, Hideyuki Ohi, Teruaki Imada, Ryuji Hiramatsu, Hiroshi Nakakubo, Norifumi Nakamura, and Tadashi Inagami 210

Inhibition and Inhibition Kinetics of Angiotensin Converting Enzyme Activity by Hemorphins, Isolated from a Peptic Bovine Hemoglobin Hydrolysate
Qiuyu Zhao, Frédéric Sannier, Isabelle Garreau, Didier Guillochon, and Jean Marie Piot 216

Chinifur, a Selective Inhibitor and "Subversive Substrate" for *Trypanosoma congolense* Trypanothione Reductase *Narimantas Cenas, Daiva Bironaite, Egle Dickancaite, Zilvinas Anusevicius, Jonas Sarlauskas, and John S. Blanchard* 224

Electromechanical Transduction: Reduction-Driven Hydrophobic Folding Demonstrated in a Model Protein to Perform Mechanical Work
Dan W. Urry, Larry C. Hayes, and D. Channe Gowda 230

Serum from Rats with Acute Pancreatitis Induces Expression of the PAP mRNA in the Pancreatic Acinar Cell Line Ar-42J *Nelson J. Dusetti, Gustavo Mallo, Jean-Charles Dagorn, and Juan L. Iovanna* 238

Nitric Oxide-Mediated Apoptosis in Murine Mastocytoma
Isao Kitajima, Koichi Kawahara, Toshihiro Nakajima, Yasuko Soejima, Takashi Matsuyama, and Ikuro Maruyama 244

Evidence for Glucokinase Translocation by Glucose in Rat Hepatocytes
Yukiyasu Toyoda, Ichitomo Miwa, Masahiro Kamiya, Saiko Ogiso, Tsunemasa Nonogaki, Shigehisa Aoki, and Jun Okuda 252

Inhibition of 3T3 Adipogenesis by Retinoic Acid Is Not Mediated by Cytoplasmic Retinoic Acid-Binding Protein *L. A. Salazar-Olivo, F. Castro-Muñozledo, M. de la Garza, and W. Kuri-Harcuch* 257

Modulation of Human Melanoma Cell Metastasis and Adhesion May Involve Integrin Phosphorylation Mediated through Protein Kinase C *Jennifer A. Dumont and Alan J. Bitonti* 264

Inhibition, Tissue Distribution, and Hormonal Specificity of a Promoter-Binding Factor for the Uteroglobin Gene *P. B. Daniel, C. Molloy, J. C. Rayner, A. M. Hill, and D. W. Bullock* 273

Dominant Negative Effects of a Carboxy-Truncated Jak2 Mutant on Epo-Induced Proliferation and Jak2 Activation *Hongming Zhuang, Sunil V. Patel, Tong-Chuan He, Zhutian Niu, and Don M. Wojchowski* 278

Developmental Regulation and Tissue-Specific Expression of Hamster Dolichol-P-Dependent *N*-Acetylglucosamine-1-P Transferase (GPT)
Olivia M. Mota, George T. Huang, and Maria A. Kukuruzinska 284

Isolation and Structure of the *Drosophila* Corazonin Gene *Jan A. Veenstra* 292

The Catalytic Mechanism of α-Amylases Based upon Enzyme Crystal Structures and Model Building Calculations *Alexey K. Mazur, Richard Haser, and Françoise Payan* 297

Mouse Prostaglandin E Receptor EP_3 Subtype Mediates Calcium Signals via Gi in cDNA-Transfected Chinese Hamster Ovary Cells *Atsushi Irie, Eri Segi, Yukihiko Sugimoto, Atsushi Ichikawa, and Manabu Negishi* 303

Methylmercury Induces Apoptosis of Rat Cerebellar Neurons in Primary Culture *Manabu Kunimoto* 310

Adenosine as an Endogenous Mediator of Hypoxia for Induction of Vascular Endothelial Growth Factor mRNA in U-937 Cells *Etsuo Hashimoto, Kumie Kage, Teruhiko Ogita, Takashi Nakaoka, Rumiko Matsuoka, and Yuji Kira* 318

Tetrafibricin Has a High Selectivity for GPIIb/IIIa: Comparison of the Effects of Tetrafibricin and RGDS on GPIIb/IIIa and the Vitronectin Receptor *Tomoko Satoh, William C. Kouns, Yuko Yamashita, Tsutomu Kamiyama, and Beat Steiner* 325

Identification of the Multicatalytic Enzyme as a Possible γ-Secretase for the Amyloid Precursor Protein *Dorothy I. Mundy* 333

Carbohydrate Antigens Recognized by Anti-horseradish Peroxidase Antiserum Are Expressed on Mammalian Cells *Akira Kurosaka, Yoshio Tsuyuki, and Saisei Tahara* 342

Activation of PKN, a Novel 120-kDa Protein Kinase with Leucine Zipper-like Sequences, by Unsaturated Fatty Acids and by Limited Proteolysis *Hideyuki Mukai, Michinori Kitagawa, Hideki Shibata, Hiromi Takanaga, Kazuya Mori, Masaki Shimakawa, Masako Miyahara, Kazuyo Hirao, and Yoshitaka Ono* 348

Characterization of High-Molecular-Mass Heat Shock Proteins and 42°C-Specific Heat Shock Proteins of Murine Cells *Takumi Hatayama, Kunihiko Yasuda, and Eiji Nishiyama* 357

Recognition DNA Sequence of a Novel Putative Transcription Factor, BCL6 *Norihiko Kawamata, Tohru Miki, Kazuteru Ohashi, Ken Suzuki, Tetsuya Fukuda, Shinsaku Hirosawa, and Nobuo Aoki* 366

Molecular Cloning and Characterization of a cDNA for Bovine Phospholipase C-α: Proposal of Redesignation of Phospholipase C-α *Naoto Hirano, Futoshi Shibasaki, Hiroyuki Kato, Ryuichi Sakai, Tomoyuki Tanaka, Junji Nishida, Yoshio Yazaki, Tadaomi Takenawa, and Hisamaru Hirai* 375

Cyclosporin A Blocks Induction of Tumor Necrosis Factor-α in Human B Lymphocytes *Carla S. Smith, Gilbert Ortega, Libbie Parker, and William T. Shearer* 383

Ciliary Neurotrophic Factor Induced-Increase in β-Amyloid Precursor Protein mRNA in Rat C6 Glioma Cells *Shinji Sudoh, Hideshi Kawakami, Mituhiro Ohta, and Shigenobu Nakamura* 391

Lovastatin Disrupts Early Events in Insulin Signaling: A Potential Mechanism of Lovastatin's Anti-mitogenic Activity *Terence F. McGuire, Xiao-Qin Xu, Seth J. Corey, Guillermo G. Romero, and Said M. Sebti* 399

Pharmacological Profile of a Non-peptidic Dual Inhibitor of Neutral Endopeptidase 24.11 and Endothelin-Converting Enzyme *Stéphane De Lombaert, Rajendra D. Ghai, Arco Y. Jeng, Angelo J. Trapani, and Randy L. Webb* 407

Evidence for a Globin Promoter-Specific Silencer Element Located Upstream of the Human δ-Globin Gene *Maria Vitale, Rosalba Di Marzo, Roberta Calzolari, Santina Acuto, David O'Neill, Arthur Bank, and Aurelio Maggio* 413

The Cloning and Expression of a Human Creatine Transporter *Ichiro Sora, Jeremy Richman, Giovanna Santoro, Hongbing Wei, Yu Wang, Todd Vanderah, Robert Horvath, Mike Nguyen, Sue Waite, William R. Roeske, and Henry I. Yamamura* 419

Two *o*-Type Oxidases in *Methylobacillus flagellatum* KT *M. S. Muntyan, D. A. Bloch, T. Yu. Dinarieva, L. A. Drachev, and A. I. Netrusov* 428

Accurate Determination and Physicochemical Properties of Rat Liver Nuclear Retinoic Acid (RA) Receptors *Julius Brtko* 439

Role of Phosphatidylinositol-3-Kinase in Insulin Receptor Signaling: Studies with Inhibitor, LY294002 *Victor Sanchez-Margálet, Ira D. Goldfine, Chris J. Vlahos, and Chin K. Sung* 446

Human Erythrocyte Ankyrin, a Cytoskeleton Component, Generates the p57 Membrane Proteinase Which Cleaves C3, the Third Component of Complement *Jacques Hermann, Monique Barel, and Raymond Frade* 453

Differential Expression of Protein Kinase C Isoform Genes in Three Murine Erythroleukemia Cell Variants: Implication for Chemical-Induced Differentiation *A. Pessino, B. Sparatore, M. Patrone, M. Passalacqua, E. Melloni, and S. Pontremoli* 461

Role of Fas Ligand in Apoptosis Induced by Hepatitis C Virus Infection *Eiji Mita, Norio Hayashi, Sadaharu Iio, Tetsuo Takehara, Taizo Hijioka, Akinori Kasahara, Hideyuki Fusamoto, and Takenobu Kamada* 468

Rapid Effects of Aldosterone on Free Intracellular Calcium in Vascular Smooth Muscle and Endothelial Cells: Subcellular Localization of Calcium Elevations by Single Cell Imaging *Martin Wehling, Axel Ulsenheimer, Manfred Schneider, Craig Neylon, and Michael Christ* 475

Chronic Progressive External Ophthalmoplegia Is Associated with a Novel Mutation in the Mitochondrial $tRNA^{Asn}$ Gene *Peter Seibel, Jürgen Lauber, Thomas Klopstock, Ceçile Marsac, Bernhard Kadenbach, and Heinz Reichmann* 482

Amino-Acid Responsiveness in Beta Cell Subpopulations with Different Sensitivity to Glucose *Christiaan F. H. Van Schravendijk, Rita Kiekens, Lutgart Heylen, and Daniël G. Pipeleers* 490

Fatty Acids and Retinoids Act Synergistically on Adipose Cell Differentiation *Irina Safonova, Uwe Reichert, Braham Shroot, Gérard Ailhaud, and Paul Grimaldi* 498

Protein Synthesis Is Required for the Generation of Oscillatory Current Responses in *Xenopus* Oocyte *Y. Nakamachi and H. Ando* 505

Stimulus–Secretion Coupling in Rat Parietal Cells Is Affected by Extracellular Magnesium *Frank Ch. Mooren, R. Stoll, E. Spyrou, W. Beil, and W. Domschke* 512

Divalent Cations Elevate Cytosolic Calcium of Chick Osteocytes *Hiroshi Kamioka, Koji Sumitani, Kahori Tagami, Yoshiki Miki, Kunihiro Terai, Yoshiyuki Hakeda, Masayoshi Kumegawa, and Terushige Kawata* 519

Detection of Retinoid X Receptors Using Specific Monoclonal and Polyclonal Antibodies *Cecile Rochette-Egly, Yves Lutz, Veronique Pfister, Sophie Heyberger, Isabelle Scheuer, Pierre Chambon, and Marie Pierre Gaub* 525

Infrared Characterization of Nitric Oxide Bonding to Bovine Heart Cytochrome *c* Oxidase and Myoglobin *Xiao-Jian Zhao, Vijaya Sampath, and Winslow S. Caughey* 537

Selective Nuclear Transport of μ-Calpain *Ronald L. Mellgren and Qin Lu* 544

Recognition of Monosialoganglioside (GM_3) Reconstituted in Sphingomyerin and Glucosylceramide Membranes against Wheat Germ Agglutinin: Quantitative Analyses by a Quartz Crystal Microbalance *Toshinori Sato, Takeshi Serizawa, and Yoshio Okahata* 551

The Predominant Form of Fibroblast Growth Factor Receptor Expressed by Proliferating Human Arterial Smooth Muscle Cells in Culture Is Type I *Xing Xin, A. Daniel Johnson, Timothy Scott-Burden, David Engler, and Ward Casscells* 557

Regulation of Osteoclastic Acid Secretion by cGMP-Dependent Protein Kinase *Cheryl Van Epps-Fung, John P. Williams, Trudy L. Cornwell, Thomas M. Lincoln, Jay M. McDonald, Wilson Radding, and Harry C. Blair* 565

A New Variant Cu/Zn Superoxide Dismutase ($Val^7 \rightarrow Glu$) Deduced from Lymphocyte mRNA Sequences from Japanese Patients with Familial Amyotrophic Lateral Sclerosis *Makito Hirano, Junichi Fujii, Yoshitaka Nagai, Masanobu Sonobe, Koichi Okamoto, Heihachi Araki, Naoyuki Taniguchi, and Satoshi Ueno* 572

Apigenin Induces Morphological Differentiation and G2-M Arrest in Rat Neuronal Cells *Fumiko Sato, Yoshizumi Matsukawa, Katsuhiko Matsumoto, Hoyoku Nishino, and Toshiyuki Sakai* 578

Ligand-Modulated Cross-Bridging of Microtubules by Phosphofructokinase *Attila Lehotzky, Zsolt Pálfia, János Kovács, Attila Molnár, and Judit Ovádi* 585

Biosynthesis and Processing by Phorbol Ester of the Cell Surface-Associated Precursor Form of Heparin-Binding EGF-like Growth Factor *Gerhard Raab, Shigeki Higashiyama, Stella Hetelekidis, Judith A. Abraham, Deborah Damm, Minoru Ono, and Michael Klagsbrun* 592

Modification of Glutamine Synthetase in *Streptomyces griseus* by ADP-Ribosylation and Adenylylation *András Penyige, Attila Kálmánczhelyi, Anikó Sipos, Jerald C. Ensign, and György Barabás* 598

Fibronectin-Induced Cell Spreading and Down-Regulation of 12-Lipoxygenase Expression in Megakaryocytic DAMI Cells *W. Kuchinke and C. D. Funk* 606

Matrilysin Is Much More Efficient Than Other Matrix Metalloproteinases in the Proteolytic Inactivation of α_1-Antitrypsin *Ulrike I. Sires, Gillian Murphy, Vijaykumar M. Baragi, Catherine J. Fliszar, Howard G. Welgus, and Robert M. Senior* 613

ABL and BCR Genes Are Not Imprinted in Androgenetic and Gynogenetic Human Tissues *Haya Lorberboum-Galski, Shai Yarkoni, Amotz Nechushtan, Jacob Rachmilewitz, Nathan deGroot, and Abraham Hochberg* 621

The αPDGFR Tyrosine Kinase Mediates Locomotion of Two Different Cell Types through Chemotaxis and Chemokinesis *Aykut Uren, Jin-Chen Yu, Nahid S. Gholami, Jacalyn H. Pierce, and Mohammad A. Heidaran* 628

Inhibition of Nitric Oxide Synthesis Enhances the Expression of Inducible Nitric Oxide Synthase mRNA and Protein in a Model of Chronic Liver Inflammation *Hartmut Luss, Mauricio DiSilvio, Amy L. Litton, Luis Molina y Vedia, Andreas K. Nussler, and Timothy R. Billiar* 635

Effects of Osmotic Changes in Extracellular Solution on Electrical Activity of Mouse Pancreatic B-Cells *Stefan Britsch, Peter Krippeit-Drews, Michael Gregor, Florian Lang, and Gisela Drews* 641

Cloning and Expression of Recombinant Human Growth/Differentiation Factor 5 *Gertrud Hötten, Helge Neidhardt, Birgit Jacobowsky, and Jens Pohl* 646

CFTR Protein Is Involved in the Efflux of Neutral Amino Acids *Bianca Maria Rotoli, Ovidio Bussolati, Maria Sironi, Giulio Cabrini, and Gian C. Gazzola* 653

Endotoxin Causes Reciprocal Changes in Hepatic Nitric Oxide Synthesis, Gluconeogenesis, and Flux through Phosphoenolpyruvate Carboxykinase *Robert A. Horton, Richard G. Knowles, and Michael A. Titheradge* 659

Autocrine Inhibition of the Epidermal Growth Factor Receptor by Intracellular Expression of a Single-Chain Antibody *Roger R. Beerli, Winfried Wels, and Nancy E. Hynes* 666

Modulators of Oxidized LDL-Induced Hyperadhesiveness in Human Endothelial Cells *Jeanette A. M. Maier, Livia Barenghi, Silvia Bradamante, and Franco Pagani* 673

Transforming Growth Factor-β_1 Regulates the Expression of Ryanodine-Sensitive Ca^{2+} Oscillations in Cardiac Myocytes *Craig B. Neylon, Simon M. Bryant, Peter J. Little, and Alex Bobik* 678

Characterization of Contractile Endothelin and Angiotensin Receptors in Human Resistance Arteries: Evidence for Two Endothelin and One Angiotensin Receptor *M. R. Tschudi and T. F. Lüscher* 685

Calcium Modulates the Cyclin D1 Expression in a Rat Parathyroid Cell Line *S. Bianchi, S. Fabiani, M. Muratori, A. Arnold, K. Sakaguchi, T. Miki, and M. L. Brandi* 691

Identification of Functional Cysteine Residues in Human Galactosyltransferase *Yong Wang, Shan S. Wong, Michiko N. Fukuda, Hongya Zu, Zhongdong Liu, Quansheng Tang, and Hubert E. Appert* 701

The Tumor Protein MAGE-1 Is Located in the Cytosol of Human Melanoma Cells *Alain Amar-Costesec, Danièle Godelaine, Elisabeth Stockert, Pierre van der Bruggen, Henri Beaufay, and Yao-Tseng Chen* 710
Glucose-6-Phosphatase Gene Expression and Activity Are Modulated in Hemorrhagic Shock: Evidence for a New Heat-Sensitive Activator *Subir R. Maitra, Wansong Pan, Alex J. Lange, M. Raafat El-Maghrabi, Naji N. Abumrad, and Simon J. Pilkis* 716
Delayed Processing of the Insulin Proreceptor by Hepatocytes from Diabetic Rats *Gyohan Koh, Katherine A. Robinson, and Maria G. Buse* 725
Modulation of Calcium Current Density by Intracellular Calcium in Isolated Guinea Pig Ventricular Cardiomyocytes *Yongdong You, Dieter J. Pelzer, and Siegried Pelzer* 732
G_{M2} Activator Protein Expression in Mouse Tissues *T. Beccari, C. A. Palmerini, G. Servillo, M. A. Della Fazia, M. P. Viola Magni, and A. Orlacchio* 741
Hsp 90α and Hsp 90β Genes Are Present in the Zebrafish and Are Differentially Regulated in Developing Embryos *Patrick H. Krone and Jennifer B. Sass* 746
Reversal of Valproic Acid-Associated Impairment of Carnitine Uptake in Cultured Human Skin Fibroblasts *Ingrid Tein and Zhong Wei Xie* 753
Sequence of the Gene, *amo*B, for the 43-kDa Polypeptide of Ammonia Monoxygenase of *Nitrosomonas europaea* *David J. Bergmann and Alan B. Hooper* 759
Molecular and Functional Analysis of Porcine E-Selectin Reveals a Potential Role in Xenograft Rejection *Scott A. Rollins, Mark J. Evans, Krista K. Johnson, Eileen A. Elliot, Steven P. Squinto, Louis A. Matis, and Russell P. Rother* 763
ADP-Ribosylation of Heterogeneous Ribonucleoproteins in HeLa Cells *Sarada Prasad, Jane Walent, and Anatoly Dritschilo* 772
The Metabolic Pathway Generating p3, an Aβ-Peptide Fragment, Is Probably Non-amyloidogenic *Jan Näslund, Malene Jensen, Lars O. Tjernberg, Johan Thyberg, Lars Terenius, and Christer Nordstedt* 780
8-Amino-2′-deoxyadenosine:2′-Deoxythymidine Base Pairing: Identification of Novel Reverse Hoogsteen Mode in Solution *Raju. K. Kumar, Anita D. Gunjal, and Krishna N. Ganesh* 788
Cobalt Stimulates the Expression of Vascular Endothelial Growth Factor mRNA in Rat Cardiac Cells *Annie Ladoux and Christian Frelin* 794
Characterization of Human B Cell Proteins Binding Specifically to Uveitopathogenic Peptide 1169–1191 of Bovine IRBP *Kalpana Rengarajan, Marc D. de Smet, Gerald J. Chader, and Barbara Wiggert* 799
1,25-Dihydroxyvitamin D_3 Effects in Rat Kidney: Regulation of Protein Phosphorylation *Xuezhong Qin, Emmanuel K. O. Siaw, and Marian R. Walters* 807
Characterization of Ca^{2+}-ATPase in Rod Outer Segment Disk Membranes *Isabella Panfoli, Alessandro Morelli, and Isidoro M. Pepe* 813
Analysis of Short Novel Human Papillomavirus Sequences *Ruth Tachezy, Marc A. Van Ranst, Yvette Cruz, and Robert D. Burk* 820
Secretion of Immunoreactive Corticotropin Releasing Factor and Adrenocorticotropic Hormone by T- and B-Lymphocytes in Response to Cellular Stress Factors *Irina V. Kravchenco and Vladimir A. Furalev* 828

Rapid Isolation of Gα_{13} from Bovine Brain Membranes: Supportive Effect of Ethylene Glycol *Rainer Harhammer, Bernd Nürnberg, Karsten Spicher, and Günter Schultz* 835

The Aminoterminus of c-Raf-1 Binds a Protein Kinase Phosphorylating Ser259 *Peter Beimling, Monika Niehof, Gerald Radziwill, and Karin Moelling* 841

Selection of Peptides with Affinity for Single-Stranded DNA Using a Phage Display Library *Margareta Krook, Klaus Mosbach, and Christer Lindbladh* 849

Characterization of ATP-Sensitive Potassium Channels in Intestinal, Cholecystokinin-Secreting Cells *Srisaila Basavappa, Rodger A. Liddle, and Allen W. Mangel* 855

Cloning of a Novel cDNA Homologous to CHIP28 Water Channel from Ocular Ciliary Epithelium *Rajkumar V. Patil, Xun Yang, Isao Saito, M. Coca-Prados, and M. B. Wax* 861

Identification of Tissue-Specific Protein Binding Domains in the 5′-Proximal Regulatory Region of the Rat Mitochondrial Brown Fat Uncoupling Protein Gene *Pilar Yubero, Octavi Viñas, Roser Iglesias, Teresa Mampel, Francesc Villarroya, and Marta Giralt* 867

Src Kinase Tyrosine Phosphorylates PTP1C, a Protein Tyrosine Phosphatase Containing Src Homology-2 Domains That Down-Regulates Cell Proliferation *Takashi Matozaki, Tohru Uchida, Yohsuke Fujioka, and Masato Kasuga* 874

Involvement of Androgen-Induced Growth Factor (FGF-8) Gene in Mouse Embryogenesis and Morphogenesis *Hideyo Ohuchi, Hidefumi Yoshioka, Akira Tanaka, Yasuhiko Kawakami, Tsutomu Nohno, and Sumihare Noji* 882

Organization and Expression of the Mouse Spot35/Calbindin-D28k Gene: Identification of the Vitamin D-Responsive Promoter Region *Tetsuro Takeda, Masaaki Arakawa, and Ryozo Kuwano* 889

Antioxidant, Gallic Acid, Induces Apoptosis in HL-60RG Cells *Makoto Inoue, Rie Suzuki, Tatsuo Koide, Nahoko Sakaguchi, Yukio Ogihara, and Yoshisada Yabu* 898

Androgens Directly Stimulate Mineralization and Increase Androgen Receptors in Human Osteoblast-like Osteosarcoma Cells *Masakazu Takeuchi, Hisato Kakushi, and Masahiro Tohkin* 905

Substitution of the ISP α Subunit of Biphenyl Dioxygenase from *Pseudomonas* Results in a Modification of the Enzyme Activity *Hai-Meng Tan and Chee-Ming Cheong* 912

Modulation of Responses to TGF-β by 1,25-Dihydroxyvitamin D_3 in MG-63 Osteoblastic Cells: Possible Involvement of Regulation of TGF-β Type II Receptor *Tadahiro Iimura, Shinichiro Oida, Hidenori Ichijo, Masae Goseki, Yutaka Maruoka, Kohsuke Takeda, and Satoshi Sasaki* 918

Peptides Corresponding to the Region Adjacent to His-94 in the Small Subunit of Cytochrome b_{558} Inhibit Superoxide Generation in a Cell-Free System from Human Neutrophils *M-Y. Park, S. Imajoh-Ohmi, H. Nunoi, and S. Kanegasaki* 924

Isolation, Sequence, and Expression of a Novel Mouse Brain cDNA, mIA-2, and Its Relatedness to Members of the Protein Tyrosine Phosphatase Family *Jia Lu, Abner L. Notkins, and Michael S. Lan* 930

Hepatic Metabolism of Chloral Hydrate to Free Radical(s) and Induction of Lipid Peroxidation *Yi-Chang Ni, Tit-Yee Wong, Fred F. Kadlubar, and Peter P. Fu* 937

Syndecan-1 Gene Expression in Isolated Rat Liver Cells: Hepatocytes, Kupffer Cells, Endothelial and Ito Cells *Ilona Kovalszky, Monika Gallai, Thomas Armbrust, and Giuliano Ramadori* 944

Involvement of NF-κB Activation in Thrombin-Induced Human Vascular Smooth Muscle Cell Proliferation *Toshihiro Nakajima, Isao Kitajima, Hiroshi Shin, Ikuko Takasaki, Koichiro Shigeta, Kazuhiro Abeyama, Yoshihiro Yamashita, Takeshi Tokioka, Yasuko Soejima, and Ikuro Maruyama* 950

Effect of Carboxyterminal Modification on the Oligomeric Structure of Human Beta Hemoglobin *Daniel P. Moulton, Anita A. Joshi, Adrianna Morris, and Melisenda J. McDonald* 956

2-Iminobiotin Is an Inhibitor of Nitric Oxide Synthases *Stephen J. Sup, Barbara Gordon Green, and Stephan K. Grant* 962

A Crucial Effect of Ligand Clustering on the Inhibition of Binding by L-Selectin in Intercellular Adhesion *Tomoaki Yoshida, Noriko Toyama-Sorimachi, Masayuki Miyasaka, and Yuan C. Lee* 969

Expression of Transforming Growth Factor-β 1–4 in the Chick Limb Bud Mesenchymal Cells: Regulation by 1,25-Dihydroxyvitamin D_3 *Katia Del Rio-Tsonis and Panagiotis A. Tsonis* 975

Identification of a Meta-Cleavage Pathway for Metabolism of Phenoxyacetic Acid and Phenol in *Pseudomonas cepacia* AC1100 *Sanjeev C. Ghadi and Udaykumar M. X. Sangodkar* 983

Protection by Prosaposin against Ischemia-Induced Learning Disability and Neuronal Loss *Akira Sano, Seiji Matsuda, Tong-Chun Wen, Yasunori Kotani, Keiji Kondoh, Shu-ichi Ueno, Yasuo Kakimoto, Hiroyuki Yoshimura, and Masahiro Sakanaka* 994

Regulation of Rat Glucagon Receptor Expression *Heeja Yoo-Warren, Ann Gore Willse, Nancy Hancock, Jacqueline Hull, Michael McCaleb, and James N. Livingston* 347

Characterization of the 30-kDa Enzyme from Red Blood Cells That Cleaves Ubiquitin-Protein Conjugates *Jackob Moskovitz* 354

Western Blot Analysis of Thyrotropin Receptor Expression in Human Thyroid Tumors and Correlation with TSH Binding *E. Pötter, R. Horn, G. F. W. Scheumann, H. Dralle, S. Costagliola, M. Ludgate, G. Vassart, J. E. Dumont, and G. Brabant* 361

PCR Cloning of Goldfish and *Tilapia* Metallothionein Complementary DNAs
K. M. Chan 368

Multiple Deletions of the Mitochondrial DNA in Polymyalgia Rheumatica
Pascal Reynier, Jean-François Pellissier, Jean-Robert Harle, and Yves Malthiéry 375

Expression, Purification, and Characterization of Porcine Leukocyte 12-Lipoxygenase Produced in the Methylotrophic Yeast, *Pichia pastoris*
Ramesh Gala Reddy, Tanihiro Yoshimoto, Shozo Yamamoto, and Lawrence J. Marnett 381

Spermine Effect on the Binding of Casein Kinase I to the Rat Liver Mitochondrial Structures *Giulio Clari, Antonio Toninello, Luciana Bordin, Federica Cattapan, Dagmar Piccinelli-Siliprandi, and Vittorio Moret* 389

CFTR Does Not Alter Acidification of L Cell Endosomes
Karen V. Root, John F. Engelhardt, Marc Post, James W. Wilson, and Rebecca W. Van Dyke 396

Role of Sialic Acid on the Viscosity of Canine Tracheal Mucin Glycoprotein
T. Shantha Raju and Eugene A. Davidson 402

Molecular Cloning of Two Pigment-Dispersing Hormone (PDH) Precursors in the Blue Crab *Callinectes sapidus* Reveals a Novel Member of the PDH Neuropeptide Family *Jörg M. Klein, Carl J. Mohrherr, Frank Sleutels, John P. Riehm, and K. Ranga Rao* 410

Obese Zucker (*fa/fa*) Rats Are Resistant to Insulin's Inhibitory Effect on Hepatic APO B Secretion *Janet D. Sparks and Charles E. Sparks* 417

Intracellular Mediators of Goblet Cell Degranulation in Isolated Pancreatic Ducts
Thomas J. Wilkins, Jose de Ondarza, and Seth R. Hootman 423

Limb Mesenchymal Cells Inhibited from Undergoing Cartilage Differentiation by a Tumor-Promoting Phorbol Ester Maintain Expression of the Homeobox-Containing Gene *Msx1* and Fail to Exhibit Gap Junctional Communication *Deborah Ferrari, Robert A. Kosher, and Caroline N. Dealy* 429

Spontaneous Calcium Oscillations in Clonal Endocrine Pancreatic Glucagon-Secreting Cells *Hans-Peter Bode, David I. Yule, Hans-Christoph Fehmann, Burkhard Göke, and John A. Williams* 435

Demonstration of Activin-A in Arteriosclerotic Lesions *Satoshi Inoue, Akira Orimo, Takayuki Hosoi, Akira Ikegami, Koichi Kozaki, Yasuyoshi Ouchi, Shintaro Nomura, Masami Muramatsu, and Hajime Orimo* 441

Motilin Synthetic Analogues and Motilin Receptor Antagonists *P. Poitras, P. Miller, D. Gagnon, S. St-Pierre* 449

Effect of Retinoic Acid on Contraction of Collagen Gel Induced by Fibroblasts *Ho-Sung Lew, M. Tsuchihashi, S. Tenshin, and T. Kawata* 455

Identification as β-Adducin of a Protein Interacting with Rabphilin-3A in the Presence of Ca^{2+} and Phosphatidylserine *Mutsuo Miyazaki, Hiromichi Shirataki, Hideshi Kohno, Kozo Kaibuchi, Akira Tsugita, and Yoshimi Takai* 460

Human Immunodeficiency Virus Type-I TAT Enhances Interleukin-2 Promoter Activity through Synergism with Phorbol Ester and Calcium-Mediated Activation of the NF-AT *cis*-Regulatory Motif *Alessandra Vacca, Monica Farina, Marella Maroder, Edoardo Alesse, Isabella Screpanti, Luigi Frati, and Alberto Gulino* 467

A Rapid and Efficient PCR-Based Method for Synthesizing High-Molecular-Weight Multimers of Oligonucleotides *Fariba Hemat and Kevin McEntee* 475

Mapping of Two Phenol Sulphotransferase Genes, *STP* and *STM*, to 16p: Candidate Genes for Batten Disease *Thomas P. Dooley, Hannah M. Mitchison, Patricia B. Munroe, Pamela Probst, Mindy Neal, Michael J. Siciliano, Zuoming Deng, Norman A. Doggett, David F. Callen, R. Mark Gardiner, and Sara E. Mole* 482

Structure of the Human Hexokinase II Gene *Mari Malkki, Markku Laakso, and Samir S. Deeb* 490

Isolation and Characterization of a cDNA That Codes for a LIM-Containing Protein Which Is Developmentally Regulated in Heart *Stephen K. W. Tsui, Nathan Y. H. Yam, Cheuk Yu Lee, and Mary M. Y. Waye* 497

A Naturally Occurring Mutation at the Second Base of Codon Asparagine 43 in the Proposed N-Linked Glycosylation Site of Human Lipoprotein Lipase: *In Vivo* Evidence That Asparagine 43 Is Essential for Catalysis and Secretion *Junji Kobayashi, Hidekuni Inadera, Yukiko Fujita, Glenda Talley, Nobuhiro Morisaki, Sho Yoshida, Yasushi Saito, Silvia S. Fojo, and H. Bryan Brewer, Jr.* 506

Tetrahydrobiopterin as Another EDRF in Man *Andreas Schaffner, Nenad Blau, Markus Schneemann, Johann Steurer, Cora-Jean S. Edgell, and Gabriele Schoedon* 516

The Effect of Mouse Mammary Tumor Virus Receptor Activation on Mammary Epithelial Cell Sensitivity toward Prolactin *Franklyn F. Bolander, Jr.* 524

An NLS Is Sufficient to Engage Facilitated Translocation by the Nuclear Pore Complex and Subsequent Intranuclear Binding *Ivana Vancurova, Jana Jochova, Willard Lou, and Philip L. Paine* 529

Cloning and Sequence of the Human Type II IMP Dehydrogenase Gene
David A. Glesne and Eliezer Huberman 537

Co-occurrence of CArG Boxes and TCF Sites within Viral Genomes
Michael A. Cahill, Alfred Nordheim, and Ralf Janknecht 545

Two Novel Mutations in the Vasopressin V2 Receptor Gene in Patients with Congenital Nephrogenic Diabetes Insipidus *Alexander Oksche, John Dickson, Ralf Schülein, Hansjörg W. Seyberth, Michael Müller, Wolfgang Rascher, Mariel Birnbaumer, and Walter Rosenthal* 552

The Nucleotide and Deduced Amino-Acid Sequences of a cDNA Encoding Lactate Dehydrogenase from *Caenorhabditis elegans*: The Evolutionary Relationships of Lactate Dehydrogenases from Mammals, Birds, Amphibian, Fish, Nematode, Plants, Bacteria, Mycoplasma, and Plasmodium
Stephen C.-M. Tsoi and Steven S.-L. Li 558

Effects of Inhibiting Transglutaminase during Egg Fertilization and Development
Lucio Cariello, Laura Zanetti, and Laszlo Lorand 565

PI 3-Kinase Activation Is Required for Insulin Stimulation of Glucose Transport into L6 Myotubes *Joel Berger, Nancy Hayes, Deborah M. Szalkowski, and Bei Zhang* 570

Basic Fibroblast Growth Factor Sense (FGF) and Antisense (*GFG*) RNA Transcripts Are Expressed in Unfertilized Human Oocytes and in Differentiated Adult Tissues
Rai S. Knee, Sonya E. Pitcher, and Paul R. Murphy 577

Effect of Thyrotropin and Adenosine on Inositol Phospholipids Pathway in Human Thyroid in Graves' Disease *Wiesław Zarzycki, Piotr Mośko, Leokadia Jaroszewicz, and Ida Kinalska* 584

Metallothionein-II and Ferritin H mRNA Levels Are Increased in Arsenite-Exposed HeLa Cells *Angelina Guzzo, Christos Karatzios, Caroline Diorio, and Michael S. DuBow* 590

Biophysical and Pharmacological Properties of Large Conductance Ca^{2+}-Activated K^+ Channels in N1E-115 Cells *Michel Diserbo, Bruno Antonny, and Jean Verdetti* 596

The Relationship between Size of a Presecretory Protein and Extent of Signal-Recognition-Particle-Mediated Arrest of Its Translation
Christoph Jung and Richard Zimmermann 603

Characterization of the Gene for Human Neutrophil-Activating Peptide 78 (ENA-78)
Max S. Corbett, Ina Schmitt, Olaf Riess, and Alfred Walz 612

Use of Photoacoustic Fourier-Transform Infrared Spectroscopy to Study Phosphates in Proteins *Donald J. Graves and Siquan Luo* 618

Human Adipocyte Apoptosis Occurs in Malignancy *Johannes B. Prins, Neal I. Walker, Clay M. Winterford, and Donald P. Cameron* 625

Cytochrome P4502A5 Expression and Inducibility by Phenobarbital Is Modulated by cAMP in Mouse Primary Hepatocytes *Pirkko Salonpää, Olavi Pelkonen, Anneli Kojo, Markku Pasanen, Masahiko Negishi, and Hannu Raunio* 631

In Vivo Imaging of the Interior of *Tradescantia zebrina* Leaves by Optical Cross-Correlation Interferometry *Li Ning, Zhao Lu, Larry S. Daley, and J. B. Callis* 638

Molecular Cloning of the Human Angiotensin II Type 2 Receptor cDNA
Mickey M. Martin, Baogen Su, and Terry S. Elton 645

3,5,3′-Triiodo-L-Thyronine Induces Cardiac Myocyte Differentiation but Not Neuronal Differentiation in P19 Teratocarcinoma Cells in a Dose-Dependent Manner *E. Rene Rodriguez, Carmela D. Tan, Uche S. Onwuta, Zu-Xi Yu, Victor J. Ferrans, and Joseph E. Parrillo* 652

Nitric Oxide Synthase Activity Is Elevated in Brain Microvessels in Alzheimer's Disease *Marie-Annette Dorheim, W. Ross Tracey, Jennifer S. Pollock, and Paula Grammas* 659

Tax-Induced HTLV-I LTR Transcriptional Activation Is Modulated by Phosphorylation *Daniela Saggioro, Monica Forino, Alessandra Penzo, Michela Pesce, Salvatore Oliviero, and Luigi Chieco-Bianchi* 666

Parathyroid Hormone and 1,25-Dihydroxyvitamin D Synergistically Induce the 1,25-Dihydroxyvitamin D-24-Hydroxylase in Rat UMR-106 Osteoblast-like Cells *H. James Armbrecht and Tara L. Hodam* 674

Effect of Acute Diabetes on Rat Hepatic Glucose-6-Phosphatase Activity and Its Messenger RNA Level *Zhenqi Liu, Eugene J. Barrett, Alan C. Dalkin, Alexander D. Zwart, and Janice Y. Chou* 680

Evolutionary Conservation and Molecular Cloning of the Recombinase Activating Gene I *Ralph M. Bernstein, Samuel F. Schluter, Douglas F. Lake, and John J. Marchalonis* 687

The Overexpression of Insulin Receptor Makes CHO Cells Resistant to the Action of IGF-1: Role of IRS-1 *Davide Maggi, Cinzia Laurino, Gabriella Andraghetti, and Renzo Cordera* 693

cis-Acting Elements in 5′-Flanking Region of Rat α-Fetoprotein Mediating Retinoic Acid Responsiveness *Yi Liu, Hongmin Chen, Jing-Ming Dong, and Jen-Fu Chiu* 700

Interaction of Fibronectin (FN) Cell Binding Fragments and Interleukin-8 (IL-8) in Regulating Neutrophil Chemotaxis *Paul W. Gudewicz, Lynn A. Heinel, Kimberly Stanton, Demian Singleton, and Mary Beth Frewin* 706

The Endoplasmic Reticulum–Golgi System Is a Major Site of Plastoquinone Synthesis in Spinach Leaves *Sylwia Osowska-Rogers, Ewa Swiezewska, Bertil Andersson, and Gustav Dallner* 714

GDP-Ribosyl Cyclase Activity as a Measure of CD38 Induction by Retinoic Acid in HL-60 Cells *Richard M. Graeff, Kapil Mehta, and Hon Cheung Lee* 722

Biological Activity and Phosphorylation Sites of the Bacterially Expressed Cytosolic Domain of the KDR VEGF-Receptor *Maureen Dougher-Vermazen, Jeffrey D. Hulmes, Peter Böhlen, and Bruce I. Terman* 728

Inositol(1,4,5)trisphosphate Production in Plant Cells: Stimulation by the Venom Peptides, Melittin and Mastoparan *Bjørn K. Drøbak and Peter A. C. Watkins* 739

Potentiation of K252a, a Protein Kinase Inhibitor-Induced Polyploidization by cAMP in Cultured Fibrosarcoma Cell Line *Zhi-ping Zong, Kohzaburo Fujikawa-Yamamoto, Kouhei Teraoka, Hiroko Yamagishi, Mikio Tanino, and Shizuo Odashima* 746

The Light Chain of Botulinum Neurotoxin Forms Channels in a Lipid Membrane *Yoichi Kamata and Shunji Kozaki* 751

Iminodipeptides Containing Proline with C-Terminal and N-Terminal Residues Prime the Stimulation of Human Neutrophil Superoxide Generation by fMLP *Yoshiya Watanabe, Yasuhiro Sagara, Kazunori Sugahara, and Hiroyuki Kodama* 758

Vascular Actions of C-Type Natriuretic Peptide in Isolated Porcine Coronary Arteries and Coronary Vascular Smooth Muscle Cells *Chi-Ming Wei, Shiling Hu, Virginia M. Miller, and John C. Burnett, Jr.* 765

Correlation between Mitochondrial DNA 4977-bp Deletion and Respiratory Chain Enzyme Activities in Aging Human Skeletal Muscles *A. M. S. Lezza, D. Boffoli, S. Scacco, P. Cantatore, and M. N. Gadaleta* 772

Prompt Glycosylation of Calreticulin Is Independent of Ca^{2+} Homeostasis *Sunita M. Jethmalani and Kurt J. Henle* 780

Eotaxin: Cloning of an Eosinophil Chemoattractant Cytokine and Increased mRNA Expression in Allergen-Challenged Guinea-Pig Lungs *P. J. Jose, I. M. Adcock, D. A. Griffiths-Johnson, N. Berkman, T. N. C. Wells, T. J. Williams, and C. A. Power* 788

Hypotension to Central Endothelin-1: Effect of Glutamate Receptor Blockade *Mir A. Hashim and A. S. Tadepalli* 795

An Additional Role of Transcriptional Activation of *ori*-λ in the Regulation of λ Plasmid Replication in *Escherichia coli* *Agnieszka Szalewska-Pałasz and Grzegorz Węgrzyn* 802

Protein Phosphatase Inhibitors Enhance the Expression of an α-Amylase Gene, α*Amy3*, in Cultured Rice Cells *Ming-Yong Lue and Hung-tu Lee* 807

Molecular Cloning of Rat RAC Protein Kinase α and β and Their Association with Protein Kinase Cζ *Hiroaki Konishi, Tetsutaro Shinomura, Shun-ichi Kuroda, Yoshitaka Ono, and Ushio Kikkawa* 817

Lectin Conjugate-Directed Gene Transfer to Airway Epithelial Cells *Weining Yin and Pi-Wan Cheng* 826

Biochemical Evidence for the Long-Tail Form (Aβ1-42/43) of Amyloid β Protein as a Seed Molecule in Cerebral Deposits of Alzheimer's Disease *A. Tamaoka, T. Kondo, A. Odaka, N. Sahara, N. Sawamura, K. Ozawa, N. Suzuki, S. Shoji, and H. Mori* 834

Inactivation of Phospholipase A_2 by Naturally Occurring Biflavonoid, Ochnaflavone *Hyeun Wook Chang, Suk Hwan Baek, Kwang Won Chung, Kun Ho Son, Hyun Pyo Kim, and Sam Sik Kang* 843

The High Density Lipoprotein- and Apolipoprotein A-I-Induced Mobilization of Cellular Cholesterol Is Impaired in Fibroblasts from Tangier Disease Subjects *Michael Walter, Ute Gerdes, Udo Seedorf, and Gerd Assmann* 850

Epidermal Growth Factor Triggers the Translocation of Insulin-Responsive Glucose Transporter (GLUT4) *Kazuo Ishii, Seika Kamohara, Hideki Hayashi, Mikio Todaka, Fumihiko Kanai, Takanobu Imanaka, and Yousuke Ebina* 857

Role of the Ribozyme of Hepatitis Δ Virus on the Transcription after Polyadenylation *Sen-Yung Hsieh, Pei-Ying Yang, Chia-Ming Chu, and Yun-Fan Liaw* 864

Effect of Cysteine Substitutions on the Mitogenic Activity and Stability of Recombinant Human Keratinocyte Growth Factor *Lance A. Bare, Marlene Brown, Shefali Goyal, Denise Idler, and Per-Erik Mansson* 872

Variations in ATP-Sensitive K^+ Channel Activity Provide Evidence for Inherent Metabolic Oscillations in Pancreatic β-Cells *Staffan Dryselius, Per-Eric Lund, Erik Gylfe, and Bo Hellman* 880

Multiple Transcription Start Sites and 5′ Alternate Splicing of Murine IL-3 Receptor β-Chain Transcripts *Koenraad Norga, Miklos Pless, Martin Stanulla, Elizabeth C. TePas, and Bernard Mathey-Prevot* 886

Differential Reactivity of Two Types of *N*-Glycolylneuraminic Acid Dimers toward Enzymatic and Nonenzymatic Hydrolysis of Their Interketosidic Linkages *Shinobu Kitazume, Ken Kitajima, Sadako Inoue, Frederic A. Troy II, William J. Lennarz, and Yasuo Inoue* 893

Histidyl Phosphorylation of P36 in Rat Hepatoma Fao Cells *in Vitro* and *in Vivo* *Kiyoto Motojima, Patricia Passilly, Brigitte Jannin, and Norbert Latruffe* 899

Increased Expression of Endothelial Constitutive Nitric Oxide Synthase in Rat Aorta during Pregnancy *Regina M. Goetz, Ingo Morano, Tanja Calovini, Roland Studer, and Jürgen Holtz* 905

Ammonia-Forming Cytochrome *c* Nitrite Reductase from *Sulfurospirillum deleyianum* Is a Tetraheme Protein: New Aspects of the Molecular Composition and Spectroscopic Properties *Wolfram Schumacher, Ursula Hole, and Peter M. H. Kroneck* 911

Molecular Cloning of Human Cytosolic Purine 5′-Nucleotidase *Jun Oka, Akiyo Matsumoto, Yu Hosokawa, and Shuji Inoue* 917

Inhibition of G1 Cyclin Expression and G1 Cyclin-Dependent Protein Kinases by cAMP in an Astrocytic Cell Line *Claire Gagelin, Michel Pierre, and Danièle Toru-Delbauffe* 923

Several Liver-Specific DNase Hypersensitive Sites Are Present in the Intergenic Region Separating Human Plasminogen and Apoprotein(A) Genes *P. Magnaghi, A. Mihalich, and R. Taramelli* 930

Alzheimer Amyloid Protein Precursor Enhances Proliferation of Neural Stem Cells from Fetal Rat Brain *Yokichi Hayashi, Kumiko Kashiwagi, Jun Ohta, Mitsunari Nakajima, Takuji Kawashima, and Kazuaki Yoshikawa* 936

Chimerism in PCR Products from a Multigene Family *D. Bhavsar, Hd. Zheng, and J. Drysdale* 944

Antimicrobial Peptides from the Skin of a Korean Frog, *Rana rugosa* *Jin Mo Park, Jae-Eon Jung, and Byeong Jae Lee* 948

Utilization of Geranylgeraniol for Protein Isoprenylation in C6 Glial Cells *Dean C. Crick, Charles J. Waechter, and Douglas A. Andres* 955

Appearance of High Enzyme Activity in Immobilized Urease Disc by Electron Beam Irradiation Technique *M. Kumakura* 962

Thiamine Disulfide as a Potent Inhibitor of Human Immunodeficiency Virus (Type-1) Production *Shozo Shoji, Kazuchika Furuishi, Shogo Misumi, Tsuyoshi Miyazaki, Masayasu Kino, and Kazunobu Yamataka* 967

ERRATUM

Volume 203, Number 2, September 15, 1994: Takashi Ishikawa and Takeyuki Wakabayashi, "Calcium-Induced Change in Three-Dimensional Structure of Thin Filaments of Rabbit Skeletal Muscle as Revealed by Cryo-electron Microscopy," pp. 951–958 976

Volume 205, Number 2, December 15, 1994

Forskolin and Methylxanthines Block the Increase in Intracellular pH during Meiosis in *Xenopus laevis* Oocytes *Katayoun Rezai and William J. Wasserman* 979

Glycosylphosphatidylinositol Toxin of *Trypanosoma brucei* Regulates IL-1α and TNF-α Expression in Macrophages by Protein Tyrosine Kinase-Mediated Signal Transduction *Souvenir D. Tachado and Louis Schofield* 984

Chronotropic Effects of Cytokines and the Nitric Oxide Synthase Inhibitor, L-NMMA, on Cardiac Myocytes *Carmine V. Oddis, Richard L. Simmons, Brack G. Hattler, and Mitchell S. Finkel* 992

Decidua Is a Possible Source of Serum Mouse Soluble Interleukin-6 Receptor (msIL-6R): Gestational Profile of Serum msIL-6R Concentration *T. Maeda, M. Yamaguchi, T. Taga, T. Kishimoto, K. Wada, H. Ikegami, H. Kurachi, and A. Miyake* 998

Strand Exchange through a DNA–Protein Complex Requires a DNA Helicase *Frank Salinas and Thomas Kodadek* 1004

Identification of Functional Domains in AMPD1 by Mutational Analysis *Manfred Gross, Hiroko Morisaki, Takayuki Morisaki, and Edward W. Holmes* 1010

Essential Role of Polyamines in Restoration of DNA Synthesis after UV Radiation and Expression of UV-Resistance in Cockayne Syndrome Cells *Itsuo Kusano, Hiroshige Hibasami, Kazuo Kawai, Kohji Esaki, Taizo Shiraishi, and Ryuichi Yatani* 1018

Immunolocalization of *Chlamydomonas* Rhodopsin *Yulan Zhang* 1025

Synaptotagmin Is an Inositol Polyphosphate Binding Protein: Isolation and Characterization as an Ins 1,3,4,5-P4 Binding Protein *Michio Niinobe, Yoshihide Yamaguchi, Mitsunori Fukuda, and Katsuhiko Mikoshiba* 1036

Differential Effects of Protein Phosphatase 2A on Distinguishable Intracellular Signals Initiated by V-SRC and Mediated by HaRAS *Ruchika Gupta and David A. Foster* 1043

C-Type Natriuretic Peptide Inhibits Intimal Thickening of Rabbit Carotid Artery after Balloon Catheter Injury *Masaki Shinomiya, Jun Tashiro, Yasushi Saito, Sho Yoshida, Mayumi Furuya, Naomi Oka, Shoji Tanaka, Kenji Kangawa, and Hisayuki Matsuo* 1051

Murine Fibroblast Growth Factor Receptor 1 Gene Generates Multiple Messenger RNAs Containing Two Open Reading Frames via Alternative Splicing *Tasuku Harada, Hiroshi Saito, Haruhiko Kouhara, Shogo Kurebayashi, Soji Kasayama, Naoki Terakawa, Tadamitsu Kishimoto, and Bunzo Sato* 1057

Induction of CYP2E1 in Liver, Kidney, Brain, and Intestine during Chronic Ethanol Administration and Withdrawal: Evidence That CYP2E1 Possesses a Rapid Phase Half-Life of 6 Hours or Less *Ben J. Roberts, Susan E. Shoaf, Kyu-Shik Jeong, and Byoung J. Song* 1064

Role of HDL Apolipoprotein E in Cellular Cholesterol Efflux: Studies in Apo E Knockout Transgenic Mice *Tony Hayek, Judith Oiknine, J. Gerald Brook, and Michael Aviram* 1072

ACPR, a *STE12* Homologue from *Candida albicans*, Is a Strong Inducer of Pseudohyphae in *Saccharomyces cerevisiae* Haploids and Diploids *Praveen Singh, K. Ganesan, K. Malathi, Dhrubaa Ghosh, and Asis Datta* 1079

Hypomethylation and Hypoexpression of Human *CYP2E1* Gene in Lung Tumors *Florence Botto, Eric Seree, Said El Khyari, Pierre Cau, Alain Henric, Michel De Meo, Patrice Bergeron, and Yves Barra* 1086

Nucleic Acid Sequence and DNase Hypersensitive Sites of the 5′ Region of the Mouse Progesterone Receptor Gene *Kazuki Hagihara, X. Sharon Wu-Peng, Toshiya Funabashi, Junzo Kato, and Donald W. Pfaff* 1093

A Cell Type-Dependent Enhancer Core Element Is Located in Exon 5 of the Human Angiotensinogen Gene *Yutaka Nibu, Keiji Tanimoto, Shigeru Takahashi, Haruko Ono, Kazuo Murakami, and Akiyoshi Fukamizu* 1102

Functional Reconstitution of Ehrlich Cell Plasma Membrane Ferricyanide Reductase *Miguel Angel Medina and Ignacio Núñez de Castro* 1109

Tyrosine Kinase-Specific Motif at Subdomain VIII Does Not Confer Specificity for Tyrosine *Ana C. Carrera, Luis R. Borlado, Thomas M. Roberts, and Carlos Martinez-A* 1114

Alteration of Phosphoinositide Metabolism by Attenuation of cAMP Resulting from Expression of the H-*ras* Oncogene *Suzanne K. Murphy, James B. Lindberg, and David A. Prussack* 1121

Positive and Negative Regulations of Human Platelet-Activating Factor Receptor Transcript 2 (Tissue-Type) by Estrogen and TGF-β1 *Hiroyuki Mutoh, Kazuhiko Kume, Sayuri Sato, Shigeaki Kato, and Takao Shimizu* 1130

Platelet-Activating Factor (PAF) Positively Auto-Regulates the Expression of Human PAF Receptor Transcript 1 (Leukocyte-Type) through NF-κB *Hiroyuki Mutoh, Satoshi Ishii, Takashi Izumi, Shigeaki Kato, and Takao Shimizu* 1137

Nitric Oxide Kills Hepatocytes by Mobilizing Mitochondrial Calcium *Christoph Richter, Vladimir Gogvadze, Ralph Schlapbach, Matthias Schweizer, and Jörg Schlegel* 1143

Absolute Glutathione Requirement for Sporulation of a Yeast *Saccharomyces cerevisiae* *Tetsuyoshi Suizu, Hiroko Tsutsumi, Yasuyuki Ohtake, Akitsugu Kawado, Satoshi Imayasu, Akira Kimura, and Kousaku Murata* 1151

Inhibition of Human Stromelysin by Peptides Based on the N-Terminal Domain of Tissue Inhibitor of Metalloproteinases-1 *Angela C. Hanglow, Alejandro Lugo, Robert Walsky, Michael Visnick, John W. Coffey, and Nader Fotouhi* 1156

The Soluble Form of Alzheimer's Amyloid β Protein Is Complexed to High Density Lipoprotein 3 and Very High Density Lipoprotein in Normal Human Plasma *Alexei Koudinov, Etsuro Matsubara, Blas Frangione, and Jorge Ghiso* 1164

Human Serum Amyloid P Component Binds to a Specific Peptide in the Presence of Calcium *Hideaki Hamazaki* 1172

Steroid Hormone Modulation of Vitamin D Receptor Levels in Human MG-63 Osteosarcoma Cells *Anitta Mahonen and Pekka H. Mäenpää* 1179

NGF Stimulates Differentiation of Osteoblastic MC3T3-E1 Cells *Mika Yada, Kohji Yamaguchi, and Tomoko Tsuji* 1187

Identification of Genetic Variation in the Human Serotonin 1Dβ Receptor Gene *Markus M. Nöthen, Jeanette Erdmann, Daphne Shimron-Abarbanell, and Peter Propping* 1194

WWP, a New Amino Acid Motif Present in Single or Multiple Copies in Various Proteins Including Dystrophin and the SH3-Binding Yes-Associated Protein YAP65 *Bruno André and Jean-Yves Springael* 1201

Purification of a Cell–Cell Adhesion Regulator from Porcine Seminal Vesicle Fluid *M. Hadjisavas, D. T. Armstrong, and R. F. Seamark* 1206
Regulation of Mouse UBF Gene by Multiple Growth-Related Control Elements *Tetsuji Nishimura, Ken-ichi Hanada, Yasushi Maeda, Chao Zhong Song, Koji Hisatake, and Masami Muramatsu* 1217
Islet Amyloid Polypeptide Stimulates Cyclic AMP Accumulation via the Porcine Calcitonin Receptor *Lars Christmanson, Per Westermark, and Christer Betsholtz* 1226
Characterization of FIII/YY1, a *Xenopus laevis* Conserved Zinc-Finger Protein Binding to the First Exon of L1 and L14 Ribosomal Protein Genes *Giuseppe Pisaneschi, Sabrina Ceccotti, Maria Laura Falchetti, Silvia Fiumicino, Francesca Carnevali, and Elena Beccari* 1236
HIV-1 Modulates the Expression of Gelatinase A and B in Monocytic Cells *Thea Kalebic, Laura Masiero, Maurizio Onisto, and Spiridione Garbisa* 1243
Isolation and Characterization of the Gene Encoding Rat Class τ Glutathione *S*-Transferase Subunit Yrs *Kenichiro Ogura, Takahito Nishiyama, Akira Hiratsuka, Tetsuro Watabe, and Tadashi Watabe* 1250
The Development of Fatty Liver Is Accelerated in Transgenic Mice Expressing Cynomolgus Monkey Cholesteryl Ester Transfer Protein *William L. Blake, Roger G. Ulrich, Keith R. Marotti, and George W. Melchior* 1257
Oscillations of Cytosolic Calcium in Rat Chromaffin Cells: Dual Modulation in Frequency and Amplitude *Paola D'Andrea, Franca Codazzi, Daniele Zacchetti, Jacopo Meldolesi, and Fabio Grohovaz* 1264
Structural Basis of SH2 Domain Mutations in X-Linked Agammaglobulinemia *Mauno Vihinen, Lennart Nilsson, and C. I. Edvard Smith* 1270
Two Different Enzymes Are Primarily Responsible for Retinoic Acid Synthesis in Rabbit Liver Cytosol *Dong-Yang Huang and Yoshiyuki Ichikawa* 1278
Nuclear Localization Signals in the Core Protein of Hepatitis C Virus *Shin C. Chang, Jui-Hung Yen, Hong-Yo Kang, Mei-Huei Jang, and Ming-Fu Chang* 1284
Molecular Construction of *Clostridium botulinum* Type C Progenitor Toxin and Its Gene Organization *Yukako Fujinaga, Kaoru Inoue, Satoshi Shimazaki, Kenichi Tomochika, Kayo Tsuzuki, Nobuhiro Fujii, Toshihiro Watanabe, Tohru Ohyama, Kouichi Takeshi, Katsuhiro Inoue, and Keiji Oguma* 1291
Loss of DNA Binding Ability of the Transcription Factor Encoded by the Mutant *mi* Locus *Eiichi Morii, Kimiko Takebayashi, Hozumi Motohashi, Masayuki Yamamoto, Shintaro Nomura, and Yukihiko Kitamura* 1299
Novel Role of Vitamin K_2: A Potent Inducer of Differentiation of Various Human Myeloid Leukemia Cell Lines *Itaru Sakai, Sachiko Hashimoto, Madoka Yoda, Takayuki Hida, Shigemitsu Ohsawa, Shigeo Nakajo, and Kazuyasu Nakaya* 1305
Seven Transmembrane Domain Receptor Subtypes Identified in NG108-15 Cells by Reverse Transcription–Polymerase Chain Reaction *Rebecca J. Chan, Andrew W. McBride, and David W. Crabb* 1311
Mechanism of Adenovirus-Mediated Endosome Lysis: Role of the Intact Adenovirus Capsid Structure *Prem Seth* 1318

Genomic Organization and DNA Sequence of the Human Catecholamine-Sulfating Phenol Sulfotransferase Gene (*STM*) *Thomas P. Dooley, Pam Probst, Patricia B. Munroe, Sara E. Mole, Z. Liu, and Norman A. Doggett* 1325

Carbon Monoxide as an Endogenous Modulator of Hepatic Vascular Perfusion *Makoto Suematsu, Satoshi Kashiwagi, Tsuyoshi Sano, Nobuhito Goda, Yuichi Shinoda, and Yuzuru Ishimura* 1333

Participation of Diacylglycerol Kinase in Mitogenic Signal Transduction Induced by Platelet-Derived Growth Factor in Vascular Smooth Muscle Cells *Hiroshi Inui, Takao Kondo, Fumiko Konishi, Yutaka Kitami, and Tadashi Inagami* 1338

Fluid Shear Stress Increases the Expression of Thrombomodulin by Cultured Human Endothelial Cells *Yoshio Takada, Fumiko Shinkai, Shuhei Kondo, Shuji Yamamoto, Hiroko Tsuboi, Risa Korenaga, and Joji Ando* 1345

Structure and Chromosomal Mapping of Genes for the Mouse κ-Opioid Receptor and an Opioid Receptor Homologue (MOR-C) *Miyuki Nishi, Hiroshi Takeshima, Mitsuko Mori, Kan-ichi Nakagawara, and Takuji Takeuchi* 1353

Destruxin B, a Specific and Readily Reversible Inhibitor of Vacuolar-Type H^+-Translocating ATPase *Makoto Muroi, Nobue Shiragami, and Akira Takatsuki* 1358

Tissue-Dependent Alternative Splicing of mRNA for NACP, the Precursor of Non-Aβ Component of Alzheimer's Disease Amyloid *Kenji Uéda, Tsunao Saitoh, and Hiroshi Mori* 1366

Purification to Homogeneity of Mitochondrial Acyl CoA: Glycine *N*-Acyltransferase from Human Liver *Yogesh R. Mawal and Ijaz A. Qureshi* 1373

Mutation Analysis of the Role for the Carboxy-Terminus Encoding Region in NGF-Induced Stabilization of GAP-43 mRNA *Kazuhisa Nishizawa and Harumasa Okamoto* 1380

The Antigen/Antibody Specificity Exchanger: A New Peptide-Based Tool for Redirecting Antibodies of Other Specificities to Recognize the V3 Domain of HIV-1 GP120 *Matti Sällberg, Kimdar Sherefa, and Zhu-Xu Zhang* 1386

Deficiency of Endogenous Arginine Synthesis Provokes Hypertension by Exhausting Substrate Arginine for Nitric Oxide Synthesis *Yasuo Wakabayashi, Etsuko Yamada, Toshihide Yoshida, and Hakuo Takahashi* 1391

Molecular Cloning and Sequence Analysis of a Human 372-kDa Protein Localized in the Golgi Complex *Miwa Sohda, Yoshio Misumi, Toshiyuki Fujiwara, Mikio Nishioka, and Yukio Ikehara* 1399

Identification of a Rabphilin-3A-Interacting Protein as GTP Cyclohydrolase I in PC12 Cells *Katsunori Imazumi, Takuya Sasaki, Kazuo Takahashi, and Yoshimi Takai* 1409

Ras Activity Is Required for Phenylephrine-Induced Activation of Mitogen-Activated Protein Kinase in Cardiac Muscle Cells *Andrew Thorburn* 1417

Detection of Elevated Basic Fibroblast Growth Factor during Early Hours of *in Vitro* Angiogenesis Using a Fast ELISA Immunoassay *Nashwa Gabra, Alex Khiat, and Paul Calabresi* 1423

Brain Uptake of Circulating Apolipoproteins J and E Complexed to Alzheimer's Amyloid β *Berislav V. Zlokovic, Cynthia L. Martel, Jasmina B. Mackic, Etsuro Matsubara, Thomas Wisniewski, J. Gordon McComb, Blas Frangione, and Jorge Ghiso* 1431

Distinct Distributions of Mu, Delta, and Kappa Opioid Receptor mRNA in Rat Brain *Susan R. George, Roman L. Zastawny, Rosario Briones-Urbina, Regina Cheng, Tuan Nguyen, Michael Heiber, Angeliki Kouvelas, Audrey S. Chan, and Brian F. O'Dowd* 1438

Hepatocyte Growth Factor Region Specifically Stimulates Gastrointestinal Epithelial Growth in Primary Culture *Hiroshi Fukamachi, Masao Ichinose, Shinko Tsukada, Nobuyuki Kakei, Takehisa Suzuki, Kazumasa Miki, and Tohru Masui* 1445

Diversity of Cytochrome P450 Genes in the Mosquito, *Anopheles albimanus* *Julie A. Scott, Frank H. Collins, and René Feyereisen* 1452

In Vitro Translation of D_2 Dopamine Receptors and Their Chimeras: Analysis by Subtype-Specific Antibodies *€. Simone Fishburn, Carol David, Sara Carmon, Cheryl Wein, and Sara Fuchs* 1460

A Substrate of Ecto-Protein Kinase Is Microtubule-Associated Protein 1B in Cortical Cell Cultures Undergoing Synaptogenesis *Kazuyo Muramoto, Hisaaki Taniguchi, Masahiro Kawahara, Kazuo Kobayashi, Yoshiaki Nonomura, and Yoichiro Kuroda* 1467

Quantitative RT–PCR Assay Detecting the Transcriptional Induction of Vascular Endothelial Growth Factor under Hypoxia *Masayuki Iizuka, Masatake Yamauchi, Koichi Ando, Nobukazu Hori, Yoshiya Furusawa, Hiromi Itsukaichi, Kumiko Fukutsu, and Hideshige Moriya* 1474

Okadaic Acid, an Inhibitor of Type 1 and Type 2A Phosphatases, Modulates the Activation of Phospholipase D in Formyl Peptide- and Mastoparan-Stimulated Human Neutrophils *Bahia Djerdjouri, Eric Pedruzzi, Jacques Hakim, and Axel Périanin* 1481

Lupus Anticoagulant Autoantibody Induces Apoptosis in Umbilical Vein Endothelial Cells: Involvement of Annexin V *Norihiko Nakamura, Yoshihiro Shidara, Naomasa Kawaguchi, Chihiro Azuma, Nobuaki Mitsuda, Shunzo Onishi, Kenji Yamaji, and Yoshinao Wada* 1488

ERRATA

Volume 202, Number 1, July 15, 1994: Usha R. Reddy and David Pleasure, "Cloning of a Novel Putative Protein Kinase Having a Leucine Zipper Domain from Human Brain," pp. 613–620 1494

Volume 203, Number 3, September 30, 1994: Terry G. Unterman, Ayeesha Fareeduddin, Matthew A. Harris, Rajendra G. Goswami, Anna Porcella, Robert H. Costa, and Raul G. Lacson, "Hepatocyte Nuclear Factor-3 (HNF-3) Binds to the Insulin Response Sequence in the IGF Binding Protein-1 (IGFBP-1) Promoter and Enhances Promoter Function," pp. 1835–1841 1496

Volume 205, Number 3, December 30, 1994

The Extrinsic Proteins of Photosystem II in Photosynthetic Organisms: Distribution, Properties, and Evolutionary Implications *Madeleine S. Fairweather, Jeremy C. L. Packer, and Christopher J. Howe* 1497

Identification and Characterization of a Sperm Peptide Antigen Recognized by a Monoclonal Antisperm Autoantibody Derived from a Vasectomized Mouse *Sagiri Nakamura, Yoshiyuki Tsuji, Yuko Nakata, Shinji Komori, and Koji Koyama* 1503

Vitamin A Regulates the Expression of Apolipoprotein AI and CIII Genes in the Rat *Akira Nagasaki, Tomoe Kikuchi, Kanako Kurata, Shoichi Masushige, Tadao Hasegawa, and Shigeaki Kato* 1510

The Transcription Factor Sp1 Is Required for Induction of the Murine GM-CSF Promoter in T Cells *Esteban S. Masuda, Yuko Yamaguchi-Iwai, Akio Tsuboi, Peggy Hung, Ken-ichi Arai, and Naoko Arai* 1518

Alternative Splicing of the *ret* Proto-Oncogene at Intron 4 *Shunhua Xing, Qiang Tong, Toshimitsu Suzuki, and Sissy M. Jhiang* 1526

Alterations of Binding Mode and Cutting Site by G→I Replacement in the Preferred Cleavage Sequence 5'-AGG of Chromoprotein C-1027 *Takuyuki Matsumoto and Yukio Sugiura* 1533

S-Adenosyl-L-Homocysteine Hydrolase from *Xenopus laevis*—Identification, Developmental Expression, and Evolution *L. T. Seery, B. D. McCabe, D. R. Schoenberg, and A. S. Whitehead* 1539

Persistent Expression of Proto-Oncogene c-*fos* Stimulates Osteoclast Differentiation *Akimitsu Miyauchi, Yasuo Kuroki, Masaaki Fukase, Takuo Fujita, Kazuo Chihara, and Shunichi Shiozawa* 1547

Hamster Gastric Inhibitory Polypeptide Receptor Expressed in Pancreatic Islets and Clonal Insulin-Secreting Cells: Its Structure and Functional Properties *Koichiro Yasuda, Nobuya Inagaki, Yuichiro Yamada, Akira Kubota, Susumu Seino, and Yutaka Seino* 1556

D-*myo*-Inositol 1,4,5-Trisphosphate Binding Domain of Phospholipase C-δ1 *Masato Hirata, Takashi Kanematsu, Kaori Sakuma, Toshitaka Koga, Yutaka Watanabe, Shoichiro Ozaki, and Hitoshi Yagisawa* 1563

On the Induction of 5-Lipoxygenase Expression and Activity in HL-60 Cells: Effects of Vitamin D3, Retinoic Acid, DMSO, and TGFβ *Martina Brungs, Olof Rådmark, Bengt Samuelsson, and Dieter Steinhilber* 1572

Identification of the Non-Specific Lipid-Transfer Protein (Sterol Carrier Protein 2) in Peroxisomes of Lung Type II Cells *Bernadette C. Ossendorp, Wim F. Voorhout, Lambert M. G. van Golde, Karel W. A. Wirtz, and Joseph J. Batenburg* 1581

Involvement of the α Isoenzyme of Protein Kinase C in the Growth Inhibition Induced by Phorbol Esters in MH1C1 Hepatoma Cells *Gian Paolo Perletti, Carla Smeraldi, Danilo Porro, and Francesco Piccinini* 1589

Angiotensin Converting Enzyme Inhibitor but Not Calcium Blocker Down-Regulates Gene Expression of Vascular Natriuretic Peptide Receptor in Hypertensive Rats *Takanobu Yoshimoto, Mitsuhide Naruse, Akiyo Tanabe, Kiyoko Naruse, Kouichiro Takagi, Takamura Muraki, Makoto Itakura, Hiromi Hagiwara, Shigehisa Hirose, and Hiroshi Demura* 1595

DNA Topoisomerases I and II Cleavage Sites in the Type 1 Human Immunodeficiency Virus (HIV-1) DNA Promoter Region *Yves Pommier, Bruno Poddevin, Malini Gupta, and Jeffrey Jenkins* 1601

Role of the A/B Region of the Human Mineralocorticoid Receptor in Aldosterone Response Selectivity *N. Jausons-Loffreda, C. Chabret, and M. Pons* 1610

Molecular Cloning and Functional Characterization of a Human VIP Receptor from SUP-T1 Lymphoblasts *Michal Svoboda, Michèle Tastenoy, Jean Van Rampelbergh, Jean-François Goossens, Philippe De Neef, Magali Waelbroeck, and Patrick Robberecht* 1617

Effects of Thrombin and Thrombin Peptide Activating Receptor (SFLLRN) on Proteoglycan Synthesis and Distribution in Human Endothelial Cells *Francesca Peracchia, Antonio Tamburro, Massimiliano Zanni, and Domenico Rotilio* 1625

Oxalate-Induced Initiation of DNA Synthesis in LLC-PK1 Cells: A Line of Renal Epithelial Cells *Hari Koul, Lori Kennington, Giju Nair, Thomas Honeyman, Mani Menon, and Cheryl Scheid* 1632

X-Linked Adrenoleukodystrophy (ALD): A Novel Mutation of the ALD Gene in 6 Members of a Family Presenting with 5 Different Phenotypes *Johannes Berger, Brunhilde Molzer, Ingrid Faé, and Hanno Bernheimer* 1638

Novel Bacterial P-Type ATPases with Histidine-Rich Heavy-Metal-Associated Sequences *Cameron Trenor III, Wei Lin, and Nancy C. Andrews* 1644

Construction of Infectious Molecular Clones of HIV-1 Containing Defined Mutations in the Protease Gene *Dean L. Winslow, Elizabeth D. Anton, Robert A. Horlick, Robert J. Zagursky, Radonna J. Tritch, Helen Scarnati, Kelly Ackerman, and Lee T. Bacheler* 1651

Rapid Grouping of HIV-1 Infection in Subtypes A to E by V3 Peptide Serotyping and Its Relation to Sequence Analysis *Kimdar Sherefa, Anders Sönnerborg, Juris Steinbergs, and Matti Sällberg* 1658

Triplex Formation at Physiological pH by Oligonucleotides Incorporating 5-Me-dC-(N^4-Spermine) *Dinesh A. Barawkar, Vaijayanti A. Kumar, and Krishna N. Ganesh* 1665

Inducible Nitric Oxide Synthase Activity in Myocardium after Myocardial Infarction in Rabbit *Ryszard R. Dudek, Stephen Wildhirt, Alessandra Conforto, Vijay Pinto, Hiroshi Suzuki, Scott Winder, and Richard J. Bing* 1671

Lovastatin Induces Growth Inhibition and Apoptosis in Human Malignant Glioma Cells *Kimberly D. Jones, William T. Couldwell, David R. Hinton, Yuzhuang Su, Shikun He, Lars Anker, and Ronald E. Law* 1681

Effect of Peptide Acetylation on Its Interaction with Antipeptide Antibody *Satya P. Yadav and Allen B. Rawitch* 1688

Ginsenoside-Rg_1 Regulates the Induction of Tyrosine Aminotransferase Gene Transcription in Rat Hepatocyte Cultures *So Young Kang, Kwang Youl Lee, and Seung Ki Lee* 1696

Evidence for the Existence of Vasopressin V2 Receptor mRNA in Rat Hippocampus *Akira Hirasawa, Yasuhisa Nakayama, Nobuya Ishiharada, Kenji Honda, Ryo Saito, Gozoh Tsujimoto, Yukio Takano, and Hiro-o Kamiya* 1702

Characterization of One Novel Venom Protease with β-Fibrinogenase Activity from the Taiwan Habu (*Trimeresurus mucrosquamatus*): Purification and cDNA Sequence Analysis *Chin-Chun Hung, Kai-Fa Huang, and Shyh-Horng Chiou* 1707

Generation of Free Radicals from Neocarzinostatin Mediated by NADPH/Cytochrome P450 Reductase via Activation of Enediyne Chromophore *Keizo Sato, Takaaki Akaike, Moritaka Suga, Masayuki Ando, and Hiroshi Maeda* 1716

Kinetics of Conformation Change in Cyanometmyoglobin Following Electron Transfer Monitored by Magnetically Induced Circular Dichroism Spectrometry *Katsuhiko Nishiyama and Fred M. Hawkridge* 1724

Structure-Activity Relationships of an Anti-HIV Peptide, T22 *Hirokazu Tamamura, Tsutomu Murakami, Masao Masuda, Akira Otaka, Wataru Takada, Toshiro Ibuka, Hideki Nakashima, Michinori Waki, Akiyoshi Matsumoto, Naoki Yamamoto, and Nobutaka Fujii* 1729

Enhanced Superoxide Production by Membrane Vesicles from *Halobacterium halobium* in a Hyposaline Environment *Nancy J. Brown-Peterson, Hai Chen, and Marvin L. Salin* 1736

Sequence of the 5'-Flanking Region of CYP3A5: Comparative Analysis with CYP3A4 and CYP3A7 *Youssef Jounaïdi, Philip S. Guzelian, Patrick Maurel, and Marie-Jo Vilarem* 1741

A Simple HPLC Method for the Determination of *S*-Adenosylmethionine and *S*-Adenosylhomocysteine in Rat Tissues: The Effect of Vitamin B6 Deficiency on These Concentrations in Rat Liver *Qing-Bai She, Ikumi Nagao, Takashi Hayakawa, and Haruhito Tsuge* 1748

Proteolysis of Aβ Peptide from Alzheimer Disease Brain by Gelatinase A *A. E. Roher, T. C. Kasunic, A. S. Woods, R. J. Cotter, M. J. Ball, and R. Fridman* 1755

Localization of Stem Cell Factor (SCF) and c-*kit* mRNA in Human Placental Tissue and Biological Effects of SCF on DNA Synthesis in Primary Cultured Cytotrophoblasts *Shigeru Saito, Masahiro Enomoto, Shigeyoshi Sakakura, Yasuyuki Ishii, Tadashi Sudo, and Motohiko Ichijo* 1762

The Pleckstrin Homology Domain of RAC Protein Kinase Associates with the Regulatory Domain of Protein Kinase C ζ *Hiroaki Konishi, Shun-ichi Kuroda, and Ushio Kikkawa* 1770

Phosphorylation of Rabphilin-3A by Calmodulin-Dependent Protein Kinase II *Masaki Kato, Takuya Sasaki, Katsunori Imazumi, Kazuo Takahashi, Keishi Araki, Hiromichi Shirataki, Yoshiharu Matsuura, Atsuhiko Ishida, Hitoshi Fujisawa, and Yoshimi Takai* 1776

Human Proteasome Subunits from Two-Dimensional Gels Identified by Partial Sequencing *Poul Kristensen, Anders H. Johnsen, Wolfgang Uerkvitz, Keiji Tanaka, and Klavs B. Hendil* 1785

Guinea Pig Membrane-Bound Aminopeptidase P Is a Member of the Proline Peptidase Family *N. D. Denslow, J. W. Ryan, and H. P. Nguyen* 1790

Immunoaffinity Purifications of Aminopeptidase P from Guinea Pig Lungs, Kidney, and Serum *J. W. Ryan, N. D. Denslow, J. A. Greenwald, and M. A. Rogoff* 1796

Calyculin A, a Nonphorbol Ester Type Tumor Promotor, Induced Oxidative DNA Damage in Stimulated Human Neutrophil-like Cells *Toru Takeuchi, Madoka Nakajima, and Kanehisa Morimoto* 1803

Isolation of *Dictyostelium discoideum* Cytokinesis Mutants by Restriction Enzyme-Mediated Integration of the Blasticidin S Resistance Marker *Hiroyuki Adachi, Takeshi Hasebe, Keisuke Yoshinaga, Takahisa Ohta, and Kazuo Sutoh* 1808

Tumor Necrosis Factor-α Induces the Expression of Carbonic Anhydrase II in Pancreatic Adenocarcinoma Cells *Michael G. Franz, Bruce C. Winkler, James G. Norman, Peter J. Fabri, and William R. Gower, Jr.* 1815

Heart Fatty Acid Binding Protein Is a Novel Regulator of Cardiac Myocyte Hypertrophy *P. B. J. Burton, C. E. Hogben, C. L. Joannou, A. G. B. Clark, J. J. Hsuan, N. F. Totty, C. Sorensen, R. W. Evans, and M. J. Tynan* 1822

β-Amyloid Protein Induces Platelet Aggregation and Supports Platelet Adhesion *M. Anna Kowalska and Karen Badellino* 1829

A Variant of the Human Corticotropin-Releasing Factor (CRF) Receptor: Cloning, Expression, and Pharmacology *Philip C. Ross, Christina M. Kostas, and Triprayar V. Ramabhadran* 1836

Temperature-Dependent Ca^{2+} Mobilization Induced by Hypoxia–Hypoglycemia in the Monkey Hippocampal Slices *Tetsumori Yamashima, Masatoshi Takita, Shuuichi Akaike, Masahiko Hirano, Atsuo Miyakawa, Atsuo Miyazawa, Yoshihisa Kudo, and Tohru Yoshioka* 1843

A Novel Cyclic GMP Stimulated Phosphodiesterase from Rat Brain *Qi Yang, Michael Paskind, Graeme Bolger, W. Joseph Thompson, David R. Repaske, Leslie S. Cutler, and Paul M. Epstein* 1850

Cyclin D1/CDK2 Kinase Is Present in a G1 Phase-Specific Protein Complex YI1 That Binds to the Mouse Thymidine Kinase Gene Promoter *Qing-Ping Dou, Gyongyi Molnar, and Arthur B. Pardee* 1859

Does the Eukaryotic Large Ribosomal Subunit Have a Channel Passing through It? *George Harauz, Daniel R. Beniac, Jing Wu, and Harry Zuzan* 1869

Molecular Cloning of Two Small GTP-Binding Proteins from Human Skeletal Muscle *Andrew X. Zhu, Yi Zhao, and Jeffrey S. Flier* 1875

Sequence Analysis of the 5'-Flanking Promoter Region of the Human Somatostatin Receptor 5 *M. T. Greenwood, R. Panetta, L. A. Robertson, J.-L. Liu, and Y. C. Patel* 1883

Unusual Insulin Binding to Cells Expressing an Insulin Receptor Mutated at Cysteine 524 *Philip J. Bilan and Cecil C. Yip* 1891

Cardiac Myocyte Differentiation Induced by 3,5,3'-Triiodo-L-Thyronine (T_3) in P19 Teratocarcinoma Cells Is Accompanied by Preferential Binding of RGG(T/A)CA Direct Repeats Spaced by Four Base Pairs in the DNA *E. Rene Rodriguez, Carmela D. Tan, Uche S. Onwuta, and Joseph E. Parrillo* 1899

Production of Interleukin-10 by Mouse Glial Cells in Culture *Tetsuya Mizuno, Makoto Sawada, Tohru Marunouchi, and Akio Suzumura* 1907

Chicken Lacks the Testis-Specific Isozyme of Angiotensin-Converting Enzyme Found in Mammals *Charles R. Esther, Jr., Kristen E. Thomas, and Kenneth E. Bernstein* 1916

A Genetic Linkage Map of the Mouse Using an Expanded Production System of Restriction Landmark Genomic Scanning (RLGS Ver.1.8) *Yasushi Okazaki, Hisato Okuizumi, Nobuya Sasaki, Tomoya Ohsumi, Jyunro Kuromitsu, Hiroshi Kataoka, Masami Muramatsu, Akira Iwadate, Norifumi Hirota, Masa-aki Kitajima, Christoph Plass, Verne M. Chapman, and Yoshihide Hayashizaki* 1922

Involvement of the Estrogen Receptor in the Growth Response of Pituitary Tumor Cells to Interleukin-2 *Christopher J. Newton, Eduardo Arzt, and Günter K. Stalla* 1930

Membrane Orientation of the SIV Fusion Peptide Determines Its Effect on Bilayer Stability and Ability to Promote Membrane Fusion *Raquel F. Epand, Isabelle Martin, Jean-Marie Ruysschaert, and Richard M. Epand* 1938

A Mammalian Serine/Threonine Kinase Receptor Specifically Binds BMP-2 and BMP-4 *Noboru Yamaji, Anthony J. Celeste, R. Scott Thies, Jeffery J. Song, Suzanne M. Bernier, David Goltzman, Karen M. Lyons, John Nove, Vicki Rosen, and John M. Wozney* 1944

Mapping Studies of Two G Protein-Coupled Receptor Genes: An Amino Acid Difference May Confer a Functional Variation between a Human and Rodent Receptor *Adriano Marchese, Regina Cheng, Maria C. Lee, Calvin A. Porter, Michael Heiber, Morris Goodman, Susan R. George, and Brian F. O'Dowd* 1952

Molecular Cloning of a Novel Thyroid/Steroid Receptor Superfamily Gene from Cultured Rat Neuronal Cells *Naganari Ohkura, Midori Hijikuro, Akihiro Yamamoto, and Keizaburo Miki* 1959

Identification of 10-kDa Proguanylin as a Major Guanylin Molecule in Human Intestine and Plasma and Its Increase in Renal Insufficiency *Masamitsu Nakazato, Hideki Yamaguchi, Kazutaka Shiomi, Yukari Date, Shoichi Fujimoto, Kenji Kangawa, Hisayuki Matsuo, and Shigeru Matsukura* 1966

RORγ: The Third Member of ROR/RZR Orphan Receptor Subfamily That Is Highly Expressed in Skeletal Muscle *Takahisa Hirose, Robert J. Smith, and Anton M. Jetten* 1976

Activation of the Tyrosinase Gene Promoter by Neurofibromin *Hiroyuki Suzuki, Kazuhiro Takahashi, Ken-ichi Yasumoto, and Shigeki Shibahara* 1984

Tumor Necrosis Factor α Production Enhancers with a Phenylphthalimide Skeleton *Yoshihiro Shibata, Keizo Sasaki, Yuichi Hashimoto, and Shigeo Iwasaki* 1992

The C-Terminus of the B Cell Activator Oct-2 Functions as an Activation Domain in Yeast *Janet Mead, Keith Elliston, David F. Mark, and Steven W. Ludmerer* 1998

Activation of Human T Helper 1 and DNAase Expression in CD4$^+$ T Cells Induced by Short Immunomodulating Peptides *Natalia López-Moratalla, Marco Migliacio, María J. López-Zabalza, L. Alberto Pérez-Mediavilla, and Esteban Santiago* 2008

ERRATUM AND ADDENDUM

Volume 196, Number 1, October 15, 1993: P. Bhattacharya, "An Endoribonuclease Activity Associated with Lettre Ehrlich Ascites Tumor Cell Mitochondria," pp. 47–54 2013

ERRATUM

Volume 201, Number 2, June 15, 1994: Kaori Nimura, Hirofumi Yoshikawa, and Hideo Takahashi, "Sequence Analysis of the Third *dnaK* Homolog Gene in *Synechococcus* sp. PCC7942," pp. 848–854 2016

CUMULATIVE SUBJECT INDEX* FOR VOLUMES 198–205

A

A23187, *see* Calcimycin
Abscisic acid
  generated superoxide radicals, role in signal transduction regulation of stomatal movements (*Vicia faba*), **205**, 30
Absorption spectra
  nanosecond resolution, in analysis of kinetics associated with carbon monoxide rebinding to hemoglobin S and C after ligand photolysis (human), **205**, 154
Absorption spectroscopy
  cytochrome c_{554}: methionine replacement of lysine as axial ligand at high pH (*Achromobacter cycloclastes*), **204**, 120
Abzymes
  selenium-containing
    generation by chemical mutation process, **198**, 1240
    physicochemical and enzymic properties, **202**, 1645
Acetaldehyde
  and transforming growth factor β1, regulation of undulin and fibronectin synthesis and gene expression in fat-storing cells, comparison (human), **199**, 1019
Acetaminophen
  hepatotoxicity, effects on CYP2E1 and CYP1A2 activity (mouse), **203**, 532
Acetoacetyl-CoA thiolase, *see* Acetyl-CoA acetyltransferase
Acetonitrile
  cross-linked subtilisin Carlsberg in, X-ray crystal structure, **198**, 675
Acetylation
  peptides, effect on interaction with antipeptide antibody, **205**, 1688
Acetylcarnitine
  inhibition of alcohol dehydrogenase (rat hepatocytes), **203**, 1496
Acetylcholine
  activated muscarinic K^+ channels, effects of transducing subunits (guinea pig atrial myocytes), **200**, 1484
  induced ionic currents in isolated acinar cells of nasal gland, patch clamp analysis (guinea pig), **202**, 307
  synthesis in neuroblastoma NB-2a cells, synergistic effect of choline and carnitine (mouse), **202**, 354
Acetylcholine receptors
  muscarinic
    activated cation channels, regulatory role of tyrosine kinases (guinea pig ileum), **203**, 1392
    role in amyloid precursor protein secretion: reduced desensitization with M1-selective agonist AF102B (rat PC12 cells), **203**, 652
  nicotinic, mediated carbachol effects on thymocyte apoptosis and differentiation (mouse), **203**, 1057
Acetylcholinesterase
  from cerebrospinal fluid, and caudate nucleus, IgM antibodies specific to, characterization (human), **203**, 1076
  Drosophila melanogaster, expressed by recombinant baculoviruses, biochemical analysis, **203**, 734
  transformation to molten globule state by oxidative stress (*Torpedo californica*), **198**, 915
Acetyl-CoA acetyltransferase
  hepatic cytosolic, cDNA, cloning and nucleotide sequencing (human), **201**, 478
N-Acetylglucosaminyltransferase V, *see* α-1,3(6)-Mannosylglycoprotein β-1,6-*N*-acetylglucosaminyltransferase
β-*N*-Acetylhexosaminidase
  differential expression in tissues (mouse), **199**, 1341
  protein folding and exit from endoplasmic reticulum, role of pro-peptide of proβ-polypeptide chain (human), **204**, 135
Acid
  and sialidase-catalyzed hydrolysis of interketosidic linkages, differential reactivities of *N*-glycolylneuraminic acid dimers, **205**, 893
Acidification
  L cell endosomes, effect of CFTR gene, **205**, 396
Acid phosphatase
  gene encoding, homologous to *Penicillium chrysogenum PHOA*, determination (*Aspergillus ficuum*), **204**, 63
  pH 6.0 optimum, primary structure, analysis by gas phase sequencing (*Aspergillus ficuum (niger)*, **203**, 182
  prostatic, *see* Prostatic acid phosphatase

Acinar cells
  nasal gland, isolated, ionic currents evoked by acetylcholine, patch clamp analysis (guinea pig), **202**, 307
  pancreatic, capacitative Ca^{2+} influx, attenuation by tyrosine kinase inhibitors (rat), **202**, 1697
  parotid, mitogen-activated protein kinase pathway in, limited modulation by cAMP (rat), **202**, 743
  signal transduction, amylase secretion in, interference by calyculin A, okadaic acid, and W-7 (rat), **201**, 1470
Acini
  pancreatic, *see* Pancreatic acini
Acivicin
  activation of 2′,3′-dideoxycytidine in H9 cells (human), **202**, 1524
Acquired immunodeficiency syndrome, *see also* Human immunodeficiency virus
  long latency period between HIV-1 infection and disease development, role of interleukin-10 (human), **202**, 374
Acrosin
  encoding gene, diploid expression and translational regulation (rat), **202**, 88
ACTH, *see* Adrenocorticotropin
Actin
  Acanthamoeba and rabbit skeletal muscle, behavior in *Acanthamoeba castellanii* soluble extracts, comparison, **196**, 569; *erratum*, **198**, 1290
  binding by chicken smooth muscle filamin, and filamin cross-linking/bundling, double exponential analysis at different temperatures (rabbit skeletal muscle), **203**, 338
  binding proteins, endothelial, N-terminal region, expression in *Escherichia coli* and phosphorylation with cAMP-dependent protein kinase (human), **202**, 764
  encoding by oligogene family (*Musca domestica*), **203**, 523
  F, induced block of calponin phosphorylation by protein kinase C *in vitro*, **203**, 1502
  filaments
    adenine nucleotides, in neuronal cytoskeletal fractions, phosphorylation states (rat pheochromocytoma cells), **201**, 1490
    bundling by myosin light-chain kinase from smooth muscle (chicken), **199**, 786
    nano-manipulation by microneedle, in analysis of energy transduction by actomyosin motor (rabbit), **199**, 1057
  hepatic, mRNA expression, effects of CCl_4 and partial hepatectomy (rat), **198**, 568
  serum, identification as cytoplasmic isoform after *in situ* hydroxylamine cleavage on sequencer membranes (fetal bovine), **205**, 195
  stress fibers, disorganization accompanied by morphological changes and protein tyrosine phosphorylation in BALB/c3T3 cells, induction by vascular endothelial growth factor (mouse), **202**, 1716
  thin filaments, 3D structure, calcium-induced change, cryo-electron microscopic analysis (rabbit skeletal muscle), **203**, 951; *erratum*, **205**, 976
  25-kDa protein binding, with homology to chicken SM22 protein, purification, characterization, and partial sequence analysis (bovine aorta), **198**, 1275
Actinomycin
  induction of MDR1 gene expression, role of DNA binding protein MDR-NF1/YB-1 (human), **199**, 1428
Activin receptors
  type II, decreased testicular mRNA expression, association with overexpression of activin-βA subunit mRNA (murine), **203**, 105
Activins
  A, expression in arteriosclerotic lesions (rabbit), **205**, 441
  A, B, and AB, pituitary cells responding to, characterization by responses to hypothalamic releasing hormones (rat), **203**, 1739
  βA subunit mRNA overexpression, association with decreased testicular activin type II receptor mRNA levels in α-inhibin-deficient mouse, **203**, 105
  localization in oocytes (*Xenopus laevis*), **202**, 484
  radioactive, in protein-binding assay of epidermal growth factor effects on follistatin production in cultured hepatocytes (rat), **202**, 422
Actomyosin
  component of aortic wall contraction, phorbol ester contraction effect through mechanism independent of (guinea pig), **199**, 944
Actomyosin motor
  single-molecule analysis by micromanipulation (rabbit), **199**, 1057
Acylation
  fatty acid, RNase A with reversed micelle as microreactor, **196**, 447; *erratum*, **198**, 410
Acyl CoA:glycine *N*-acyltransferase, *see* Glycine *N*-acyltransferase
Acyl-CoA hydrolase
  long-chain, detection in renal medulla and role in prostaglandin synthesis (rabbit), **202**, 1054
Acyl-CoA oxidase
  peroxisomal
    molecular cloning and functional expression (human), **198**, 1113
    as rate-limiting enzyme in very-long-chain fatty acid β-oxidation system (rat hepatoma cells), **201**, 1541

β-Adducin
  interacting with Rabphilin-3A in presence of Ca^{2+} and phosphatidylserine (bovine), **205**, 460
Adenine methyltransferase
  Chlorella virus, gene promoter, functional expression in bacteria and plants, **204**, 187
Adenine nucleotides
  and pyridine nucleotides, status during Ca^{2+}- and inorganic phosphate-induced mitochondrial permeability transition (rat liver), **200**, 1615
Adenine nucleotide translocator
  role in temperature dependence of coupling efficiency of hepatic oxidative phosphorylation (rat), **202**, 816
Adenosine
  and derivatives, genistein effects in rat FRTL-5 thyroid cells: identification as competitive antagonist for P$_1$-purinergic receptors, **203**, 1488
  as endogenous activator of cellular antioxidant defense system (bovine, human, rat), **201**, 508
  mediation of hypoxia-induced vascular endothelial growth factor mRNA in U-937 cells, **204**, 318
  role in thyrotropin-stimulated inositol phospholipids pathway in thyroid non-toxic goiter (human), **201**, 1182
  and thyrotropin, effects on inositol phospholipid pathway in thyroid from Graves' disease patients, **205**, 584
Adenosine 3′,5′-monophosphate, *see* Cyclic AMP
Adenosine receptors
  A$_1$, induction of chlorine efflux in endothelial cells via pertussis toxin-sensitive G protein (bovine), **204**, 1143
  A$_2$, –cAMP system, identification in aortic endothelial cells (human), **199**, 905
  A$_3$, selective agonist affinity label (rat brain), **203**, 570
  functional coupling to ligand-dependent reporter gene system in transfected CHO cells (human), **198**, 626
  genistein as competitive antagonist in rat FRTL-5 thyroid cells, **203**, 1488
Adenosine 5,5′-P1,P4-tetraphosphate receptors
  cardiac membrane, adenylated dinucleotide binding (mouse), **200**, 749
Adenosine triphosphatase, *see* ATPase
Adenosylhomocysteinase
  identification, developmental expression, and evolution (*Xenopus laevis*), **205**, 1539
S-Adenosylhomocysteine
  and *S*-adenosylmethionine, HPLC assay of tissue levels and effect of vitamin B$_6$ deficiency on hepatic levels (rat), **205**, 1748
S-Adenosyl-L-homocysteine hydrolase, *see* Adenosylhomocysteinase
S-Adenosylmethionine
  and *S*-adenosylhomocysteine, HPLC assay of tissue levels and effect of vitamin B$_6$ deficiency on hepatic levels (rat), **205**, 1748
Adenoviruses
  mediated endosome lysis, mechanism: role of intact capsid structure (human), **205**, 1318
  type 2, –protein conjugates, for protein delivery in cells: Ad linkage with epidermal growth factor and mAb to human transferrin receptor (human), **203**, 582
Adenylate cyclase
  agonist-induced activation, role of thyrotropin receptor residues 684-692 in intracellular region adjacent to plasma membrane, **199**, 1497
  coupling to somatostatin receptor SSTR2 in presence of Giα1 protein, **202**, 1188
  functional coupling of somatostatin receptor subtypes (human), **198**, 605
  inhibition by human somatostatin receptor type 2 after transfection in COS-7 cells (monkey), **200**, 986
  and phospholipase C, coupling to somatostatin receptor subtype SSTR1, demonstration (human), **204**, 176
  stimulation by thyrotropin receptors, TSHR point mutations determining structural requirements (human), **199**, 612
  stimulatory system, enhancement by prostaglandin E receptor EP3 subtype isoforms with different efficiencies, **201**, 340
Adenylated dinucleotides
  Ap$_4$A, Ap$_5$A, and Ap$_6$A, binding to cardiac membrane adenosine 5,5‴ -P1,P4-tetraphosphate receptors (mouse), **200**, 749
Adenylylation
  and ADP-ribosylation, modification of glutamine synthetase (*Streptomyces griseus*), **204**, 598
Adenylyl cyclase, *see* Adenylate cyclase
Adenylyl phosphosulfate reductase
  coupling of NADH oxidase from *Desulfovibrio vulgaris*, **203**, 839
Adhesion
  cellular, *see* Cell adhesion
Adipocytes, *see also* Preadipocytes
  apoptosis
    occurrence in malignancy (human), **205**, 625
    in vitro (human), **201**, 500
  brown
    glucose transport induced by insulin and norepinephrine, effect of wortmannin (rat), **202**, 660
    uncoupling gene promoter, transcriptional activation by

    CCAAT/enhancer binding proteins α and β (mouse), **198**, 653
  uncoupling protein gene expression in primary cultures, induction by insulin-like growth factor, role of C/EBP transcription factors (fetal rat), **201**, 813
 insulin-like effects of growth hormone, inhibition by phosphatidylinositol 3-kinase inhibitor wortmannin (rat), **203**, 306
 intracellular Mg^{2+} concentrations, effects of pioglitazone (rat), **202**, 416
 isolated
  insulin-stimulated glucose uptake, inhibition by endothelin-1 (rat), **202**, 688; *erratum*, **203**, 1363
  lipid synthesis, effects of high levels of glucose and insulin (rat), **199**, 1151
 protein-tyrosine phosphatases in, identification by molecular cloning (rat), **202**, 902
 3T3-F442A, phospho*enol*pyruvate carboxykinase (GTP) gene expression, fatty acid oleate effects, **203**, 385
 3T3-L1, insulin responsive deoxyglucose transport, correlation with insulin receptor substrate-1 (human), **198**, 523
Adipogenesis
 3T3-F442A cells, inhibition by retinoic acid, role of cytoplasmic retinoic acid-binding protein, **204**, 257
Adipose tissue
 brown, mitochondrial uncoupling protein gene, 5′-proximal regulatory region, identification of tissue-specific protein binding domain (rat), **204**, 867
ADP (adenosine 5′-diphosphate)
 actin filament, in neuronal cytoskeletal fractions, phosphorylation state (rat pheochromocytoma cells), **201**, 1490
 and AMP, ATP, and NAD(P)H, status during Ca^{2+}- and inorganic phosphate-induced mitochondrial permeability transition (rat liver), **200**, 1615
 induced platelet aggregation, inhibition by jararhagin-C from snake venom (human), **201**, 331
ADP-ribosylation
 and adenylylation, modification of glutamine synthetase (*Streptomyces griseus*), **204**, 598
 heterogeneous ribonucleoproteins in HeLa cells (human), **204**, 772
ADP-ribosyl cyclase
 homologous murine bone marrow stromal cell antigen 1, molecular cloning (*Aplysia*), **203**, 1309
Adrenalectomy
 and hydrocortisone replacement, effects on stomach mucosa cell proliferation, differentiation, and pepsinogen levels (rat), **202**, 1
Adrenal gland
 isolated perfused, endothelin-1 release, acute elevation in response to increasing flow rates and ACTH(1-24) (rat), **202**, 873
Adrenal medullary cells
 catecholamine secretion, stimulation by interleukin-1β *in vitro* (bovine), **198**, 81
α$_1$-Adrenergic agonists
 and endothelin-1, evoked phosphoinositide responses in cultured cardiomyocytes (neonatal rat), **203**, 422
β-Adrenergic-receptor kinase
 pleckstrin homology domains, binding to WD40/β-transducin repeat regions of trimeric G-protein β-subunits, **203**, 29
α-Adrenergic receptors
 α-1, mediation of membrane phospholipid degradation in cultured cardiomyocytes, dynamics (rat), **198**, 366
 α$_1$A, α$_1$B, and α$_1$C, cloning, expression, and characterization (human), **201**, 1296
 α$_2$A-C10 and α$_2$C-C4, sensitivity in coupling to G$_i$ protein in CHO cells, relationship to inhibition of cAMP accumulation (human), **199**, 869
 α$_1$C, mRNA distribution in tissues, analysis by RNase protection assay and comparison with α1B and α1D (adult rat), **200**, 1177
 α$_2$C10, Rat-1 fibroblasts stably transfected with, regulation of p42 and p44 MAP kinase isoforms, **200**, 1529
β-Adrenergic receptors
 activation of maxi-K$^+$ channels, enhancement by GM1 ganglioside (guinea pig myocytes), **200**, 1341
 blockade, and aortacaval fistulae, cardiac angiotensin II receptor populations during, analysis (rat), **203**, 1865
Adrenocortical cells
 expression of casein kinase II oligomeric isoforms *in vitro* (bovine), **198**, 660
Adrenocorticotropin
 ACTH(1–24), acute elevation of endothelin-1 release from isolated perfused adrenal gland (rat), **202**, 873
 immunoreactive, secretion by B and T cells in response to cellular stress factors (human), **204**, 828
 secretion by anterior pituitary cells *in vitro*, effects of CINC/gro (rat), **202**, 155
Adrenoleukodystrophy
 ALD protein cDNA from affected patient, nonsense mutation, identification, **198**, 632
 gene encoding 80-kDa membrane protein, characterization (human), **201**, 1029
 identification of two base pair deletion in five unrelated families, **202**, 647
 X-linked, detection of cytosine to guanine transversion in nu-

    cleotide 1451 in exon 5 of ALD gene (human), **205**, 1638
drenomedullin
  effect as *in vivo* bronchodilator (guinea pig), **205**, 251
  gene structure (human), **203**, 631
  precursor, cDNA, cloning and characterization (human), **194**, 720; *erratum*, **202**, 643
  production and secretion by vascular smooth muscle cells, augmentation by tumor necrosis factor α (bovine, rat), **203**, 719
  synthesis and secretion by vascular endothelial cells in various species, **201**, 1160; *erratum*, **203**, 1363
driamycin, *see* Doxorubicin
F102B
  M1-selective, stimulation of amyloid precursor protein secretion in PC12 cells, comparison with carbachol stimulation, **203**, 652
ffinity chromatography
  α-L-fucosyltransferases of Lewis-type and plasma-type in milk (human), **198**, 350
  isoquinolinesulfonamide, in isolation and characterization of 36-kDa microfibril-associated glycoprotein (bovine aorta), **198**, 1262
ffinity labeling
  P-glycoprotein in multidrug-resistant cells, [^{3}H]tamoxifen aziridine as probe (hamster lung), **202**, 606
gammaglobulinemia
  tyrosine kinase, SH2 domain mutations, structural basis (human), **205**, 1270
gglutinin
  wheat germ, binding of monosialoganglioside reconstituted in sphingomyelin and glucosylceramide membranes: quantitative analyses by quartz crystal microbalance, **204**, 551
ggregation
  β-amyloid
    effects of brain clusterin (human), **204**, 1131
    prevention by rifampicin *in vitro* (rat), **204**, 76
  B lymphoblasts, LFA-1-sensitive effects of nectadrin antibodies (mouse), **198**, 1209
  network gel from 1,2-bis(dinonoyl)-*sn*-glycero-3-phosphocholine and 1,2-bis(tricosa-10,12-diynoyl)-*sn*-glycero-3-phosphocholine mixtures, **203**, 296
  nuclear protein, heat-induced, acceleration of recovery in O23 cells overexpressing Hsp27 (hamster), **204**, 1170
  platelets, inhibition by stable leukocyte-derived factor (human), **201**, 878
ging, *see also* Senescence
  associated characteristics, onset in fibroblasts, kinetin-induced delay (human), **201**, 665
  effects on peripheral lymphocyte K^+ channel activity, **199**, 519
  premature
    associated heart mitochondrial DNA fragmentation (human), **202**, 102
    association with inherited enhancement of hydroxyl radical generation and lipid peroxidation in galactose cataractogenesis-sensitive rat, **199**, 726
  skeletal muscles, mitochondrial DNA 4977-bp deletion and respiratory chain enzyme activities in, correlation (human), **205**, 772
AIDS, *see* Acquired immunodeficiency syndrome
Alanine
  Ala-146, and Met-134, identification in second transmembrane segment of tachykinin NK$_3$ receptor as residues involved in SR 48968 binding (human), **198**, 961
  and glycine, protection against hypoxic injury in isolated perfused kidney, detection by ^{23}Na NMR (rat), **202**, 1639
Albolabrin
  crosslinking site on isolated platelet integrin GPIIb/IIIa, characterization (human), **202**, 135
Albumin
  genes, missense mutation in, detection in familial dysalbuminemic hyperthyroxinemia (human), **202**, 781
  glycated, Amadori-modified, endothelial cell receptors for, identification (mouse), **198**, 734; *erratum*, **199**, 1088
Alcohol
  cardioprotective effects, mediation by vascular alcohol dehydrogenase (human), **203**, 1858
  effect on expression of hsp73 in hepatocyte monolayers from alcohol-exposed rats, **205**, 186
Alcohol dehydrogenase
  class IV, cDNA cloning and sequencing (human), **203**, 219
  inhibition by acetylcarnitine (rat hepatocytes), **203**, 1496
  vascular, mediation of cardioprotective effects of alcohol (human), **203**, 1858
Alcoholism
  association with dopamine D$_2$ receptor structural polymorphism, **204**, 1199
Aldehyde dehydrogenase
  effect on spermine inhibition of nitric-oxide synthase induction in J774.2 macrophages, **203**, 1638
Aldosterone
  elevation of free intracellular calcium in vascular smooth muscle and endothelial cells, subcellular localization by single cell imaging (pig, rat), **204**, 475
  response selectivity, role of A/B region of mineralocorticoid receptor (human), **205**, 1610
  responsiveness to angiotensin in aldosterone-producing adenoma, association with RFLP at atrial natriuretic pep-

tide gene locus (human), **204**, 1312

- Algae
  - chromophyte and red, detection of 33-kDa photosystem II extrinsic protein, **205**, 1497
- Alkaline phosphatase
  - DMSO-induced increase, sphinganine, associated with the HL-60 cell granulocytic differentiation, potentiation by, **199**, 888
  - induction in osteoblastic cell line MC3T3-E1
    - by bone morphogenetic protein-2 (*mouse*), **198**, 1267
    - effect of nerve growth factor (mouse), **205**, 1187
- *N*-Alkyl benzazepinone
  - NMR and molecular modeling based on conformational analysis: CNS agent design motif, **205**, 98
- Allergens
  - *Cry j* I, cloning and sequencing (*Cryptomeria japonica*), **199**, 619
  - *Cry j* II, cDNA, isolation and expression (*Cryptomeria japonica*), **201**, 1021
- Alternative splicing
  - fibronectin IIICS domain, regulation by cytokines (human), **199**, 1005
  - RNA, role in derivation of isoforms of kidney EP_3 receptor (rat), **199**, 834
  - single gene, role in derivation of slow skeletal troponin T mRNA isoform (human), **199**, 841
- Aluminum
  - promotion of Alzheimer's disease-associated amyloid β-protein *in vitro*, **198**, 531
- Alzheimer's disease
  - amyloid
    - non-Aβ component precursor, mRNA, tissue-dependent alternative splicing (human), **205**, 1366
    - serum, P component concentration in cerebrospinal fluid (human), **201**, 722
  - amyloid β
    - aggregation *in vitro*, promotion by aluminum, **198**, 531
    - apolipoproteins J and E complexed to, cerebral uptake (guinea pig), **205**, 1431
    - from brain, proteolysis by gelatinase A (human), **205**, 1755
    - 4-kDa, production in lymphoid cells, role of amyloid precursor protein C-terminal cytosolic domain, **204**, 1371
    - free radical fragments, implications of sequence-specific synaptosomal lipoperoxidation initiated by, **200**, 710
    - levels in cerebral and cerebellar cortices and cerebrospinal fluid from affected subjects and control subjects, **200**, 1598
    - long-tail form Aβ1-42/43 as seed molecule, biochemical evidence in cerebral deposits (human), **205**, 834
    - neurotoxic fragment, role of channel formation in planar lipid bilayer by, **202**, 1142
    - precursor, expression in neurons, role of neuron–glial interactions (human), **198**, 504
    - role in macrophage activation (rat), **199**, 984
  - amyloid β/4A protein, secretion in COS cells, role of N-terminal site cleavage, **202**, 1517
  - associated amyloidogenesis, role of Aβ-peptide fragment p3, **204**, 780
  - elevation of nitric oxide synthase activity in cerebral microvessels (human), **205**, 659
  - relation to mutations at nucleotide 5460 of mitochondrial NADH dehydrogenase (human brain), **203**, 745
- Amelogenin
  - molecular cloning, DNA sequence, and comparative analysis of mammalian proteinsequence divergence (rat), **198**, 755
- Amidase
  - detection in Bence Jones proteins (human), **204**, 57
- Amides
  - Lys-Ser-Ala-Tyr-Met-Arg-Phe, from free-living nematode *Panagrellus redivivus*, myoactive in *Ascaris suum*, isolation and primary structure, **200**, 973
- Amine oxidase (flavin-containing)
  - resting state of, two different chromophores in, observation by fluorescence spectroscopy (bovine), **202**, 1574
- Amino acid composition
  - anadarin MS (*Anadara granosa*), **203**, 36
  - cytochrome C_{549} (*Pseudomonas nautica*), **199**, 1289
  - vitellogenin (*Xenopus laevis*), **200**, 1407
- Amino acids
  - in amino terminal region of rat prolactin, role in prolactin receptor binding and Nb2 cell proliferation, **205**, 312
  - L-isoaspartyl/D-aspartyl methyltransferase involved in protein repair, polymorphisms in encoding gene exons (human), **203**, 491
  - myeloperoxidase, residues involved in catalytic activity and heme interaction, analysis by site-directed mutagenesis (human), **202**, 73
  - neutral, efflux, role of CFTR protein (murine fibroblasts), **204**, 653
  - phosphates in, study with photoacoustic Fourier-transform infrared spectroscopy, **205**, 618
  - positively charged residues of apolipoprotein B, role in low-density lipoprotein recognition by putative signaling-coupled/growth receptors (human vascular smooth muscle cells), **203**, 1700
  - repeating motif, WWP, identification in yeast, nematod, and vertebrate proteins, **205**, 1201
- α-Amino acids

  - fluorogenic peptides composed entirely of, preparation, **201**, 835
- D-Amino acids
  - residues, as substrate specificity determinants for casein kinase II, **200**, 1564
- Amino acid sequence
  - acetoacetyl-CoA thiolase, hepatic cytosolic (human), **201**, 478
  - *N*-acetylglucosaminyltransferase V (human), **198**, 318; *erratum*, **200**, 668
  - acid phosphatase of 6.0 optimum pH (*Aspergillus ficuum (niger)*), **203**, 182
  - actin-binding protein, 25-kDa (bovine), **198**, 1275
  - β-adducin, Rabphilin-3A-interacting protein (bovine), **205**, 460
  - *S*-adenosyl-L-homocysteine hydrolase (*Xenopus laevis*), **205**, 1539
  - α-adrenergic receptor subtypes α_1A, α_1B, α_1C (human), **201**, 1296
  - adrenomedullin (human), **203**, 631
  - adrenomedullin precursor (human), **194**, 720; *erratum*, **202**, 643
  - alcohol dehydrogenase class IV (human), **203**, 219
  - amelogenin (rat), **198**, 755
  - amino-terminal
    - cytochrome C$_{549}$ (*Pseudomonas nautica*), **199**, 1289
    - *Diospyro texana* 27-kDa antifungal protein, **202**, 666
    - vitellogenin (*Xenopus laevis*), **200**, 1407
  - *amo*B gene product (*Nitrosomonas europaea*), **204**, 759
  - angiotensin II
    - type 1 receptor subtype AT$_{1b}$R (human), **199**, 467
    - type 2 receptor (human), **200**, 1449; **203**, 1842; **205**, 645
  - angiotensin converting enzyme, comparison in stroke-prone spontaneously hypertensive and Wistar-Kyoto rats, **198**, 380
  - apolipoprotein F (human), **203**, 1146
  - *Aspergillus ficuum* acid phosphatase, **204**, 63
  - bacterial histidine-rich ATPases 1 and 2 isolated from human small intestine cDNA library, **205**, 1644
  - bone marrow stromal cell antigen 1 (mouse), **203**, 1309
  - bone morphogenetic protein type IA receptor (rat), **204**, 203
  - E-cadherin (human), **200**, 1754
  - calcitonin gene-related peptide analogues, **202**, 497
  - calmitine (human), **203**, 1477
  - carboxylesterase ES-3 (rat liver), **203**, 1404
  - casein kinase-1 *hhp1*$^+$ and *hhp2*$^+$ isoforms (*Schizosaccharomyces pombe*), **203**, 231
  - α(E)-catenin (human colon), **203**, 1691
  - CD38-homologous protein (rat), **202**, 629
  - cGMP-stimulated phosphodiesterase (rat brain), **205**, 1850
  - CHIP29 water channel protein (bovine), **204**, 861
  - class *theta* glutathione *S*-transferase subunit Yrs (rat), **205**, 1250
  - collagen type V, gelatinase-derived fragments (bovine, human), **202**, 328
  - complement regulatory antigen 512 (rat), **198**, 819
  - conglutinin (bovine), **198**, 597
  - corazonin (*Drosophila melanogaster*), **204**, 292
  - corticotropin-releasing factor receptor variant with 40-amino-acid deletion in amino-terminal domain (human), **205**, 1836
  - creatine transporter hCRT-BS2M (human), **204**, 419
  - *Cry j* I cDNA allergen (*Cryptomeria japonica*), **199**, 619
  - *Cry j* II allergen (*Cryptomeria japonica*), **201**, 1021
  - γ-crystallin isoforms (hybrid teleostean fish), **202**, 527
  - *Cwnt-4* predicted protein (chicken embryo), **203**, 1581
  - cyclic hexameric peptides inhibiting phosphatidylinositol 3-kinase p85 SH2 domain binding, **201**, 1148
  - cyclin D1 protein (rat), **204**, 691
  - cyclin E (mouse), **201**, 994
  - cysteine-rich fish antifreeze protein (sea raven), **203**, 1851
  - cytochrome P450 (mosquito), **205**, 1452
  - cytochrome P450 2A10 and 2A11 (rabbit), **203**, 373
  - cytochrome P450$_{14DM}$ clone pRT-9 (rat liver), **201**, 1320
  - cytochrome P450 102 FAD/NADP$^+$ domain (*Bacillus megaterium*), **203**, 162
  - cytosolic purine 5′-nucleotidase (human placenta), **205**, 917
  - echicetin β subunit (*Echis carinatus*), **205**, 68
  - eIF-2 β-subunit (rabbit reticulocytes), **201**, 1279
  - endogenous hemorphin-containing peptides from hemoglobin β-chain (bovine brain), **202**, 410
  - endothelin-converting enzyme (bovine), **203**, 1417
  - enolase synthetic peptides corresponding to C-terminal portion: NNE and NSE (human), **202**, 25
  - eotaxin (guinea pig lung), **205**, 788
  - erythrocyte NADPH-flavin reductase (human), **198**, 1170
  - estrogen sulfotransferase (human liver), **200**, 1621
  - Fas antigen, truncated and transmembrane form (rat), **198**, 666
  - Fas ligand (human hepatocytes), **204**, 468
  - 7Fe type ferredoxin (*Bacillus schlegelii*), **201**, 938
  - α-fibrinogen isoforms, N-terminal sequences (*Crotalus atrox*), **201**, 1414
  - fructose 2,6-bisphosphate 2-phosphatase/fructose 6-phosphate 2-kinase (frog), **198**, 1099; *erratum*, **200**, 1769
  - fructose 6-phosphate 2-kinase:fructose 2,6-bisphosphatase (rat brain), **198**, 335
  - gaegurins (Korean frog skin), **205**, 948
  - galactocerebrosidase (human), **198**, 485
  - β-galactosidase (*Lactobacillus delbrückii bulgaricus*), **201**, 1167

gastric inhibitory polypeptide receptor (hamster), **205**, 1556
gastrin/CCK_B receptor gene (rabbit), **202**, 947
gentamicin resistance gene (*Serratia marcescens*), **198**, 1084
glucagon receptor (rat liver), **198**, 328
glucose-6-phosphatase (rat liver), **201**, 302
β_2-glycoprotein I (mouse), **200**, 1521
Golgi antigen (human), **205**, 1399
G protein-coupled receptor kinase 4 isoforms (human), **199**, 848
G protein-coupled receptors
  GPR1 from various species, **205**, 1952
  structurally related to mammalian FSH, TSH, LH/CG receptor family (sea anemone), **197**, 1062; *erratum*, **200**, 668
growth/differentiation factor 5 (human), **204**, 646
GTA1085 (*Saccharomyces cerevisiae*), **201**, 310
hCDC10 homologous to yeast CDC10 (human fetal lung), **202**, 82
heat shock proteins
  DnaK3 hsp70 family homologue (*Synechococcus* sp. PCC7942), **201**, 848; *erratum*, **205**, 2016
  Hsp70RY (human), **203**, 577
  Hsp105A and 105B (murine FM3A cells), **204**, 357
heat-stable phosphocarrier proteins (*Streptococcus mutans*), **199**, 1297
hemagglutinin HA-17, HA 2223, and HA-53 (*Clostridium botulinum*), **205**, 1291
heparin-binding protein HBp15 cDNA (bovine, mouse), **199**, 706
hepatic growth factor cDNA (mouse), **199**, 772
hepatitis C virus type 5a$^+$ core, E2, and NS3/NS4 regions (human), **202**, 1308
HES-3 helix–loop–helix factor (mouse), **203**, 594
hippocampal autoantigen ple21 (human), **199**, 1200
histamine H1 receptor (human), **201**, 894
histidine ammonia-lyase near Ser-143 residue: wild-type and mutagenic oligonucleotide (*Pseudomonas putida*), **201**, 1433
HMGI-C phosphoprotein (human), **201**, 63
hobo-like transposons in *Heliothis virescens* and *Heicoverpa zea* genomes, **203**, 169
human papillomavirus short amplicons, **204**, 820
2α-hydroxysteroid dehydrogenase (rat corpus luteum), **201**, 1289
insulin-like growth factor I receptors (human, rat), **202**, 1038
$\alpha_5\beta_1$ integrin β_{1B} variant subunit and β_1 mutant subunits (human), **199**, 603
jararhagin-C (*Bothrops jararaca*), **201**, 331
kexin-like protease PC7 (rat), **202**, 1452
L-lactate dehydrogenase (*Caenorhabditis elegans*), **205**, 558
lacY cDNA-deduced (*Citrobacter freundii*), **203**, 1882
large subunit of trifunctional β-oxidation complex (swine), **198**, 431
leucine zipper putative protein kinase (human brain), **202**, 613; *erratum*, **205**, 1494
leucokinins 1, 2, and 3 (mosquito), **202**, 715
LIM-containing cysteine-rich heart protein (human), **205**, 497
macrophage 65-kDa phosphoprotein (mouse), **202**, 1631
MAGE-1-related genes (human), **202**, 549
major histocompatibility complex class II *DRA* gene (bovine), **204**, 195
MAP kinase-activated protein kinase 2 (human), **200**, 1118
mast cell protease 1 (rat), **199**, 593
MC5 melanocortin receptor (rat), **200**, 1007
melanocortin receptor, fifth family member (mouse), **200**, 1214
membrane-bound aminopeptidase P internal peptides: identification as proline peptidase family member (guinea pig), **205**, 1790
metabotropic glutamate receptor subtype 5 isoforms (human), **199**, 1136
mIA-2 protein (mouse), **204**, 930
mitochondrial fatty acid β-oxidation trifunctional protein subunit cDNAs (human), **199**, 818
monocyte chemoattractant protein-1
  bovine, **202**, 1272
  porcine luteal cells, **199**, 962
monocyte chemotactic protein-3 (murine macrophages), **201**, 493
murine cytomegalovirus U_L80 open reading frame, **203**, 472
natural resistance-associated macrophage protein (human), **204**, 1074
neuraminidase (*Bacteroides fragilis* YCH46), **203**, 914
neurite outgrowth molecule, 74kDa soluble (bovine brain), **199**, 1167
neutrophil-activating peptide ENA-78 (human), **205**, 612
neutrophil gelatinase-associated lipocalin (human), **202**, 1468
nitric-oxide synthase constitutive and inducible isoforms (human), **205**, 85
nuclear antigen with DEAD-box RNA helicase motif (human), **199**, 748
nuclear receptor Rev-ErbAβ (rat), **204**, 49
κ-opioid receptor (human), **202**, 1431
κ-opioid receptor and homolog (mouse), **205**, 1353
OTK-4 gene (human), **200**, 836
PACE-4 isforms (human), **200**, 943; *erratum*, **204**, 1381
peptide T22 with anti-HIV activity, **205**, 1729

  peptidylglycine α-amidating monooxygenase (human pancreas), **205**, 282
  peroxisomal acyl-CoA oxidase cDNA (human), **198**, 1113
  phenylethylamine oxidase (*Arthrobacter globiformis*), **199**, 1096
  phosphofructokinase platelet-type isozyme from pancreatic islet (human), **198**, 990
  phosphoglycerate mutase, cofactor-independent (*Zea mays*), **203**, 1204
  phospholipase A_2 (cobra), **199**, 969
  phospholipase A_2 inhibitor, 25-kDa and 31-kDa subunits (cobra), **204**, 1212
  phospholipase C-α (bovine), **204**, 375
  PINCH open reading frame (human fetal liver), **201**, 1124
  prostacyclin synthase
    bovine, **203**, 59
    human, **200**, 1728
  prostaglandin E_2 receptor (rat), **200**, 1329
  prostaglandin E_2 receptor subtype EP3 (human), **198**, 999
  prostate transglutaminase (human), **203**, 1117
  proteasome subunits resolved by two-dimensional gels (human), **205**, 1785
  protein kinase with leucine zipper-like sequences and catalytic domain homologous to protein kinase C (human hippocampus), **199**, 897
  protein-tyrosine phosphatase with homology to band 4.1 (murine thymus), **203**, 479
  pyruvate carboxylase (human), **202**, 1009
  pyruvate kinase (*Trypanoplasma borelli*), **201**, 727
  Rabphilin-3A-interacting protein and GTP cyclohydrolase I, alignment (rat), **205**, 1409
  RAC protein kinase α and β (rat), **205**, 817
  Ran/TC4 GTP-binding protein homolog PfRan (*Plasmodium falciparum*), **201**, 423
  recombinase activating gene 1, **205**, 687
  ribosomal proteins
    L13 (rat), **201**, 102
    L15 (rat), **201**, 108
    L24 (rat), **202**, 1176
    L27a *Drosophila melanogaster* homolog, **198**, 748
    S11 (*Xenopus laevis*), **203**, 768
    S15a (rat), **200**, 1498
    S23 (rat), **202**, 314
  ROR/RZR orphan receptor RORγ (human), **205**, 1976
  secA protein (*Synechococcus* PCC7942), **200**, 844
  secreted glycoprotein ligands for hL-31, N-terminal sequences (human), **201**, 1366
  secretin (mouse), **200**, 1066
  E-selectin (pig), **204**, 763
  S1 elongation factor-1α, from brain cDNAs (human, mouse), **203**, 1371
  serine/threonine kinase receptors specifically binding to bone morphogenetic proteins BMP-2 and BMP-4, **205**, 1944
  small GTP-binding proteins H-YPT3 and H-ray (human), **205**, 1875
  sperm peptide antigen recognized by monoclonal autoantibody 4A11 from vasectomized mouse, **205**, 1503
  superfast myosin light chain 2 (cat), **200**, 1277
  testicular follitropin receptor (horse), **201**, 201
  thermolabile phenol sulfotransferase (human liver), **198**, 1119
  34-kDa glutathione-binding protein, N-terminal (rat), **201**, 149
  36-kDa microfibril-associated glycoprotein (bovine aorta), **198**, 1262
  thyroid/steroid receptor NOR-1 cloned from cultured neuronal cells (rat), **205**, 1959
  transforming growth factor-β receptor type I
    mouse, **198**, 1054
    mTFR40 (mouse), **198**, 1063
  transmembrane protein with highly basic C-terminal region encoded by tropomyosin-related cDNA clone (*Saccharomyces cerevisiae*), **199**, 1363
  α-tropomyosin cDNA from heart (*Ambystoma mexicanum*), **203**, 319
  vascular cell adhesion molecule (swine), **201**, 805
  vascular-type vasopressin receptor (human), **203**, 72
  vasoactive intestinal peptide receptor-related proteins (human), **200**, 769
  vasoactive intestinal polypeptide receptor cloned from SUP-T1 lymphoblasts (human), **205**, 1617
  venom protease with β-fibrinogenase activity (Taiwan habu), **205**, 1707
  V3 peptide, relationship to grouping of HIV-1 infection in subtypes A to E by V3 peptide serotyping, **205**, 1658
  xanthine dehydrogenase (human liver), **199**, 998
  yeast *PMS1* gene products, human homolog, **204**, 1257
  zinc-finger proteins
    Br140 (human), **198**, 1143
    FIII/YY1 (*Xenopus laevis*), **205**, 1236
  Zn-α_2-glycoprotein RGD regions (human), **201**, 1339
Amino acid substitution
  during divergent evolution, analysis: 400 by 400 dipeptide substitution matrix, **199**, 489
Amino acid transport systems
  y^+, role in selective transport of nitric-oxide synthase inhibitors in LPS-stimulated macrophages (mouse), **200**, 726
Aminoacyl-tRNA synthetase
  cooperative binding of zinc to, **201**, 1079

  - effect on cell death mediated by natural killer cell impairment of cytoskeleton function (human), **199**, 1250
  - induction of cytoskeleton rearrangement in M14 melanoma cells (human), **202**, 915
  - mediated protection against cytotoxic effector cell-mediated cell death (human), **199**, 525
- 2-Amino-6-caprolactam racemase
  - aminotransferase homolog, identification (*Achromobacter obae*), **198**, 138
- 1-Aminocyclopropane-1-carboxylate synthase
  - aminotransferase homolog, identification, **198**, 138
- 5-Aminodansyl-dU-DNA
  - netrosin binding in minor groove, correlation with fluorophore changes in major groove, **203**, 53; *erratum*, **204**, 437
- 8-Amino-2′-deoxyadenosine
  - base pairing with 2′-deoxythymidine, reverse Hoogsteen mode in solution, identification, **204**, 788
- Aminoethylcysteine ketimine
  - decarboxylated dimer
    - inhibition of mitochondrial respiration by impairment of electron transport on Complex I (bovine), **199**, 755
    - protection of submitochondrial particles from lipid peroxidatin at concentration not inhibitory of electron transport (bovine heart), **205**, 264
- Aminoguanidine
  - inhibitory effect on collagen (human), **199**, 683
- 2-Aminoisobutyrate
  - directional accumulation and transfer by placental trophoblast in two-sided culture, differential effects of epidermal growth factor and insulin-like growth factor I (human), **199**, 922
- 8-Amino-7-oxononanoate synthase
  - aminotransferase homolog, identification (*Bacillus sphaericus, Escherichia coli*), **198**, 138
- Aminopeptidase
  - resistant sugar-coupled tripeptides, Na^+-dependent transport in intestine (rat), **203**, 1412
- Aminopeptidase P, *see* X-Pro aminopeptidase
- 2-Aminopurine
  - inhibition of late telophase delay induced by ectopic expression of PITSLREβ1 protein kinase (CHO cells), **199**, 1167
- Aminotransferases
  - homologs catalyzing non-transamination amino acid transformations, identification, **198**, 138
- Amlodipine
  - and α-tocopherol, antioxidant activity against low-density lipoprotein oxidation *in vitro*, comparison (human), **203**, 1803
- Ammonia
  - forming cytochrome *c* nitrite reductase, molecular composition and spectroscopic properties (*Sulfurospirillum deleyianum*), **205**, 911
- Ammonia monooxygenase
  - 43-kDa polypeptide component, *amo*B gene encoding, sequencing (*Nitrosomonas europaea*), **204**, 759
- Ammonium
  - permeability of lymphocytes, increase by extracellular ATP, role of P_{2z} purinoceptor-operated ion channel (human), **202**, 1511
- Amnion
  - cyclo-oxygenase mRNA levels at term, analysis (human), **198**, 304
  - at term, cyclo-oxygenase regulation, role of mRNA binding proteins (human), **203**, 67
- AMP (adenosine 5′-monophosphate)
  - activated protein kinase in liver, characterization with specific peptide substrates and effects of 5′-AMP analogues (human), **200**, 1551
  - and ADP, ATP, and NAD(P)H, status during Ca^{2+}-and inorganic phosphate-induced mitochondrial permeability transition (rat liver), **200**, 1615
- AMP deaminase
  - functional domains, identification by mutational analysis (human, rat), **205**, 1010
- Amphiphiles
  - cationic, *N*-t-butyl-*N*′-tetradecyl-3-tetradecylaminopropionamidine, transfection of mammalian cells, description, **203**, 1622
- Amylase
  - secretion
    - activated by phospholipase A_2-activating protein, mediation by Gβ/phospholipase A_2/arachidonic acid cascades (rat pancreatic acini), **203**, 1716
    - in pancreatic acinar signal transduction, interference by calyculin A, okadaic acid, and W-7 (rat), **201**, 1470
- α-Amylase
  - catalytic mechanism, determination based on crystal structures and model building calculations, **204**, 297
  - mRNAs, poly(A) tail shortening in vegetative tissues of *Oryza sativa*, **202**, 1031
- Amylin
  - and designer β-peptides, β-structure in, CD and NMR spectroscopic comparisons (human), **204**, 1088
- Amyloid
  - Aβ peptide, fragment p3, role in Alzheimer's disease-associated amyloidogenesis, **204**, 780

Alzheimer's disease, non-Aβ component precursor, mRNA, tissue-dependent alternative splicing (human), **205**, 1366
βA peptide, and deletion analogs, putative neurotoxic 25-35 region, conformational mapping, **205**, 120
βA4, neurotoxicity, implications of apolipoprotein E and cholesterol effects on neuronal calcium signaling (murine brain), **200**, 1185
β/4A protein, secretion in COS cells, role of N-terminal site cleavage, **202**, 1517
islet polypeptide, stimulation of cAMP accumulation via porcine calcitonin receptor (rat), **205**, 1226
β peptide
  aggregation *in vitro*, promotion by aluminum, **198**, 531
  from Alzheimer disease brain, proteolysis by gelatinase A (human), **205**, 1755
  associated free radical fragments, initiation of sequence-specific synaptosomal lipoperoxidation, implications for Alzheimer's disease, **200**, 710
  neurotoxic fragment, channel formation in planar lipid bilayer, **202**, 1142
  role in macrophage activation (rat), **199**, 984
precursor proteins
  β
    enhancement of cerebral neural stem cell proliferation (rat fetus), **205**, 936
    extracellular and intracellular forms, susceptibility to ubiquitin-mediated degradation (human), **203**, 1731
    mRNA, expression in C6 glioma cells, effect of ciliary neurotrophic factor (rat), **204**, 391
    secreted, binding sites, identification on intact fibroblasts (human), **200**, 1685
  β/A4, altered processing in hippocamus of reserpinized brain (rat), **202**, 293
  C-terminal cytosolic domain, role in 4-kDa β peptide production in lymphoid cells, **204**, 1371
  expression in neuroblastoma cells, effects of glial conditioned medium (human), **198**, 504
  identification in synaptic plasma membrane (rat), **196**, 240; *erratum*, **198**, 409
  multicatalytic enzyme as γ-secretase, identification (human), **204**, 333
  promoter, transcriptional activity and regulatory elements (rat), **201**, 610
  secretion in cultured PC12 cells after stimulation with carbachol or M1-selective agonist AF102B, **203**, 652
β protein
  aggregation and neurotoxicity
    effects of brain clusterin (human), **204**, 1131
    prevention by rifampicin *in vitro* (rat), **204**, 76
  apolipoproteins J and E complexed to, cerebral uptake (guinea pig), **205**, 1431
  induction of platelet aggregation and support of platelet adhesion (human), **205**, 1829
  long-tail form Aβ1-42/43, as seed molecule in cerebral deposits of Alzheimer's disease, biochemical evidence (human), **205**, 834
  N-terminus, derived substrates, cleavage: purification and characterization of metalloproteinase with ability to cleave (human brain), **201**, 45
  soluble
    analysis in cerebral and cerebellar cortices and cerebrospinal fluid of Alzheimer's disease-affected and control subjects, **200**, 1598
    complexation with high density lipoprotein 3 and VHDL (human plasma), **205**, 1164
serum, P-component
  binding to specific peptide in presence of calcium (human), **205**, 1172
  concentration in cerebrospinal fluid as marker of cerebral deposits in Alzheimer's disease (human), **201**, 722
Amyloidogenesis
  Alzheimer's disease-associated, role of Aβ-peptide fragment p3, **204**, 780
Amyloidosis
  hemodialysis-associated, pathogenesis, role of macrophage interleukin-6 induction by β_2-microglobulin modified by advanced glycation end products (human), **201**, 1235
Amyotrophic lateral sclerosis
  Japanese familial, associated Cu/Zn superoxide dismutase gene mutation, identification, **200**, 695
Anadara MS
  purification and partial characterization (*Anadara granosa*), **203**, 36
Anaerocellum thermophilum
  carbohydrate-degrading enzymes, genes coding for, cloning and expression in *Escherichia coli*, **202**, 1076
Ancrod, *see* Venombin A
Androgen-induced growth factor
  FGF-8, gene, role in embryogenesis and morphogenesis (mouse), **204**, 882
Androgen receptors
  gene, microsatellite $CAG_{24\rightarrow18}$ mutations, detection in prostate cancer (human), **198**, 74
  increase in osteoblast-like osteosarcoma cells, stimulation by androgens (human), **204**, 905
Androgen response elements
  identification in prostate-specific acid phosphatase genes (human, rat), **202**, 49

Angiogenesis
  role of endothelial cell produced parathyroid hormone-related protein (human), **198**, 740
  in vitro, elevated basic fibroblast growth factor levels during early hours, detection with ELISA (bovine), **205**, 1423
Angiogenin
  nucleolar targeting signal, identification (human), **203**, 1765
Angiotensin
  –renin system, role in regulation of vascular natriuretic peptide receptor in hypertensive rat, **205**, 1595
Angiotensin-converting enzyme, *see* Peptidyl-dipeptidase A
Angiotensin II
  endogenous, effects on endothelin-1 secretion following nephrectomy (rat mesenteric artery), **202**, 246
  induced expression of transcription factors, stimulation of TGF β_1 mRNA increase in cardiac fibroblasts (neonatal rat), **205**, 105
  inhibition of protein tyrosine phosphatase in pheochromocytoma cells, role of angiotensin II type 2 receptor (rat), **198**, 60
  responsiveness of aldosterone in aldosterone-producing adenoma, association with RFLP at atrial natriuretic peptide gene locus (human), **204**, 1312
  stimulated adrenal zona glomerulosa cell, protein kinase C activation and inositol trisphosphate release in, role of type I angiotension II receptor internalization (rat), **204**, 1292
  stimulated spleen lymphocyte proliferation *in vitro*, mediation via AT$_1$ and AT$_2$ (mouse), **198**, 1034
Angiotensinogen
  encoding gene, exon 5, localization of cell type-dependent enhancer core element (human), **205**, 1102
Angiotensin II receptors
  AT$_1$
    contractile, in mammary resistance arteries, characterization (human), **204**, 685
    gene promoter
      cloning and characterization (human), **200**, 1264
      genomic organization and functional analysis (human), **204**, 1039
    internalization, role in protein kinase C activation and inositol trisphosphate release in angiotensin II-stimulated adrenal zona glomerulosa cell (rat), **204**, 1292
  AT$_{1a}$
    cDNA encoding, as model for structure-function relationship analysis (rat), **199**, 1347
    gene promoter, induction by glucocorticoid (rat), **204**, 210
  AT$_{1a}$ and AT$_{1b}$, signal transduction mechanisms in transfected CHO cells (human), **199**, 475
  AT$_{1b}$, cDNA cloning and expression (human), **199**, 467
  AT$_1$ and AT$_2$
    cardiac, expression during aortacaval fistulae, characterization relative to β-adrenergic receptor antagonism and blockade of AII (rat), **203**, 1865
    mediation of angiotensin II-stimulated spleen lymphocyte proliferation *in vitro* (mouse), **198**, 1034
  AT$_2$
    cDNA cloning (human), **205**, 645
    gene cloning, mapping to X chromosome, and mRNA expression in lung (human), **203**, 1842
    gene cloning and expression (human), **200**, 1449
    role in angiotensin II inhibition of protein tyrosine phosphatase in pheochromocytoma cells (rat), **198**, 60
  subtype coupled to cell proliferation resistant to Losartan and PD 123319, expression by cardiac fibroblasts (human), **204**, 1334
Ankyrin
  erythrocyte, generation of p57 membrane proteinase cleaving C3 (human), **204**, 453
Annetocin
  isolation and identification as oxytocin-vasopressin superfamily member (*Eisenia foetida*), **198**, 393
Annexins
  type I
    calcium and phosphotidylserine binding properties, structural determinants, **200**, 867
    as potential inhibitor of insulin receptor protein tyrosine kinase (human placenta), **203**, 813
  type II, endothelial cell-surface form, binding to human cytomegalovirus (human), **198**, 983
  type V
    calcium and phosphotidylserine binding properties, structural determinants, **200**, 867
    recombinant, secretion by insect cells in baculovirus expression system (rat), **200**, 1421
    role in lupus anticoagulant autoantibody induction of apoptosis in umbilical vein endothelial cells (human), **205**, 1488
  type XI, development-related and cell-type specific nuclear localization (rat), **202**, 403
Anorexia
  endotoxin-induced, effects of linoleic acid *in vivo* (mouse), **198**, 1107
Anoxia
  perfused whole heart, X-ray diffraction studies (rat), **202**, 1244
ANQ-11125
  blockage of motilide-induced smooth muscle contractions

  - (rabbit), **198**, 411

Ansamycins
- benzoquinoid, binding to p100, correlation with depletion of *erb*B2 gene product p185 (human breast cancer cells), **201**, 1313

Anterior pituitary cells
- hormone secretion *in vitro*, effects of CINC/gro (rat), **202**, 155

Anthracene
- in photodegradation of lindane and DDT, role of reactive oxygen species, **199**, 1284

Antiarrhythmic agents
- NE-10044 and NE-10133, inhibition of potassium channels I_{sK} and I_{Ks} (*Xenopus* oocytes, guinea pig cardiac myocytes), **202**, 265

Antibodies
- –antigen specificity exchanger, for re-direction of antibodies of other specificities to recognize V3 domain of HIV-1 gp120, **205**, 1386
- antipeptide, interaction with antigen, effect of peptide acetylation, **205**, 1688
- autogeneic, *see* Autoantibodies
- to *Bacillus thuringiensis* δ-endotoxin, production by injection of bacterial plasmid (mouse, rabbit), **202**, 1227
- Ca^{2+}/calmodulin-dependent protein kinases I and V, role in identification as isoform family (rat), **201**, 1561
- elicited by primary response, evaluation as immunoaffinity chromatography ligands (bovine, mouse), **201**, 1008
- to GAP-43, intracellular delivery effects on neuroblastoma growth cone morphology (NB2a/d1 cells), **203**, 459
- to lipids, and alternative pathway activation: evidence from complement activation by liposomes and liposome-encapsulated hemoglobin (rat), **205**, 255
- monoclonal, *see* Monoclonal antibodies
- myotonin-protein kinase, in analysis of MT-PK levels in brain and muscle tissues in myotonic dystrophy (human), **202**, 577
- to nectadrin, LFA-1-sensitive effects on B lymphoblast aggregation and signal transduction (mouse), **198**, 1209
- polyclonal
  - in detection of retinoid X receptors (mouse), **204**, 525
  - recombinant subunit D-directed, in overexpression of yeast ATP synthase in *Escherichia coli*, **200**, 877
- single-chain, intracellular expression, in autocrine inhibition of EGF receptor (NIH 3T3 cells), **204**, 666
- to sperm protein P26h, induction of polyspermy in sea urchin eggs (hamster), **202**, 181
- subtype-specific, in analysis of *in vitro* translation of D_2 dopamine receptors and chimeras, **205**, 1460

Anticoagulants
- lupus, IgG and IgM, heterogeneity and diversity in patient with systemic lupus erythematosus, **203**, 1789

Antifreeze
- cysteine-rich protein, production in Sf21 cells as active proprotein precursor (sea raven), **203**, 1851

Antigenic determinants, *see* Autoepitopes; Epitopes

Antigens, *see also* Superantigens
- –antibody specificity exchanger, for re-direction of antibodies of other specificities to recognize V3 domain of HIV-1 gp120, **205**, 1386
- bone marrow stromal cell antigen 1, BST-1, homology with CD38 and *Aplysia* ADP-ribosyl cyclase, cloning (mouse), **203**, 1309
- cancer-associated, expressed on mucin-type sugar chains, monoclonal antibodies recognizing, production (human), **203**, 1828
- carbohydrate, recognized by anti-horseradish peroxidase antiserum, expression on mammalian cells (bovine, rat), **204**, 342
- carcinoembryonic
  - expressed in various cell types, characterization: adhesion molecule and repulsion molecule functions, **204**, 1225
  - human, CHO cells expressing, metastatic potential in nude mouse, **200**, 1748
- CD4
  - localization with tryptase TL_2 on surface of monocytoid and $CD4^+$ lymphoid cells (human), **201**, 1390
  - T cell, gp160 signals transduced through, activation of NF-κ (human), **203**, 498
- CD11/CD18, expression by myelomonocytic cells, and endothelial cell ICAM-1 expression and binding, genistein effects (human), **203**, 443
- CD14, role in lipopolysaccharide priming of basophil mediator release (human), **203**, 1295
- CD28, crosslinking in leukemic Jurkat cells, effect on protein tyrosine kinase $P56^{lck}$ (human), **199**, 1466
- CD38
  - homologous murine bone marrow stromal cell antigen 1, molecular cloning, **203**, 1309
  - identification as ecto-enzyme of NAD glycohydrolase: hyaluronate-binding activity (HL-60 cells), **203**, 1318
  - induction in HL-60 cells by retinoic acid, GDP-ribosyl cyclase activity as measure (human), **205**, 722
- CD40, and Fas, chimeric receptor constructed from, induction of apoptosis in murine L929 cells (human), **204**, 1102
- CD44, mRNA expression in colorectal adenocarcinomas (human), **200**, 1015

- CD45
    - association with protein tyrosine kinase $p56^{lck}$, role of CD4, CD8, and T cell receptor stimulation (human), **198**, 88
    - glycosylation pattern alterations with different cell proliferation states (human lymphocytes), **200**, 1283
- differentiation, 3G11, expressed by murine helper T lymphocytes, identification as ganglioside $IV^3(NeuAc)_2$–$GgOse_4Cer$, **200**, 1557
- Fas
    - apoptosis-associated, identification in ovary (mouse), **203**, 1438
    - and CD40, chimeric receptor constructed from, induction of apoptosis in murine L929 cells (human), **204**, 1102
    - role in apoptosis induced by hepatitis C virus infection (human hepatocytes), **204**, 468
    - variant mRNA species encoding truncated form in liver, identification (rat), **198**, 666
- 512, complement regulatory protein, molecular cloning (rat), **198**, 819
- Golgi, 372-kDa, recognized by autoantibodies from chronic rheumatoid arthritis patient, molecular cloning and sequence analysis (human), **205**, 1399
- HBs, binding protein, functional active recombinant, cloning and production (human), **205**, 52
- hCDC10, homologous to CDC10 in *Saccharomyces cerevisiae*, molecular cloning (human), **202**, 82
- hen egg-white lysozyme, binding of single-chain HyHEL10 Fv fragment expressed in *Escherichia coli*, thermodynamic analysis, **201**, 546
- large T, simian virus 40, binding region of human p53, identification of cellular proteins binding to, **202**, 490
- MHC class II
    - *DRA*, cDNA cloning and molecular evolution (bovine), **204**, 195
    - multiple binding sites on staphylococcal enterotoxin B, identification, **201**, 596
    - NIV-1 Nef peptide binding to, identification, **200**, 1059
    - SDS-resistant, induction in B cells by O-chain of *Brucella abortus* lipopolysaccharide (mouse), **203**, 1230
    - signaling via, selective induction of interleukin-1β over IL-1 receptor antagonist gene expression (human monocytic cells), **201**, 855
- nuclear, with DEAD-box RNA helicase motif, cDNA cloning and sequencing (human), **199**, 748
- proliferating cell nuclear, *see* Proliferating cell nuclear antigen
- prostate-specific, *see* Prostate-specific antigen
- related region in midkine molecule, localization, **203**, 1131
- sperm peptide, recognized by monoclonal antisperm autoantibody 4A11 from vasectomized mouse, identification and characterization, **205**, 1503
- tumor-associated, MZ2-E, related MAGE-1 genes expressed in DM150 melanoma cells, cloning and analysis (human), **202**, 549

Anti-immunoglobulins
- apoptotic response of WEHI 231 cells to, mediation by ceramide (mouse), **202**, 710

Antioxidants, *see also specific antioxidants*
- activity *in vitro*, determination by luminescence method (human), **202**, 940
- associated activity of calcium antagonists *in vitro* against low-density lipoprotein oxidation, comparison with α-tocopherol (human), **203**, 1803
- glutathione-derived, glutathione peroxidase and glutathione reductase activities toward, **203**, 1668

Antiporters
- Na/Mg, in ascites cells, stimulation by cAMP, effect on magnesium efflux (mouse), **202**, 1209
- tetracycline/H^+, truncated at last transmembrane helix, rapid degradation in *Escherichia coli*, and protective effects of overproduced GroEL/ES, **202**, 258

Antiserum
- anti-horseradish peroxidase, carbohydrate antigens recognized by, expression on mammalian cells (bovine, rat), **204**, 342
- from rabbits immunized with synthetic peptides, reactivity of recombinant human single chain T-cell receptor, **201**, 1502

Antithrombin III
- –thrombin complex, *see* Thrombin–antithrombin III complex

α_1-Antitrypsin
- expression in mouse after *in vivo* gene transfer to hepatocytes by small liposomes (human), **204**, 1023
- proteolytic inactivation by matrilysin: comparison with other matrix metalloproteinases (human), **204**, 613

Antizyme
- effects on polyamine transport and spermine restoration of growth in polyamine-deficient murine FM3A cells, **203**, 608
- ornithine decarboxylase-inhibiting, functional regions, characterization (rat), **200**, 1721

Aorta
- endotoxin-induced hyporeactivity to vasoconstrictor agents, role of activation of soluble guanylyl cyclase (rat), **201**, 436
- increased expression of endothelial constitutive nitric oxide synthase during pregnancy (rat), **205**, 905

  25-kDa actin-binding protein, with homology to chicken SM22 protein, purification, characterization, and partial sequence analysis (bovine), **198**, 1275
  36-kDa microfibril-associated glycoprotein, isolation and characterization by isoquinolinesulfonamide affinity chromatography (bovine), **198**, 1262
  wall, contraction, non-actomyosin component, activation by phorbol ester (guinea pig), **199**, 944

Apigenin
  induction of morphological differentiation and G2-M arrest in neuronal cells (rat), **204**, 578

Apohemoglobin
  dimer dissociation, kinetics (human), **199**, 1278

Apolipoprotein A-I
  gene expression, regulation by vitamin A (rat), **205**, 1510
  induced mobilization of cellular cholesterol, impairment in dermal fibroblasts from Tangier disease subjects, **205**, 850

Apolipoprotein A-II
  transcriptional down-regulation by first intron of gene (human), **202**, 822

Apolipoprotein A-IV
  expression in hepatocellular carcinoma cells, modulation by fenofibric acid (human), **198**, 764

Apolipoprotein B
  hepatic secretion, insulin inhibitory effect, resistance of hepatocytes from obese Zucker rats, **205**, 417
  positively charged amino acid residues, role in low-density lipoprotein recognition by signaling-coupled/growth receptors in vascular smooth muscle cells (human), **203**, 1700

Apolipoprotein C-III
  gene expression, regulation by vitamin A (rat), **205**, 1510

Apolipoprotein E
  and apoJ, complexed to Alzheimer's amyloid β, circulating, cerebral uptake (guinea pig), **205**, 1431
  and cholesterol, effects on intracellular Ca^{2+} in mouse brain neurons and human lymphocytes: significance in β-amyloid neurotoxicity, **200**, 1185
  deficiency, plasma and lipoprotein lipid peroxidation in, effects of oxidative stress (mouse), **201**, 1567
  intestinal overexpression, effect on chylomicron remnant metabolism (mouse), **200**, 716

Apolipoprotein F
  purification and molecular cloning (human), **203**, 1146

Apolipoprotein J
  and apoE, complexed to Alzheimer's amyloid β, circulating, cerebral uptake (guinea pig), **205**, 1431
  HDL apoE, role in cellular cholesterol efflux in apoE-deficient mouse, **205**, 1072
  synthesis in fetal intestine, regulation by epidermal growth factor (human), **204**, 1340

Apoprotein
  apo(a), and plasminogen, genes, intergenic region separating, presence of liver-specific DNase-hypersensitive sites (human), **205**, 930
  –heme interactions, effects on horseradish and wheat germ peroxidases, **204**, 1

Apoptosis, *see also* Cell death
  adipocytes
    occurrence in malignancy (human), **205**, 625
    in vitro (human), **201**, 500
  associated Fas antigen, identification in ovary (mouse), **203**, 1438
  in brain and gut tissues after cycad toxicity (mouse), **205**, 327
  cerebellar neurons in primary culture, induction by methyl mercury (rat), **204**, 310
  cytotoxic effector cell-associated, protection by 3-aminobenzamide and other poly(ADP-ribose)polymerase inhibitors (human), **199**, 525
  differentiating neuroblastoma cells, induction by colchicine (human), **199**, 807
  fibroblasts, associated early calcium waving, effect of bcl-2 gene overexpression (mouse), **204**, 84
  hepatocytes, hepatitis C virus infection-induced, role of Fas ligand (human), **204**, 468
  HL-60 cells, induction by inhibition of isoprenoid biosynthesis (human), **199**, 1209
  HL-60RG cells, induction by by gallic acid (human), **204**, 898
  L929 cells, induction by human CD40/Fas chimeric receptor (mouse), **204**, 1102
  lung cancer cells *in vitro*, induction by substance P (human), **199**, 1313
  lymphoid cells, butyrate-induced, transient hsp70 mRNA overexpression preceding (human), **198**, 257
  malignant glioma cells, induction by lovastatin (human), **205**, 1681
  mastocytoma cells, mediation by nitric oxide (mouse), **204**, 244
  myeloid leukemic cells, selective induction by monoacetone glucose-3 butyrate (human), **201**, 266
  PC12 cells, induction by bovine brain sialoglycopeptide (rat), **203**, 1554
  quiescent peripheral blood mononuclear cells, induction by D-(–)-ribose and deoxy-D-ribose (human), **201**, 1109
  testis cells, induction by testosterone withdrawal during spermatogenesis *in vivo* (rat), **202**, 1315

- thymocytes
  - associated changes in nuclear DNase forms α, β, and γ (rat), **203**, 789
  - dexamethasone-induced, inhibition by herbimycin A (rat), **202**, 128
  - formation of high-molecular-weight DNA fragments during, role of Ca^{2+} (human), **202**, 120
  - modulation by cholinergic stimulation via nicotinic effect on thymic epithelium (mouse), **203**, 1057
  - role of cyclin-dependent protein kinase Cdc2 (rat), **202**, 1400
- umbilical vein endothelial cells, induction by lupus anticoagulant autoantibody, role of annexin V (human), **205**, 1488
- WEHI 231 cells in response to anti-immunoglobulin, corticosteroids, and irradiation, mediation by ceramide (mouse), **202**, 710

Aptamers
- defibrotide, acting as thrombin antagonists *in vitro*, isolation and identification (human), **200**, 933

Arachidonic acid
- activation of 120-kDa protein kinase PKN with leucine zipper-like sequence (COS-7 cells), **204**, 348
- –Gβ–phospholipase A$_2$ cascades, mediation of Ca^{2+} oscillations and pancreatic amylase secretion activated by phospholipase A$_2$-activating protein (rat pancreatic acini), **203**, 1716
- metabolism
  - in HL60 and U937 cells, effects of oxidized low-density lipoproteins (human), **201**, 1014
  - by 12-lipoxygenase pathway, selective inhibition by L-arginine or sodium nitroprusside in intact platelets (human), **200**, 1630
- for prostaglandin synthesis in renal medulla, enzymatic pathway supplying, detection (rabbit), **202**, 1054
- release from
  - intact cells, role of phospholipase A$_2$ (mouse), **198**, 220
  - monocytes, role of synergism between platelet-activating factor and C-C chemokines (human monocytes), **199**, 761
  - platelets, role of thrombin-induced tyrosine phosphorylation and activation of mitogen-activated protein kinase (human), **198**, 497

Arachidonoyl CoA
- evaluation of arachidonic acid source for prostaglandin synthesis in renal medulla (rabbit), **202**, 1054

Arginase
- inhibition by nitric oxide biosynthesis intermediate N^{G}-hydroxy-L-arginine (rat liver), **202**,174
- liver and macrophage, inhibition by N^{ω}-hydroxy-L-arginine (bovine, mouse, rat), **203**, 1614
- and nitric-oxide synthase, substrate and inhibitor specificities for arginine analogues and related compounds in macrophages, comparison (mouse, rat), **198**, 206

Arginine
- analogs and related compounds in macrophages, substrate and inhibitor specificity of arginase and nitric-oxide synthase for, comparison (mouse, rat), **198**, 206
- endogenous synthesis, deficiency, effect on nitric oxide synthesis and hypertension (rat), **205**, 1391
- and leucine, responsiveness in β cell subpopulations with different sensitivity to glucose (rat), **204**, 490
- position 125, role in synthetic peptide inhibition of cytochrome b_5 binding to cytochrome P450 2B1 (rat liver microsomes), **201**, 1090

L-Arginine
- catalytic conversion to nitrate by platinum electrodes, **202**, 1347
- dependent nitric oxide pathway, and FcεRII/CD23, role in IgE-mediated activation of bone marrow eosinophils (human), **203**, 265
- dependent nitric-oxide synthase, induction in bone marrow-derived macrophages (bovine), **198**, 510
- nitric oxide synthesis from, intermediate N^{ω}-hydroxy-L-arginine, inhibition of liver and macrophage arginase (bovine, mouse, rat), **203**, 1614
- and sodium nitroprusside, effects on arachidonic acid metabolism by 12-lipoxygenase and cyclooxygenase pathways in intact platelets (human), **200**, 1630

Arginine-vasopressin
- peptide and non-peptide antagonists, inhibition of vasopressin-induced MAP kinase activation in vascular smooth muscle cells (rat), **200**, 1155

Arginine-vasopressin receptors, *see also* Vasopressin receptors
- V2, mRNA, detection in hippocampus (rat), **205**, 1702

Aromatase
- gene encoding, exon 1, specific for aromatase transcripts, analysis (human brain), **198**, 1153
- human placental, baculoviral expression, **201**, 694

Aromatic nitroreductase
- identification in cell-free extracts of *Phanerochaete chrysosporum*, **205**, 298

Arsenite
- enhancement of proteolytic activity in CHO cells, **202**, 1015

Arteries
- acute occlusion, development of collateral circulation after, effect of tecogalan sodium (rat), **202**, 1149
- carotid
  - intimal thickening after balloon catheter injury, inhibition by C-type natriuretic peptide (rabbit), **205**, 1051

in vivo accumulation of neointimal smooth muscle cells, suppression by antisense cdc2 and cdk2 oligonucleotides (rat), **198**, 16
coronary
and coronary vascular smooth muscle cells, C-type natriuretic peptide in, vascular action (pig), **205**, 765
smooth muscle tension and intracellular Ca^{2+}, effects of motilin (pig), **202**, 346
mammary, contractile endothelin receptors ET_A and ET_B and angiotensin receptor AT_1, characterization (human), **204**, 685
mesenteric, endothelin-1 release following nephrectomy, augmentation by converting enzyme inhibition (rat), **202**, 246
Arthritis
rheumatoid, *see* Rheumatoid arthritis
Arthrobacter globiformis
cloning and sequencing of gene encoding phenylethylamine oxidase in, and identification of Tyr-382 as precursor to covalently bound quinone cofactor, **199**, 1096
Aryl sulfotransferase
encoding gene, genomic organization and DNA sequence (human), **205**, 1325
STP and *STM* genes, mapping to 16p: candidate genes for Batten disease, **205**, 482
thermolabile, cDNA cloning, expression and characterization (human liver), **198**, 1119
Asbestos
carcinogenesis, implications of differential mediation of DNA damage by organic peroxides and H_2O_2 (calf thymus), **200**, 687
Ascites cells
magnesium efflux via Na/Mg antiporter, stimulation by cAMP, effect on magnesium efflux (mouse), **202**, 1209
Ascites fluid
tumor-bearing mice, soluble gp130 in, detection by ELISA (mouse), **202**, 637
L-Ascorbate oxidase
substrate specificity: similarity to dopamine β-monooxygenase reduction site, **203**, 1471
L-Ascorbic acid 2-phosphate
modulation of perisinusoidal stellate cell morphology, proliferation, and collagen synthesis (rat), **200**, 999
Asparagine
Asn^{198}, role in site-directed mutagenesis of histamine H_1 receptor, **203**, 1096
Asn^{207} residue, role in transmembrane domain 5 of histamine H_1-receptor, analysis by site-directed mutagenesis (guinea pig), **201**, 295
second base of codon Asn^{43} in *N*-linked glycosylation site of lipoprotein lipase, naturally occurring mutation: role of Asn^{43} in catalysis and secretion (human), **205**, 506
Aspartate
residues in third extracellular loop of B_2 bradykinin receptor, mutation, associated decrease in affinity for bradykinin (rat), **201**, 523
Aspartate aminotransferase
mitochondrial, N-terminal region, direction of cytosolic dihydrofolate reductase import into mitochondria *in vitro*, **201**, 1059
Aspartic acid
Asp^{107}, role in site-directed mutagenesis of histamine H_1 receptor, **203**, 1096
residue 514 in A1 domain of von Willebrand factor, requirement for interaction with human platelet glycoprotein Ib (bovine), **203**, 881
Aspergillus ficuum
acid phosphatase, AFPhoA, homology to *Penicillium chrysogenum PHOA*, **204**, 63
Aspergillus ochraceus TS
microsomal glutathione *S*-transferase isozymes, induction by 3-methylcholanthrene, **203**, 1508
Aspirin
role in inhibition of sugar-induced structural alterations in collagen (human), **199**, 683
Astrocytes
Ca^{2+} influx, stimulation by corticotropin-releasing factor *in vitro* (rat), **199**, 1103
cyclin G1 expression and cyclin G1-dependent protein kinase, inhibition by cAMP (mouse), **205**, 923
parathyroid hormone/parathyroid hormone-related peptide receptor expressed in, identification and characterization (rat), **200**, 1042
protein kinase C-dependent and pertussis toxin-sensitive G protein-mediated signaling pathways in, role in activation of mitogen-activated protein kinases through (rat), **204**, 1325
Astroglia
nitric oxide-synthase gene transcriptional induction, limitation by nitric oxide (rat), **201**, 762
Atherosclerosis
affected coronary smooth muscle cells, overexpression of parathyroid hormone-related peptides (human), **200**, 1028
ApoE-deficient mouse with, increased plasma and lipoprotein lipid peroxidation during oxidative stress (mice), **201**, 1567
pathogenesis, role of activin A expressed in arteriosclerotic lesions (rabbit), **205**, 441

- potential link with 4-hydroxy-2-nonenal: whole blood and plasma 4HNE levels in hyperlipidemic and control rabbits, **199**, 671

ATP (adenosine 5′-triphosphate)
- actin filament, in neuronal cytoskeletal fractions, phosphorylation state (rat pheochromocytoma cells), **201**, 1490
- and ADP, AMP, and NAD(P)H, status during Ca^{2+}- and inorganic phosphate-induced mitochondrial permeability transition (rat liver), **200**, 1615
- alternative binding subunit of protease Ti, *clpX* encoding, expression independent of *clpP* (*Escherichia coli*), **203**, 798
- cytoplasmic, activation of tonoplast potassium channels (*Arabidopsis thaliana*), **200**, 1143
- dependent nitric oxide production in endothelial cells, *in vitro* stimulation by laminar flow (bovine), **198**, 213
- depletion, isolated hepatocytes undergoing, evidence for sodium-dependent calcium influx (rat), **202**, 360
- extracellular
  - increase of lymphocyte permeability to NH_4^+, role of P_{2z} purinoceptor-operated ion channel (human), **202**, 1511
  - potentiation of lipopolysaccharide-induced nitric-oxide synthase production in murine RAW 264.7 macrophages, **203**, 430
  - promotion of glomerular mesangial cell growth, mediation by phospholipase C (rat), **202**, 234
  - stimulatory effect on NO release in endothelial cells, role of ecto-ATPase as ATP receptor (bovine aorta), **203**, 1237
- hydrolysis, bacteriophage T4 dda helicase-mediated, inhibition by sequence specific DNA-protein complex (*Escherichia coli*), **198**, 1070
- hydrolysis and synthesis activity of membrane-bound H^+-ATP synthase, effect of sulfite, **201**, 487
- induced vesiculation of erythrocyte ghosts, effect of incorporation of phospholipid analogs into plasma membrane (human), **199**, 881
- $P47^{phox}$, binding to, relationship to respiratory burst oxidase (human), **198**, 191
- sensitive K channels, in intestinal cholecystokinin-secreting STC-1 cells, characterization, **204**, 855

ATPase
- Ca^{2+}
  - cardiac, expression in streptozotocin-induced diabetic heart (rat), **203**, 113
  - in cardiac sarcoplasmic reticulum, phospholamban-induced inhibition, reversal by tannin (rabbit), **202**, 1668
  - inhibition by trilobolide and 2,5-di(*tert*-butyl)-1,4-benzohydroquinone, role of hydroxyl moieties (rabbit), **199**, 916
  - in rod outer segment disk membranes, characterization (bovine), **204**, 813
  - sarcoplasmic reticulum, proton ejection by, interaction with vanadate oligoanions (rabbit), **205**, 161
  - sarcoplasmic reticulum isoforms, expression in skeletal muscle fibers, differential effects of thyroid hormone (rat), **203**, 1035
  - transmembrane domains, erythrocytic, identification by photoactivatable phospholipidic probe (human), **201**, 194
- CopA and CopB, induction by Ag^+ and Cu^{2+}, and Ag^+ extrusion by CopB (*Enterococcus hirae*), **202**, 44
- ecto-, as ATP receptor, role in extracellular ATP stimulatory effect on NO release in endothelial cells (bovine aorta), **203**, 1237
- $F_1\gamma$ subunits, tissue-specific, kinetics (bovine), **200**, 671
- F-type and P-types, in cyanobacterium plasma membrane, immunological and functional localization, **200**, 884
- Na^+,K^+-
  - α_2 isoform, downregulation at blood-brain barrier and brain by nicotine (rat), **199**, 1422
  - role in $[Na^+]_i$ regulation during metabolic inhibition (guinea pig myocytes), **203**, 93
- P-type
  - bacterial, with histidine-rich heavy-metal-associated sequences, isolation from human small intestine library, **205**, 1644
  - increased activity in *Leishmania tropica* resistant to methotrexate, **199**, 855
- SecA, role of carboxy-terminal region: promotion of protein translocation activity *in vivo* (*Escherichia coli*), **200**, 1477
- subunit D, overexpression in *Escherichia coli*: use of recombinant subunit D-directed polyclonal antibodies (yeast), **200**, 877
- vacuolar-type H^+-translocating, inhibition by destruxin B (*Saccharomyces cerevisiae*), **205**, 1358

ATP receptors
- ecto-ATPase as, role in extracellular ATP stimulatory effect on NO release in endothelial cells (bovine aorta), **203**, 1237

ATP synthase
- dicyclohexylcarbodiimide sites, TFPACD as bifunctional reagent for reaction with, synthesis (*Escherichia coli*), **201**, 635
- F_0, purified from mitochondria and reconstituted in planar lipid bilayers, potassium-selective and venturicidin-sensitive conductances (bovine heart), **203**, 1005
- H^+-transporting, membrane-bound, ATP hydrolysis and synthesis activity, effect of sulfite, **201**, 487
- mitochondrial, subunit 8, *Saccharomyces cerevisiae* defec-

tive in, rescue by heterologous gene from *Aspergillus nidulans*, **203**, 1567
Atrial natriuretic peptide
  gene expression in gastrointestinal tract (rat), **202**, 562
  interaction with A7r5 cells (rat), **204**, 1286
  RFLP at gene locus, association with aldosterone responsiveness to angiotensin in aldosterone-producing adenoma (human), **204**, 1312
Atrial natriuretic peptide receptors
  expression in uterine tissue during pregnancy (human), **203**, 602
Autoantibodies
  from chronic rheumatoid arthritis patient, Golgi antigen recognized by, molecular cloning and sequence analysis (human), **205**, 1399
  lupus anticoagulant, induction of apoptosis in umbilical vein endothelial cells, role of annexin V (human), **205**, 1488
  monoclonal, 4A11, from vasectomized mouse, sperm peptide antigen recognized by, identification and characterization, **205**, 1503
  in serum from patients with classical autoimmune diseases, reactivity of recombinant human single chain T-cell receptor, **201**, 1502
  thyrotropin receptors, and thyroiditis, induction in mice immunized with recombinant TSH-R, **199**, 1027
Autoantigens
  hippocampal, associated with paraneoplastic neurologic syndrome and small cell lung carcinoma, isolation (human), **199**, 1200
  LIM protein, containing autoepitope homologous to senescent cell antigen, detection in fetal liver expression library (human), **201**, 1124
Autoepitopes
  homologous to senescent cell antigen, detection on LIM protein (human fetal liver), **201**, 1124
Autographa californica nuclear polyhedrosis virus
  expressed recombinant rat annexin 5, secretion by insect cells, **200**, 1421
Autoimmune diseases
  sera from patients, reactivity of recombinant human single chain T-cell receptor, **201**, 1502
Autoimmunity
  related triggering, prevention by free radical bombing of spermatozoa in spermatic granuloma (rat), **201**, 472
Autophosphorylation
  insulin receptor
    β subunit domain, role of insulin receptor COOH-terminal (human), **200**, 777
    at juxtamembrane domain, stimulation by dithithreidtol (human), **201**, 1439
Autophotography
  and spectrometric methods, for determination of DNA concentrations, comparison, **203**, 834
3′Azido-3′deoxythymidine, *see* Zidovudine
1-[6-(4-Azido-2,3,5,6-tetrafluorobenzamido) hexyl]-3-cyclohexylcarbodiimide
  synthesis as bifunctional reagent for reacting with dicyclohexylcarbodiimide sites in proteins: studies with *Escherichia coli* ATP synthase, **201**, 635
Azotobacter vinelandii
  Vitreoscilla globin gene promoter in, regulatory characteristics in response to oxygen availability, **202**, 535
AZT, *see* Zidovudine

B

Bacillus megaterium
  cytochrome P450$_{BM-3}$, heme domain, in flavin-supported fatty acid oxidation, **203**, 1745
Bacillus subtilis
  and *B. thuringiensis* and *Escherichia coli*, chimeric CryIA family ICPs expressed in, intracellular proteolysis, **201**, 788
  SRP54 homolog Ffh, GTPase activity and formation of ribonucleoprotein complex with small cytoplasmic RNA *in vivo*, **199**, 1394
Bacillus thuringiensis
  and *B. subtilis* and *Escherichia coli*, chimeric CryIA family ICPs expressed in, intracellular proteolysis, **201**, 788
  δ-endotoxin
    antibodies against, production by injection of bacterial plasmid into mouse and rabbit, **202**, 1227
    Choristoneura fumiferana brush border membrane molecules binding, detection by crossed affinity immunoelectrophoresis, **199**, 1194
  resistance in insects, role of altered protoxin activation by midgut enzymes, **198**, 940
Bacteria, *see also specific bacteria*
  functional expression of *Chlorella* virus adenine methyltransferase gene promoter, **204**, 187
  and other life forms, evolutionary relationships of lactate dehydrogenases, **205**, 558
Bacteriophages
  borne endoglycanase, specificity for native capsular polysaccharide and derived polymers (*Klebsiella pneumoniae* SK1), **198**, 1128
  display library, in selection of peptides with affinity for single-stranded DNA, **204**, 849

  - filamentous, surface, expression of human prostate-specific antigen, **200**, 1346
  - P1, replication, role of glutathione *S*-transferase–SspA fusion binding to RNA polymerase and complementing Δ*sspA* mutation, **201**, 123
  - T4
    - dda helicase, DNA unwinding and ATP hydrolysis activities, inhibition by sequence specific DNA-protein complex (*Escherichia coli*), **198**, 1070
    - dda protein, efficient unwinding of triplex DNA, **204**, 1119

- *Bacteroides fragilis*
  - strain YCH46, neuraminidase-encoding gene *nanH*, sequence, **203**, 914
- Baculoviruses
  - mediated high-level expression of human placental aromatase/CYP19A1, **201**, 694
  - –*Spodoptera frugiperda* cell system, expression of
    - *Drosophila melanogaster* acetylcholinesterases, and enzyme biochemical characterization, **203**, 734
    - human tissue inhibitor of metalloproteinases-1, **203**, 237
    - murine DNA (cytosine-5-)-methyltransferase, **204**, 1003
    - Ras-related RAP2A protein, **198**, 973
    - recombinant murine perforin, **201**, 318
    - recombinant rat annexin 5, **200**, 1421
- Basement membrane
  - binding affinity of osteogenic protein-1 (human), **198**, 693
- Basophils
  - priming by lipopolysaccharide for enhanced mediator release: role of plasma cofactor and CD14 (human), **203**, 1295
- Bathophenanthroline disulfonate
  - iron-chelating, inhibition of DNA synthesis in CCl 39 cells, **203**, 16
- Batten disease
  - phenol sulfotransferase *STP* and *STM* as candidate genes, **205**, 482
- BB87
  - low-molecular-weight synthetic inhibitor, and TIMP and TIMP-2, prevention of collagen breakdown in nasal cartilage (bovine), **201**, 94
- B cells
  - Epstein–Barr virus-transformed, hsp70RY expression (human), **203**, 577
  - platelet-activating factor receptor mRNA, detection by reverse transcript-PCR (human), **202**, 1373; *erratum*, **204**, 436
  - SDS-resistant MHC class II molecules, induction by O-chain of *Brucella abortus* lipopolysaccharide (mouse), **203**, 1230
  - secretion of immunoreactive corticotropin releasing factor and adrenocorticotropic hormone in response to cellular stress factors (human), **204**, 828
  - tumor necrosis factor-α induction, inhibition by cyclosporin A (human), **204**, 383
  - vasoactive intestinal peptide receptor gene expression (rat), **203**, 1599
- Benzo[*a*]pyrene
  - and proximate carcinogen isomers, catalytic activity of human cytochrome P450 isozymes (COS-7 cells), **192**, 1373; *erratum*, **203**, 1935
- Benzo[*a*]pyrene hydroxylase
  - activation by CYP1A1, inhibition by dietary ellagic acid without alteration of CYP1A1 protein and mRNA levels, **201**, 1477
- Benzophenone
  - in photodegradation of lindane and DDT, role of reactive oxygen species, **199**, 1284
- β cells
  - calcium and potassium channel currents, effects of H_2O_2 and 2,2′-dithio-bis(5 nitropyridine) (mouse), **200**, 860
  - electrical activity, effects of osmotic changes in extracellular solution (mouse), **204**, 641
  - inherent metabolic oscillations in, evidence from variations in ATP-sensitive K^+ channel activity (human, mouse), **205**, 880
  - prion-related protein gene expression, tight hormone control (rat), **201**, 1220
  - subpopulations with different sensitivity to glucose, responsiveness to arginine and leucine (rat), **204**, 490
- Beta-2-glycoprotein I
  - characterization, expression, and evolution (mouse), **200**, 1521
- BFGF, *see* Fibroblast growth factor, basic
- Bicarbonate
  - effect on Mg^{2+}-induced lipid phase transition in thylakoid membranes (spinach), **202**, 1724
- Bifunctional reagents
  - TFPACD, for reaction with protein dicyclohexylcarbodiimide sites, synthesis: studies with *Escherichia coli* ATP synthase, **201**, 635
- Bile acids
  - effects on cholesterol 7α-hydroxylase mRNA and *CYP7* gene expression in HepG2 cells (human), **198**, 546
- Bilirubin binding protein
  - –tetrabromosulfophthalein, and bilitranslocase, role in glutathione uptake in basolateral liver plasma vesicles (rat), **200**, 1079

Bilitranslocase
  and BSP/bilirubin binding protein, role in glutathione uptake in basolateral liver plasma vesicles (rat), **200**, 1079
Bilotranslocase
  and BSP/bilirubin binding protein, role in glutathione uptake in basolateral liver plasma membrane vesicles (rat), **200**, 1079
Binding assays
  A_3 adenosine receptor by selective agonist affinity label, analysis in CHO cells and RBL-2H3 mast cells and rat brain, **203**, 570
  cellular proteins interacting with p53 central conserved region (human), **202**, 490
  gastrin/cholecystokinin receptors, role of seventh transmembrane domain to non-peptide antagonist binding (rat), **201**, 1382
  ipriflavone and metabolites, with preosteoclastic cell line (human), **201**, 1084
  neurotensin receptor protein and mRNA expression in colon cancer cell lines and normal colonic epithelium (human), **203**, 465
  phosphatidylinositol 3-kinase p85 SH2 domain, effects of cyclic peptide inhibitors, **201**, 1148
Bioassay
  with L-cysteine, in discrimination between nitric oxide and nitroxyl, **201**, 54
Bioluminescence
  effects of 60 Hz magnetic fields (*Vibrio fischeri*), **198**, 40
6-Biopterin
  cytotoxicity in melanocytes (human), **204**, 43
Biosynthesis
  isoprenoid compounds in cattle filarial parasite *Setaria digitata,* **205**, 24
Biphenyl dioxygenase
  ISP α subunit, substitution, modification of enzyme activity (*Pseudomonas pseudoalcaligenes*), **204**, 912
Biphenyls
  and polychlorinated biphenyls, *bphA* and *bphB* genes degrading, identification in *Pseudomonas* sp. KKS102, **202**, 850
Bis(3,5-dibromosalicyl) sebacate
  modification of hemoglobin (human), **203**, 1463
1,2-Bis(dinonoyl)-*sn*-glycero-3-phosphocholine
  and 1,2-bis(tricosa-10,12-diynoyl)-*sn*-glycero-3-phosphocholine, mixtures, network gel formation and properties, **203**, 296
Bis(1-hydroxyheptyl)peroxide
  hydrolysis product 1-hydroxy-1-hydroperoxyheptane, in analysis of ozonation product effects on phospholipase A_2, **203**, 80
1,2-Bis(tricosa-10,12-diynoyl)-*sn*-glycero-3-phosphocholine
  network gel with 1,2-bis(dinonoyl)-*sn*-glycero-3-phosphocholine spacer lipids, formation and properties, **203**, 296
Bitistatin
  crosslinking site on isolated platelet integrin GPIIb/IIIa, characterization (human), **202**, 135
Blastocidin S
  resistance gene, restriction enzyme-mediated integration, in isolation of cytokinesis mutants (*Dictyostelium discoideum*), **205**, 1808
Blastocysts
  –uterine interactions during implantation, mediation by reactive thiols (mouse), **198**, 150
Bleomycin
  binding to NADPH–cytochrome P450 reductase, in creation of semi-artificial hydroxylating enzymes, **200**, 722
Blood
  –brain barrier, and brain, Na,K-ATPase α_2 isoform at, downregulation by nicotine (rat), **199**, 1422
  RH type, gene transcripts, expression in leukocytes (human), **202**, 1497
  whole, and plasma, concentrations of 4-hydroxy-2-nonenal in New Zealand White and hyperlipidemic rabbits, **199**, 671
Blood groups
  RhPI-α and RhPI-β, mRNA isoforms expressed in immature erythroblasts, identification (human), **198**, 1135
Blood pressure
  regulation associated S_A gene, assignment to chromosome 16p13.11 and expression in kidney (human), **199**, 862
  role in regulation of vascular natriuretic peptide receptor in hypertensive rat, **205**, 1595
Blood substitute
  potential, HbXL99α, stability under high pressure, **200**, 1635; *erratum,* **202**, 645
Blood vessels
  effect of ET_{B1} and ET_{B2} receptor antagonist BQ-788 (rabbit, rat), **205**, 168
Bone
  ectopic formation, bone morphogenetic protein-induced
    associated expression of bone morphogenetic protein type IA receptor (rat), **204**, 203
    relationship to homeobox-containing gene expression (rat), **201**, 980
  osteoclastic resorption
    effects of extracellular calcium (bovine, rat), **202**, 456
    inhibition by ipriflavone, mechanism (rat), **199**, 930

- role of c-src (mouse), **199**, 1237
- Bone cells, *see also* Osteoclasts
  - binding sites for osteogenic protein-1 in cultured cells (human), **201**, 1140; *erratum*, **202**, 1196
- Bone marrow
  - derived macrophages
    - induction of L-arginine-dependent nitric-oxide synthase activity (bovine), **198**, 510
    - priming by noncytopathic bovine viral diarrhea virus strains, effect on nitric oxide generation (bovine), **202**, 1562
- Bone morphogenetic protein receptors
  - osteogenic protein-1 binding sites in cultured bone cells (human), **201**, 1140; *erratum*, **202**, 1196
  - type IA, molecular cloning and expression during BMP-induced ectopic bone formation (rat), **204**, 203
- Bone morphogenetic proteins
  - BMP-2, in early embryos, biological activity (*Xenopus laevis*), **198**, 1267
  - BMP-2 and BMP-4, serine/threonine kinase receptors binding to, molecular cloning and characterization, **205**, 1944
  - BMP-7, localization during embryonic development and basement membrane binding affinity (human), **198**, 693
- *Botryllus schlosseri*
  - microsatellites, cloning and direct PCR-typing, **203**, 646
- *Botryococcus braunii*
  - derived cell-free system, farnesol phosphorylation, **200**, 1036
- Botulinum neurotoxin
  - light chain, formation of channels in lipid membrane, **205**, 751
- Bovine leukemia virus
  - integrase, in gene transfer into murine L929 cells, **203**, 1756
  - promoter, activation by downstream regulatory element, **202**, 1553
- Bovine viral diarrhea virus
  - noncytopathic strains, priming of bovine bone marrow-derived macrophages, effect on nitric oxide generation, **202**, 1562
- BQ-123
  - antagonism of endothelin receptor-mediated calcium transport (human), **200**, 679
- BQ-788
  - ET_{B1} and ET_{B2} receptor antagonist, effects on blood vessels and small intestine (guinea pig, rabbit, rat), **205**, 168
- Bradykinin
  - urinary, derivation from plasma low-molecular-weight kininogen in kininogen-deficient rat, **204**, 1219
- Bradykinin receptors
  - B_2, affinity for bradykinin, reduction by mutation of aspartate residues in third extracellular loop (rat), **201**, 523
- Brain
  - A_3 adenosine receptor binding by selective agonist affinity label (rat), **203**, 570
  - amygdala and hypothalamus, aromatase transcripts, aromatase gene exon 1 specific for, analysis (human), **198**, 1153
  - amyloid deposits in Alzheimer's disease
    - amyloid β protein long-tail form Aβ1-42/43 as seed molecule, biochemical evidence (human), **205**, 834
    - serum amyloid P component concentration in cerebrospinal fluid as marker (human), **201**, 722
  - blood–brain barrier, Na,K-ATPase α_2 isoform at, downregulation by nicotine (rat), **199**, 1422
  - cDNA library, mIA-2 isolation, bacterial expression, and relationship to protein tyrosine phosphatases (mouse), **204**, 930
  - clusterin, purification and characterization (human), **204**, 1131
  - copper content and Cu binding to superoxide dismutase, differential decrease in copper-deficient rat, **203**, 1028
  - cytochrome P4502E1, induction during chronic ethanol administration and withdrawal: evidence for short half-life of CYP2E1 (rat), **205**, 1064
  - detection of cGMP-stimulated phosphodiesterase (rat), **205**, 1850
  - distribution of
    - μ, δ, and κ opioid receptor mRNAs (rat), **205**, 1438
    - histamine H1 receptor mRNA (human), **201**, 894
    - inositol-1,4,5-trisphosphate, somatostatin-14 effects (rat), **203**, 379
    - thyrotropin-releasing hormone-potentiating peptide Ps4 and receptors (rat), **200**, 958
  - enzymatic catalysis of reversal of C-terminal methyl esterification of protein phosphatase 2A (bovine), **203**, 1710
  - expression of
    - fructose 6-phosphate 2-kinase:fructose 2,6-bisphosphatase (rat), **198**, 335
    - G_{M2} activator protein (mouse), **204**, 741
    - kexin-like protease PC7 and isoforms (rat), **202**, 1452
  - and gut tissues, apoptosis after cycad toxicity (mouse), **205**, 327
  - ischemia-induced learning disability and neuronal loss, protection by prosaposin (gerbil), **204**, 994
  - 74-kDa soluble neurite outgrowth molecule detection and characterization (bovine), **199**, 1167
  - metalloproteinase, with ability to cleave substrates derived from N-terminus of β-amyloid protein, purification and characterization (human), **201**, 45
  - microsomal membrane-associated endopeptidase character-

  istic of thimet oligopeptidase, assay and partial purification (swine), **198**, 787
  microsome lumen, identification of Ca^{2+}-binding protein calstorin (rat), **203**, 828
  microvessels, elevation of nitric oxide synthase activity in Alzheimer's disease (human), **205**, 659
  myotonin-protein kinase levels in myotonic dystrophy (human), **202**, 577
  neonatal, neuronatin cloning and expression (rat), **201**, 1227
  neural stem cells, proliferation, enhancement by Alzheimer amyloid protein precursor (rat fetus), **205**, 936
  reserpinized rat, hippocampus and striatum, β/A4 amyloid precursor protein processing (rat), **202**, 293
  S1 elongation factor-1α cDNAs, cloning: evolutionary pathway (human, mouse), **203**, 1371
  senescent, detection of multiple deletions in mitochondrial DNA (mouse), **202**, 654
  sodium channel subtypes, conductance and channel gating, modification by veratridine (rat), **199**, 1305
  synaptic vesicle, localization of Rabphilin-3A, **202**, 1235
  uptake of circulating apolipoproteins J and E complexed to Alzheimer's amyloid β (guinea pig), **205**, 1431
  vascular perfused, transcapillary transport of reduced glutathione (guinea pig), **201**, 402
Brain-derived neurotrophic factor
  expression in osteoblastic cell line (mouse), **198**, 891
Brain natriuretic peptide
  gene activation in stem cell cultures induced for cardiac myogenesis (mouse), **199**, 954
Breath
  exhaled, nitric oxide in, direct GC–MS confirmation (human), **201**, 883
Bromodeoxyuridine
  sensitized B16 cells, UV radiation-induced DNA fragmentation and cell death: impaired c-*jun* induction and defective tyrosine phosphorylation signaling, **203**, 1629
Bromosulfophtalein, *see* Sulfobromophthalein sodium
Bronchodilation
  effect *in vitro* of hypotensive peptide adrenomedullin (guinea pig), **205**, 251
Brugia malayi
  microfilaraemic patients infected with, follow-up with IgG4–ELISA, **205**, 202
BSP, *see* Tetrabromosulfophthalein
Budding site
  HIV-1 GAG protein, effects of internal and myristylated N-terminus sequences of matrix domain, **204**, 1031
Bundling
  and crosslinking, associated activity of smooth muscle filamin, and filamin–actin binding, double exponential analysis, **203**, 338
N-t-Butyl-*N*′-tetradecyl-3-tetradecylaminopropionamidine
  as cationic amphiphile for transfection of mammalian cells, description, **203**, 1622
Butyrolactone I
  inhibition of cell cycle oscillation of DNA replication (*Xenopus laevis*), **198**, 536
Butyrylcholineesterase, *see* Cholinesterase
B vitamins
  dietary deprivation, effects on splenocyte proliferation *in vitro* (mouse), **198**, 451

C

Ca^{2+}/Calmodulin-dependent protein kinase
  cascade identification between CaMKK, CaM kinase IV, and CaM kinase V (rat brain), **203**, 695
Ca^{2+}/Calmodulin-dependent protein kinase I
  immunoreactivity with antibody to Ca^{2+}/calmodulin-dependent protein kinase V: identification as family of isoforms (rat), **201**, 1561
Ca^{2+}/Calmodulin-dependent protein kinase II
  phosphorylation of protein tyrosine kinase $p56^{lck}$ (rat), **198**, 67
  regulation of cholecystokinin secretion, differential effects of phenylalanine and cAMP (murine intestinal cells), **201**, 1483
Ca^{2+}/Calmodulin-dependent protein kinase kinase
  cascade identification (rat brain), **203**, 695
Ca^{2+}/Calmodulin-dependent protein kinase kinase IV
  cascade with CaMKK and CaM kinase V, identification (rat brain), **203**, 695
Ca^{2+}/Calmodulin-dependent protein kinase kinase V
  cascade with CaMKK and CaM kinase IV, identification (rat brain), **203**, 695
Ca^{2+}/Calmodulin-dependent protein kinase V
  antibody, immunoreactivity with Ca^{2+}/calmodulin-dependent protein kinase I: identification as family of isoforms (rat), **201**, 1561
Cadherins
  E
    encoding gene, transcriptional regulation in prostate cancer cells: characterization of E-cadherin gene promoter (human), **203**, 1284
    human, molecular cloning: suggested subdivision of cadherin superfamily, **200**, 1754
  E and P, encoding genes, tandem arrangement on genome (human), **203**, 1291

  superfamily, subdivision suggested by molecular cloning of human E-cadherin, **200**, 1754
Cadmium
  divalent cations, elevation of osteocyte cytosolic calcium (chicken), **204**, 519
  resistance in *Candida glabrata,* role of cadmium sulfide quantum crystallites, **200**, 1193
Cadmium resistance
  Euglena gracilis cells, role of constitutive overexpression of heat shock proteins, **203**, 540
Cadmium sulfide
  quantum crystallites, role in cadmium resistance in *Candida glabrata,* **200**, 1193
Caffeine
  biotransformation in hepatocyte lines derived from normal liver tissue, effects of dibenz(*a,h*)anthracene (human), **201**, 559
  inhibition of agonist-induced cytoplasmic Ca^{2+} oscillation in single hepatocytes (rat), **198**, 728
Calcimycin
  effects on release of bound and free calcium from Ca-loaded liposomes, **204**, 142
Calcineurin
  activation of transcription from GM–CSF promoter in synergy with protein kinase C and NF-κB/AP-1 in T cells (human), **199**, 1064
  FKBP-59/HBI effects *in vitro* (rabbit), **203**, 750
  interaction with FK-506 and metabolites (bovine), **202**, 437
Calcineurin A
  recombinant form, overexpression and characterization (rat), **200**, 1221
Calcineurin B
  testis-specific, subunit isoform β1, *in situ* localization in developing testis (rat), **203**, 1275
Calcitonin
  effects on
   cyclic AMP accumulation in CHO cells (human, porcine, salmon), **205**, 1226
   osteoblastic MC3T3-E1 cells in stimulation of mRNA expression of c-fos, insulin-like growth factor-1, and osteoblastic phenotypes (mouse), **199**, 876
  minigene transcripts, alternative RNA splicing (human thyroid cells), **200**, 993
Calcitonin gene-related peptide
  constrained analogues, synthesis and testing, **202**, 497
  minigene transcripts, alternative RNA splicing (human thyroid cells), **200**, 993
Calcitonin receptors
  in stimulation of cyclic AMP accumulation in CHO cells, by islet amyloid polypeptide (pig), **205**, 1226
Calcitriol, *see* 1α,25-Dihydroxyvitamin D_3
Calcium
  activated K^{+} channels, identification in growth plate chondrocytes and effects of protein kinase A (chicken), **201**, 776
  activated large conductance K^{+} channels, biophysical and pharmacological properties (mouse), **205**, 596
  antagonists, antioxidant activity *in vitro* against low-density lipoprotein oxidation, comparison with α-tocopherol (human), **203**, 1803
  binding by nucleobindin, mediation by EF hand moiety (human, mouse), **199**, 1388
  binding properties of protein disulfide-isomerase (rabbit liver), **202**, 556
  –calmodulin dependence
   in estrogen biphasic effect on neuronal constitutive nitric oxide synthase (rabbit), **203**, 1013
   regulation of voltage-dependent Na^{+} channel density in skeletal muscle cells during *in vivo* development (chicken embryo), **203**, 852
  and cAMP, differential regulation of μ- and m-type calpain in perfused heart (rat), **202**, 1197
  capacitative influx in pancreatic acinar cells, attenuation by tyrosine kinase inhibitors (rat), **202**, 1697
  cytoplasmic
   concentration in Niemann–Pick disease type C fibroblasts, effects of low-density lipoprotein uptake, **198**, 438
   oscillation in single hepatocytes, agonist-induced, inhibition by caffeine (rat), **198**, 728
  cytosolic
   effects of growth hormone, analysis in cultured IM-9 lymphocytes (human), **202**, 391
   in endothelial cells *in situ* and in smooth muscle, effects of motilin (pig), **202**, 346
   levels in cultured airway *in vitro,* effect of menthol (dog), **201**, 1333
   levels in L6 myoblasts, effect of 3-hydroxy-3-methylglutaryl-CoA reductase inhibitors (rat), **202**, 1579
   oscillation in chromaffin cells (rat), **205**, 1264
   receptor agonist-mediated elevation in neutrophils, role of protein kinase C (human), **203**, 998
  dependent
   activation peritoneal macrophages by γ-hexachlorocyclohexane (murine), **199**, 699
   exocytosis sites in PC12 cells, localization of Rabphilin-3A (rat), **198**, 158
   inactivation of cardiac L-type calcium channels, molecular determinants (human embryonic kidney cells), **201**, 1117

  inhibition of constitutive nitric-oxide synthase (rat brain), **203**, 8
divalent cations, elevation of osteocyte cytosolic calcium (chicken), **204**, 519
early waving in NIH-3T3 fibroblasts, apoptosis-associated, effect of bcl-2 gene overexpression (mouse), **204**, 84
extracellular
  effects on osteoclastic bone resorption (bovine, rat), **202**, 456
  regulation of Ca currents in hemocytes (land snail), **204**, 1096
  role as mediator of acetylcholine-evoked membrane conductances in isolated acinar cells of nasal gland (guinea pig), **202**, 307
homeostasis, prompt glycosylation of calreticulin independent of (CHO cells), **205**, 780
induced change in 3D structure of skeletal muscle thin filaments, cryo-electron microscopic analysis (rabbit), **203**, 951; *erratum*, **205**, 976
influx
  in astrocytes, stimulation by corticotropin-releasing factor *in vitro* (rat), **199**, 1103
  in endothelial cells, thrombin-induced, inhibition by herbimycin A (human), **202**, 1651
  pathway in Sf9 insect cells, appearance after expression of *Drosophila* transient receptor potential-like protein, **201**, 1050
and inorganic phosphate, induced mitochondrial permeability transition, associated status of ADP, AMP, ATP, and NAD(P)H (rat liver)
  (rat liver), **200**, 1615
intercellular transport, endothelin receptor-mediated, antagonism by BQ123 (human), **200**, 679
intracellular
  effects of apolipoprotein E and cholesterol: significance in β-amyloid neurotoxicity (human lymphocytes, mouse brain neurons), **200**, 1185
  increase by DM-nitrophen photolysis, role in evoked mechanical response in phalangeal process of Deiters cells in organ of Corti (guinea pig), **201**, 1263
  modulation of calcium current density in isolated ventricular cardiomyocytes (guinea pig), **204**, 732
  and Na^+, transients, simultaneous measurement in isolated myocytes: strophanthidin effects (guinea pig), **203**, 1050
  oscillations in β cells, inherent nature, evidence from variations in ATP-sensitive K^+ channel activity (human, mouse), **205**, 880
  role in priming of neutrophil respiratory burst by diadenosine polyphosphates AP_4A and AD_3A (human), **202**, 218
  synchronous oscillations in cultured cortical neurons, inhibition by endoglycoceramidase (rat), **202**, 398
  tachykinin-induced rise in human NK_2 receptor-transfected CHO cells, pharmacological characterization, **200**, 1512
intracellular free
  elevation in vascular smooth muscle and endothelial cells by aldosterone, subcellular localization by single cell imaging (pig, rat), **204**, 475
  modulation by ipriflavone, as mechanism of inhibition of osteoclastic activity (rat), **199**, 930
  in NIH/3T3 fibroblasts, effects of inositol tetrakisphosphate isomers, **200**, 1300
  in platelets, epinepherine-induced, effects of propranolol and phentolamine (human), **202**, 1069
mediated activation of NF-AT *cis*-regulatory motif of interleukin-2 promoter, in HIV-1 Tat enhancement of IL-2 promoter activity (Jurkat cells), **205**, 467
mobilization
  G protein-dependent, and G protein-independent flux, in dispersed intestinal smooth muscle cells, activation by fluoride (guinea pig), **202**, 1681
  by human somatostatin receptor type 2 after transfection in COS-7 cells (monkey), **200**, 986
  induced by hypoxia–hypoglycemia in hippocampal slices, temperature dependence (monkey), **205**, 1843
  mitochondrial, in nitric oxide killing of hepatocytes, **205**, 1143
  neurotensin-induced, desensitization in transfected PC12 cells expressing neurotensin receptor (rat), **198**, 400
modulation of cyclin D1 expression in parathyroid cells (rat), **204**, 691
nuclear, requirements for meiosis reinitiation in starfish oocytes, **203**, 674
oscillation
  activation by phospholipase A_2-activating protein, mediation by Gβ/phospholipase A_2/arachidonic acid cascades (rat pancreatic acini), **203**, 1716
  in oocytes, generation, role of protein synthesis (*Xenopus laevis*), **204**, 505
  ryanodine-sensitive, expression in cardiac myocytes, regulation by TGF β_1 (rat), **204**, 678
  spontaneous, in clonal endocrine pancreatic glucagon-secreting cells (hamster), **205**, 435
and phosphatidylserine, β-adducin interaction with Rabphilin-3A in presence of (bovine), **205**, 460
and phosphotidylserine, annexin binding properties, structural determinants, **200**, 867
release from Ca-loaded liposomes, effects of A23187, sonication, and osmotic shock, **204**, 142

  role in formation of high-molecular-weight DNA fragments in thymocyte apoptosis (human), **202**, 120
  serum amyloid P component binding to specific peptide in presence, **205**, 1172
  signals, mediation by murine prostaglandin E receptor EP_3 subtype in cDNA-transfected CHO cells, role of G_i activation of phospholipase C, **204**, 303
  sodium-dependent influx in isolated hepatocytes undergoing ATP depletion (rat), **202**, 360
  in spermatozoa, effects of RU486 (human), **204**, 1009
  transport in erythrocyte membrane, effect of primary hyperparathyroidism (human), **202**, 1505
  uptake mechanism in cardiac junctional sarcoplasmic reticulum, ATP-independent, stimulation by inositol tetrakisphosphate (dog), **204**, 69
  and verapamil, modulation of 12-O-tetradecanoylphorbol-13-acetate-induced epidermal ornithine decarboxylase activity (mouse), **199**, 582
Calcium channels
  BI class A, neuronal, stable expression in BHK cells, **203**, 1821
  blocker manidipine, effect on vascular natriuretic peptide receptor gene expression in hypertensive rat, **205**, 1595
  L-type
    cardiac, molecular determinants of calcium-dependent inactivation (human embryonic kidney cells), **201**, 1117
    skeletal muscle
      protein kinase C-mediated regulation, α_1 subunit phosphorylation requirement (chicken), **202**, 857
      regulation by protein kinase A and protein phosphatase-1C, role of channel α_1-subunit (rabbit), **198**, 166
  N-type, ω-conotoxin-sensitive, α1 subunit, surface expression in neuroblastoma cells, modulation by anti-β2 subunit antisense oligonucleotides (human), **201**, 180
  permeable, inositol-1,4,5-trisphosphate-activated, detection in inside-out patches of Purkinje cells *in vitro* (mouse), **199**, 1128
  and potassium channels, currents, pancreatic β cells, effects of H_2O_2 and 2,2′-dithio-bis(5 nitropyridine) (mouse), **200**, 860
  in sarcoplasmic reticulum, regulation by calsequestrin, **199**, 1120
  single, mechanosensitive, in mesangial cells (rat), **203**, 773
Calcium currents
  density in isolated ventricular cardiomyocytes, modulation by intracellular calcium (guinia pig), **204**, 732
  in hemocytes, regulation by vitamin D metabolites and extracellular Ca (land snail), **204**, 1096
  mechanosensitive single channel, in mesangial cells (rat), **203**, 773
  run-down, relationship to intracellular sodium (guinea pig), **199**, 720
Calcium pump, *see* ATPase, Ca^{2+}
Calcium receptors
  osteoclast, modulation by extracellular protons (rat), **199**, 742
Caldesmon, *see* Caldesmon kinase
Caldesmon kinase
  gene promoter, identification of two subtypes (chicken), **201**, 618
Calmitine
  cloning: identity with calsequestrine (human), **203**, 1477
Calmodulin
  binding site of smooth muscle myosin light chain kinase, role of tryptophan 800 (turkey), **202**, 1329
  –Ca^{2+}-dependent regulation of voltage-dependent Na^+ channel density in skeletal muscle cells during development in culture (chicken embryo), **203**, 852
  –calcium dependent mechanism, in estrogen biphasic effect on neuronal constitutive nitric oxide synthase (rabbit), **203**, 1013
  calcium dependent protein kinase I and V, immunoreactivity, identification as isoform family (rat), **201**, 1561
  interactions with
    jujuboside A, ^1H NMR and spin-labeled EPR studies (bovine brain), **202**, 148
    polylysine, analysis by ^1H NMR and sedimentation equilibrium centrifugation, **198**, 309
  role in stage-specific changes in protein phosphorylation during spore germination (*Dictyostelium discoideum*), **201**, 430
Calnexin
  hyperphosphorylation by *Clostridium difficile* cytotoxin B (McCoy cells), **203**, 22
Calpain
  μ-type, in epidermoid carcinoma cells, selective nuclear transport (human), **204**, 544
  μ- and m-types, differential regulation in heart perfused with Ca^{2+} and cAMP (rat), **202**, 1197
Calpastatin
  types I and II, specificity in various tissues, modulation by reversible phosphorylation and dephosphorylation (rat), **199**, 1326
Calponin
  phosphorylation by protein kinase C, block by F-actin *in vitro* (chicken gizzard), **203**, 1502
Calreticulin
  prompt glycosylation, independent of Ca^{2+} homeostasis (CHO cells), **205**, 780

- Calsequestrin
  - regulation of Ca^{2+} channels in sarcoplasmic reticulum, **199**, 1120
  - role as casein kinase-1 and CK2 substrate and inhibitor (chicken, frog, rabbit), **198**, 144
- Calsequestrine
  - calmitine identity with (human), **203**, 1477
- Calstorin
  - identification in microsome lumen (rat brain), **203**, 828
- Calyculin A
  - induction of oxidative DNA damage in stimulated neutrophil-like cells (human), **205**, 1803
  - interference with amylase secretion in pancreatic acinar signal transduction (rat), **201**, 1470
- Camptothecin
  - inhibition of topoisomerase I, enhancement of vitamin D-responsive expression of lipopolysaccharide-binding protein receptor CD 14 (human), **199**, 531
- Cancer, *see also* Tumors
  - associated antigens, expressed on mucin-type sugar chains, monoclonal antibodies recognizing, production (human), **203**, 1828
  - predisposition syndrome, inherited, encoding gene, tight linkage to tuberous sclerosis gene (Eker rat), **203**, 1302
- *Candida glabrata*
  - cadmium resistance, role of cadmium sulfide quantum crystallites, **200**, 1193
- Capsanthin-capsorubin synthase
  - gene structure and expression (*Capsicum annuum*), **199**, 1144; *erratum*, **201**, 486
- Capsids
  - intact structure, role in adenovirus-mediated endosome lysis mechanism (human), **205**, 1318
- Captopril
  - and CV-11974, effects on endothelin-1 secretion following nephrectomy (rat mesenteric artery), **202**, 246
- Carbachol
  - modulation of thymocyte apoptosis and differentiation via nicotinic effect on thymic epithelium (mouse), **203**, 1057
  - and M1-selective agonist AF102B, stimulation of amyloid precursor protein secretion in PC12 cells, comparison, **203**, 652
- Carbamyl phosphate synthetase
  - COOH-terminal domain, location of binding site for allosteric activator IMP (*Escherichia coli*), **203**, 1083
- Carbohydrate-deficient-glycoprotein syndrome
  - fibroblasts from affected patients, glycosylation defects, role of dolichyl phosphate and *N*-acetylglucosaminyl-phosphoryl-dolichol, **200**, 816
- Carbohydrates
  - *Anaerocellum thermophilum*, enzymes degrading, genes coding for, cloning and expression in *Escherichia coli*, **202**, 1076
  - antigens recognized by anti-horseradish peroxidase antiserum, expression on mammalian cells (bovine, rat), **204**, 342
- Carbonate dehydratase II
  - expression in pancreatic adenocarcinoma cells, induction by tumor necrosis factor α (human), **205**, 1815
- Carbon dioxide
  - production in starved yeast cells, effects of D-glucose anomer additions, **203**, 640
- Carbonic anhydrase II, *see* Carbonate dehydratase II
- Carbon monoxide
  - contribution to activation of soluble guanylyl cyclase in endotoxin-induced vascular hyporeactivity (rat aorta), **201**, 436
  - as endogenous modulator of hepatic vascular perfusion (rat), **205**, 1333
  - rebinding to hemoglobin S and C after ligand photolysis, associated kinetics, nanosecond absorption study (human), **205**, 154
- Carbon tetrachloride
  - effects on hepatic actin, profilin, and extracellular matrix mRNA expression (rat), **198**, 568
- Carboxylesterase ES-3
  - cloning and sequencing (rat liver), **203**, 1404
- Carboxylmethylation
  - protein phosphatase 2A from eggs, stimulation by cAMP and inhibition by okadaic acid (*Xenopus laevis*), **198**, 372
  - role in chemoattractant receptor-stimulated G protein activation and functional responses (HL-60 cells), **200**, 1604
- 1-*O*-(5′-Carboxypentyl)-L-glycero-3-phospho-L-threonine
  - partial modulator activity toward glucocorticoid receptor, **203**, 408
- Carcinogenesis
  - absestos-induced, implications of differential mediation of DNA damage by organic peroxides and H_2O_2 (calf thymus), **200**, 687
- Carcinogens
  - benzo[*a*]pyrene-associated proximate isomers, catalytic activity of human cytochrome P450 isozymes (COS-7 cells), **192**, 1373; *erratum*, **203**, 1935
- Cardiomyocytes
  - differentiation, induction by 3,5,3′-triiodo-L-thyronine in dose dependent manner (mouse), **205**, 652
  - expression of ryanodine-sensitive Ca^{2+} oscillations, regula-

tion by TGF β_1 (rat), **204**, 678
expression of vascular endothelial growth factor mRNA, stimulation by cobalt (rat), **204**, 794
membrane phospholipids, α-1-adrenoceptor-mediated degradation *in vitro,* dynamics (rat), **198**, 366
phosphoinositide cycle responses induced by phenylephrine and endothelin-1 (neonatal rat), **203**, 422
ventricular, isolated, calcium current density, modulation by intracellular calcium (guinia pig), **204**, 732

Cardioprotection
effects of alcohol, mediation by vascular alcohol dehydrogenase (human), **203**, 1858

CArG box
and ternary complex factor binding sites, co-occurrence in cytomegaloviral genome, **205**, 545

Carnitine
and choline, synergistic effect on acetylcholine synthesis in neuroblastoma NB-2 cells (mouse), **202**, 354
uptake in cultured skin fibroblasts, valproic acid-associated impairment, reversal (human), **204**, 753

Carnitine palmitoyltransferase-I
mRNA levels and enzymatic activity, effects of hyperthyroidism and hypothyroidism (rat), **201**, 932

Cartilage
differentiation, limb mesenchymal cells, phorbol ester-inhibited, expression of homeobox-containing gene *Msx1* and lack of gap junctional communication (chicken embryo), **205**, 429
nasal, collagen breakdown in, prevention by TIMP, TIMP-2, and BB87 (bovine), **201**, 94

Casein kinase
release from erthrocyte membranes, relationship to membrane protein phosphorylation (human), **203**, 681

Casein kinase-1
binding to liver mitochondrial structures, spermine effect (rat), **205**, 389
and CK2, calsequestrin as substrate and inhibitor, analysis (chicken, frog, rabbit), **198**, 144
hhp1$^+$ and *hhp2*$^+$ isoforms, cloning and sequence analysis (*Schizosaccharomyces pombe*), **203**, 231
monitoring with synthesized peptide substrates, **198**, 898

Casein kinase-2
and CK1, calsequestrin as substrate and inhibitor, analysis (chicken, frog, rabbit), **198**, 144
D-amino acid residues as substrate specificity determinants for, **200**, 1564
monitoring with synthesized peptide substrates, **198**, 898
oligomeric isoforms, tissue distribution and subcellular localization (bovine), **198**, 660
phosphorylation of glycyrrhizin binding protein *in vitro,* effects of glycyrrhizin, dexamethasone, and olean-11,13 (18)-diene-3β, 30-diol, **198**, 1090
phosphorylation site on eIF-2 β-subunit, identification (rabbit reticulocytes), **201**, 1279
and protein substrates, release from liver cell nuclei by DNase and RNase digestion (rat), **202**, 984
in vitro phosphorylation of NM23/nucleoside-diphosphate kinase (human), **199**, 1041

Castration
induced regression in ventral prostate gland, associated expression of p53 protein and mRNA (rat), **198**, 1189

Catalase
cellular, activation by endogenous adenosine (bovine, human, rat), **201**, 508

Cataract
congenital hereditary, possible mutations for, leukocyte DNA analysis (miniature Schnauzer dog), **203**, 1663

Cataractogenesis
galactose-induced, susceptible S strain rat, association with inherited enhancement of hydroxy radical generation and lipid peroxidation (rat)

Catecholamines
secretion from adrenal medullary cells *in vitro,* stimulation by interleukin-1β (bovine), **198**, 81

Catenation
inverse relationship with superhelicity in newly replicated simian virus 40 daughter chromosomes (CV-1 cells), **201**, 1510

α-Catenin
in stomach cancer cells, association with c*erbB*-2 gene product (human), **205**, 73

α(E)-Catenin
alternative splice forms, identification by molecular cloning (human), **203**, 1691

β-Catenin
in stomach cancer cells, association with c*erbB*-2 gene product (human), **205**, 73

Cathepsin B
expression in B16 melanomas of varying metastatic potential, transcriptional regulation (mouse), **202**, 429

Cathepsin D
encoding gene, estradiol insensitivity, relationship to estrogen response element sequence (human endometrial cells), **203**, 711

Cathepsin E
expression in stomach mucosa following adrenalectomy, effects of hydrocortisone replacement therapy (rat), **202**, 1

- athepsin G
  - mechanism-based inhibition by substituted 3-oxo-1,2,5-thiadiazolidine 1,1-dioxides (human), **198**, 341
- atheters
  - balloon, induced injury to rabbit carotid artery, subsequent intimal thickening, inhibition by C-type natriuretic peptide, **205**, 1051
- ation channels
  - muscarinic receptor-activated nonselective, regulatory role of tyrosine kinases (guinea pig ileum), **203**, 1392
- audate nucleus
  - and cerebrospinal fluid acetylcholinesterase, IgM antibodies specific to, characterization (human), **203**, 1076
- -1027 chromoprotein
  - binding and cutting of DNA at preferred cleavage sequence 5′-AGG, effect of guanosine replacement by inosine, **205**, 1533
- D, *see* Circular dichroism
- ecum
  - microflora, biodegradation of malachite green and rhodamine B (rat), **200**, 1544
- ell adhesion
  - Arg-Gly-Asp sequence mediating, localization in close proximity to major linear antigenic region of hepatitis C virus NS3 protein (human), **202**, 1352
  - A549 tumor cells *in vitro,* stimulation by thrombospondin and transforming growth factor β (human), **203**, 857
  - differential, on endothelial cell surfaces, induction by interleukin-1β (human), **202**, 866
  - endothelial cells–lymphocytes, inhibition of binding by L-selectin, effect of ligand clustering (mouse), **204**, 969
  - leukocytes to endothelial cell monolayers, attenuation by tyrosine kinase inhibitors (human), **198**, 359
  - major 30-kDa protein secreted by bladder carcinoma cells, identification (human), **198**, 1046
  - melanoma cells, modulation, role of integrin phosphorylation mediated via protein kinase C (human), **204**, 264
  - monocyte–endothelial cell, oxidized low-density lipoprotein-induced, indomethacin effects (human), **204**, 673
  - platelets, support by beta-amyloid protein (human), **205**, 1829
  - P-selectin-dependent, leukocytes in postcapillary venules, induction *in vivo* by mast cell activation (rat), **203**, 1043
  - regulating protein, purification from seminal vesicle fluid (pig), **205**, 1206
- ell adhesion molecules, *see also specific types*
  - carcinoembryonic antigens function as, evidence in various cell types, **204**, 1225
  - E-selectin, expression on endothelial cells, and tumor cell adhesion, induction by endothelial cell activation factors released from activated platelets (human), **203**, 1605
  - ICAM-1, mediated endothelial adhesion by myelomonocytic cells, genistein effects: role of up-regulation of ICAM-1 and counter-receptors (human), **203**, 443
  - NCAM, 140-kDa isoform, expression by dermal microvascular endothelial cells (human), **203**, 686
  - VCAM, cloning and expression kinetics (swine), **201**, 805
  - Zn-α_2-glycoprotein, role in cell attachment and spreading (human), **201**, 1339
- Cell cycle
  - associated DNA replication oscillation, inhibition by butyrolactone I (*Xenopus laevis*), **198**, 536
  - associated phosphorylation of Rap1GTPase activating protein in HeLa cells, **202**, 967
  - C6 glioma cells, and portein kinase C activity, effects of simvastatin (rat), **200**, 1143
  - G2-M, arrest in neuronal cells, induction by apigenin (rat), **204**, 578
  - G1 phase, associated protein complex Yi1 binding thymidine kinase gene promoter, cyclin D1/cdk2 kinase in, detection (mouse), **205**, 1859
  - late telophase, delay induced by ectopic expression of PITSLREβ1 protein kinase, inhibition by 2-aminopurine (CHO cells), **199**, 1167
  - progression
    - cAMP effects on cyclin synthesis and cyclin-dependent kinase activation (murine astrocytes), **205**, 923
    - effects of hydroxyurea and 2′,3′-dideoxycytidine (human), **205**, 92
- Cell death, *see also* Apoptosis
  - mediated by natural killer cell impairment of cytoskeleton function, effect of 3-aminobenzamide (human), **199**, 1250
  - UV-induced, after bromodeoxyuridine sensitization in B16 melanoma cells: impaired c-*jun* induction and defective tyrosine phosphorylation signaling, **203**, 1629
- Cell differentiation, *see* Differentiation
- Cell growth
  - early response, causative gene *Egr-1,* translation in myogenic cells, control by mitogenic signals (mouse), **202**, 1337
  - glomerular mesangial cells, phospholipase C-mediated promotion by extracellular ATP (rat), **202**, 234
- Cell lines, *see also specific types*
  - AtT20, human prosomatostatin expressed in: generation of somatostatin-14 and -28 in different secretory pathways, **205**, 221
  - BaF/ER, mitogen-activated protein kinase cascade, activa-

tion through erythropoietin receptor, **203**, 1912
  CHO (Chinese hamster ovary), *see* CHO cells
  DAER, erythropoietin-induced proliferation and Jak2 activation, dominant negative effects of carboxy-truncated Jak2 mutant, **204**, 278
  DH33, *Drosophila hydei,* and *D. melanogaster,* copia retrotransposon differential expression, strong transcriptional activator responsible for, **203**, 392
  FM3A, high-molecular-mass and 42°C-specific heat shock proteins in, characterization (mouse), **204**, 357
  Hel, transfer of hypoxanthine phosphoribosyltransferase gene-containing YAC into, by four methods, and role of homologous recombination (human), **200**, 1693
  Kc and Schneider II, *Drosophila melanogaster,* and *D. hydei* DH33 cells, copia retrotransposon differential expression, strong transcriptional activator responsible for, **203**, 392
  Sf9 (*Spodoptera frugiperda)*
    baculovirus-mediated expression of recombinant murine perforin, **201**, 318
    Ca^{2+} influx pathway, appearance after expression of *Drosophila* transient receptor potential-like protein, **201**, 1050
  Sf21 (*Spodoptera frugiperda)*
    baculovirus-expressed *Drosophila melanogaster* acetylcholinesterases, biochemical characterization, **203**, 734
    –baculovirus expression system, production of cysteine-rich fish antifreeze protein as active proprotein precursor, **203**, 1851
    baculovirus-transfected cells, high-level expression of murine DNA (cytosine-5-)-methyltransferase (mouse), **204**, 1003
  STC-1, cholecystokinin-secreting intestinal, ATP-sensitive K channels in, characterization, **204**, 855
  Trichoplusia ni
    TN5, baculovirus-mediated high-level expression of human placental aromatase/CYP19A1, **201**, 694
    TN-368, doxorubicin toxicity, topoisomerase II-independent, comparison with murine fibroblasts, **198**, 582
Cell–matrix interactions
  induction of matrilysin mRNA in colorectal adenomas, analysis (human), **201**, 657
Cell migration
  cholesterol-poor endothelial cells, effects of pretreatment with HMG-CoA reductase inhibitors (bovine), **203**, 1355
  cultured gastric mucosal cells, in wound repair, role of extracellular matrix (rabbit), **202**, 285
  32D hematopoietic cells and NIH 3T3 fibroblasts via chemotaxis and chemokinesis, mediation by αPDGF receptor tyrosine kinase (mouse), **204**, 628
Cellobiose
  coupled tripeptides, aminopeptidase-resistant, Na^+-dependent transport in intestine (rat), **203**, 1412
Cell proliferation, *see also* Hyperproliferation
  A431 cells, dual effect of epidermal growth factor, relation to MAP kinase activity (human), **203**, 984
  breast cancer
    MCF7 cells, estrogen-stimulated proliferation, inhibition by insulin-like growth factor binding protein 3 (human), **198**, 292
    T47D cells, inhibition by cisplatin and taxol (human), **202**, 1413
  cerebral neural stem cells, enhancement by Alzheimer amyloid protein precursor (fetal rat), **205**, 936
  cultured vascular endothelial cells, inhibition by exogenous nitric oxide (bovine), **203**, 1160
  DAER cells, and Jak 2 activation, erythropoietin-induced, dominant negative effects of carboxy-truncated Jak2 mutant, **204**, 278
  gastric mucosal cells
    and differentiation and pepsinogen gene expression, effects of adrenalectomy and hydrocortisone replacement (rat), **202**, 1
    in wound repair, role of extracellular matrix (rabbit), **202**, 285
  hepatocytes
    associated microsomal localization of cyclin A and cdk 2 (rat), **201**, 1072
    reduction *in vitro,* role of impaired intracellular collagen synthesis (rat), **200**, 1701
  hypercalcemic Walker 256 carcinoma, effect of parathyroid hormone-related protein (rat), **198**, 1281
  intestinal epithelial cells, modulation by hepatocyte growth factor/scatter factor (human), **202**, 701
  leukemia
    and erythropoietin-induced erythroid differentiation, inhibition by antisense *src* RNA expression (human), **201**, 1534
    megakaryoblast-derived CHRF-288 cells, serum-induced, inhibition by wortmannin, **202**, 1619
    monocytic, and c-*myb* and c-*src* expression, effects of antisense *myb* and *src* expression (human), **201**, 1001
  lymphocytes, associated differences in CD45 glycosylation pattern (human), **200**, 1283
  Nb2 cells, role of amino acids in amino terminal region of rat prolactin, **205**, 312
  perisinusoidal stellate cells, modulation by extracellular matrix and L-ascorbic acid 2-phosphate (rat), **200**, 999

resistant to Losartan and PD 123319, angiotensin II receptor coupled to, expression by cardiac fibroblasts (human), **204**, 1334
role of Zn-α_2-glycoprotein (human), **201**, 1339
satellite cells, regulation by macrophages (human), **202**, 1688
splenic lymphocytes
  after endotoxin injection, effects of linoleic acid *in vitro* (mouse), **198**, 1107
  in vitro, angiotensin II-stimulated, mediation via AT_1 and AT_2 receptors (mouse), **198**, 1034
splenocytes *in vitro*, effects of specific B vitamin deprivation (mouse), **198**, 451
vascular smooth muscle cells
  arterial, in culture, expression of type I fibroblast growth factor receptor (human), **204**, 557
  regulation by ras proteins (rat), **202**, 1252
  thrombin-induced, role of NF-κ activation (human), **204**, 950
3Y1 fibroblasts, down-regulation by Src homolgy-2 domain of PTP1C tyrosine phosphorylated by Src kinase (rat), **204**, 874
Cell puncture
  in L6 myoblasts, induction by 3-hydroxy-3-methylglutaryl-CoA reductase inhibitors (rat), **202**, 1579
Cell spreading
  in megakaryocytic DAMI cells, induction by fibronectin, **204**, 606
Cellular retinoic acid-binding protein-II
  induction by retinoic acid all-*trans* and 9-*cis* isomers in osteosarcoma cells (human), **200**, 1125
Central nervous system
  developing, regional expression of *Cwnt-4* gene in relation to diencephalic neuromere D2 and spinal cord dorsal domain (chicken embryo), **203**, 1581
  N-alkylated benzazepinones as agents, NMR and molecular modeling based on conformational analysis: design motifs, **205**, 98
Centrifugation
  sedimentation equilibrium, *see* Sedimentation equilibrium centrifugation
Ceramide
  lysosomal degradation *in vivo*, stimulation by sphingolipid activator protein D (human fibroblasts), **200**, 1440
  mediation of apoptotic response of WEHI 231 cells to anti-immunoglobulin, corticosteroids, and irradiation (mouse), **202**, 710
Cerebellum
  cortex, and cerebral cortex and cerebrospinal fluid, Alzheimer's disease-affected and control subjects, analysis of soluble amyloid β-protein, **200**, 1598
  NO synthase activity, EPR measurement by spin trapping of nitric oxide by nitronylnitroxides (rat), **202**, 195
Cerebral cortex
  and cerebellar cortex and cerebrospinal fluid, Alzheimer's disease-affected and control subjects, analysis of soluble amyloid β-protein, **200**, 1598
  and hippocampus and pituitary, inositol-1,4,5-trisphosphate content, somatostatin-14 effects (rat), **203**, 379
Cerebrospinal fluid
  acetylcholinesterase, and caudate nucleus, IgM antibodies specific to, characterization (human), **203**, 1076
  purification of prostaglandin D synthase: identity with β-trace (human), **203**, 1110
  serum amyloid P component levels, differences in subjects with and without Alzheimer's disease, **201**, 722
CFTR, *see* Cystic fibrosis transmembrane conductance regulator
CGS 26303
  as inhibitor of neutral endopeptidase 24.11 and endothelin-converting enzyme, pharmacological profile (rat), **204**, 407
Chaperones
  calnexin, hyperphosphorylation by *Clostridium difficile* cytotoxin B (McCoy cells), **203**, 22
Chaperonins
  GroEL/ES, overproduction in *Escherichia coli*, protective effects against degradation of tetracycline/H^+ antiporter truncated at last transmembrane helix, **202**, 258
Charybdotoxin
  secondary structure, from hydropathy power spectral analysis, **201**, 186
Chemoattractant receptors
  stimulated G protein activation and functional responses, role of carboxylmethylation (HL-60 cells), **200**, 1604
Chemoattractants
  eosinophil, eotaxin, cloning and increased mRNA expression in allergan-challenged lung (guinea pig), **205**, 788
Chemokines, *see also specific chemokines*
  C-C, and platelet-activating factor, synergism, for arachidonate release in monocytes (human), **199**, 761
  KC, homologous to human *MGSA/GRO*, gene transcription, negative regulation by glucocorticoids (mouse), **203**, 1809
  RANTES, eosinophil chemotaxis towards, effect of human monocyte chemotactic proteins 2 and 3, **200**, 1470
Chemokinesis
  related locomotion of 32D hematopoietic cells and NIH 3T3 fibroblasts, mediation by αPDGF receptor tyrosine kinase, **204**, 628

- Chemotaxis
  - eosinophils towards human monocyte chemotactic proteins 2 and 3, and MCP-2 and -3 effects on chemotaxis towards RANTES, **200**, 1470
  - neutrophils, regulation via interaction of fibronecting cell binding fragments and interleukin-8 (human), **205**, 706
  - related locomotion of 32D hematopoietic cells and NIH 3T3 fibroblasts, mediation by αPDGF receptor tyrosine kinase, **204**, 628
- Chimeras, *see also* Proteins, chimeric
  - CD40/Fas receptors, induction of apoptosis in murine L929 cells (human), **204**, 1102
  - D_2 dopamine receptors, *in vitro* translation, analysis by subtype-specific antibodies (mouse), **205**, 1460
  - formation from ferritin genes during PCR reaction (human), **205**, 944
- Chinifur
  - function as selective inhibitor and subversive substrate for trypanothione reductase (*Trypanosoma congolense*), **204**, 224
- Chirality
  - enantiomeric 2′-deoxythymidine 5′-triphosphate, discrimination by HIV-1 reverse transcriptase and eukaryotic DNA polymerases, **200**, 1023
- Chitinase
  - type A1, monoclonal antibodies to, isolation and characterization (*Bacillus circulans*), **204**, 7
- *Chlamydomonas reinhardtii*
  - localization of rhodopsin by immunofluorescence microscopy, **205**, 1025
- Chloral hydrate
  - metabolism to free radicals by hepatic microsomes and induction of lipid peroxidation (mouse), **204**, 937
- *Chlorella* virus
  - adenine methyltransferase gene promoter, functional expression in bacteria and plants, **204**, 187
- Chloride
  - effect on Mg^{2+}-induced lipid phase transition in thylakoid membranes (spinach), **202**, 1724
- Chlorine
  - efflux in endothelial cells, induction by adenosine via pertussis toxin-sensitive G protein (bovine), **204**, 1143
- 2-Chloro-2′-deoxyadenosine
  - effects on deoxycytidine and deoxythymidine metabolism in cultured lymphocytes (human), **203**, 1378
- 7-Chloro-4-nitrobenzo-2-oxa-1,3-diazole
  - glutathione transferase in presence of, steady-state kinetics: role of deprotonation of bound glutathione (human placenta), **200**, 1428
- *m*-Chloroperbenzoic acid
  - reaction with cytochrome $P450_{cam}$, compound I formation, **201**, 1464
- Chlorophenylfuranyl compounds
  - NE-10044 and NE-10133 antiarrhythmics, inhibitory effects on I_{sK} and I_{Ks} potasium channels (guinea pig cardiac myocytes, *Xenopus* oocytes), **202**, 265
- CHO cells
  - A_3 adenosine receptor, selective agonist affinity probe, **203**, 570
  - *Bacillus anthracis* edema toxin: induced elongating effects of monoclonal antibodies, **199**, 676
  - cAMP accumulation, stimulation by islet amyloid polypeptide via porcine calcitonin receptor, **205**, 1226
  - carrying somoatostatin receptor, activation of cytosolic phospholipase A_2: wortmannin-sensitive pathway activating mitogen-activated protein kinase, **205**, 18
  - CHO-GLUT4myc, translocation of insulin-responsive glucose transporter GLUT4, induction by epidermal growth factor, **205**, 857
  - CHO-K1, expression of bovine endothelin-converting enzyme, **203**, 1417
  - expressing human carcinoembryonic antigen, metastatic potential in nude mouse, **200**, 1748
  - expression of
    - human vasoactive intestinal polypeptide receptor cloned from SUP-T1 lymphoblasts, **205**, 1617
    - recombinant human luteinizing hormone/human choriogonadotropin receptor, **201**, 248
    - transfected bovine prostaglandin $F_{2\alpha}$ receptor, intracellular transduction and G protein coupling, **200**, 756
  - human α_2A-C10 and α_2C-C4 receptor subtypes in, inhibition of cAMP accumulation, role of differential coupling to G_i proteins (human), **199**, 869
  - human adenosine receptor-transfected: functional coupling to ligand-dependent reporter gene system, **198**, 626
  - human angiotensin II type 1 receptor subtype $AT_{1a}R$ and $AT_{1b}R$ expressed in, signal transduction mechanisms, **199**, 475
  - human $\alpha_5\beta_1$ integrin mutants expressed in, in analysis of role of NPXY signals in internalization, **199**, 603
  - human NK_2 receptor-transfected, tachykinin-induced intracellular Ca^{2+} rise, pharmacological characterization, **200**, 1512
  - late telophase, delay induced by ectopic expression of PITSLREβ1 protein kinase, inhibition by 2-aminopurine, **199**, 1167
  - murine prostaglandin E receptor EP_3 subtype in, mediation of calcium signals via G_i, **204**, 303

O23, overexpressing Hsp27, accelerated recovery from heat-induced nuclear protein aggregation, analysis, **204**, 1170
overexpression of insulin receptor, subsequent resistance to insulin-like growth factor-I: role of insulin receptor substrate-1, **205**, 693
prompt glycosylation of calreticulin independent of Ca^{2+} homeostasis, **205**, 780
protein kinase Cα in, tyrosine phosphorylation: direct interaction of insulin receptor and PKC, **200**, 1570
proteolytic activity, enhancement by arsenite, **202**, 1015
and rat embryo fibroblasts, differential expression of cyclin B1 mRNAs resulting from alternate polyadenylation (hamster), **202**, 908
resistant to okadaic acid, expression of multidrug-resistant phenotype, **203**, 1210
signal transduction in, regions of human neurokinin A receptor involved in, deletion analysis, **199**, 626
somatostatin receptor subtype SSTR1 signaling pathways: multiple effector coupling, **204**, 176
stably expressing human ET_A and ET_B receptor subtype, cytosolic phospholipase stimulation by endothelin-1, **199**, 992
substitution of glutamic acid for conserved lysines in α-domain of metallothionein, effects on metal binding in α and β domains (hamster), **202**, 621
transfection by cationic amphiphile diC_{14}-amidine, **203**, 1622
V79, cytotoxic response to PUVA, γ-rays, and UVC, effect of polyamine depletion, **201**, 1
vasoactive intestinal peptide$_1$ receptors expressed by stable transfectants, signaling pathways, **203**, 141

Cholecystokinin
CCK-8, heat-resistant neuropeptidase degrading, isolation and characterization (rat liver), **198**, 574
secretion in
murine intestinal cells, regulation by calcium-dependent calmodulin kinase II, differential effects of phenylalanine and cAMP, **201**, 1483
RIN rat islet tumor cells, functional coupling with cAMP pathway, **200**, 1382
STC-1 intestinal cells, associated ATP-sensitive K channels, characterization, **204**, 855

Cholecystokinin receptors
A type, gene expression in pancreas of diabetic rat, **199**, 482
A and B types, role in gastrin stimulation of colon cancer cells (human), **202**, 1222
B type, encoding gene, molecular cloning and structural analysis (rabbit), **202**, 947
–gastrin receptor, seventh transmembrane domain, role in non-peptide antagonist binding (rat), **201**, 1382

Cholesterol
and apolipoprotein E, effects on intracellular Ca^{2+} in mouse brain neurons and human lymphocytes: significance in β-amyloid neurotoxicity, **200**, 1185
cellular
efflux, in apolipoprotein E-deficient mouse, role of HDL apoE, **205**, 1072
high-density lipoprotein- and apolipoprotein A-1-induced mobilization, impairment in dermal fibroblasts from Tangier disease subjects, **205**, 850
dietary, effects on hepatic metabolism of free fatty acid and secretion of very-low-density lipoprotein (hamster), **200**, 1505
diet enriched in, hepatocyte susceptibility to mouse hepatitis virus type 3: correlation with membrane fluidity, **204**, 1299
endothelial cells deficient in, migration activity, effect of pretreatment with HMG-CoA reductase inhibitors (bovine), **203**, 1355
free, transfer between lipoproteins and artificial membrane system, mediation by membrane-bound cholesteryl ester proteins (human), **202**, 1322
synthesis by mononuclear leukocytes, melatonin effects (human), **203**, 416

Cholesterol 7α-hydroxylase
enhancement of HMG CoA reductase activity in COS cells, **202**, 896
mRNA expression in HepG2 cells, effects of bile acids and steroid/thyroid hormones (human), **198**, 546

Choline
and carnitine, synergistic effect on acetylcholine synthesis in neuroblastoma NB-2 cells (mouse), **202**, 354
uptake by HEK-293 fibroblasts *in vitro*, role of sodium (human), **199**, 1320

Cholinesterase
amphiphilic forms, in intestinal mucosa cells, heparin binding (rat), **201**, 1376

Choline transporter 1
creatine transport and expression in neural and muscle tissues (rat), **198**, 637

Chondrocytes
articular, potassium channels, blockage by propofol (swine), **202**, 31
growth plate
1,25-dihydroxyvitamin D_3 in, effect of 24,25-dihydroxyvitamin D_3 *in vitro* (chicken), **202**, 1204
identification of Ca^{2+}-activated potassium channels and effects of protein kinase A (chicken), **201**, 776
proliferation, synergistic stimulation by histatin and epider-

mal growth factor (rabbit), **198**, 274
Chondroitin sulfate
  incorporation of sulfate and glucosamine during HL-60 cell differentiation (human), **203**, 1682
Choriogonadotropin receptors
  –luteinizing hormone receptors, recombinant, human, function expression in CHO cells, **201**, 248
Chorionic gonadotropin receptors
  mammalian, relationship to G-protein coupled receptors cloned from sea anemone, **197**, 1062; *erratum,* **200**, 668
Chromaffin cells
  cytosolic calcium oscillation (rat), **205**, 1264
Chromatin
  fragmentation in thymocyte apoptosis, role of Ca^{2+} (human), **202**, 120
  structure condensation, induction by 90-kDa heat shock protein (rat), **202**, 1657
  testis, condensation, induction by histones: comparison of testis-specific H1t and somatic H1 variants (rat), **198**, 32
  ubiquitinated histone isoform levels in mammalian cells, effect of transcription inhibition, **203**, 344
Chromatography, *see specific techniques*
  cell–cell adhesion regulator from porcine seminal vesicle fluid, **205**, 1206
Chromium
  and colupulone, effects on glucose tolerance and hepatic cytochrome P450 in diabetic and nondiabetic mice, **200**, 1455
Chromophores
  corresponding to fluorescence emissions at 480 and 530 nm, detection in resting state of monoamine oxidase B, **202**, 1574
Chromosomes
  1
    casein kinase-1 *hhp2*$^+$ localization (*Schizosaccharomyces pombe*), **203**, 231
    p36 region, atrial natriuretic peptide locus, RFLP at, association with aldosterone responsiveness to angiotensin in aldosterone-producing adenoma (human), **204**, 1312
    prostaglandin H synthase-2 gene localization (human), **203**, 190
  1A2-3, mapping of κ-opioid receptor gene (mouse), **205**, 1353
  2
    casein kinase-1 *hhp1*$^+$ localization (*Schizosaccharomyces pombe*), **203**, 231
    mouse macrophage mannose receptor gene *Mrc1* localization, **198**, 682
    q21 region, *N*-acetylglucosaminyltransferase V localization (human), **198**, 318; *erratum,* **200**, 668
  3, p25 region, histamine H1 receptor gene mapping (human), **201**, 894
  4
    Hes-3 gene localization (mouse), **203**, 594
    q12 region, assignment of glycine decarboxylase processed gene (human), **203**, 1483
  7
    endothelial nitric oxide synthase gene mapping (human), **198**, 1027
    q11.23 and 7q22 regions, localization of genes homologous to yeast *PMS1* gene (human), **204**, 1257
  9
    p23–24 region, assignment of glycine decarboxylase true gene (human), **203**, 1483
    in skin squamous cell carcinomas, q22.3-q31 region microsatellite markers, genetic instability, **201**, 1495
  9 and 22, gene expression in androgenetic and gynogenetic tissues without imprinting (human), **204**, 621
  16
    p12.1–p11.2 region, mapping of phenol sulfotransferase genes *STP* and *STM* to: candidate genes for Batten disease, **205**, 482
    q12.23–12.3 region, Long Evans Cinnamon hepatitis gene mapping: homolog to human Wilson disease gene (rat), **202**, 512
    p13.11 region, assignment of S_A gene (human), **199**, 862
    q22.1, mapping of P-cadherin gene: tandem arrangement with E-cadherin gene (human), **203**, 1291
  21, Cu/Zn superoxide dismutase gene mutation, identification in Japanese familial amyotrophic lateral sclerosis, **200**, 695
  2H2-4, mapping of κ-opioid receptor homolog gene (mouse), **205**, 1353
  simian virus 40 daughter, newly replicated, inverse relationship between catenation and superhelicity (CV-1 cells), **201**, 1510
  X
    linked agammaglobulinemia tyrosine kinase, SH2 domain mutations, structural basis (human), **205**, 1270
    mapping of angiotensin II type 2 receptor gene (human), **203**, 1842
Chronic granulomatous disease
  with $p47^{phox}$ deficiency, identification of homologous dinucleotide deletion in Japanese patients, **199**, 1372
  with $p67^{phox}$ deficiency, absence of $p40^{phox}$ in patients, **199**, 1378
Chylomicron
  remnants, metabolism in intestine, effect of apolipoprotein E

    overexpression (mouse), **200**, 716
Cigarette smoke
  effects on hepatic and pulmonary cytochrome P450 isoforms (mouse), **202**, 1731
  induced increase in monocyte adherence to cultured endothelial cell monolayer (human), **203**, 929
Ciliary neurotrophic factor
  effect on β-amyloid precursor protein mRNA expression in C6 glioma cells (rat), **204**, 391
CINC/gro, *see* Cytokine-induced neutrophil chemoattractant/growth-related oncogene
Circular dichroism
  magnetic, cytochrome c_{554}: methionine replacement of lysine as axial ligand at high pH (*Achromobacter cycloclastes*), **204**, 120
  β-structure in amylin and designer β-peptides, comparison (human), **204**, 1088
Circular dichroism spectroscopy
  magnetically induced, monitoring of kinetics of conformational change in cyanometmyoglobin after electron transfer, **205**, 1724
Circulation
  collateral, development after acute arterial occlusion, effect of tecogalan sodium (rat), **202**, 1149
  C-type natriuretic peptide in, detection (human), **198**, 1177
Cisplatin
  enhancement of Mg^{2+}-dependent activity in liver cells (rat), **202**, 749
  generation of superoxide anion by interaction with DNA in cell-free system (bovine thymus), **203**, 1175
  inhibition of T47D breast cancer cell proliferation (human), **202**, 1413
Cleavage
  hydroxylamine *in situ,* actin on sequencer membranes, subsequent identification of serum actin as cytoplasmic isoform (fetal bovine), **205**, 195
  by 92-kDa gelatinase, sites in native type V collagen (rabbit synovial cells), **202**, 328
  plasmic, by glycerin-stabilized plasmin, susceptibility of monoclonal IgG paraproteins (human serum), **202**, 367
meta-Cleavage pathway
  Pseudomonas cepacia AC1100, for metabolism of phenoxyacetic acid and phenol, identification, **204**, 983
Cleavage sites
  DNA, streptonigrin-induced topoisomerase II, exhibition of base preferences in middle of enzyme stagger (human), **203**, 1259
Clonality
  in precancerous disease states and early stages of tumor progression, hypoxanthine phosphoribosyltransferase encoding gene, PCR analysis (human), **199**, 511
Cloning
  G protein-coupled receptors structurally related to mammalian FSH, TSH, LH/CG receptor family (sea anemone), **197**, 1062; *erratum,* **200**, 668
  L-type and M-type fructose 2, 6-bisphosphate 2-phosphatase/fructose 6-phosphate 2-kinase cDNA (frog), **198**, 1099; *erratum*, **200**, 1769
  vasoactive intestinal polypeptide receptor from SUP-T1 lymphoblasts (human), **205**, 1617
Clostridium botulinum
  neurotoxin G, proteolysis of rat synaptobrevin 2 Ala^{81}-Ala^{82} bond, **200**, 829
Clusterin
  in brain, purification and characterization (human), **204**, 1131
CNS, *see* Central nervous system
Cobalt
  stimulation of vascular endothelial growth factor mRNA expression in cardiac cells (rat), **204**, 794
Coccolysin
  inactivation of human endothelin at bonds with hydrophobic amino acid residues (*Enterococcus faecalis*), **200**, 981
Coding
  multiple-channel fractal information, mammalian nerve signals, **199**, 911
Coenzyme Q_{10}
  dosage-related effects on breast cancer (human), **199**, 1504
Cofactors
  plasma, role in lipopolysaccharide priming of basophil mediator release (human), **203**, 1295
Colchicine
  induction of apoptosis in differentiating neuroblastoma cells (human), **199**, 807
Colforsin
  effect on intracellular pH increase during meiosis in *Xenopus laevis* oocytes, **205**, 979
Collagen
  breakdown in nasal cartilage, prevention by TIMP, TIMP-2, and BB87 (bovine), **201**, 94
  induced platelet aggregation, inhibition by jararhagin-C from snake venom (human), **201**, 331
  induction in osteoblastic MC3T3-E1 cells, effect of nerve growth factor (human), **205**, 1187
  insulin-like growth factor 1, expression by osteoblasts, stimulation by calcitonin (mouse), **199**, 876
  intracellular, impaired synthesis, role in deduced proliferation in cultured hepatocytes (rat), **200**, 1701

sugar-induced structural alterations, inhibition by aspirin and other compounds (human), **199**, 683
synthesis by perisinusoidal stellate cells, modulation by extracellular matrix and L-ascorbic acid 2-phosphate (rat), **200**, 999
type II, antigenic determinant closely associated with age-related abnormal modification (human), **200**, 1641
type V, 92-kDa gelatinase cleavage site (rabbit synovial cells), **202**, 328

Collagenase
inhibition by peptidyl hydroxamic acid (human, tadpole), **199**, 1442
secretion from skin fibroblasts, stimulation by tissue inhibitor of metalloproteinase-1 (human), **203**, 874

Collagen gel
fibroblast-induced contraction, effect of retinoic acid (human gingiva), **205**, 455

Colon
particulate gyanylate cyclase, activation by guanylin (rat), **203**, 1432

Colony-stimulating factor 1
and phorbol ester, effects on phospholipase D activity in bone marrow-derived macrophages (mouse), **201**, 733

Colony-stimulating factors, *see specific types*

Colupulone
and chromium, effects on glucose tolerance and hepatic cytochrome P450 in diabetic and nondiabetic mice, **200**, 1455

Complement
activation, regulatory antigen 512, molecular cloning (rat), **198**, 819
activation by liposomes and liposome-encapsulated hemoglobin: evidence for anti-lipid antibodies and alternative pathway activation (rat), **205**, 255
C3, cleavage by p57 membrane proteinase generated by erythrocyte ankyrin (human), **204**, 453
C3b, factor H affinity, effect of glycosaminoglycan interaction with factor H polyanion binding site (human), **198**, 52
mediated hemolysis, effects of brain clusterin (human), **204**, 1131

Complementary DNA
L-type and M-type fructose 2, 6-bisphosphate 2-phosphatase/fructose 6-phosphate 2-kinase and expression in skeletal muscle (frog), **198**, 1099; *erratum*, **200**, 1769
N-acetylglucosaminyltransferase V, cloning and chromosomal mapping (human), **198**, 318; *erratum*, **200**, 668
α-adrenergic receptors α1A, α1B, and α1C subtypes, cloning, expression, and characterization (human), **201**, 1296
adrenomedullin precursor, cloning and characterization (human), **194**, 720; *erratum*, **202**, 643
alcohol dehydrogenase class IV, cloning and sequencing (human), **203**, 219
ALD protein, nonsense mutation, identification in adrenoleukodystrophy-affected patient, **198**, 632
angiotensin converting enzyme from stroke-prone spontaneously hypertensive and Wistar-Kyoto rats, cloning, **198**, 380
angiotensin II AT$_2$ receptor, molecular cloning (human), **205**, 645
angiotensin II type 1 receptor subtype AT$_{1b}$R
and AT$_{1A}$R, signal transduction after expression in transfected CHO cells (human), **199**, 475
cloning and expression (human), **199**, 467
apoprotein region from insoluble mucin complex of small intestine, molecular cloning (rat), **198**, 181
aryl hydrocarbon receptor gene promoter, cloning and analysis (human), **203**, 615
AT$_{1a}$ receptor, as model for structure-function relationship analysis (rat), **199**, 1347
bone marrow stromal cell antigen 1, molecular cloning (mouse), **203**, 1309
bone morphogenetic protein type IA receptor, cloning and expression during BMP-induced ectopic bone formation (rat), **204**, 203
bovine prostaglandin F$_{2\alpha}$ receptors, tranfection into CHO cells, **200**, 756
E-cadherin, cloning and sequencing (human), **200**, 1754
calmitine, cloning: identity with calsequestrine (human), **203**, 1477
α(E)-catenin, molecular cloning: identification of alternative splice forms (human), **203**, 1691
CD38-homologous protein, cloning and expression in pancreatic islets (rat), **202**, 629
cloning, in analysis of luteal cell expression of monocyte chemoattractant protein-2 (pig), **205**, 148
complement regulatory antigen 512, cloning (rat), **198**, 819
creatine transporter hCRT-BS2M, cloning and expression in tissues and COS-7 cells (human), **204**, 419
Cry j I allergen of Japanese cedar pollen, cloning and sequencing, **199**, 619
Cry j II allergen of Japanese cedar pollen, isolation and expression, **201**, 1021
γ-crystallins from hybrid teleostean fish, characterization: multiple isoforms, **202**, 527
cytosolic purine 5′-nucleotidase, molecular cloning (human placenta), **205**, 917
encoding PfRan homolog of Ran/TC4 GTP-binding protein,

cloning and expression (*Plasmodium falciparum*), **201**, 423
endothelin-converting enzyme, cloning and expression in CH0-K1 cells (bovine), **203**, 1417
eotaxin, cloning (guinea pig lung), **205**, 788
erythrocyte NADPH-flavin reductase, cloning and sequencing (human), **198**, 1170
estrogen sulfotransferase, cloning and expression (human liver), **200**, 1621
expressed at high level in cultured senescent fibroblasts, subtractive cDNA library enriched in, preparation (human), **199**, 1108
fibroblast growth factor receptor 1 soluble form, cloning (human), **203**, 1781
fructose 1,6-bisphosphatase, isolation from monocytes, liver, and kidney (human), **199**, 687
fructose 6-phosphate 2-kinase:fructose 2,6-bisphosphatase, cloning and tissue specific expression (rat brain), **198**, 335
galactocerebrosidase, isolation and characterization (human), **198**, 485
glucagon receptor
  characterization (human liver), **198**, 328
  isolation (rat), **205**, 347
glucose-6-phosphatase catalytic subunit, expression in Fao hepatoma cells, multihormone regulation (rat), **201**, 302
Golgi antigen recognized by autoantibodies from chronic rheumatoid arthritis patient, molecular cloning and sequence analysis (human), **205**, 1399
G protein-coupled receptor kinase 4 isoforms, cloning (human), **199**, 848
G protein-coupled receptor structurally related to mammalian FSH, TSH, LH/CG receptor family, molecular cloning (sea anemone), **197**, 1062; *erratum*, **200**, 668
hCDC10, homologous to CDC10 in *Saccharomyces cerevisiae*, cloning (human), **202**, 82
heparin-binding protein HBp15, isolation and sequencing (human, mouse, pig), **199**, 706
hepatic cytosolic acetoacetyl-CoA thiolase, cloning and sequencing (human), **201**, 478
HMGI-C phosphoprotein, cloning, sequencing, and expression (human), **201**, 63
2α-hydroxysteroid dehydrogenase, isolation and characterization (rat corpus luteum), **201**, 1289
IGF I receptor, cloning: structural analysis of rat and human IGF 1 and insulin receptors, **202**, 1038
inducible nitric-oxide synthase 5′-flanking region, nucleotide sequencing (human), **200**, 802
kenix-like protease PACE4, isoforms, identification (human), **200**, 943; *erratum*, **204**, 1381
keratinocyte, 607 randomly isolated sequences, analysis (human), **202**, 976
kexin-like protease PC7 and isoforms, homologous to PACE4A, characterization, and expression in brain (rat), **202**, 1452
L-lactate dehydrogenase, nucleotide and deduced amino acid sequences (*Caenorhabditis elegans*), **205**, 558
lactoferrin, characterization: assignment of relevant locus to bovine U12 synteny group (goat), **203**, 1324
leucine zipper putative protein kinase, cloning and sequence analysis (human brain), **202**, 613; *erratum*, **205**, 1494
LIM-containing protein developmentally regulated in heart, isolation and characterization (human), **205**, 497
L-type and M-type fructose 2,6-bisphosphatase 2-phosphatase/fructose 6-phosphate 2-kinase and expression in skeletal muscle (frog), **198**, 1099; *erratum*, **200**, 1769
lysosome-associated membrane protein-2, isolation and sequencing (human), **205**, 1
lysyl oxidase from myofibroblasts from fibrotic liver, characterization (mouse), **199**, 587
MAGE-1-related genes, cloning and analysis (human), **202**, 549
major histocompatibility complex class II *DRA* gene, isolation and characterization (bovine), **204**, 195
MAP kinase-activated protein kinase 2, cloning and sequencing (human), **200**, 1118
mast cell protease 1, cloning and development of specific probes for gene transcript, **199**, 593
MC5 melanocortin receptor cloning and characterization (rat), **200**, 1007
metallothionein, PCR-cloning (goldfish, tilapia), **205**, 368
mIA-2, isolated from brain, sequencing, bacterial expression, and relationship to protein tyrosine phosphatases (mouse), **204**, 930
mitochondrial fatty acid β-oxidation trifunctional protein subunits, structural analysis (human), **199**, 818
monocyte chemoattractant protein-1, cloning, in analysis of MCP-1 expression in luteal cells (pig), **199**, 962
monocyte chemoattractant protein-1 receptor, cloning and functional expression (human), **202**, 1156
monocyte chemotactic protein-3, macrophage-derived, cloning: identity with MARC/FIC (mouse), **201**, 493
natural resistance-associated macrophage protein, isolation and characterization (human), **204**, 1074
neuronatin mRNA highly expressed in neonatal brain, cloning (rat), **201**, 1227
neutrophil gelatinase-associated lipocalin, molecular cloning and expression in various fetal and adult tissues (human), **202**, 1468
nuclear antigen bearing DEAD-box RNA helicase motif,

cloning and sequencing (human), **199**, 748
  nuclear receptor Rev-ErbAβ, isolation and characterization (rat), **204**, 49
  κ-opioid receptor and homolog, isolation and analysis (mouse), **205**, 1353
  κ-opioid receptor, isolation and characterization (human), **202**, 1431
  peroxisomal acyl-CoA oxidase, molecular cloning and functional expression (human), **198**, 1113
  phospholipase C-α, molecular cloning and characterization: redesignation proposal (bovine), **204**, 375
  pigment-dispersing hormone precursors, cloning: identification of novel member of PDH neuropeptide family (blue crab), **205**, 410
  prostacyclin synthase, cloning and characterization (bovine), **203**, 59
  prostacyclin synthase, cloning and expression (human), **200**, 1728
  prostaglandin E receptor EP_3 subtype, murine, mediation of calcium signals in transfected CHO cells via G_i, **204**, 303
  prostaglandin E2 receptor subtype EP3, cloning and expression (human), **198**, 999
  protein kinase with leucine zipper-like sequences and catalytic domain homologous to protein kinase C (human hippocampus), **199**, 897
  protein-tyrosine phosphatase, with homology to band 4.1, cloning and expression in T-lineage cells (murine thymus), **203**, 479
  RAC protein kinase α and β, molecular cloning and association with protein kinase C ¿ (rat), **205**, 817
  ribosomal proteins
    L13, sequence (rat), **201**, 102
    L15, sequence (rat), **201**, 108
    S11, cloning and sequencing (*Xenopus laevis*), **203**, 768
    S23, deduced amino acid sequence (rat), **202**, 314
  secretin, nucleotide sequencing (mouse), **200**, 1066
  S1 elongation factor-1α, cloning: evolutionary pathway (human, mouse), **203**, 1371
  small intestinal library, isolation of bacterial P-type ATPases with histidine-rich heavy-metal-associated sequences (human), **205**, 1644
  superfast myosin light chain 2 from cat, cDNA isolation and structure and evidence for identiy of human homolog, **200**, 1277
  thermolabile phenol sulfotransferase, cloning, expression and characterization (human liver), **198**, 1119
  transcobalamin II from patients with TC II deficiency, nonsense mutations in, detection (human), **204**, 1111
  transforming growth factor-β_1, regulation of TGF-β_1 expression (human), **204**, 1061
  transforming growth factor-β receptor type I requiring type II receptor for binding, isolation (mouse), **198**, 1063
  transglutaminase, molecular cloning and characterization from library (human), **203**, 1117
  α-tropomyosin cardiac isoform, cloning, sequencing, and expression (*Ambystoma mexicanum*), **203**, 319
  tropomyosin-related, encoding transmembrane protein with highly basic C-terminal region, isolation (*Saccharomyces cerevisiae*), **199**, 1363
  UV-inducible clones, isolation from *Schizosaccharomyces pombe*, **202**, 1113
  vascular cell adhesion molecule, cloning and expression kinetics (swine), **201**, 805
  vascular-type vasopressin receptor, cloning, functional expression, and tissue distribution (human), **203**, 72
  vasoactive intestinal peptide receptor-related proteins, cloning and functional expression in COS-7 cells (human), **200**, 769
  venom protease with β-fibrinogenase activity, sequence analysis (Taiwan habu), **205**, 1707
  water channel protein CHIP29, from ocular ciliary epithelium, cloning (bovine), **204**, 861
  xanthine dehydrogenase, cloning and tissue expression (human liver), **199**, 998
  zinc finger proteins
    Br140, homologous to TFIID TAF250 subunit, cloning, sequencing, and immunolocalization (human), **198**, 1143
    FIII/YY1, isolation and sequencing (*Xenopus laevis*), **205**, 1236
Complementation
  Δ*sspA* mutation by glutathione *S*-transferase–SspA fusion binding to RNA polymerase, role in phage P1 replication (*Escherichia coli*), **201**, 123
Complement-inhibiting factors
  27- to 28-kDa glycoprotein, isolation and partial characterization (*Cuscuta europea*), **202**, 186
Compound I
  formation in reaction between cytochrome $P450_{cam}$ and *m*-chloroperbenzoic acid, **201**, 1464
Compound motion model
  in interpretation of time-resolved fluorescence anisotropy of diphenylhexatriene–phosphatidylcholine, **201**, 709
Concanamycin A
  inhibition of enveloped animal virus entry into cells, role of pH gradient, **201**, 1270
Concanavalin A
  polylysine and histone conjugates, lectin with, directed gene transfer to airway epithelial cells (human), **205**, 826

- Condensation
  - chromatin structure, induction by 90-kDa heat shock protein (rat), **202**, 1657
- Conductance
  - potassium-selective and venturicidin-sensitive, F_0 purified from mitochondria and reconstituted in planar lipid bilayers (bovine heart), **203**, 1005
- Conformation, *see also* Molecular structure
  - based mapping, amyloid peptides from putative neurotoxic 25-35 region, **205**, 120
  - based NMR and molecular modeling of *N*-alkylated benzazepinones: CNS agent design motifs, **205**, 98
  - calcitonin gene-related peptide constrained analogues, **202**, 497
  - cyanometmyoglobin, changes after electron transfer, monitoring by magnetically induced circular dichroism spectroscopy, **205**, 1724
  - Emp-AKH neuropeptide, analysis by combined ^{1}H NMR and molecular mechanics (praying mantis), **198**, 228
  - right handed 16 residue peptide helix, effect of insertion of potentially helix breaking D-Phe-Pro sequence in center, **202**, 241
  - RNA polymerase, changes during transcription initiation, intrinsic fluorescence as probe (*Escherichia coli*), **201**, 820
- Conglutinin
  - gene organization and 5′-flanking region sequence (bovine), **198**, 597
- Connective tissue matrix
  - role in phorbol ester activation of aortic wall contraction (guinea pig), **199**, 944
- ω-Conotoxin
  - sensitive N-type Ca^{2+} channels, α1 subunit, surface expression in neuroblastoma cells, modulation by anti-β2 subunit antisense oligonucleotides (human), **201**, 180
- Consensus sequence
  - BCL6 transcription factor DNA recognition sequence (human), **204**, 366
- Conservation
  - evolutionary, recombinase activating gene 1, **205**, 687
- Contractile activity
  - and behavior as motilin receptor antagonists, motilin synthetic analogs (rabbit duodenal muscle), **205**, 449
- Contraction
  - aortic wall, non-actomyosin component, activation by phorbol ester (guinea pig), **199**, 944
  - collagen gel, fibroblast-induced, effect of retinoic acid (human gingiva), **205**, 455
  - myometrial smooth muscle, oxytocin-stimulated, inhibition by neomycin (rat), **205**, 245
  - oviduct, endothelin-1-induced, modulation by endogenous nitric oxide (bovine), **201**, 143
- Contrapsins, *see* Serine protease inhibitors
- Control elements
  - multiple growth-related, in regulation of upstream binding factor gene (mouse), **205**, 1217
- Controlled release systems
  - matrix-type device for basic fibroblast growth factor release, **201**, 1066
- Copper
  - content, in liver, heart, and brain of copper-deficient rat, differential decrease, **203**, 1028
  - ions, induction of copper ATPases CopA and CopB (*Enterococcus hirae*), **202**, 44
- Corazonin
  - gene isolation and structure (*Drosophila melanogaster*), **204**, 292
- Coronary disease
  - protective effects of alcohol against, mediation by vascular alcohol dehydrogenase (human), **203**, 1858
- Corpus luteum
  - isolation and characterization of cDNA encoding 2α-hydroxysteroid dehydrogenase (rat), **201**, 1289
- Corpus striatum
  - β/A4 amyloid precursor protein processing, effects of reserpination (rat brain), **202**, 293
- Cortical cells
  - cultures undergoing synaptogenesis, microtubule-associated protein 1B, identification as substrate of ecto-protein kinase (rat), **205**, 1467
- Corticosteroids
  - apoptotic response of WEHI 231 cells to, mediation by ceramide (mouse), **202**, 710
- Corticotropin-releasing factor
  - immunoreactive, secretion by B and T cells in response to cellular stress factors (human), **204**, 828
  - responses to, in characterization of activin A-, AB-, and B-responding pituitary cells (rat), **203**, 1739
  - stimulation of Ca^{2+} influx in cultured astrocytes (rat), **199**, 1103
- Corticotropin-releasing factor receptors
  - variant with 40-amino-acid deletion in amino-terminal domain, cloning, expression, and pharmacology (human), **205**, 1836
- Corticotropin-releasing hormone
  - effect on pituitary cells (rat), **199**, 1436
  - role in induction of pituitary sensitivity to interleukin-1 (rat), **198**, 480

Corynebacterium glutamicum
  tryptophan-hyperproducing strain, sequence encoding resistance to 5-methyltryptophan, characterization, **201**, 1255
  tryptophan operon, constitutive internal promoter in, analysis, **203**, 820
Coumarin
  hydroxylation by cytochromes P450 2A10 and 2A11, structure–function analysis (rabbit), **203**, 373
Creatine
  transport by putative rat choline transporter CHOT-1 (human embryonic kidney cells), **198**, 637
Creatine transporter
  hCRT-BS2M, cDNA, cloning and expression in various tissues (human), **204**, 419
Crosslinking
  and bundling, associated activity of smooth muscle filamin, and filamin–actin binding, double exponential analysis, **203**, 338
  CD28 in leukemic Jurkat cells, effect on protein tyrosine kinase $P56^{lck}$ (human), **199**, 1466
  hemoglobin by bis(3,5-dibromosalicyl) sebacate (human), **203**, 1463
  microtubules by phosphofructokinase, ligand modulation, **204**, 585
Crotalase, *see* Venombin A
Cryo-electron microscopy
  in analysis of calcium-induced change in skeletal muscle thin filament 3D structure (rabbit), **203**, 951; *erratum,* **205**, 976
Cryopreservation
  hepatic, in glycerol and antifreeze glycoprotein solution, subsequent function and morphology (rat), **200**, 732
Crystallins
  αA and αB, glycation by glucose, site selectivity (bovine eye), **201**, 1451
  γ, from hybrid teleostean fish, characterization: multiple isoforms, **202**, 527
Crystallites
  quantum, cadmium sulfide, role in cadmium resistance in *Candida glabrata,* **200**, 1193
Crystallization
  monodisperse maltoporin, from wild-type and mutant strains of enterobacteriaceae, **199**, 767
Crystals
  α,α-di-n-propylglycine, structure: coexistence of folded and extended conformations, **198**, 424
Crystal structure
  Taka-amylase A and porcine pancreatic α-amylase, and model building calculations, in determination of α-amylase catalytic mechanism, **204**, 297
C-type natriuretic peptide
  detection in circulation, and determination of plasma levels in septic shock patients, **198**, 1177
  inhibition of intimal thickening of carotid artery after baloon catheter injury (rabbit), **204**, 1051
  stimulated cGMP production in pituitary AtT-20 tumor cells, inhibition by activation of protein kinase C by phorbol esters (mouse), **204**, 1381
  vascular action in isolated coronary arteries and coronary vascular smooth muscle cells (pig), **205**, 765
Culture media
  gastric cancer cells, soluble form of K-*sam*/fibroblast growth factor receptor protein in, characterization (human), **202**, 1387
  ovarian carcinoma cells, soluble P-glycoprotein detection (human), **203**, 506
  Sertoli cell-enriched, purification of gonadotropin surge-inhibiting factor (rat), **199**, 1229
Culture medium
  glial conditioned, effect of amyloid precursor protein expression in neuroblastoma cells (human), **198**, 504
CV-11974
  and captopril, effects on endothelin-1 secretion following nephrectomy (rat mesenteric artery), **202**, 246
4-Cyano-5,5-bis(methoxyphenyl)-4-pentenoic acid
  antagonization of thrombin receptor signals by inhibition of NF-κB activation (human), **203**, 1181
Cyanometmyoglobin
  conformational change after electron transfer, kinetics, monitoring by magnetically induced circular dichroism spectroscopy, **205**, 1724
Cyclic ADP-ribose
  hydrolysis and methanolysis, catalysis by spleen $NAD(P)^+$ glycohydrolase, mechanism (bovine), **204**, 1279
Cyclic AMP
  accumulation, inhibition by human α_2A-C10 and α_2C-C4 receptor subtypes in CHO cells, relationship to G_i coupling (human), **199**, 869
  accumulation in CHO cells, stimulation by islet amyloid polypeptide via porcine calcitonin receptor, **205**, 1226
  activation of magnesium efflux via Na/Mg antiporter in ascites cells (mouse), **202**, 1209
  –adenosine A_2 receptor system, identification in aortic endothelial cells (human), **199**, 905
  attenuation, in alteration of phosphoinositide metabolism, role of H-*ras* oncogene (mouse), **205**, 1121
  and Ca^{2+}, differential regulation of μ^- and m^- calpain in perfused heart (rat), **202**, 1197

dependent cholecystokinin secretion pathway, and CCK release, functional coupling in RIN rat islet tumor cells, **200**, 1382
inhibition of cyclin G1 and cyclin G1-dependent protein kinase in astrocytes (mouse), **205**, 923
inhibition of insulin-stimulated mitogen-activated protein kinase pathway in hepatoma H4EII cells (rat), **202**, 1104
limited modulation of mitogen-activated protein kinase pathway in parotid acinar cells (rat), **202**, 743
modulation of cytochrome P4502A5 expression and inducibility by phenobarbital in primary hepatocytes (mouse), **205**, 631
and phenylalanine, differential effects on calcium-dependent calmodulin kinase II, regulation of cholecystokinin secretion (murine intestinal cells), **201**, 1483
potentiation of K252a-induced polyploidization in Meth-A cells (mouse), **205**, 746
production in starved yeast cells, effects of D-glucose anomer additions, **203**, 640
regulation of hepatic glucose-6-phosphatase gene expression in Fao hepatoma cells (rat), **201**, 302
second messenger, effect of melanotropin peptides α-MSH, MTI, and MTII (human), **204**, 1137
stimulation of carboxyl methylation of protein phosphatase 2A from *Xenopus laevis* eggs, **198**, 372
vassopressin-induced, formation in immortalized TKC2 cells, stimulation by vassopressin receptor V1 and V2 subtypes, mechanistic comparison (mouse), **202**, 680

Cyclic AMP-dependent protein kinase, *see* Protein kinase A

Cyclic AMP responsive element
  functional, detection in thrombomodulin gene 3′-untranslated region (human), **200**, 1391

Cyclic GMP
  C-type natriuretic peptide-stimulated, production in pituitary AtT-20 tumor cells, inhibition by phorbol ester activation of protein kinase C (mouse), **204**, 1318
  –inositol(1,4,5)trisphosphate cascade, role in eclosion hormone-mediated signal transduction in abdominal ganglia (*Bombyx mori*), **198**, 613

Cyclic strain
  stimulation of dephosphorylation of 20-kDa regulatiory myosin light chain in vascular smooth muscle cells (bovine aorta), **205**, 79

Cyclin
  –cdk2 complexes, localization in nucleus (HeLa cells), **203**, 1527

Cyclin A
  microsomal localization in proliferating liver cells (rat), **201**, 1072

Cyclin B1
  mRNAs, differential expression in rodent cells resulting from alternate polyadenylation (Chinese hamster, rat), **202**, 908

Cyclin D1
  expression in parathyroid cells, modulation by calcium (rat), **204**, 691
  mRNA expression
    during growth cycle and TGF-α-induced mitogenic transitions in primary hepatocytes (rat), **204**, 91
    in vascular endothelial cells, effects of TNP-470 (human), **204**, 1067

Cyclin D1/cdk2 kinase
  detection in G1 phase-specific protein complex Yi1 binding to thymidine kinase gene promoter (mouse), **205**, 1859

Cyclin-dependent kinase
  cdc2
    phosphorylation of dynamin, **202**, 1127
    potent inhibition by flavonoid L86-8275 (human breast cancer cells), **201**, 589
    role in thymocyte apoptosis (rat), **202**, 1400
    suppression by protein kinase C inhibitor ilmofosine (human), **199**, 937

Cyclin-dependent kinase-4 inhibitor
  –multiple tumor suppressor 1 gene, somatic mutations, detection in primary non-small cell lung carcinomas (human), **202**, 1426

Cyclin-dependent kinases
  cdc2 and cdk2, antisense oligonucleotides, suppression of neointimal smooth muscle cell accumulation in carotid artery *in vivo* (rat), **198**, 16
  cdc2–histone H1 kinase complex, in C108 carcinoma cells, hydroxystearic acid effects (mouse), **203**, 1385
  cdk2
    complexes with cyclin, localization in nucleus (HeLa cells), **203**, 1527
    microsomal localization in liver cells (rat), **201**, 1072
  cyclin G1, and cyclin G1 expression in astrocytes, inhibition by cAMP (mouse), **205**, 923

Cyclin E
  molecular cloning and characterization (mouse), **201**, 994

Cyclin G1
  expression, and cyclin G1-dependent protein kinase, inhibition by cAMP in astrocytes (mouse), **205**, 923

Cyclogenase 2
  interleukin-1β-inducted expression in A549 cells, suppression by dexamethasone, role of lipocortin-1 (human), **202**, 931

Cyclooxygenase
  de novo synthesis, in prostacyclin production by endothelial cells stimulated by ancrod-formed fibrin (human umbilical vein), **203**, 1920
  and 12-lipoxygenase, arachidonic acid metabolism pathways in intact platelets, effects of L-arginine and sodium nitroprusside (human), **200**, 1630
  regulation in amnion at term, role of mRNA binding proteins (human), **203**, 67
  types 1 and 2, mRNA, levels in amnion at term (human), **198**, 304
Cyclosporin A
  inhibition of tumor necrosis factor-α induction in B cells (human), **204**, 383
  peptidyl-propyl *cis-trans* isomerase sensitive to, from *Holobacterium cutirubrum*, identification and purification, **198**, 466
Cylindrospermopsin
  toxicity in cultured hepatocytes, role of glutathione (rat), **201**, 235
Cysteine
  in bioassay discrimination between nitric oxide and nitroxyl, **201**, 54
  cluster-coordinating, ferredoxin, structural features revealed by 2D TOCSY ^{1}H NMR on oxidized protein (*Clostridium pasteurianum*), **202**, 591
  Cys-949, role in binding of transforming growth factor β1 and β2 to α_2-macroglobulin (human), **200**, 1578
  fish antifreeze protein rich in, production in Sf21 cells as active proprotein precursor (sea raven), **203**, 1851
  functional residues in galactosyltransferase, identification (human), **204**, 701
  residue 524 in insulin receptor, role in intermolecular disulfide bond (human), **205**, 1891
  single mutant, in probe of location of disulfide bond in LamB protein (*Escherichia coli*), **201**, 242
  substitutions in recombinant keratinocyte growth factor, effect on mitogenic activity and stability (human), **205**, 872
Cystic fibrosis
  tracheal cells from patients, increased coexpression of CFTR and S100 calcium binding protein MRP8 and MRP14 mRNAs, **201**, 1518
Cystic fibrosis transmembrane conductance regulator
  expression in epithelial cells, link to constitutive mucin secretion (canine gallbladder), **203**, 1457
  gene, transduced L cells, effect on acidification of L cell endosomes, **205**, 396
  role in efflux of neutral amino acids (murine fibroblasts), **204**, 653
  and S100 calcium binding proteins MRP8 and MRP14, mRNAs, increased coexpression in tracheal gland cells from cystic fibrosis patients, **201**, 1518
Cytochrome b_5
  interaction with cytochrome P450 2B1: role of Lys-122 and Arg-125 residues in binding inhibition by synthetic peptides (rat liver microsomes), **201**,1090
Cytochrome b_{558}
  small subunit, region adjacent to His-94 in, corresponding peptides, inhibition of superoxide generation in cell-free system derived from neutrophils (human), **204**, 924
Cytochrome C_{549}
  dihemic, purification and characterization (*Pseudomonas nautica*), **199**, 1289
Cytochrome C_{554}
  methione replacement as axial ligand at high pH: absorption, EPR, and MCD spectroscopy (*Achromobacter cycloclastes*), **204**, 120
Cytochrome *c* nitrite reductase
  ammonia-forming, molecular composition and spectroscopic properties (*Sulfurospirillum deleyianum*), **205**, 911
Cytochrome-*c* oxidase
  nitric oxide binding to, characterization by infrared spectroscopy (bovine heart), **204**, 537
  proteoliposomal, image analysis and tungsten-tantalum shadowing (bovine heart), **203**, 331
Cytochrome O
  soluble, *vgb* gene, oxygen dependent regulation, evidence for positive regulation by transcriptional activator FNR (*Vitreoscilla*), **202**, 535
Cytochrome P450
  102, FAD/NADP$^+$ domain, isolation and properties (*Bacillus megaterium*), **203**, 162
  1A1
    dependent benzo[*a*]pyrene hydroxylase activity, reduction by dietary ellagic acid without alteration of levels of CYP1A1 protein or mRNA (rat liver), **201**, 1477
    gene promotor regulation by retinoid receptors: presence of retinoid responsive element (human), **201**, 1205
    levels in hepatocytes *in vitro*, effect of thiabendazole (rabbit), **202**, 1483
  1A1, 1A2, 3A4, and 3A5, catalytic activity toward benzo[*a*]pyrene and isomers of associated proximate carcinogen in COS-7 cells (human), **192**, 1373; *erratum*, **203**, 1935
  1A1, 3A, and 2B1, induction in skin by pyridine (mouse), **199**, 1400
  1A2
    acetaminophen effects, relationship to toxicity (mouse),

203, 532
expression in liver, inhibition by ionic lead (rat), **200**, 1086
2A5, expression and inducibility by phenobarbital, modulation by cAMP in primary hepatocytes (mouse), **205**, 631
2A10 and 2A11, structure-function analysis for activities toward testosterone and coumarin (rabbit), **203**, 373
3A
induction by ethylbenzene without alternation of RNA levels (rat), **202**, 1259
induction in liver, correlation with binding of inducers to microsomal proteins (rat), **201**, 973
19A1, human placental, baculovirus-mediated high-level expression, **201**, 694
and associated reductase, fatty acid hydroxylase as fused protein containing, evidence (*Fusarium oxysporum*), **202**, 586
2B1, interaction with cytochrome b_5: role of Lys-122 and Arg-125 residues in binding inhibition by synthetic peptides (rat liver microsomes), **201**,1090
2B4, flavins binding to, in creation of semi-artificial hydroxylating enzymes, **200**, 722
and cytochrome P450 reductase, isobutene-forming reaction catalyzed by, reconstitution: decarboxylation with formation of isobutene (*Rhodotorula minuta*), **201**, 516
2E1
acetaminophen effects, relationship to toxicity (mouse), **203**, 532
expression in hepatic tissue, effect of malotilate (rat), **200**, 1414
induction in liver, kidney, brain, and intestine during chronic ethanol administration and withdrawal: evidence for short half-life of CYP2E1 (rat), **205**, 1064
NADPH-cytochrome P450 reductase interaction, role of NH_2 terminal region (rabbit), **203**, 156
production and activity in HepG2 cells, ethanol effects (human), **203**, 727
role in (ω-1)-hydroxylation of lauric acid in hepatic microsomes (rat), **203**, 1168
encoding genes, diversity in mosquito, **205**, 1452
hepatic, and glucose tolerance, in diabetic and nondiabetic mice, effects of colupulone and chromium, **200**, 1455
hepatic and pulmonary isoforms, effect of cigarette smoke (mouse), **202**, 1731
phenobarbital and dexamethasone coadministration effects (rat liver microsomes), **203**, 351
role in naphthalic acid anhydride- and phenobarbitol-induced microsomal hydroxylation of oleic acid (*Triticum aestivum*), **198**, 795
Cytochrome $P450_{BM-3}$
encoding gene, protein-binding DNA regions in and near (*Bacillus megaterium*), **198**, 862
heme domain, in flavin-supported fatty acid oxidation (*Bacillus megaterium*), **203**, 1745
Cytochrome $P450_{CAM}$
ferric, reaction with *m*-chloroperbenzoic acid, compound I formation, in, **201**, 1464
ferrous, spectral intermediate in reaction with superoxide dismutase (*Pseudomonas putida*), **201**, 1349
oxidation of low-molecular-weight chloroalkanes (*Pseudomonas putida* G786), **201**, 373
Cytochrome $P450_{14DM}$
pRT-9 clone in liver with high homology to yeast lanosterol 14-demethylase (rat), **201**, 1320
Cytochrome P450 reductase
and cytochrome P450, isobutene-forming reaction catalyzed by, reconstitution: decarboxylation with formation of isobutene (*Rhodotorula minuta*), **201**, 516
Cytochrome $P450_{scc}$
modified precursor, in studies on protein import into mitochondria (rat liver), **203**, 866
Cytokine-induced neutrophil chemoattractant/growth-related oncogene
effects on interleukin-6 secretion by posterior pituitary cells *in vitro* (rat), **200**, 742
Cytokines, *see also specific cytokines*
expression of inducible nitric oxide synthase in lung epithelial cell in response to, and effects of corticosteroids (mouse), **198**, 835
outer surfaces, comparative structural patterns, **201**, 1396
production, suppression by α-fetoprotein (transgenic mouse), **201**, 1154
proinflammatory, modulation of interleukin-8-related KC/gro protein release from hepatocytes (rat), **203**, 1398
regulation of alternative splicing of fibronectin IIICS domain (human), **199**, 1005
Cytokinesis
mutants deficient in, isolation by restriction enzyme-mediated integration of blastocidin S resistance marker (*Dictyostelium discoideum*), **205**, 1808
Cytomegalovirus
binding to endothelial cell-surface form of annexin II (human), **198**, 983
co-occurrence of CArG boxes and ternary complex factor binding sites in genome, **205**, 545
major immediate-early promoter, Tat from, TAR-independent transactivation by, role of HIV-1 *env* gene sequence (mouse), **203**, 1152
murine, protease and capsid assembly protein genes, cloning

  and sequencing, **203**, 472
Cytopathicity
  HIV, inhibition by short terminally phosphorylated oligoriboguanylic acids, **203**, 1244
Cytoskeleton
  detergent-extracted fractions from, actin filament adenine nucleotides, phosphorylation states, **201**, 1490
  function, impairment by natural killer cells, cell death caused by, effect of 3-aminobenzamide (human), **199**, 1250
  interaction with protein 4.1 and spectrin, mediation of platelet physiological response (human), **198**, 111
  rearrangement in M14 melanoma cells, induction by 3-aminobenzamide (human), **202**, 915
Cytosol
  associated domain, KDR VEGF-receptor, bacterially expressed, biological activity and phosphorylation sites, **205**, 728
  guanosine GTPγS-treated, disintegration of lysosomes in vitro (rat), **198**, 869
  hepatic, retinoic acid synthesis, role of retinal oxidase and retinal dehydrogenase (rabbit), **205**, 1278
Cytotoxicity
  6-biopterin to melanocytes (human), **204**, 43
  cylindrospermopsin in cultured hepatocytes, role of glutathione (rat), **201**, 235
  Kupffer cell-mediated, hepatoma cells, role of nitric oxide (rat), **201**, 1175
  PUVA, γ-rays, and UVC to V79 cells, effect of polyamine depletion, **201**, 1
  quaternized ellipticines to human brain tumor cells, cellular uptake as determinant, **200**, 1762
  selective, transformed and normal fibroblasts by sialoglycopeptide in presence of TNF-α (mouse), **205**, 215
Cytotoxin B
  hyperphosphorylation of calnexin (*Clostridium difficile*), **203**, 22
Cytotrophoblasts
  DNA synthesis in primary culture, effects of stem cell factor (human), **205**, 1762

D

DDT, *see* 1,1′-(2,2,2-Trichloroethylidene)*bis*[4-chlorobenzene]
Decarboxylation
  aminoethylcysteine ketimine, dimer and product, inhibition of mitochondrial respiration by impairment of electron transport Complex I (bovine), **199**, 755
  in mechanism of isobutene formation catalyzed by isobutene-forming activity reconstituted with cytochrome P450 and P450 reductase purified from *Rhodotorula minuta*, **201**, 516
Decidua
  as source of serum soluble interleukin-6 receptor: gestational profile of msIL-6R concentration (rat), **205**, 998
Decomposition
  peroxynitrite, electron spin resonance spin trapping analysis: lack of hydroxyl radical production, **203**, 1515
Deenergization
  potent and reversible, mitochondria at low oxygen tension, induction by nitric oxide (rat), **204**, 169
Defibrotide
  aptamer sequences acting as thrombin antagonists *in vitro*, isolation and identification (human), **200**, 933
Degenerative diseases
  association with inherited enhancement of hydroxy radical generation and lipid peroxidation in galactose cataractogenesis-sensitive (rat), **199**, 726
Degradation, *see also* Proteolysis
  amyloid β protein precursor extracellular form, mediation by ubiquitin (human), **203**, 1731
Degranulation
  goblet cells, in isolated pancreatic ducts, role of intracellular mediators (guinea pig), **205**, 423
Dehydroepiandrosterone, *see* Prasterone
Deiters cells
  organ of Corti, mechanical responses in phalangeal process, induction by photo-released intracellular calcium (guinea pig), **201**, 1263
Denaturation
  M_4 lactate dehydrogenase, protection by proline (rabbit muscle), **201**, 957
Deoxyadenosine 1-thiotriphosphate
  synthesis in single reaction vessel, procedure, **204**, 150
Deoxycytidine
  metabolism in cultured lymphocytes, 2-chloro-2′-deoxyadenosine effects (human), **203**, 1378
Deoxy-D-ribose
  induction of apoptosis in quiescent peripheral blood mononuclear cells (human), **201**, 1109
Deoxyglucose
  transport in 3T3-L1 adipocytes, insulin responsive, correlation with insulin receptor substrate-1 (human), **198**, 523
Deoxyguanosine 1-thiotriphosphate
  synthesis in single reaction vessel, procedure, **204**, 150
Deoxyribonuclease
  hypersensitive sites
    liver-specific, presence in intergenic region separating human plasminogen and apoprotein(a) genes, **205**, 930

progesterone receptor gene 5′ region (mouse), **205**, 1093
nuclear forms α, β, and γ, partial purification and characterization and analysis of changes during apoptosis (rat thymocytes), **203**, 789
Deoxyribonuclease I
digestion of liver cell nuclei, resulting release of casein kinase 2 and protein substrates (rat), **202**, 984
expression in CD4$^+$ T cells, induction by short immunomodulating peptides (human), **205**, 2008
footprinting, in identification of retina-specific footprint within retina-specific regulatory region of interphotoreceptor retinoid-binding protein gene (human), **203**, 1875
Deoxythymidine
metabolism in cultured lymphocytes, 2-chloro-2′-deoxyadenosine effects (human), **203**, 1378
2′-Deoxythymidine
base pairing with 8-amino-2′-deoxyadenosine, reverse Hoogsteen mode in solution, identification, **204**, 788
Deoxythymidine 1-thiotriphosphate
synthesis in single reaction vessel, procedure, **204**, 150
2′-Deoxythymidine 5′-triphosphate
enantiomeric, chiral discrimination by HIV-1 reverse transcriptase and eukaryotic DNA polymerases, **200**, 1023
Dephosphorylation
insulin receptors, inhibition by hexamer peptide containing phosphotyrosyl mimetic F_2Pmp (human), **204**, 129
modulation of calpastatin I and II specificity in various tissues (rat), **199**, 1326
p53 mutant, and nuclear accumulation, role in TPA-induced rhabdomyosarcoma cell differentiation (human), **202**, 17
20-kDa regulatory myosin light chain, stimulation by cyclin strain in vascular smooth muscle cells (bovine aorta), **205**, 79
Deprotonation
bound glutathione, role in steady-state kinetics of glutathione transferase (human placenta), **200**, 1428
Derapril
down-regulation of vascular natriuretic peptide receptor gene expression in hypertensive rat, **205**, 1595
Destruction box
cyclin-like, point mutation, stabilizing effect on yeast plasma membrane uracil permease stress-induced degradation, **201**, 769
Destruxin B
inhibition of vacuolar-type H$^+$-translocating ATPase (fungus), **205**, 1358
Desulfovibrio vulgaris
NADH oxidase, purification, characterization, properties, and coupling to adenylyl phosphosulfate reductase, **203**, 839
Deuteroporphyrin IX
and analogs, erythroid differentiation induction in erythroleukemia K562 cells (human), **198**, 720
Development, *see also* Embryogenesis
annexin IX subcellular immunolocalization in tissues during, analysis (rat), **202**, 403
embryonic and postnatal, effects on glucose-dependent insulinotropic polypeptide gene expression (rat intestine), **201**, 964
follicular, menstrual cycle-associated, nitrite/nitrate circulating levels during, effects of ovarian/sex hormones (human), **202**, 1543
heart, transcriptional regulation during, analysis (rat), **202**, 838
osteogenic protein-1 localization during, and basement membrane binding affinity (human embryo), **198**, 693
postnatal
  epididymis, associated expression of multiple γ-glutamyl transpeptidase mRNAs (rat), **198**, 554
  submandibular gland, dolichol-P dependent *N*-acetylglucosamine-1-P transferase and ALG7 gene expression during, correlation (hamster), **204**, 284
related expression of *S*-adenosyl-L-homocysteine hydrolase, analysis (*Xenopus laevis*), **205**, 1539
skeletal muscle cells in culture, associated Na$^+$ channel density, Ca^{2+}/calmodulin-dependent regulation (chicken embryo), **203**, 852
testis, related changes in expression of testis-specific calcineurin B subunit isoform β1 (rat), **203**, 1275
Dexamethasone
binding to microsomes, effects of other cytochrome P4503A inducers (rat), **201**, 973
coadministration with phenobarbital, effects on liver P450 system (rat), **203**, 351
effects on
  cholesterol 7α-hydroxylase mRNA and *CYP7* gene expression in HepG2 cells (human), **198**, 546
  expression of inducible nitric oxide synthase in lung epithelial cells in response to cytokines (mouse), **198**, 835
  glycyrrhizin binding protein phosphorylation by casein kinase II *in vitro*, **198**, 1090
  insulin receptor carbohydrate chains (human, rat), **200**, 852
induced apoptosis in thymocytes, selective inhibition by herbimycin A (rat), **202**, 128
induction of angiotensin II type 1A receptor gene promoter (rat), **204**, 210
inhibition of
  inducible NO synthase expression in infarcted myocardi-

um (rabbit), **202**, 1120
nitric oxide production by microglial cells, role of protein kinase C (mouse), **199**, 633
regulation of hepatic glucose-6-phosphatase gene expression in Fao hepatoma cells (rat), **201**, 302
role as suppressor of elastin gene expression in cultured skin fibroblasts (human), **201**, 1189
role in prion-related protein gene expression regulation in rat endocrine pancreatic cells, **201**, 1220
suppression of interleukin-1β-induced cyclooxygenase 2 expression in A549 cells, role of lipocortin-1 (human), **202**, 931
treated embryo, differentiation, effects of overexpression of glucocorticoid receptors (*Xenopus laevis*), **199**, 734

12-Dexoyphorbol 13-phenylacetate 20-acetate
potentiation of glucocorticoid-mediated viral promoter induction in mammary carcinoma (mouse), **198**, 1183

Dextrins
linear, specific interaction with DNA in minor groove, **202**, 204

Diabetes
acute, effect on hepatic glucose-6-phosphatase activity and mRNA levels (rat), **205**, 680
affected rat, hepatocytes from, delayed processing of insulin proreceptor, **204**, 725
experimental, associated fatty acid-binding protein content increase in heart (rat), **199**, 639
spontaneous, affected mice, and nondiabetic mice, glucose tolerance and hepatic cytochrome P450, effects of colupulone and chromium, **200**, 1455
streptozotocin-induced, cardiac sarcoplasmic reticulum Ca^{2+}-ATPase expression, **203**, 113

Diabetes insipidus
congenital nephrogenic, affected patients, mutations in vasopressin receptor V_2 gene, **205**, 552

Diabetes mellitus
non-insulin-dependent, glycogen synthase and insulin receptor substrate-1 genes of Japanese subjects with, molecular scanning, **202**, 463
OLETF rat model, pancreatic expression of cholecystokinin-A receptor gene, **199**, 482
streptozotocin-induced, prevention by interleukin-1 receptor antagonist (mouse), **202**, 543

Diacylglycerol
production for nitric oxide synthesis in macrophages activated by IFN-γ and lipopolysaccharide, role of phosphatidylcholine-specific phospholipase C (mouse), **199**, 461

Diacylglycerol kinase
role in mitogenic signal transduction induced by platelet-derived growth factor in vascular smooth muscle cells (rat), **205**, 1338

Diadenosine polyphosphates
AP_4A and AD_3A, priming of neutrophil respiratory burst, role of intracellular calcium (human), **202**, 218

2,2-Dialkylglycine decarboxylase
aminotransferase homolog, identification (*Pseudomonas cepacia*), **198**, 138

N-Dialkylphenylphthalimides
enhancement of tumor necrosis factor α production (human), **205**, 1992

Dibenz(*a,h*)anthracene, *see* 1,2:5,6-Dibenzanthracene

1,2:5,6-Dibenzanthracene
effect on caffeine biotransformation in hepatocyte lines derived from normal liver tissue (human), **201**, 559

2,5-Di(*tert*-butyl)-1,4-benzohydroquinone
inhibition of Ca^{2+}-ATPase, role of hydroxyl moieties (rabbit), **199**, 916

3′,5-Dichlorodiphenylamine-2-carboxylic acid
inhibition of Na^+/I^- symporter in thyroid follicles *in vitro* (pig), **204**, 1265

1,2-Dichloropropane
oxidation by cytochrome $P450_{CAM}$ (*Pseudomonas putida* G786), **201**, 373

Dictyostelium discoideum
associated porins, structure and homologies with mitochondrial porins, **200**, 908
cytokinesis mutants, isolation by restriction enzyme-mediated integration of blastocidin S resistance marker, **205**, 1808
spore germination, protein phosphorylation during, stage-specific changes, role of calmodulin, **201**, 430

Dicyclohexylcarbodiimide
reactive sites in proteins, TFPACD as bifunctional reagent for reaction with, synthesis: studies with *Escherichia coli* ATP synthase, **201**, 635

2′,3′-Dideoxycytidine
activation in H9 cells
by acivicin (human), **202**, 1524
hydroxyurea effect (human), **205**, 92

Diet
copper-deficient rat, associated differential decrease of copper content and copper binding to superoxide dismutase in liver, heart, and brain, **203**, 1028
high-fat, effects on gene expression of GLUT4 and insulin receptor in soleus muscle (rat), **202**, 519
hypercholesterolemic, effect on hepatocyte susceptibility to mouse hepatitis virus type 3: correlation with membrane fluidity, **204**, 1299

  - α-lipoic acid-supplemented, prevention of vitamin E deficiency symptoms (mouse), **204**, 98
  - omega-3 and omega-6 lipid-rich, effects on proinflammatory cytokine and superoxide dismutase expression in murine lupus nephritis, **200**, 893
  - restricted, modulation of growth hormone regulation of skeletal muscle myosin heavy chain mRNA levels in hypophysectomized rat, **198**, 97
  - specific B vitamin-deprived, effects on splenocyte proliferation *in vitro* (mouse), **198**, 451
  - very-low-calorie, effects on *in vivo* status of glucose and insulin, assessment in isolated lymphocytes (human), **202**, 1169
- Diethylenetriaminepentaacetic acid
  - inhibitory effect on collagen (human), **199**, 683
- Diethylmaleate
  - and oxygen, in regulation of ferritin synthesis in macrophages (mouse), **201**, 38
- Differential display
  - for gene analysis, improvements (mouse), **199**, 564
- Differentiation
  - after dexamethasone treatment, effects of overexpression of glucocorticoid receptor (*Xenopus laevis* embryo), **199**, 734
  - associated antigen 3G11, expressed by murine helper T lymphocytes, identification as ganglioside $IV^3(NeuAc)_2$-$GgOse_4Cer$, **200**, 1557
  - cardiac myocytes, induction by 3,5,3′-triiodo-L-thyronine in P19 teratocarcinoma cells, associated preferential binding of RGG(T/A)CA direct repeats spaced by 4 base pairs in DNA (mouse), **205**, 1899
  - cardiomyocytes and neurons, dose-dependent effect of 3,5,3′-triiodo-L-thyronine (P19 cells), **205**, 652
  - chemical-induced, implications of differential expression of protein kinase C isoform genes in erythroleukemia cell variants (mouse), **204**, 461
  - chondrogenic, limb mesenchymal cells, phorbol ester-inhibited, expression of homeobox-containing gene *Msx1* and lack of gap junctional communication (chicken embryo), **205**, 429
  - erythroid, in K562 cells
    - erythropoietin-induced, inhibition by antisense *src* RNA (human), **201**, 1534
    - induction by protoporphyrin IX and analogs (human), **198**, 720
  - HL-60 cells
    - associated calcium-binding protein pEL98 expression (human), **202**, 94
    - phorbol ester-induced, hydroxyl radicals as early signal involved in, **200**, 1650
    - proteoglycan synthesis during, **203**, 1682
  - morphological, in neuronal cells, induction by apigenin (rat), **204**, 578
  - neural, activation of helix-loop-helix proteins Id1, Id2, and Id3 (rat), **199**, 1355
  - neuroblastoma cells
    - apoptotic cell death associated, induction by colchicine (human), **199**, 807
    - role of plasma membrane ganglioside sialidase (human), **199**, 1188
  - NG108-15 cells
    - associated regulation of protein kinase C (mouse), **201**, 135
    - role of Ca^{2+}-independent protein kinase C (mouse), **203**, 1423
  - osteoblasts, cell responses to TGF-β_1 during, regulation at receptor level by 1,25-dihydroxyvitamin D_3 (human), **204**, 918
  - osteoclasts, stimulation by persistent c-*fos* expression (chicken), **205**, 1547
  - preadipocytes, synergistic action of fatty acids and retinoids (mouse), **204**, 498
  - and proliferation and pepsinogen gene expression, in gastric mucosal cells, effects of adrenalectomy and hydrocortisone replacement (rat), **202**, 1
  - promyelocytic leukemia cells *in vitro*, myeloblastin and myeloperoxidase expression during, comparison (human), **200**, 1130
  - rhabdomyosarcoma cells, TPA-induced, role of dephosphorylation and nuclear accumulation of mutant p53 (human), **202**, 17
  - satellite cells, regulation by macrophages (human), **202**, 1688
  - teratomatous, in male germ cell tumors, correlation with loss of heterozygosity and decreased expression of *NME* genes (human), **202**, 1096
  - thymocytes, modulation by cholinergic stimulation via nicotinic effect on thymic epithelium (mouse), **203**, 1057
  - U937 cells, synergistic induction by all-*trans* retinoic acid and 1α,25-dihydroxyvitamin D_3, association with retinoid X receptor α expression, **203**, 272
- Difluoromethylornithine
  - depletion of polyamines in V79 cells, effect on cytotoxic response to PUVA, γ-rays, and UVC, **201**, 1
- Dihydrofolate reductase
  - cytosolic, mitochondrial import, direction by mitochondrial aspartate aminotransferase N-terminal region *in vitro*, **201**, 1059
- Dihydrolipoic acid
  - effects on c-*fos* expression in Jurkat T cells (human), **200**, 1136

5α-Dihydrotestosterone
  stimulation of mineralization and increase of androgen receptors in osteoblast-like osteosarcoma cells (human), **204**, 905
1α,25-Dihydroxy-7-dehydrocholesterol
  and 1α,25$(OH)_2$-lumisterol$_3$, functional differentiation between vitamin D nuclear and membrane receptors (chicken), **201**, 394
1α,25-Dihydroxylumisterol$_3$
  and 1α,25$(OH)_2$-7-dehydrocholesterol, functional differentiation between vitamin D nuclear and membrane receptors (chicken), **201**, 394
2,6-Dihydroxypyridine
  combination with 5-fluorouracil, subsequent increase in micronucleus induction (mouse), **203**, 1124
1,25-Dihydroxyvitamin D_3
  in growth plate chondrocytes, effect of 24,25-dihydroxyvitamin D_3 *in vitro* (chicken), **202**, 1204
  modulation of responses to TGF-β_1 in osteoblastic cells during differentiation (human), **204**, 918
  and parathyroid hormone, synergistic induction of 1,25-dihydroxyvitamin D-24-hydroxylase in UMR-106 cells (rat), **205**, 674
  regulation of
    protein phosphorylation in kidney (rat), **204**, 807
    TGF-β isoforms 1–4 expression in limb bud mesenchymal cells (chicken embryo), **204**, 975
  responsive promoter region, identification in Spot35/calbindin-D28k gene (mouse), **204**, 889
1α,25-Dihydroxyvitamin D_3
  and all-*trans* retinoic acid, synergistic induction of U937 cell differentiation, association with retinoid X receptor α expression (human), **203**, 272
  analogs, functional differentiation between vitamin D nuclear and membrane receptors (chicken), **201**, 394
  effect on expression of ribonucleic acids in osteoblast-like cells (human, rat), **201**, 861
  gene promotor, vitamin D receptor homodimer-type response element in, identification (rat), **202**, 1366
  induction of tissue transglutaminase in peritoneal macrophages, role of GTP-binding proteins (mouse), **203**, 1773
1,25-Dihydroxyvitamin D-24-hydroxylase
  synergistic induction in UMR-106 cells by parathyroid hormone and 1,25-dihydroxyvitamin D_3 (rat), **205**, 674
24,25-Dihydroxyvitamin D_3
  effect on 1,25-dihydroxyvitamin D_3 in growth plate chondrocytes *in vitro* (chicken), **202**, 1204
Diltiazem
  and α-tocopherol, antioxidant activity against low-density lipoprotein oxidation *in vitro*, comparison (human), **203**, 1803
Dimaprit
  analogues, inhibition of tyrosinase via disulfide breakdown product independently of histamine H_2 receptor (human melanoma cells), **201**, 687
Dimer dissociation reaction
  apohemoglobin, kinetics (human), **199**, 1278
Dimerization
  HIV Tat protein: genetic test-based detection and homodimer inhibitor selection, **201**, 701
16,16-Dimethyl-15-dehydroprostaglandin B_1
  trimeric derivative Tri-Calciphor, *see* Tri-Calciphor
Dimethylmercury
  induction of cerebellar neuron apoptosis in primary culture (rat), **204**, 310
Dimethyl sulfoxide
  effects on 5-lipoxygenase induction and activity in HL-60 cells (human), **205**, 1572
  induced granulocytic differentiation in HL-60 cells, associated increased alkaline phosphatase activity and decreased protein kinase C activity, potentiation by sphinganine, **199**, 888
Dinitrosyl iron complexes
  biotransformation of sodium nitroprusside into, in ascites tumors (mouse), **202**, 168
α,α-Di-*n*-propylglycine
  crystal structure, coexistence of folded and extended conformations, **198**, 424
Dinucleotides
  adenylated, *see* Adenylated dinucleotides
Dipalmitoylphosphatidic acid
  modified staphylococcal protein A-containing monolayer, on both solution and slide surfaces, characterization, **200**, 1463
  monolayer, staphylococcal protein A-containing, characterization on aqueous and solid surfaces, **201**, 1242
Dipeptides
  400 by 400 dipeptide substitution matrix for analysis of amino acid substitution during divergent evolution, **199**, 489
  opioid-selective, synthesis, **198**, 933
  synthetic, potentially helix breaking D-Phe-Pro sequence, incorporation in center of right-handed 16 residue peptide helix, **202**, 241
Dipeptidyl-peptidase IV
  epithelial, regional expression in intestines (human), **203**, 1224
Diphenylamine-2-carboxylic acid, *see* *N*-Phenylanthranilic acid

- Diphenylhexatriene–phosphatidylcholine
  - time-resolved fluorescence anisotropy, interpretation with compound motion model, **201**, 709
- Discharges
  - mammalian nerve signals, multiple-channel fractal information coding, **199**, 911
- Disintegrins
  - albolabrin, bitistatin, echistatin, and eristostatin, crosslinking sites on platelet integrin GPIIb/IIIa, characterization (human), **202**, 135
- Disulfide bonds
  - calcitonin gene-related peptide analogues constrained by, synthesis and testing, **202**, 497
  - in LamB protein, probe of location by single-cysteine mutants (*Escherichia coli*), **201**, 242
- Disulfide isomerase
  - analogous activity by insulin-like growth factors and IGF binding protein-3, role of complex formation, **198**, 1225
- Disulfides
  - reduction by superoxide *in vitro:* possible model of intracellular redox modulation, **200**, 1586
- 5,5′-Dithiobis(2-nitrobenzoic acid)
  - reduction by superoxide *in vitro:* possible model of intracellular redox modulation, **200**, 1586
- 2,2′-Dithiobis(5- nitropyridine)
  - effects on Ca^{2+} and K^{+} channel currents in pancreatic β cells (mouse), **200**, 860
- 1,2-Dithiolane-3-pentanoate, *see* α-Lipoate
- Dithiothreitol
  - stimulation of insulin receptor autophosphorylation at juxtamembrane domain (human), **201**, 1439
- Dityrosine bridges
  - detection in bovine thyroglobulin and role of iodination in formation, **202**, 38
- DM-nitrophen
  - photolysis, associated [Ca^{2+}]$_i$ increase, role in evoked mechanical response of Deiters cells of organ of Corti (guinea pig), **201**, 1263
- DMSO, *see* Dimethyl sulfoxide
- DNA
  - 5-aminodansyl-containing, netrosin binding in minor groove, monitoring with probe conjugate in major groove, **203**, 53; *erratum,* **204**, 437
  - binding of
    - Egr-1 transcription factor phosphorylated and non-phosphorylated forms, comparison (NIH3T3 cells), **200**, 1271
    - heat shock transcription factor occurrence in hepatocytes in form uncoupled from transcriptional activity (rat), **201**, 552
    - P1 and P2 protamines, role of zinc (human spermatozoa), **201**, 1197
    - transcription factor encoded by mutant *mi* locus, loss (mouse), **205**, 1299
  - binding proteins
    - MDR-NF1/YB-1, role in actinomycin D-induced MDR1 gene expression (human), **199**, 1428
    - *QUAD*, stabilization of tetrahelical DNA, **205**, 305
    - serum response factor-associated ETS proteins: ternary complex factors and PEA3-binding factor, **201**, 1406
  - *cis* element, conferring activation of GM-CSF in embryonal carcinoma cells, identification (human), **198**, 473
  - cleavage at 5′-AGG by chromoprotein C-1027, effect on binding mode and cutting site, **205**, 1533
  - coeffector, binding to HSV-1 encoded helicase-primase complex and UL9 origin binding protein, site characterization (human), **199**, 1333
  - concentration determination, comparison of spectrometric and autophotographic methods, **203**, 834
  - damage-specific incison, measurement by nucleotide excision repair *in vitro* (human), **202**, 788
  - discontinuous DNA replication: Okazaki fragments (*Escherichia coli*), **198**, 844
  - double strand breaks, induction by sulfur trioxide anion radicals, **205**, 141
  - double-stranded, stimulated protein kinase, inhibiting 41-kDa protein, detection in proliferating HL-60 cells and purification (human), **202**, 1530
  - enhancers, *see* Enhancers
  - excision repair enzymes, uv-induced, detection in *Schizosaccharomyces pombe* protein extracts, **198**, 770
  - expression library, isolation of cDNA for LIM protein with autoepitope homologous to senescent cell antigen (human fetal liver), **201**, 1124
  - flanking Alu elements, sequence, effect on Alu transcription *in vitro*, **203**, 845
  - four-way junction, competition between linker histones and high mobility group protein 1 for binding: implications for transcription (bovine, chicken), **203**, 1904
  - genomic, neutrophil-activating peptide ENA-78, characterization (human), **205**, 612
  - glucocorticoid receptor domain binding to, fusion protein with catalytic domain of poly(ADP-ribose) polymerase, expression and characterization (*Escherichia coli*), **202**, 880
  - helix, aromatic staking and bending by individual repeat units, RNA polymerase II carboxy-terminal domain (calf thymus), **198**, 712
  - high-molecular-weight fragments, formation in thymocyte apoptosis, role of Ca^{2+} (human), **202**, 120

high-molecular-weight multimers of oligonucleotides, synthesis, PCR-based technique, **205**, 475
HIV-1, long terminal repeats
  mapping of DNA topoisomerase I and II cleavage sites, **205**, 1601
  targeting by hammerhead ribozyme, **203**, 889
interaction with cisplatin, in generation of superoxide anion in cell-free system (bovine thymus), **203**, 1175
joining, VDJP-mediated, effects of distance and end configuration, **202**, 1134
leukocytes, analysis for mutations in congenital hereditary cataract and microphthalmia (miniature Schnauzer dog), **203**, 1663
LINE 1 element, retrotransposition, induction of deletion in target DNA: model for both deletion and variable length duplication (*Drosophila melanogaster*), **202**, 111
mitochondrial
  cardiac, fragmentation associated with premature aging (human), **202**, 102
  deletions
    associated levels of mitochondrial transcription factor A (human), **200**, 1374
    association with homoplasmic point mutation in ocular myopathy (human), **202**, 1606
    4977-bp, and respiratory chain enzyme activities, correlation in aging skeletal muscles (human), **205**, 772
    in polymyalgia rheumatica (human muscle), **205**, 375
    in senescent brain (mouse), **202**, 654
  NADH dehydrogenase, mutations at nucleotide 5460, relation to Alzheimer's disease (human brain), **203**, 745
NFκB, binding in epithelial cells, induction by oxidative stress (human), **199**, 1518
oxidative damage in stimulated neutrophil-like cells, induction by calyculin A (human), **205**, 1803
pBluescript, strand scission, induction by S-nitrosothiol with H_2O_2 (*Escherichia coli*), **200**, 966
plasmid, *see* Plasmids
protein-binding regions, in and near cytochrome P450bm-3 gene (*Bacillus megaterium*), **198**, 862
–protein complex
  mediation of strand exchange, role of DNA helicase, **205**, 1004
  sequence-specific, inhibition of bacteriophage T4 dda helicase-mediated DNA unwinding and ATP hydrolysis (*Escherichia coli*), **198**, 1070
rearrangements, association with inherited enhancement of hydroxyl radical generation and lipid peroxidation in galactose cataractogenesis-sensitive rat, **199**, 726
recombinant, in production of human parathyroid hormone hPTH(1–34), **200**, 1735
response element, *see* Response elements
RGG(T/A)CA direct repeats spaced by 4 base pairs, preferential binding associated with cardiac myocyte differentiation induced by 3,5,3′-triiodo-L-thyronine in P19 teratocarcinoma cells (mouse), **205**, 1899
silencer elements, globin promoter-specific, localization to δ-globin gene upstream region (human), **204**, 413
single-stranded
  binding proteins, recognizing octamer motif in IgH gene, identification (mouse), **200**, 1307
  peptides with affinity for, selection with phage display library, **204**, 849
strand exchange, mediation by DNA–protein complex, role of DNA helicase, **205**, 1004
streptonigrin-induced topoisomerase II cleavage sites, exhibition of base preferences in middle of enzyme stagger (human), **203**, 1259
–sugar molecular recognition: specific interaction of α-1,4-glucopyranose chains with DNA in minor groove, **202**, 204
target, interaction with ferric uptake regulation protein, analyses by gel retardation, footprinting, and electron microscopy, **201**, 346
template, and other *in vitro* system components, separate irradiation with He-Ne laser, subsequent increase in transcription and translation activities, **203**, 991
tetrahelical, stabilization by quadruplex DNA binding protein *QUAD*, **205**, 305
triplex, efficient unwinding by DNA helicase, **204**, 1119
two *EcoRII* recognition sites, interaction with two *EcoRII* restriction endonuclease subunits (human), **198**, 885
unwinding, bacteriophage T4 dda helicase-mediated, inhibition by sequence, specific DNA-protein complex (*Escherichia coli*), **198**, 1070
UV-induced fragmentation after bromodeoxyuridine sensitization in B16 melanoma cells: impaired c-*jun* induction and defective tyrosine phosphorylation signaling, **203**, 1629
DNA (cytosine-5-)-methyltransferase
  baculovirus-mediated high-level expression in Sf21 cells (mouse), **204**, 1003
DNA damage
  differential mediation by organic peroxides and H_2O_2, implications for absestos carcinogenesis (calf thymus), **200**, 687
DNA-directed DNA polymerase
  eukaryotic, chiral discrimination of enantiomeric 2′-deoxythymidine 5′-triphosphate, **200**, 1023

DNA-directed RNA polymerase
  binding of glutathione *S*-transferase–SspA fusion, subsequent complementation of Δ*sspA* mutation, role in phage P1 replication (Escherichia coli), **201**, 123
  carboxy-terminal domain, individual repeat units, aromatic stacking and bending of DNA helix (calf thymus), **198**, 712
  intrinsic fluorescence, as probe for conformational changes during transcription initiation (*Escherichia coli*), **201**, 820
DNA libraries
  cDNA, prostate, molecular cloning and characterization of transglutaminase cDNA (human), **203**, 1117
  subtractive, enriched in cDNAs expressed at high levels in cultured senescent fibroblasts, preparation (human), **199**, 1108
DNA markers
  microsatellite, genetic instability in chromosome 9 q22.3-q31 region in skin squamous cell carcinomas (human), **201**, 1495
  polymorphic, distinguishing inbred strains of mice, identification with arbitrary single short primers, **203**, 659
DNA polymerase
  meiotic, enhancement by meiotic protein factor (*Coprinus cinereus*), **198**, 1232
DNA polymerase-δ auxiliary factor, *see* Proliferating cell nuclear antigen
DNA polymorphisms, *see also specific types*
  (CA) repeat, endothelial nitric-oxide synthase gene, identification (human), **198**, 1027
  glycogen synthase and insulin receptor substrate-1 genes, analysis in Japanese subjects with non-insulin-dependent diabetes mellitus, **202**, 463
  inbred mouse strains, identification by random amplified polymorphic DNA assay, **203**, 659
  in L-isoaspartyl/D-aspartyl methyltransferase gene, resulting in amino acid changes (human), **203**, 491
  structural, dopamine D_2 receptor gene, association with alcoholism, **204**, 1199
  thyroid peroxidase, and TPO expression, in thyroid cancer (human), **198**, 948
DNA probes
  dansyl fluorescent, in major groove, correlation with netrosin binding to 5-aminodansyl-dU-DNA in minor groove, **203**, 53; *erratum,* **204**, 437
DNA recognition sequence
  putative transcription factor, BCL6, determination (human), **204**, 366
DNase, *see* Deoxyribonuclease
DNase-I, *see* Deoxyribonuclease I
DNA synthesis
  activation in vascular smooth muscle cells by low-density lipoprotein and positively charged proteins: role of polycationic nature of apolipoprotein B (human), **203**, 1700
  CCl 39 cells, regulation, role of iron at cell surface, **203**, 16
  cell cycle oscillation, inhibition by butyrolactone I (*Xenopus laevis*), **198**, 536
  in chondrocytes, synergistic stimulation by histatin and epidermal growth factor (rabbit), **198**, 274
  in Cockayne cells, restoration after UV irradiation, role of polyamines (human), **205**, 1018
  in hepatocytes, inhibition by elevated glucose levels *in vitro* (rat), **202**, 1476
  oxalate-induced initiation in LLC-PK1 cells (porcine kidney), **205**, 1632
  in primary cultured cytotrophoblasts, effects of stem cell factor (human), **205**, 1762
  simian virus 40 daughter chromosomes, inverse relationship between catenation and superhelicity (CV-1 cells), **201**, 1510
  in vascular endothelial cells, effects of TNP-470 (human), **204**, 1067
  in vascular smooth muscle cells, effect of erythropoietin (rat), **199**, 977
DNA topoisomerase
  types I and II, cleavage sites in HIV-1 DNA promoter region, **205**, 1601
Dolichol-phosphate-dependent *N*-acetylglucosamine-1-phosphate transferase
  developmental regulation and tissue-specific expression (hamster), **204**, 284
Dolichyl phosphate
  role in glycosylation defects in carbohydrate-deficient-glycoprotein syndrome (human), **200**, 816
Dopachrome isomerase
  isozyme patterns in *Manduca sexta,* ontogeny, **200**, 1072
Dopachrome tautomerase
  slaty gene product TRP2 as, functional analysis and effect of point mutation on catalytic function (mouse), **202**, 1060
  as zinc-containing enzyme, identification (mouse), **204**, 1243
Dopamine
  inhibition of thyrotropin-releasing hormone-induced MAP kinase activation in dispersed anterior pituitary cells (rat), **201**, 642
Dopamine D_2 receptors
  and chimeras, *in vitro* translation, analysis by subtype-specific antibodies (mouse), **205**, 1460

encoding gene, structural polymorphism, association with alcoholism, **204**, 1199
SER311CYS polymorphism, detection by mismatch PCR RFLP and relationship to schizophrenia (human), **202**, 757
Dopamine β-monooxygenase
reduction site, similarity of ascorbate oxidase substrate specificity, **203**, 1471
Double exponential analysis
filamin-actin binding and cross-linking/bundling at different temperatures, **203**, 338
Doxorubicin
induction of myoglobin oxidation, **204**, 30
stimulation of myoglobin-dependent lipid peroxidation, **204**, 23
topoisomerase II-independent toxicity in TN-368 insect cells and murine fibroblasts, **198**, 582
Drug delivery
controlled release system, *see* Controlled release system
Drug resistance
[^{3}H]tamoxifen aziridine as affinity probe for P-glycoprotein in multidrug-resistant cells (hamster lung), **202**, 606
increased phospholipase D activity in multidrug-resistant breast cancer cells (human), **202**, 211
Drugs
anticancer and antifungal, liposome encapsulation, **199**, 433
Dynamin
phosphorylation by cdc2 kinase (rat), **202**, 1127
Dystrophin
identification of repeating amino acid motif WWP, **205**, 1201

E

E5510, *see* 4-Cyano-5,5-bis(methoxyphenyl)-4-pentenoic acid
Echicetin
β subunit, isolation, characterization, and amino acid sequence (*Echis carinatus*), **205**, 68
Echistatin
crosslinking site on isolated platelet integrin GPIIb/IIIa, characterization (human), **202**, 135
Eclosion hormone
mediated signal transduction in abdominal ganglia, role of inositol(1,4,5)trisphosphate–cGMP cascade (*Bombyx mori*), **198**, 613
Ecto-protein kinase
identification of microtubule-associated protein 1B as substrate, in cortical cell cultures undergoing synaptogenesis (rat), **205**, 1467
Edema factor
Bacillus anthracis, structure–function analysis with monoclonal antibodies (mouse), **199**, 676
EF hand motif
mediation of calcium binding to nucleobindin (human, mouse), **199**, 1388
Egasyn, *see* Carboxylesterase ES-3
EGF, *see* Epidermal growth factor
Eggs, *see also* Oocytes
fertilization, effects of transglutaminase inhibition during (*Sphaerechinus granularis*), **205**, 565
hyperovulated, identification of Fas antigen associated with apoptosis (mouse), **203**, 1438
protein phosphatase 2A, carboxyl methylation, stimulation by cAMP and inhibition by okadaic acid (*Xenopus laevis*), **198**, 372
EIF-2, *see* Initiation factors
Elastin
gene expression in cultured skin fibroblasts, suppression by dexamethasone (human), **201**, 1189
promoter
activity in transgenic mouse, transforming growth factor-β effects (human), **203**, 485
identification of transforming growth factor-β responsive element (human), **199**, 1049
Electrical activity
pancreatic B cells, effects of osmotic changes in extracellular solution (mouse), **204**, 641
Electrical charge
surface, *see* Surface charge
Electric organ
excitation, induction by temperature changes (*Malapterurus electricus*), **200**, 704
Electrodes
platinum, in catalytic conversion of L-arginine to nitrate, **202**, 1347
Electromechanical transduction
from reduction-driven hydrophobic folding, demonstration in model protein to perform mechanical work, **204**, 230
Electron microscopy
in analysis of ferric uptake regulation protein interaction with target DNA, comparison with gel retardation and footprinting analyses, **201**, 346
Electron paramagnetic resonance
in analysis of
nitric oxide binding to intact erythrocytes (human), **203**, 176
nitric oxide production during liver regeneration (rat), **202**, 571; *erratum*, **203**, 743

  in characterization of high oxido-reduction potential rusticyanin from *Thiobacillus ferrooxidans*, **203**, 1655
  cytochrome c_{554}: methionine replacement of lysine as axial ligand at high pH (*Achromobacter cycloclastes*), **204**, 120
  nitric-oxide synthase activity measurement: NO spin trapping by nitronyl nitroxides (rat cerebellum), **202**, 195
  spectroscopic analysis of ammonia-forming cytochrome *c* nitrite reductase (*Sulfurospirillum deleyianum*), **205**, 911
  spin-labeled, in analysis of interaction of calmodulin with jujuboside A, **202**, 148
  spin trapping analysis of peroxynitrite decomposition: lack of hydroxyl radical production, **203**, 1515
Electron transfer
  cyanometmyoglobin-related, subsequent conformational changes, kinetics, monitoring by magnetically induced circular dichroism spectroscopy, **205**, 1724
  cytochrome P450 102 FAD/NADP$^+$ domain (*Bacillus megaterium*), **203**, 162
  NADPH-cytochrome P450 reductase–cytochrome P450 CYP2E1 interaction, role of CYP2E1 NH$_2$ terminal region (rabbit), **203**, 156
Electron transport
  Complex I, in mitochondrial respiration, inhibition by aminoethylcysteine ketimine decarboxylated dimer (bovine), **199**, 755
  concentration-related effects of aminoethylcysteine ketimine decarboxylated dimer protection of submitochondrial particles from lipid peroxidation (bovine heart), **205**, 264
  plasma membrane, inhibition by iron chelator (CCl 39 cells), **203**, 16
Electrophoresis
  high-performance capillary, in measurement of plasma nitrite and nitrate (human), **200**, 951
Electrospray–mass spectrometry
  trypsin, analysis (bovine), **199**, 694
Electrostatic interactions
  surface charge effects on redox potential of high potential sulfur-iron proteins (*R. globiformis, C. vinosum, R. gelatinosus, E. vacuolata, E. halophila*), **203**, 436
Elephantiasis
  chronic, diagnosis with IgG2–ELISA (human serum), **205**, 202
ELISA, *see* Enzyme-linked immunosorbent assay
Ellagic acid
  dietary, inhibition of benzo[a]pyrene hydroxylase without alteration of CYP1A1 protein or mRNA (rat liver), **201**, 1477
Ellipticines
  quaternary, cellular uptake as determinant of cytotoxicity to human brain tumor cells, **200**, 1762
Elongation factors
  EF-1α, second family member S1, cDNA cloning: evolutionary pathway (human, mouse), **203**, 1371
  EF-2, eukaryotic, identification as 100-kDa protein phosphorylated before embryonic myoblast fusion (chicken), **198**, 132
  eEF-2, from liver cells, multiformity (rat), **202**, 844
Embryo
  developing, hsp90α and hsp90β genes in, differential regulation (zebrafish), **204**, 746
  early, bone morphogenetic protein-2, biological activity (*Xenopus laevis*), **198**, 1267
  midgestation male, urogenital ridges, expression of *Xist* gene (mouse), **205**, 334
  osteogenic protein-1, localization during development and basement membrane binding affinity (human), **198**, 693
  1,10-phenanthroline teratology (*Xenopus laevis*), **200**, 1398
  preimplantation
    GLUT1 mRNA expression (mouse), **199**, 1525
    occurrance of circular and linear *Sry* gene transcripts (mouse), **198**, 492
Embryogenesis
  effects of transglutaminase inhibition during (*Sphaerechinus granularis*), **205**, 565
  glucocorticoid receptor transcript localization during, and overexpression effects on differentiation after dexamethasone treatment (*Xenopus laevis*), **199**, 734
  role of androgen-induced growth factor FGF-8 gene (mouse), **204**, 882
Embryoid bodies
  Brachyury(T), Nkx1.1, and *Pax* genes in, regulated expression (mouse), **199**, 552
Embryonic stem cells
  D3, expressed Oct-1 and Oct-3, binding by Rex-1 promoter octamer motif (mouse), **203**, 1795
  derived embryoid bodies, regulated expression of Brachyury(T), Nkx1.1, and *Pax* genes, **199**, 552
  p53 gene replacement with *lacZ* gene via two step homologous recombination (mouse), **202**, 830
  retinoid X receptor expression (mouse), **200**, 1252
Encephalomyopathies
  mitochondrial, associated point mutations, rapid and sensitive PCR screening method (human), **200**, 938
Encephalopathies
  spongiform, epilepsy with, associated *tremor* and *zwitter* genes, linkage to synaptobrevin-2 and prion protein

  - genes in spontaneously epileptic rat, **200**, 1161

Endocrine cells
- pancreatic, alpha and beta, prion-related protein gene expression, hormone regulation (rat), **201**, 1220

Endocytosis
- receptor-mediated, thrombin–antithrombin III complex by U937 cells, **200**, 1334

Endoglycanase
- bacteriophage-borne, specificity for native capsular polysaccharide and derived polymers, demonstration (*Klebsiella pneumoniae* SK1), **198**, 1128

Endoglycosylceramidase
- therapeutic use, inhibition of synchronous oscillations of intracellular Ca^{2+} in cultured cortical neurons (rat), **202**, 398

Endometrial cells
- Ishikawa, cathepsin D gene insensitivity to estradiol, relationship to estrogen response element sequence (human), **203**, 711

Endometrium
- uteroglobin gene promoter-binding factor, detection (rabbit), **204**, 273

Endo–β–*N*-acetylglucosaminidase
- transglycosylation activity (*Mucor hiemalis*), **203**, 244

Endonuclease
- site-specific, recognizing sequence 5′GCCGGC, in yeast mitochondria (yeast), **201**, 208

Endopeptidase
- CD10/Nep, inhibiting HIV Tat homodimer formation, selection with genetic system, **201**, 701

Endoplasmic reticulum
- β-*N*-acetylhexosaminidase exit from, role of pro-peptide of proβ-polypeptide chain (human), **204**, 135
- –Golgi system, site of plastoquinone synthesis in spinach leaves, **205**, 714

Endoribonuclease
- RNA-processing, Lettre Ehrlich ascite, tumor cell mitochondria, role in mRNA splicing (mouse), **196**, 47; *erratum*, **205**, 2013

Endosomes
- adenovirus-mediated lysis, mechanism: role of intact capsid structure (human), **205**, 1318
- L cell, acidification, effect of CFTR gene, **205**, 396
- and lysosomes, membrane fusion, role of G$_{M2}$ activator protein (human), **201**, 90

Endothelial cell activation factors
- released from activated platelets, induction of E-selectin expression and tumor cell adhesion to endothelial cells (human), **203**, 1605

Endothelial cells
- annexin II cell-surface form, binding to human cytomegalovirus (human), **198**, 983
- antioxidant defense system, activation by endogenous adenosine (bovine, human), **201**, 508
- aortic
  - adenosine A$_2$ receptor–cAMP system in, identification (human), **199**, 905
  - cGMP-dependent protein kinase, identification and possible localization (bovine), **201**, 531
  - cytosolic calcium levels *in situ*, and smooth muscle tension, effects of motilin (pig), **202**, 346
  - receptors for Amadori-modified glycated albumin, identification (mouse), **198**, 734; *erratum*, **199**, 1088
- cholesterol-poor, migration activity, effect of pretreatment with HMG-CoA reductase inhibitors (bovine), **203**, 1355
- coronary artery and aortic, characteristics in culture, comparison (pig), **202**, 504
- cultured, thrombomodulin expression, effect of fluid shear stress (human), **205**, 1345
- dermal microvascular, expression of NCAM 140-kDa isoform (human), **203**, 686
- E-selectin expression and tumor cell adhesion, induction by endothelial cell activation factors released from activated platelets (human), **203**, 1605
- free intracellular calcium, elevation by aldosterone, subcellular localization by single cell imaging (pig, rat), **204**, 475
- hyperadhesiveness of U937 cells, induction by oxidized low-density lipoprotein, indomethacin effects (human), **204**, 673
- ICAM-1 expression, and myelomonocytic cell expression of β$_2$-integrins and endothelial binding, genistein effects (human), **203**, 443
- KOP 2.16, intercellular adhesion, binding inhibition by L-selectin, effect of ligand clustering (mouse), **204**, 969
- mammalian, synthesis and secretion of adrenomedullin, **201**, 1160; *erratum*, **203**, 1363
- monolayers, leukocyte adhesion to, attenuation by tyrosine kinase inhibitors (human), **198**, 359
- nitric oxide production, ATP- and shear stress-dependent, *in vitro* stimulation by laminar flow (bovine), **198**, 213
- nitric oxide release, stimulatory effect of extracellular ATP, role of ecto-ATPase as ATP receptor (bovine aorta), **203**, 1237
- parathyroid hormone-related protein production, role in angiogenesis (human), **198**, 740
- pulmonary artery, chlorine efflux, induction by adenosine via

pertussis toxin-sensitive G protein (bovine), **204**, 1143
pulmonary microvascular, detection of cyclic GMP-dependent protein kinase (rat), **202**, 728
sinusoidal, isolated from regenerating liver, production of nitric oxide (rat), **204**, 1305
subjected to shear stress, stimulation of transcription factors NFκB and AP1 (bovine), **201**, 950
syndecan-1 gene expression (rat liver), **204**, 944
tetrahydrobiopterin, identification as endothelium-derived relaxing factor (human), **205**, 516
tetrahydrobiopterin synthesis, role in subsequent nitric oxide production (mouse), **199**, 504
thrombin-induced calcium influx and protein tyrosine phosphorylation, inhibition by herbimycin A (human), **202**, 1651
umbilical artery, nuclear import of angiogenin: nucleolar targeting signal (human), **203**, 1765
umbilical vein
  apoptosis, induction by lupus anticoagulant autoantibody, role of annexin V (human), **205**, 1488
  monolayers, monocyte adherence, cigarette smoking-induced increase (human), **203**, 929
  prostacyclin production, stimulation by ancrod-formed fibrin via *de novo* cyclooxygenase synthesis (human), **203**, 1920
  proteoglycan synthesis and distribution, comparative effects of thrombin and thrombin peptide activating receptor (human), **205**, 1625
  surfaces, differential adhesion on, induction by interleukin-1β (human), **202**, 866
  umbilical vein, thrombomodulin in, inhibition by thrombin receptor agonist peptide (human), **199**, 1262
vascular
  constitutive and inducible nitric oxide production, differential regulation by inflammatory stimuli (mouse), **202**, 450
  derived from mice lacking endothelin-1, isolation and characterization, **201**, 538
  DNA synthesis and c-myc and cyclin D1 mRNA expression in, effects of TNP-470 (human), **204**, 1067
  expression of prostacyclin-stimulating factor *in vitro* (bovine), **202**, 1490
  immunocytochemical detection of parathyroid hormone-related protein (bovine), **199**, 547
  proliferation, inhibition by exogenous nitric oxide (bovine), **203**, 1160
  tetrahydrobiopterin as secretory product (mouse), **203**, 1522
venous, vascular cell adhesion molecule expression kinetics (swine), **201**, 805
Endothelial growth factor, *see* Vascular endothelial growth factor
Endothelin-1
  accelerated release from mesenteric arteries following nephrectomy, augmentation by converting enzyme inhibitor (rat), **202**, 246
  activation of mitogen-activated protein kinases via independent signaling pathways in astrocytes (rat), **204**, 1325
  central, induced hypotension, effect of glutamate receptor blockade (rat), **205**, 795
  circulating, clearance, role of endothelin receptors ETA and ETB (rat), **199**, 1461
  inactivation by *Enterococcus faecalis*-derived coccolysin at bonds with hydrophobic amino acid residues (human), **200**, 981
  induced contraction of oviduct, modulation by endogenous nitric oxide (bovine), **201**, 143
  inhibition of insulin-stimulated glucose uptake in isolated adipocytes (rat), **202**, 688; *erratum*, **203**, 1363
  and phenylephrine, stimulated cardiomyocytes, phosphoinositide cycle responses (neonatal rat), **203**, 422
  production and responsiveness to ET-1 in cultured cardiac myocytes, effects of high and low levels of oxygen (rat), **202**, 1612
  release from isolated perfused adrenal gland, acute elevation in response to increasing flow rates and ACTH(1-24) (rat), **202**, 873
  secretion by coronary artery and aortic endothelial cells in culture, comparison (pig), **202**, 504
  stimulation of cytosolic phospholipase A_2 in CHO cells stably expressing human ET_A or ET_B receptor subtypes, **199**, 992
  vascular endothelial cells lacking, isolation and characterization (mouse), **201**, 538
Endothelin-converting enzyme
  cDNA cloning and expression in CHO-K1 cells (bovine), **203**, 1417
  CGS 26303 as inhibitor, pharmacological profile (rat), **204**, 407
Endothelin receptor antagonists
  cyclic hexapeptide, highly potent for receptor subtypes ET_A and ET_B, identification, **200**, 1708
Endothelin receptors
  ET_1, functional expression in melanoma cells (human), **201**, 449
  ET_2, mediation of intracellular calcium transients, antagonism by BQ123 (human), **200**, 679
  ET_A, selective antagonists, identification by pharmacophore-directed screening (human), **201**, 228

  - ET_A and ET_B
    - CHO cells stably expressing, cytosolic phospholipase A_2, stimulation by endothelin-1 (human), **199**, 992
    - contractile, mammary resistance arteries, characterization (human), **204**, 685
    - cyclic hexapeptide antagonists highly potent for both subtypes, identification, **200**, 1708
    - role in clearance of circulating endothelin-1 (rat), **199**, 1461
  - ET_{B1} and ET_{B2}, antagonist BQ-788, effects on blood vessels and small intestine (guinea pig, rabbit, rat), **205**, 168

- Endothelium
  - derived constitutive nitric-oxide synthase, increased expression in aorta during pregnancy (rat), **205**, 905
- Endothelium-derived relaxing factor, *see* Nitric oxide
- Endotoxic shock
  - effects on glucose transporters in fat, muscle, and liver tissues (rat), **198**, 923
  - therapeutic effect of imidazolineoxyl *N*-oxide by direct NO-scavenging (rat), **202**, 923
- Endotoxins
  - δ
    - *Bacillus thuringiensis, Choristoneura fumiferana* brush border membrane molecules binding, detection by crossed affinity immunoelectrophoresis, **199**, 1194
    - murine and rabbit antibodies against, production by injection of bacterial plasmid (*Bacillus thuringiensis*), **202**, 1227
  - induced growth suppression and food intake depression *in vivo,* effects of linoleic acid (mouse), **198**, 1107
  - induced vascular hyporeactivity to vasoconstrictor agents, role of activation of soluble guanylyl cyclase (rat aorta), **201**, 436
  - induction of reciprocal changes in hepatic nitric oxide synthesis, gluconeogenesis, and flux through phospho*enol*pyruvate carboxykinase (rat), **204**, 659
- Energy
  - production in mitochondria-like particles, role of lactate oxidation (*Setaria digitata*), **204**, 17
- Enhancer core element
  - cell type-dependent, localization in exon 5 of angiotensinogen gene (human), **205**, 1102
- Enhancers
  - HIV-1, NF-κB subunit binding, tumor necrosis factor α and interleukin-1β effects (human), **203**, 623
  - related function of 53-bp nucleotide sequence in 5′ flanking region of neutrophil elastase gene (human), **204**, 38
- Enolase, *see* Phosphopyruvate hydratase
- Entactin
  - binding to fibronectin, mediation by fibronectin 29-kDa amino terminal fragment and entactin G2 domain (human), **199**, 1509
- Enterobacteriaceae
  - wild-type and mutant strains, monodisperse maltoporin from, crystallization, **199**, 767
- *Enterococcus faecalis*
  - extracellular metalloendopeptidase coccolysin, inactivation of human endothelin at bonds with hydrophobic amino acid residues, **200**, 981
- *Enterococcus hirae*
  - Cu^{2+} and Ag^+ induction of ATPases CopA and CopB, and Ag^+ extrusion by CopB, **202**, 44
- Enterotoxins
  - staphylococcal, SEB, multiple MHC class II molecule binding regions, identification, **201**, 596
- Enzyme-linked immunosorbent assay
  - in detection of elevated basic fibroblast growth factor during early hours of *in vitro* angiogenesis (bovine), **205**, 1423
  - with IgG2, in diagnosis of chronic elephantiasis (human serum), **205**, 202
  - soluble gp30, establishment, and gp130 detection in ascitic fluids of tumor-bearing mice, **202**, 637
- Enzymes
  - kinetics, lipolysis, role of lipase interfacial binding, **200**, 1321
  - reactions with dilute substrates, time-course curves, determination from reverse reactions, **203**, 805
- Eosinophils
  - attractivity of human monocyte chemotactic proteins 2 and 3 for, and MCP-2 and -3 effects on chemotaxis towards RANTES (human), **200**, 1470
  - IgE-mediated activation
    - FcεRII/CD23 role (human bone marrow), **203**, 265
    - role of FcεRII/CD23 and L-arginine-dependent pathway (human), **203**, 265
- Eotaxin
  - cloning and increased mRNA expression in allergan-challenged lungs (guinea pig), **205**, 788
- Epidermal cells
  - 8-hydroxy-2′-deoxyguanosine after near-ultraviolet light exposure (hairless mouse), **201**, 1132
- Epidermal growth factor
  - –adenovirus type 2 conjugates, for protein delivery into cells (human), **203**, 582
  - effects on
    - insulin-induced glucokinase expression in hepatocytes (rat), **201**, 902
    - neurofibroma cell growth response in neurofibromatosis type 1 (rat), **198**, 827

  and histatin, synergistic stimulation of chondrocyte proliferation (rabbit), **198**, 274
  induced translocation of insulin-responsive glucose transporter GLUT4 (CHO cells), **205**, 857
  and insulin-like growth factor I, differential effects on directional accumulation and transfer of 2-aminoisobutyrate by placental trophoblast in two-sided culture (human), **199**, 922
  keratinocyte growth factor, effects on keratinocyte and fibroblast growth, modulation by protein kinase C inhibitor (human), **204**, 1081
  regulation of apolipoprotein synthesis in fetal intestine (human), **204**, 1340
  stimulation/inhibition of A431 cell proliferation, relation to MAP kinase activity (human), **203**, 984
  stimulation of follistatin production in cultured hepatocytes (rat), **202**, 422
Epidermal growth factor-like growth factor
  heparin-binding, *see* Heparin-binding EGF-like growth factor
Epidermal growth factor receptors
  autocrine inhibition by intracellular expression of single-chain antibody (NIH 3T3 cells), **204**, 666
Epidermis
  hyperproliferation, reversal by 13-hydroxyoctadecadienoic acid via selective inhibition of protein kinase C-β activity (guinea pig), **201**, 257
  ornithine decarboxylase activity, 12-O-tetradecanoylphorbol-13-acetate-induced modulation by calcium and verapamil (mouse), **199**, 582
Epididymis
  expression of G_{M2} activator protein (mouse), **204**, 741
  postnatal, multiple γ-glutamyl transpeptidase mRNA expression, developmental regulation (rat), **198**, 554
Epilepsy
  with spongiform encephalopathy, associated *tremor* and *zwitter* genes, linkage to synaptobrevin-2 and prion protein genes in spontaneously epileptic rat, **200**, 1161
Epinepherine
  induced aggregation and intracellular free calcium concentration in platelets, effects of propranolol and phentolamine (human), **202**, 1069
Epithelial cells
  airway
    cytosolic calcium levels, effect of menthol *in vitro* (dog), **201**, 1333
    expression of inducible nitric oxide synthase in response to cytokines (mouse), **198**, 835
    lectin conjugate-directed gene transfer (human), **205**, 826
  gall bladder, CFTR expression, link to constitutive mucin secretion (dog), **203**, 1457
  gastric mucosal, wound repair *in vitro*, role of extracellular matrix (rabbit), **202**, 285
  gastro-intestinal, growth in primary culture, stimulation by hepatocyte growth factor (rat), **205**, 1445
  intestinal
    dipeptidyl peptidase IV, regional expression (human), **203**, 1224
    proliferation and migration, modulation by hepatocyte growth factor/scatter factor (human), **202**, 701
  mammary, sensitivity to prolactin, effect of mouse mammary tumor virus receptor activation, **205**, 524
  nitric-oxide synthase mRNA expression and NFκB DNA binding, induction by oxidative stress (human), **199**, 1518
  pulmonary, nitric-oxide synthase expression and nitric oxide release, cytokine effects (human), **203**, 209
  related SH-EP cells, thrombin receptor activation, role of consecutive phenylalanine residues in thrombin receptor-tethered ligand peptides, **203**, 366
  renal, LLC-PK1, DNA synthesis, oxalate-induced initiation (pig), **205**, 1632
  retinal pigmented, nitric oxide production in response to interferon-γ and interleukin-1β (human), **198**, 120
Epithelium
  colonic, and colon cancer cell lines, neurotensin receptor protein and mRNA expression, binding studies and RT-PCR (human), **203**, 465
  mammary, mitogenic effects of keratinocyte and acidic fibroblast growth factors (mouse), **204**, 1165
  ocular ciliary, water channel protein CHIP29, cDNA homologous to CHIP28, cloning (bovine), **204**, 861
  seminiferous, apoptosis, induction by testosterone withdrawal during spermatogenesis *in vivo* (rat), **202**, 1315
  thymic, effect of nicotine, in cholinergic modulation of thymocyte apoptosis and differentiation (mouse), **203**, 1057
  tongue, intact, taste receptor proteins, direct extraction by liposome (frog), **201**, 415
Epitopes, *see also* Autoepitopes
  collagen II, close association with age-related abnormal modification (human), **200**, 1641
Epoxide hydrolase
  putative hydroxyacyl intermediate, isolation (mouse), **198**, 850
EPR, *see* Electron paramagnetic resonance
Eristostatin
  crosslinking site on isolated platelet integrin GPIIb/IIIa, characterization (human), **202**, 135
Erythroblasts
  immature, RhPI-α and RhPI-β mRNA isoforms expressed

in, identification (human), **198**, 1135

Erythrocytes
  from anemic Belgrade rat, α- and β-globin imbalance, **201**, 115
  ankyrin, generation of p57 membrane proteinase cleaving C3 (human), **204**, 453
  associated NADPH-flavin reductase cDNA, cloning and sequencing (human), **198**, 1170
  ATP-induced vesiculation, effect of incorporation of phospholipid analogs into plasma membrane (human), **199**, 881
  calcium pump, transmembrane domains, identification by photoactivatable phospholipidic probe (human), **201**, 194
  functional properties, role of nitric oxide (human), **199**, 447
  intact, nitric oxide binding, electron paramagnetic resonance monitoring (human), **203**, 176
  30-kDa hydrolase from, cleaving ubiquitin–protein conjugates, characterization (bovine), **205**, 354
  membrane
    calcium transport, effect of primary hyperparathyroidism (human), **202**, 1505
    identification of tropomyosin isoform hTM5 and preferential binding of tropomodulin to hTM5 N-terminus (human), **201**, 627
    photophysical alteration by 4,5′,8-trimethylpsoralen (rat), **199**, 1413
    protein phosphorylation, relationship to casein kinase release (human), **203**, 681
  metabolized ^{15}N-isosorbide dinitrate, role in formation of nitric oxide (rat), **204**, 1055

Erythroid cells
  erythropoietin-induced differentiation of K562 cells to, inhibition by antisense *src* RNA (human), **201**, 1534

Erythropoietin
  effect on DNA synthesis, proto-oncogene expression, and phosopholipase C activity in vascular smooth muscle cells (rat), **199**, 977
  induced erythroid differentiation in K562 cells, inhibition by antisense *src* RNA expression, **201**, 1534
  induced proliferation and Jak2 activation, dominant negative effects of carboxy-truncated Jak2 mutant, **204**, 278

Erythropoietin receptors
  in activation of mitogen-activated protein kinase cascade in BaF/ER cells, **203**, 1912

Escherichia coli
  and *Bacillus thuringiensis* and *B. subtilis,* chimeric CryIA family ICPs expressed in, intracellular proteolysis, **201**, 788
  carbamyl phosphate synthetase, COOH-terminal domain, location of binding site for allosteric activator IMP, **203**, 1083
  cloning and expression of genes coding for carbohydrate-degrading enzymes of *Anaerocellum thermophilum,* **202**, 1076
  clpX encoding alternative ATP-binding subunit of protease Ti, expression independent of *clpP,* **203**, 798
  co-expression system for human liver pyruvate dehydrogenase complex E1 component, **203**, 225
  expression of
    human endothelial actin-binding protein N-terminal region, and phosphorylation with cAMP-dependent protein kinase, **202**, 764
    phospholipase A_2 from Taiwan cobra, **199**, 969
    soluble rat T cell receptor α chain, **202**, 1280
    yeast transcription factor IIIA, **203**, 1217
  ferric reductase activities, contribution of hemoglobin-like protein, **198**, 127
  ispB gene encoding octaprenyl diphosphate synthase, identification, **202**, 340
  λ plasmid replication in, regulatory role of *ori*λ transcriptional activation, **205**, 802
  lipopolysaccharide, binding of pulmonary surfactant protein D carbohydrate recognition domain, demonstration, **202**, 1674
  5-methyltryptophan resistance, conferral by sequence from tryptophan-hyperproducing strain of *Corynebacterium glutamicum,* **201**, 1255
  overexpression of recombinant form of rat calcineurin A, **200**, 1221
  poly(A)polymerase II in, identification and purification, **198**, 459
  RNA polymerase, binding of glutathione *S*-transferase–SspA fusion, subsequent complementation of Δ*sspA* mutation, role in phage P1 replication, **201**, 123
  tetracycline/H^+ antiporter truncated at last transmembrane helix expressed in, rapid degradation, and protective effects of overproduced GroEL/ES, **202**, 258
  Vitreoscilla globin gene promoter in, regulatory characteristics in response to oxygen availability, **202**, 535
  wild-type and mutant strains, monodisperse maltoporin from, crystallization, **199**, 767

Estradiol
  cathepsin D gene insensitivity, relationship to estrogen response element sequence (human endometrial cells), **203**, 711

Estradiol-17β
  effect on nitrite/nitrate circulating levels during follicular

development (human), **202**, 1543
  plasma membrane binding sites, identification on osteoclasts (chicken), **200**, 899; *erratum*, **202**, 643
  and receptors, effects on melanocytes (human), **199**, 1407
Estradiol receptors
  ligand-binding site, residence in noncovalent complex of consecutive 7- and 17-kDa peptides (pig), **199**, 826
Estrogen
  biphasic effect on neuronal constitutive nitric-oxide synthase via Ca^{2+}–calmodulin-dependent mechanism (rabbit), **203**, 1013
  stimulated breast cancer cell proliferation, inhibition by insulin-like growth factor binding protein 3 (human), **198**, 292
  and transforming growth factor β1, in positive and negative regulation of platelet-activating factor receptor transcript 2 (human), **205**, 1130
  treated tissues, uteroglobin gene promoter-binding factor, detection (rabbit), **204**, 273
Estrogen receptors
  and estradiol-17β, effects on melanocytes (human), **199**, 1407
  mRNA, expression and regulation in MG-63 osteosarcoma cells, characterization (human), **205**, 1179
  mutant exhibiting enhanced binding to estrogen response element, activation by antiestrogens (human), **202**, 888
  negative MDA-MB-231 breast cancer cells stimulating estrogen receptor-positive cells, heregulin-like growth factor secreted by, isolation (human), **202**, 1357
  role in growth response of pituitary tumor cells to interleukin-2 (rat), **205**, 1930
Estrogen response element
  cathepsin D gene, role in estradiol insensitivity to estradiol (human endometrial cells), **203**, 711
  estrogen receptor mutant exhibiting enhanced binding to, activation by antiestrogens (human), **202**, 888
Estrogen sulfotransferase
  identification by cDNA cloning and expression (human liver), **200**, 1621
Estrone sulfotransferase
  identification in adult human liver, **198**, 707
  P-loop-related motif GxxGxxK, as binding site for sulfate donor, evaluation (guinea pig), **204**, 1178
Ethanol
  chronic and acute treatment, effect on expression of manganese-containing superoxide dismutase in hepatic mitochondria (rat), **201**, 1356
  chronic administration and withdrawal in rat, induction of cytochrome P4502E1 in liver, kidney, brain, and intestine during, **205**, 1064
  effects on cytochrome P450 2E1 production and activity in HepG2 cells (human), **203**, 727
  production in starved yeast cells, effects of D-glucose anomer additions, **203**, 640
Ether aminophosphoglyceride
  synthetic, partial modulator activity toward glucocorticoid receptor, **203**, 408
17α-Ethinylestradiol
  sulfotransferase specific for, identification in adult human liver, **198**, 707
Ethylbenzene
  induction of cytochrome P4503A expression without alternation of RNA levels, **202**, 1259
Ethylene glycol
  supportive effect on rapid isolation of Gα_{13} from cerebral membranes (bovine), **204**, 835
Euglena gracilis
  cadmium resistance, role of constitutive overexpression of heat-shock proteins, **203**, 540
Evolution, *see also* Phylogeny
  S-adenosyl-L-homocysteine hydrolase, analysis (*Xenopus laevis*), **205**, 1539
  divergent, amino acid substitution during, analysis: 400 by 400 dipeptide substitution matrix, **199**, 489
  β$_2$-glycoprotein I (mouse), **200**, 1521
  molecular, major histocompatibility complex class II *DRA* gene (bovine), **204**, 195
  related conservation of recombinase activating gene 1, **205**, 687
Excision repair enzymes
  uv-induced, detection in *Schizosaccharomyces pombe* protein extracts, **198**, 770
Exercise
  high-force eccentric, effects on ubiquitin levels in bicep muscle (human), **204**, 1193
Exocytosis
  Ca^{2+}-dependent, sites in PC12 cells, localization of Rabphilin-3A (rat), **198**, 158
Exon deletion
  exon 18 in lysosomal α-glucosidase gene, as mutation in glycogen storage disease type II (human), **203**, 1535
Exon–intron junction sequence
  hexokinase II gene (human), **205**, 490
  IMP dehydrogenase type II gene (human), **205**, 537
Exon–intron structure
  prostate-specific acid phosphatase gene (human, rat), **202**, 49
Exons
  number 5, angiotensinogen gene, localization of cell type-

    - dependent enhancer core element (human), **205**, 1102
- Exo–α–sialidase, *see* Neuraminidase
- Expression systems, *see also specific types*
  - cytoplasmic transgene, sustained, delivery by cationic liposomes (293 cells), **200**, 1201
- Extracellular matrix
  - cell adhesion, role of Zn-α_2-glycoprotein (human), **201**, 1339
  - hepatic, associated proteins, effects of CCl_4 and partial hepatectomy (rat), **198**, 568
  - regulation of morphology, proliferation, and collagen synthesis of perisinusoidal stellate cells (rat), **200**, 999
  - renal fibroblasts, proteoglycans, effect of *ras* transformation (rat), **200**, 925
  - role in wound repair in cultured gastric mucosal cells (rabbit), **202**, 285

F

- Factor H
  - polyanion binding site, interactions with glycosaminoglycans, effects on factor H binding to complement C3b-target complex, **198**, 52
- Familial dysalbuminemic hyperthyroxinemia
  - associated missense mutation in albumin gene, detection (human), **202**, 781
- Farnesol
  - phosphorylation in cell-free system from *Botryococcus braunii,* **200**, 1036
- Fat
  - glucose transporter levels during endoxic shock (rat), **198**, 923
- Fat-storing cells
  - undulin and fibronectin synthesis and gene expression, regulation by acetaldehyde and transforming growth factor β1, comparison (human), **199**, 1019
- Fatty acid hydroxylase
  - as fused protein of cytochrome P450 and reductase (*Fusarium oxysporum*), **202**, 586
- Fatty acids
  - acylation of RNase A with reversed micelle as microreactor (bovine), **196**, 447; *erratum,* **198**, 410
  - effects on phospho*enol*pyruvate carboxykinase (GTP) gene expression in adipocytes and hepatoma cells, **203**, 385
  - free, hepatic metabolism, effects of dietary cholesterol (hamster), **200**, 1505
  - α-hydroxylase, soluble α-hydroxylase for, separation and characterization (*Sphingomonas paucimobilus*), **201**, 1554
  - mitochondrial, β-oxidation, associated trifunctional protein, structural analysis of subunit cDNAs (human), **199**, 818
  - polyunsaturated, transcriptional control of stearoyl-CoA desaturase-1 gene (mouse), **200**, 763
  - and retinoids, synergistic action on adipose cell differentiation (mouse), **204**, 498
  - tissue levels after endotoxin injection, effects of linoleic acid *in vivo* (mouse), **198**, 1107
  - unsaturated, activation of 120-kDa protein kinase PKN with leucine zipper-like sequence (COS-7 cells), **204**, 348
  - very-long-chain, β-oxidation system, rate limitation by acyl-CoA oxidase (rat hepatoma cells), **201**, 1541
- Fatty-acid synthase
  - gene promoter, identification of insulin-responsive regions (rat), **203**, 943
- Fc receptors
  - FcεRII/CD23, and ʟ-arginine-dependent pathway, role in IgE-mediated activation of bone marrow eosinophils (human), **203**, 265
  - Fcγ, role in aggregated IgG-stimulated protein tyrosine phosphorylation in neutrophils (human), **199**, 653
  - FcγRII
    - triggering of protein tyrosine phosphorylation (human), **201**, 829
    - tyrosine phosphorylation, induction by neutrophil binding to immunocomplexes: role of phosphorylation in signaling Fc-mediated phagocytosis (human), **201**, 30
  - phosphoinositide hydrolysis activation, role of tyrosine phosphorylation of phospholipase C-γ2 (human neutrophils), **201**, 1100
- Fenofibric acid
  - modulation of apolipoprotein A-IV expression in hepatocellular carcinoma cells (human), **198**, 764
- Ferredoxin
  - cluster-coordinating cysteines, structural features revealed by 2D TOCSY ^{1}H NMR on oxidized protein (*Clostridium pasteurianum*), **202**, 591
  - 7Fe type, gene encoding, cloning and expression (*Bacillus schlegelii*), **201**, 938
- Ferric reductase
  - in *Escherichia coli,* contribution of hemoglobin-like protein, **198**, 127
- Ferricyanide reductase
  - functional reconstitution from Ehrlich cell plasma membrane, **205**, 1109
- Ferritin
  - synthesis in macrophages, regulation by oxygen and sulfhydryl-reactive agent (mouse), **201**, 38

Ferritin H
  gene family, chimerism in derived PCR products (human), **205**, 944
  and metallothionein-II, mRNA levels, increase in HeLa cells exposed to arsenite (human), **205**, 590
Fertilization
  egg, effects of transglutaminase inhibition during (*Sphaerechinus granularis*), **205**, 565
  polyspermy, induction in sea urchin eggs by antibodies against hamster sperm protein, **202**, 181
α-Fetoprotein
  cis-acting element in 5′-flanking region mediating retinoic acid responsiveness (rat), **205**, 700
  immunosuppressive effect (transgenic mouse), **201**, 1154
Fibers, *see* Nerve fibers; Stress fibers
Fibrillin
  gene structure, expression, and unspliced transcripts (*Capsicum annuum*), **199**, 1144; *erratum,* **201**, 486
Fibrin
  ancrod-formed, stimulation of prostacyclin production by endothelial cells via *de novo* cyclooxygenase synthesis (human umbilical vein), **203**, 1920
Fibrinogenase, *see* Thrombin
Fibrinogen receptors
  GPIIb/IIIa
    crosslinking sites of disintegrins albolabrin, bitistatin, echistatin, and eristostatin on, characterization (human platelets), **202**, 135
    and vitronectin receptor, effects of RGDS and tetrafibrican, comparison, **204**, 325
Fibroblast growth factor
  acidic, mitogenic effects on mammary epithelium in primary culture (mouse), **204**, 1165
  basic
    concentration gradient in pancreatic cancer cell invasion (human), **200**, 1435
    elevated levels during early hours of *in vitro* angiogenesis, detection with ELISA (bovine), **205**, 1423
    matrix-type controlled release system, **201**, 1066
    sense and antisense RNA transcripts, expression in unfertilized oocytes and differentiated adult tissues (human), **205**, 577
    and soluble fibroblast growth factor receptor-1, ternary complex formation with heparin, role of 2-*O*-, 6-*O*-, and *N*-sulfate groups, **203**, 450
  gene family, expression in upper gastrointestinal tract (human), **199**, 1113
Fibroblast growth factor-1
  nuclear localization sequence, mutagenesis, effects on protein stability and mitogenic activity (mouse), **198**, 1203
Fibroblast growth factor 8, *see* Androgen-induced growth factor
Fibroblast growth factor receptor 1
  encoding gene, generation of multiple mRNAs containing open reading frames by alternative splicing (mouse), **205**, 1057
  gene expression, transcriptional element critical for, mapping (mouse), **198**, 1020
Fibroblast growth factor receptors
  gene family, expression in upper gastrointestinal tract (human), **199**, 1113
  K-*sam,* protein, soluble form, in culture medium of gastric cancer cells, characterization (human), **202**, 1387
  soluble FGFR-1, and basic FGF, ternary complex formation with heparin, role of 2-*O*-, 6-*O*-, and *N*-sulfate groups, **203**, 450
  type 1
    functional soluble, purification and characterization (human), **203**, 1781
    identification as predominant form expressed by proliferating arterial smooth muscle cells in culture (human), **204**, 557
Fibroblasts
  3.7, and CHO cells, differential expression in rodent cells resulting from alternate polyadenylation (rat embryo), **202**, 908
  AB-variant, endosome and lysosome membrane fusion, role of G_{M2} activator protein (human), **201**, 90
  BALB/c3T3
    actin stress fiber disorganization accompanied by protein tyrosine phosphorylation and morphological changes, induction by vascular endothelial growth factor (mouse), **202**, 1716
    chemoattractant cytokine gene expression, effects of proinflammatory stimuli (mouse), **198**, 590
    F5b, and F5m, selective cytotoxicity by sialoglycopeptide growth regulator in presence of TNF-α (mouse), **205**, 215
    induction of platelet-derived growth factor-inducible *JE* gene in, role of serine/threonine protein kinases (mouse), **203**, 1815
    stimulated by growth factors, time of appearance of human proliferating cell nuclear antigen mRNA, role of introns (mouse), **201**, 841
    variant A31, sphingosine kinase regulation by phorbol esters: cell type-specific response (mouse), **198**, 1
  BALB/3T3, antisense oligonucleotide uptake and degradation, effect of cationic lipids (mouse), **197**, 818; *erratum,* **200**, 1769

C127, efflux of neutral amino acids, role of CFTR protein (mouse), **204**, 653
from carbohydrate-deficient-glycoprotein syndrome-affected patients, glycosylation defects, role of dolichyl phosphate and *N*-acetylglucosaminyl-phosphoryl-dolichol, **200**, 816
cardiac
  expression of angiotensin II receptor subtype coupled to cell proliferation resistant to Losartan and PD 123319 (human), **204**, 1334
  increase in TGF β_1 mRNA after angiotensin II-induced expression of transcription factors (neonatal rat), **205**, 105
CCl 39, DNA synthesis, role of iron at cell surface (hamster lung), **203**, 16
C3H 10T1/2, high-molecular-mass heat shock proteins in, cellular localization (mouse), **200**, 1367
Cockayne syndrome, CS-3 and -9, UV-irradiated, restoration of DNA synthesis and expression of UV resistance in, role of polyamines (human), **205**, 1018
dermal
  carnitine uptake in, valproic acid-associated impairment, reversal (human), **204**, 753
  collagenase secretion, stimulation by tissue inhibitor of metalloproteinase-1 (human), **203**, 874
  elastin gene expression, suppression by dexamethasone (human), **201**, 1189
    peroxisomal acyl-CoA oxidase expression (human), **198**, 1113
    prostacyclin-stimulating factor expression *in vitro* (human), **202**, 1490
  from Tangier disease subjects, impairment of high-density lipoprotein- and apolipoprotein A-1-induced mobilization of cellular cholesterol, **205**, 850
diploid, cellular senescence, prohibitin expression during (human), **201**, 409
embryonic kidney, HEK-293, choline uptake, role of sodium (human), **199**, 1320
from fibrotic liver, lysyl oxidase cDNA, isolation and characterization (mouse), **199**, 587
gingival, induced contraction of collagen gel, effect of retinoic acid (human), **205**, 455
growth, effects of protein kinase C interaction with epidermal and keratinocyte growth factors, comparison with keratinocyte growth modulation (human), **204**, 1081
intact, identification of secreted β-amyloid precursor protein binding sites (human), **200**, 1685
L
  endosome acidification, effect of CFTR gene (mouse), **205**, 396
  interleukin-2 receptor α chain mRNA stabilization by HTLV-1 Rex protein (mouse), **198**, 243
  transfer of hypoxanthine phosphoribosyltransferase gene-containing YAC into, and role of homologous recombination (mouse), **200**, 1693
L929, gene transfer with retroviral integrase protein (mouse), **203**, 1756
lung and skin, differences in α_2-macroglobulin gene promoter expression (human), **202**, 65
mammary, mammary growth factor purified from, identification as hepatocyte growth factor (mouse), **199**, 772
from Niemann–Pick disease type C-affected patients, cytoplasmic Ca concentration, effects of low-density lipoprotein uptake, **198**, 438
NIH 3T3
  apoptosis-associated early calcium waving, effect of bcl-2 gene overexpression (mouse), **204**, 84
  EGF receptors, autocrine inhibition by intracellular expression of single-chain antibody (mouse), **204**, 666
  heparin formation of ternary complexes with basic fibroblast growth factor and soluble fibroblast growth factor receptor-1, role of 2-*O*-, 6-*O*-, and *N*-sulfate groups,, **203**, 450
  insulin-like growth factor binding protein-1 promoter activity, enhancement by hepatocyte nuclear factor-3 coexpression (mouse), **203**, 1835; *erratum*, **205**, 1496
  intracellular Ca^{2+} concentration, effects of inositol tetrakisphosphate isomers (mouse), **200**, 1300
  locomotion via chemotaxis and chemokinesis, mediation by αPDGF receptor tyrosine kinase (mouse), **204**, 628
  and pEJ, transformed, PGH_2/PGE_2 isomerase induction by platelet-derived growth factor, **198**, 298
  phosphoinositide metabolism, attenuation by cAMP, role of H-*ras* oncogene (mouse), **205**, 1121
  recombinant human granulocyte colony-stimulating factor production, regulation with herpes simplex virus 1 thymidine kinase gene (mouse), **200**, 1245
  transforming potential of $G\alpha_{13}$ (mouse), **201**, 603
onset of aging characteristics, kinetin-induced delay (human), **201**, 665
Rat 1
  insulin receptor signaling, early events, effects of lovastatin, **204**, 399
  insulin-sensitive, protein tyrosine phosphatase activation and insulin receptor deactivation by high glucose (rat), **201**, 71
  stably transfected with α_2C10 adrenoceptors, regulation of p42 and p44 MAP kinase isoforms in, **200**, 1529
renal, extracellular matrix proteoglycans, effect of *ras* transformation (rat), **200**, 925

  senescent, cDNAs expressed at high level *in vitro*, subtractive cDNA library enriched in, preparation (human), **199**, 1108
  sphingolipid pattern, effects of sphingolipid activator proteins SAP-B and SAP-D: *sap*-D stimulation of lysosomal ceramide degradation (human), **200**, 1440
  Swiss 3T3
    arachidonic acid release, role of phospholipase A_2 (mouse), **198**, 220
    high-molecular-mass heat shock proteins in, cellular localization (mouse), **200**, 1367
    inositol 1,4,5-trisphosphate production, stimulation by synthetic *Rab*3A effector domain peptide (mouse), **203**, 756
  3Y1
    proliferation, down-regulation by Src homology-2 domain of PTP1C tyrosine phosphorylated by Src kinase (rat), **204**, 874
    v-Fps-transformed, phosphatidylcholine-specific phospholipase D activity, elevation (rat), **203**, 1195
  TIG-1, diploid, cellular aging, accumulation of oxidative stress during (human), **203**, 1063
  V79
    doxorubicin toxicity, topoisomerase II-independent, comparison with insect cell line (mouse), **198**, 582
    respiration-deficient mutant, enhanced sugar transport, correlation with glucose transporter glycosylation (hamster), **200**, 1313
Fibronectin
  binding to entactin, mediation by fibronectin 29-kDa amino terminal fragment and entactin G2 domain (human), **199**, 1509
  cell binding fragments, interaction with interleukin-8 in regulation of neutrophil chemotaxis (human), **205**, 706
  IIICS domain, alternative splicing, regulation by cytokines (human), **199**, 1005
  induction of cell spreading and down-regulation of 12-lipoxygenase expression in megakaryocytic DAMI cells, **204**, 606
  truncated, induction of matrilysin mRNA in colorectal adenomas (human), **201**, 657
  and undulin, synthesis and gene expression in fat-storing cells, effect of acetaldehyde and transforming growth factor β1, comparison, **199**, 1019
Filaments
  actin
    bundling by myosin light-chain kinase from smooth muscle (chicken), **199**, 786
    nano-manipulation by microneedle, in analysis of energy transduction by actomyosin motor (rabbit), **199**, 1057
  thin, reconstituted from skeletal muscle actin, 3D structure, calcium-induced change, cryo-electron microscopic analysis (rabbit), **203**, 951; *erratum*, **205**, 976
Filamin
  binding of rabbit skeletal muscle actin and cross-linking/bundling activity, double exponential analysis at different temperatures (chicken gizzard), **203**, 338
Filariasis
  Brugian, infected patients, follow-up with IgG4–ELISA, **205**, 202
Filterability
  cellular, and cell membrane fluctuations and metastatic potential of lymphoid cell lines, direct correlation (murine BW5147 cells), **203**, 899
Fistula
  aortacaval, and β-adrenergic receptor blockade, cardiac angiotensin II receptor populations during, analysis (rat), **203**, 1865
FK-506
  and metabolites, interaction with FK-506-binding protein and calcineurin, **202**, 437
Flavin mononucleotide
  supported fatty acid oxidation, by heme domain of cytochrome $P450_{BM-3}$ (*Bacillus megaterium*), **203**, 1745
Flavins
  binding to cytochrome P450 2B4, in creation of semi-artificial hydroxylating enzymes, **200**, 722
Flavonoids
  L86-8275, potent inhibition of cdc2 kinase (human breast cancer cells), **201**, 589
Flow
  laminar, *see* Laminar flow
Fluorescence
  intrinsic
    Escherichia coli RNA polymerase, as probe for conformational changes during transcription initiation, **201**, 820
    potential blood substitute HbXL99α, effect of high pressure, **200**, 1635; *erratum*, **202**, 645
Fluorescence anisotropy
  time-resolved, diphenylhexatriene–phosphatidylcholine, interpretation with compound motion model, **201**, 709
Fluorescence microscopy
  confocal, in study of interaction between ganglioside-containing liposome and T-lymphocyte (rat), **203**, 1750
Fluorescence postlabeling assay
  RNA modification, **200**, 1239
Fluorescence spectroscopy
  observation of two different chromophores in resting state of

    - monoamine oxidase B, **202**, 1574
  - α-urease and dissociation products: fluorescence emission properties, **201**, 1096
- Fluorescent probes
  - monodansylcadaverine, Gln^5 selective labeling of substance P with transglutaminase reaction, **203**, 359
- Fluoride
  - activation of G protein-dependent and -independent pathways in dispersed intestinal smooth muscle cells (guinea pig), **202**, 1681
- 5-Fluorouracil
  - combination with 2,6-dihydroxypyridine, subsequent increase in micronucleus induction (mouse), **203**, 1124
- Follicles
  - thyroid, *see* Thyroid follicles
- Follicle-stimulating hormone
  - effect on nitrite/nitrate circulating levels during follicular development (human), **202**, 1543
  - secretion by rat anterior pituitary cells *in vitro*, effects of CINC/gro, **202**, 155
- Follicle-stimulating hormone receptors
  - mammalian, relationship to G-protein-coupled receptors cloned from sea anemone, **197**, 1062; *erratum*, **200**, 668
- Folliculogenesis
  - associated expression of mRNAs for transforming growth factor β isoforms and TGF-β type II receptor (mouse), **201**, 649
- Follistatin
  - localization in oocytes (*Xenopus laevis*), **202**, 484
  - production in cultured hepatocytes, stimulation by epidermal growth factor (rat), **202**, 422
- Follitropin receptors
  - testicular, cloning and sequence analysis (horse), **201**, 201
- Footprinting
  - in analysis of ferric uptake regulation protein interaction with target DNA, comparison with electron microscopy and gel retardation analyses, **201**, 346
  - DNase I, in identification of retina-specific footprint within retina-specific regulatory region of interphotoreceptor retinoid-binding protein gene (human), **203**, 1875
- Formylmethanofuran
  - synthesis by formylmethanofuran dehydrogenase (*Methanobacterium thermoautotrophicum*), **199**, 1256
- Formylmethanofuran dehydrogenase
  - synthesis of formylmethanofuran (*Methanobacterium thermoautotrophicum*), **199**, 1256
- Formyl-methionyl-leucyl-phenylalanine
  - stimulated human neutrophils, phospholipase D activation in, modulation by okadaic acid, **205**, 1481
- *N*-Formyl-methionyl-leucyl-phenylalanine
  - induced cytosolic Ca^{2+} responses in neutrophils, role of protein kinase C (human), **203**, 998
  - induced superoxide generation in neutrophils, priming by iminodipeptides containing proline with C-terminal and N-terminal residues (human), **205**, 758
- Formyl peptide receptors
  - neutrophil, *Porphyromonas gingivalis* trypsin-like protease as natural ligand, identification, **199**, 1489
- *N*-Formyl peptide receptors
  - gene cluster, differential expression in phagocytes (human), **201**, 174
- Forskolin, *see* Colforsin
- Fourier-transform infrared spectroscopy
  - photoacoustic, in study of phosphates in proteins, **205**, 618
- Fractals
  - multiple-channel information coding, of mammalian nerve signals, **199**, 911
- Free radicals
  - β-amyloid peptide fragments, initiation of sequence-specific synaptosomal lipoperoxidation, implications for Alzheimer's disease, **200**, 710
  - bombing of spermatozoa in spermatic granuloma, in prevention of autoimmune switch-on (rat), **201**, 472
  - generation from chloral hydrate by hepatic microsomes, subsequent induction of lipid peroxidation (mouse), **204**, 937
  - inherited hyperproduction, associated impairment of mitochondrial respiratory functions (rat liver), **205**, 180
  - sulfur trioxide anions, induction of 8-hydroxy-2′-deoxyguanosine formation and DNA damage, **205**, 141
- Fructose
  - induced structural alterations in collagen, inhibitory effects of aspirin and other compounds (human), **199**, 683
- Fructose 1,6-bisphosphatase
  - cDNA encoding, isolation from monocytes, liver, and kidney (human), **199**, 687
  - deficiency, molecular analysis, application of monocytes (human), **199**, 687
- Fructose 2,6-bisphosphate, *see* Fructose 2,6-bisphosphate 2-phosphatase
- Fructose 2,6-bisphosphatase 2-phosphatase
  - –fructose 6-phosphate 2-kinase, L-type and M-type, cDNA, cloning and expression in skeletal muscle (frog), **198**, 1099; *erratum*, **200**, 1769
- Fructose 6-phosphate 2-kinase. *see* 6-Phosphofructo-2-kinase
- Fructose 6-phosphate 2-kinase:fructose 2,6-bisphosphatase
  - cloning and tissue specific expression (rat brain), **198**, 335
- FSH, *see* Follicle-stimulating hormone

Fucose
  glycosaminoglycans rich in, from squid ink, isolation and characterization (*Illex argentinus*), **198**, 560
Fucosylated structures
  as ligands for selectins, biosynthetic control: substrate inhibition by precursor structures (human), **201**, 78
α1,3/4-L-Fucosyltransferase
  high affinity substrates for, precursor structures with substrate inhibition ability: biosynthetic control on structures acting as ligands for selectins (human), **201**, 78
α-L-Fucosyltransferases
  Lewis-type and plasma-type, in milk, affinity elution with lactose and differentiation with synthetic sulfated copolymer inhibitor and synthetic and natural acceptors (human), **198**, 350
Furosemide
  inhibition of Na^+/I^- symporter in thyroid follicles *in vitro* (pig), **204**, 1265
Fusion proteins
  fatty acid hydroxylase as fused protein containing P450 and reductase domains (*Fusarium oxysporum*), **202**, 586
  glutathione *S*-transferase–p53, in identification of cellular proteins binding central conserved region of human p53, **202**, 490
  nuclear localization signal in, engagement of facilitated translocation by nuclear pore complex and subsequent intranuclear binding (*Xenopus laevis* oocytes), **205**, 529
  poly(ADP-ribose) polymerase catalytic domain and DNA binding domain of glucocorticoid receptor, expression and characterization (*Escherichia coli*), **202**, 880
  SIV-derived, membrane orientation, role in fusion protein effect on bilayer stability and promotion of membrane fusion, **205**, 1938
  tet/VP16, in inducible inhibition of eukaryotic gene expression, **202**, 1664
Fv fragments
  HyHEL10, single-chain, expression in *Escherichia coli*, effect of order of antibody variable regions and thermodynamic analysis of antigen-binding properties, **201**, 546

G

Gaegurins
  antimicrobial peptides, isolation from Korean frog skin, **205**, 948
Galactocerebrosidase, *see* Galactosylceremidase
Galactose
  cataractogenesis, susceptible S strain rat, associated DNA rearrangements, degenerative diseases, and premature aging (rat), **199**, 726
Galactosylceremidase
  cDNA encoding, isolation and characterization (human), **198**, 485
β-1,3-Galactosyl-*O*-glycosyl-glycoprotein β-1,6-*N*-acetylglucosaminyltransferase
  from acute myeloid leukemia cells, inhibition by photoreactive nitrophenyl substrate derivatives (human), **198**, 417
Galactosyltransferase, *see* Lactose synthase
β-1,4-Galactosyltransferase
  soluble active, expression in *Saccharomyces cerevisiae* (human), **201**, 160
Galectin-3
  melanoma cellular and secreted ligands for, identification (human), **201**, 1366
Gallbladder
  epithelial cells, CFTR expression, link to constitutive mucin secretion (dog), **203**, 1457
Gallic acid
  induction of apoptosis in HL-60RG cells (human), **204**, 898
Gamma rays
  and PUVA and UVC, cytotoxic response in V79 cells, effect of polyamine depletion, **201**, 1
Ganglia
  abdominal, eclosion hormone-mediated signal transduction, role of inositol(1,4,5)trisphosphate–cGMP cascade (*Bombyx mori*), **198**, 613
Gangliosides
  containing liposome, interaction with T-lymphocyte: confocal fluorescence microscopic study (rat), **203**, 1750
  effects on cytosolic phospholipase A_2 (bovine brain), **199**, 1158
  $IV^3(NeuAc)_2$–$GgOse_4Cer$, identification of murine helper T lymphocyte differentiation antigen 3G11 as, **200**, 1557
  GM_1, enhancement of β-adrenergic receptor activation of maxi-K^+ channels (guinea pig myocytes), **200**, 1341
  GM_2
    activator protein, expression in tissues (mouse), **204**, 741
    role in endosome and lysosome membrane fusion (human), **201**, 90
  GM_3, association with glycosylphosphatidylinositol-anchored leukocyte surface glycoproteins (human), **203**, 1069
Ganglioside sialidase
  plasma membrane, in neuroblastoma cells, role in growth control and differentiation (human), **199**, 1188
Gap junctions
  intercellular communication, lack in limb mesenchymal cells

inhibited from cartilage differentiation by phorbol ester (chicken embryo), **205**, 429

Gas chromatography–mass spectrometry
  direct confirmation of nitric oxide in exhaled breath (human), **201**, 883

Gastric inhibitory polypeptide receptors
  expressed in pancreatic islets and clonal insulin-secreting cells, structure and functional properties (hamster), **205**, 1556

Gastrin
  stimulation of colon cancer cell growth, role of cholecystokinin-A and CCK-B receptors (human), **202**, 1222

Gastrin receptors
  –cholecystokinin receptors, role of seventh transmembrane domain to non-peptide antagonist binding (rat), **201**, 1382
  encoding gene, molecular cloning and structural analysis (rabbit), **202**, 947

Gastrointestinal tract
  atrial natriuretic peptide gene expression (rat), **202**, 562
  upper, expression of fibroblast growth factor and FGF receptor gene families (human), **199**, 1113

GC–MS, *see* Gas chromatography–mass spectrometry

GDP dissociation stimulator
  Smg gene, comparison with *Dbl* gene product (SK-ES-1 cells), **198**, 811

GDP (guanosine 5′-diphosphate)
  bound, role in stability of A–rho GDP dissociation inhibitor complex purified from neutrophil cytosol, **205**, 174
  –GTP exchange protein, interacting with Ash/Grb2 protein, kinetic properties, **198**, 1255

GDP-ribosyl cyclase
  activity, as measure of CD38 induction in HL-60 cells by retinoic acid (human), **205**, 722

Gelatinase
  inhibition by peptidyl hydroxamic acid (human), **199**, 1442
  neutrophil, associated lipocalin, cDNA, molecular cloning and expression in various fetal and adult tissues (human), **202**, 1468
  92-kDa, cleavage site, detection in native type V collagen (rabbit synovial cells), **202**, 328

Gelatinase A
  expression in monocytic cells, modulation by HIV-1 (human), **205**, 1243
  proteolysis of β-amyloid peptide from Alzheimer disease brain (human), **205**, 1755

Gelatinase B
  expression in monocytic cells, modulation by HIV-1 (human), **205**, 1243
  92-kDa, and inhibitors, *in vitro* modulation in HIV-1-infected macrophages, **204**, 1272

Geldanamycin
  binding to p100, correlation with depletion of *erb*B2 gene product p185 (human breast cancer cells), **201**, 1313

Gel electrophoresis, *see also* Immunoelectrophoresis
  two-dimensional
    proteasome subunits resolved by, partial sequencing (human), **205**, 1785
    and Western bloting, in determination of immunological identity of purified and recombinant fatty acid-binding protein and cytosolic heme-binding protein (rat liver), **204**, 163

Gel retardation
  in analysis of ferric uptake regulation protein interaction with target DNA, comparison with electron microscopy and footprinting analyses, **201**, 346

Gels
  network, from 1,2-bis(dinonoyl)-*sn*-glycero-3-phosphocholine and 1,2-bis(tricosa-10,12-diynoyl)-*sn*-glycero-3-phosphocholine mixtures, formation and properties, **203**, 296

Genes
  ABL and BCR, expression in androgenetic and gynogenetic tissues without imprinting (human), **204**, 621
  β-*N*-acetylhexosaminidase, differential expression in tissues (mouse), **199**, 1341
  acid phosphatase, homologous to *Penicillium chrysogenum PHOA*, determination (*Aspergillus ficuum*), **204**, 63
  acid proteinase related gene, *ACPR*, induction of pseudohyphae in *Saccharomyces cerevisiae* haploids and diploids (*Candida albicans*), **205**, 1079
  acrosin, diploid expression and translational regulation (rat), **202**, 88
  actin, in *Musca domestica:* oligogene family, **203**, 523
  adenine methyltransferase, *Chlorella* virus, promoter function in bacteria and plants, **204**, 187
  adrenoleukodystrophy
    detection of cytosine to guanine transversion in nucleotide 1451 in exon 5 (human), **205**, 1638
    encoding 80-kDa membrane protein, characterization (human), **201**, 1029
    identification of two base pair deletion in five unrelated families, **202**, 647
  adrenomedullin, genomic structure (human), **203**, 631
  albumin, identical missense mutation in, detection in familial dysalbuminemic hyperthyroxinemia (human), **202**, 781
  ALG7, mRNA levels, and dolichol-P dependent *N*-acetylglucosamine-1-P transferase, correlation during postnatal

  submandibular gland development (hamster), **204**, 284
Alu, transcription, methylation- and mutation-dependent stimulation *in vitro*, **203**, 845
*amo*B, encoding 43-kDa polypeptide component of ammonia monooxygenase, sequencing (*Nitrosomonas europaea*), **204**, 759
AMP deaminase, functional domains, identification with mutational analysis (human, rat), **205**, 1010
α*Amy3*, expression in cultured rice cells, enhancement by protein phosphatase inhibitors, **205**, 807
androgen-induced growth factor FGF-8, role in embryogenesis and morphogenesis (mouse), **204**, 882
angiotensinogen, exon 5, localization of cell type-dependent enhancer core element (human), **205**, 1102
angiotensin II type 1A receptor, promoter, induction by glucocorticoid (rat), **204**, 210
angiotensin II type 2 receptor
  cloning, mapping to X chromosome, and mRNA expression in lung (human), **203**, 1842
  molecular cloning and expression (human), **200**, 1449
aniridia locus, homeobox-containing region, analysis for mutations involved in congenital hereditary cataract and microphthalmia (miniature Schnauzer dog), **203**, 1663
α1-antitrypsin, expression after *in vivo* transfer to murine hepatocytes by small liposomes (human), **204**, 1023
apolipoprotein AI and CIII, expression, regulation by vitamin A (rat), **205**, 1510
apolipoprotein AII, transcriptional down-regulation by first intron (human), **202**, 822
aromatase, exon 1, specific for aromatase transcripts, analysis (human brain), **198**, 1153
aryl hydrocarbon receptor, promoter region, molecular cloning and analysis (human), **203**, 615
ATP synthase, heterologous subunit 8 from *Aspergillus nidulans*, rescue of subunit 8-defective *Saccharomyces cerevisiae*, **203**, 1567
atrial natriuretic peptide
  expression in gastrointestinal tract (rat), **202**, 562
  RFLP at locus, association with aldosterone responsiveness to angiotensin in aldosterone-producing adenoma (human), **204**, 1312
bcl-2, overexpression, effect on apoptosis-associated early calcium waving in NIH-3T3 fibroblasts (mouse), **204**, 84
bcl-6, putative transcription factor, DNA recognition sequence, determination (human), **204**, 366
bphA and *bphB*, involved in degradation of biphenyl and polychlorinated biphenyls, identification (*Pseudomonas* sp. KKS102), **202**, 850
bphA1, encoding ISP α subunit of biphenyl dioxygenase, substitution, modification of enzyme activity (*Pseudomonas pseudoalcaligenes*), **204**, 912
Brachyury(T), regulated expression in embryoid bodies (mouse), **199**, 552
brown fat uncoupling protein, mitochondrial, 5′-proximal regulatory region, identification of tissue-specific protein binding domains (rat), **204**, 867
bsr, restriction enzyme-mediated integration, in isolation of cytokinesis mutants (*Dictyostelium discoideum*), **205**, 1808
E-cadherin
  molecular cloning and sequencing (human), **200**, 1754
  transcriptional regulation in prostate cancer cells: characterization of E-cadherin gene promoter (human), **203**, 1284
E-cadherin and P-cadherin, tandem arrangement on genome (human), **203**, 1291
calcitonin/calcitonin gene-related peptide, minigene transcripts, alternative RNA splicing (human thyroid cells), **200**, 993
calcitriol 24-hydroxylase, promotor, vitamin D receptor homodimer-type response element in, identification (rat), **202**, 1366
caldesmon, two distinct promoters in, identification (chicken), **201**, 618
capsanthin-capsorubin synthase, structure and expression (*Capsicum annuum*), **199**, 1144; *erratum*, **201**, 486
casein kinase-1 $hhp1^+$ and $hhp2^+$, cloning and sequence analysis (*Schizosaccharomyces pombe*), **203**, 231
catecholamine-sulfating phenol sulfotransferase, genomic organization and DNA sequence (human), **205**, 1325
c-*fos*
  expression in Jurkat T cells, effects of α-lipoic acid and dihydrolipoic acid (human), **200**, 1136
  insulin-like growth factor 1, expression by osteoblasts, stimulation by calcitonin (mouse), **199**, 876
  promoter serum response element, ternary complex formation at, inhibition by muscle homeodomain protein MHox, **200**, 1742
  proto-oncogene, persistent expression, stimulation of osteoclast differentiation (chicken), **205**, 1547
  transcription, repression by thyroid hormone and retinoic acid receptors, identification of mediating promoter elements (GH1 cells), **205**, 135
chemoattractant cytokine, IP-10, JE, and KC, expression patterns in fibroblasts and and osteoclasts, effects of proinflammatory stimuli (mouse), **198**, 590
cholecystokinin-A receptor, expression in pancreas of diabetic rat, **199**, 482

c-*jun*, impaired induction, role in UV-induced DNA fragmentation and cell death in B16 melanoma cells after bromodeoxyuridine sensitization, **203**, 1629

class *theta* glutathione *S*-transferase, subunit Yrs, encoding gene, isolation and characterization (rat), **205**, 1250

clpP, expression independent of *clpX* encoding alternative ATP-binding subunit of protease Ti (*Escherichia coli*), **203**, 798

clpX, encoding alternative ATP-binding subunit of protease Ti, expression independent of *clpP* (*Escherichia coli*), **203**, 798

c-*myb* and c-*src*, expression and U937 leukemia cell proliferation, effects of antisense *myb* and *src* expression (human), **201**, 1001

c-*myc*, expression in
- hepatocytes, inhibition by elevated glucose levels *in vitro* (rat), **202**, 1476
- HL-60 leukemic cells, inhibition by 4-hydroxynonenal (human), **203**, 553
- vascular endothelial cells, effects of TNP-470 (human), **204**, 1067

c-*myc* and Ki-*ras* oncogenes, expression, measurement by coamplification PCR, **201**, 574

coding for carbohydrate-degrading enzymes of *Anaerocellum thermophilum*, cloning and expression in *Escherichia coli*, **202**, 1076

cofactor-independent phosphoglycerate mutase, isolation and characterization (*Zea mays*), **203**, 1204

conglutinin, organization and 5′-flanking region sequence (bovine), **198**, 597

corazonin, isolation and structure (*Drosophila melanogaster*), **204**, 292

c-ras, activation of c-myc proto-oncogene and c-fos, role of polyamines (rat), **202**, 720

c-src, role in osteoclastic bone resorption (mouse), **199**, 1237

Cu/Zn superoxide dismutase
- 5′-flanking region, characterization (human), **201**, 1526
- mutation, in Japanese familial amyotrophic lateral sclerosis, identification, **200**, 695

Cwnt-4, regional expression in developing CNS in relation to diencephalic neuromere D2 and spinal cord dorsal domain (chicken embryo), **203**, 1581

cyclin D1, expression in parathyroid cells, modulation by calcium (rat), **204**, 691

cyclin E, molecular cloning and characterization (mouse), **201**, 994

CYP7, expression in HepG2 cells, effects of bile acids and steroid/thyroid hormones (human), **198**, 546

CYP3A5, 5′-flanking region, sequence analysis: comparison with CYP3A4 and CYP3A7 (human), **205**, 1741

cystic fibrosis transmembrane conductance regulator, effect on acidification of L cell endosomes, **205**, 396

cytochrome P450
- 1A1, promoter region, detection of retinoid responsive element (human), **201**, 1205
- diversity in mosquito, **205**, 1452
- 2E1, hypomethylation and hypoexpression in lung tumors (human), **205**, 1086

cytochrome P450bm-3, protein-binding, DNA regions in and near (*Bacillus megaterium*), **198**, 862

cytosolic phospholipase A_2
- induction in C6 glioma cells by interleukin-1β (rat), **205**, 12
- isolation of 5′-flanking region (human), **205**, 6

Dbl, product, identification as GDP/GTP exchange proteins, comparison with *Smg* GDP dissociation stimulator (SK-ES-1 cells), **198**, 811

differential display method for analysis, improvements (mouse), **199**, 564

dnaK, homologs, identification (*Synechococcus* sp. PCC7942), **201**, 466

dnaK3 hsp70 homolog, sequence analysis (*Synechococcus* sp. PCC7942), **201**, 848; *erratum*, **205**, 2016

dopamine D_2 receptor, structural polymorphism, association with alcoholism, **204**, 1199

early growth response, *Egr-1*, translation in myogenic cells, control by mitogenic signals (mouse), **202**, 1337

elastin, expression in cultured skin fibroblasts, suppression by dexamethasone (human), **201**, 1189

elastin promoter, identification of transforming growth factor-β responsive element (human), **199**, 1049

endothelial nitric oxide synthase, structure, polymorphism, and mapping to chromosome 7 (human), **198**, 1027

env, sequence of HIV-1, role in TAR-independent transactivation by Tat from major immediate-early promoter of murine cytomegalovirus, **203**, 1152

eukaryotic, expression, inducible inhibition with *tet*/VP16 fusion protein, **202**, 1664

expressed in keratinocytes, cataloging (human), **202**, 976

ferredoxin, 7Fe type, cloning and expression (*Bacillus schlegelii*), **201**, 938

ferritin H, multigene family, PCR products from, associated chimerism (human), **205**, 944

α-fetoprotein, *cis*-acting element in 5′-flanking region mediating retinoic acid responsiveness (rat), **205**, 700

fibrillin, structure, expression, and role of unspliced transcripts (*Capsicum annuum*), **199**, 1144; *erratum*, **201**, 486

fibroblast growth factor receptor 1
- generation of multiple mRNAs containing open reading

frames, by alternative splicing (mouse), **205**, 1057

  transcriptional element critical for expression, mapping (mouse), **198**, 1020

fibronectin, expression in fat-storing cells, regulation by acetaldehyde and transforming growth factor β-1, comparison with undulin, **199**, 1019

N-formylpeptide receptor cluster, differential expression in phagocytes (human), **201**, 174

$G_{i\alpha}$, interleukin-1β-regulated expression via lipid mediators in tracheal muscle (guinea pig), **203**, 1889

gastrin/CCK_B receptor, molecular cloning and structural analysis (rabbit), **202**, 947

gentamicin resistance, isolated from R plasmid, nucleotide sequence and expression (*Serratia marcescens*), **198**, 1084

β-globin, intronless and 3′ splice site-deleted, transcript accumulation mechanisms (mouse), **203**, 128

δ-globin, upstream region, localization of globin promoter-specific silencer element (human), **204**, 413

glucose-dependent insulinotropic polypeptide, developmental expression (rat intestine), **201**, 964

glucose-6-phosphatase, expression and activity, modulation in hemorrhagic shock: evidence for heat-sensitive activator (rat), **204**, 716

glutathione *S*-transferase

  alpha class, 5′ flanking sequences, structure and function (human), **200**, 1665

  expression regulation by dietary selenium (rat), **202**, 271

GLUT4 glucose transporter, expression in soleus muscle, effects of high-fat diet (rat), **202**, 519

glycine decarboxylase, true and processed, assignment to 9p23–24 and 4q12 (human), **203**, 1483

glycogen synthase, in Japanese subjects with non-insulin-dependent diabetes mellitus, molecular scanning, **202**, 463

N-glycosylation ALG7, antisense RNA to, inhibition of protein N-glycosylation and secretion by *Xenopus* oocytes, **198**, 1248

GM-CSF, inducibility in embryonal carcinoma cells, associated *cis*-DNA element, identification (human), **198**, 473

G protein-coupled receptor, GPR1 and GPR6, mapping studies: identification of amino acid difference with role in functional variation between human and rodent receptors, **205**, 1952

GTA1085, identification as homolog of human active-gene-repairing helicase *ERCC6* (*Saccharomyces cerevisiae*), **201**, 310

heat shock proteins

  expression during 41°C heating in human carcinoma cell lines, effects of isoquinolinesulfamides (human), **199**, 714

  hsp70, transcription in HT-29 cells, effect of staurosporine (human), **202**, 476

  hsp90α and hsp90β, differential regulation in developing zebrafish embryo, **204**, 746

heparin-binding EGF-like growth factor, expression in mesangial cells, regulation by LDL and oxidized-LDL (rat), **202**, 1001

hepatic glucose-6-phosphatase, catalytic subunit cDNA, expression in Fao hepatoma cells, multihormonal regulation (rat), **201**, 302

hepatitis C virus type $5a^+$ core, E2, and NS3/NS4 regions, cloning and phylogenetic analysis (human), **202**, 1308

Hes-3 helix–loop–helix factor, cerebellar Purkinje cell-specific, structure and chromosomal locus (mouse), **203**, 594

hexokinase II, structure analysis (human), **205**, 490

histamine H1 receptor, cloning, chromosomal mapping, and tissue distribution (human), **201**, 894

homeobox

  expression, relationship to ectopic bone formation induced by bone morphogenetic protein (rat), **201**, 980

  Hot, differential expression, identification by PCR (tobacco), **198**, 1012

  Msx1, expression by limb mesenchymal cells inhibited from cartilage differentiation by phorbol ester (chicken embryo), **205**, 429

  Nkx1.1, regulated expression in embryoid bodies (mouse), **199**, 552

17β-hydroxysteroid dehydrogenase I, role in breast–ovarian cancer susceptibility: differential pseudogene transcription (human), **201**, 1327

hypoxanthine phosphoribosyltransferase

  in PCR analysis of clonality in precancerous disease states and early stages of tumor progression (human), **199**, 511

  YAC containing, transfer into human cells by four methods and role of homologous recombination, **200**, 1693

immunoglobulin H, octamer motif, single-stranded DNA-binding proteins recognizing, identification (mouse), **200**, 1307

IMP dehydrogenase type II, cloning and sequencing (human), **205**, 537

inherited cancer predisposition syndrome, tight linkage to tuberous sclerosis gene (Eker rat), **203**, 1302

insulin-like growth factor-1, expression and serum levels, tamoxifen-induced suppression, effects of somatostatin analogue octreotide (rat), **203**, 253

insulin receptor, expression in soleus muscle, effects of high-fat diet (rat), **202**, 519
insulin receptor substrate-1, in Japanese subjects with non-insulin-dependent diabetes mellitus, molecular scanning, **202**, 463
interleukin-1β, expression, selective induction over IL-1 receptor antagonist gene expression, by signaling via MHC class II molecules (human monocytic cells), **201**, 855
interleukin-3 β-chain, multiple transcription start sites and 5′ alternate splicing (mouse), **205**, 886
interleukin-4, regulatory P sequence, nuclear factor interacting with, relationship to NFκB and NF-AT NF(P) (human), **199**, 439
interphotoreceptor retinoid-binding protein, retina-specific regulatory region, identification of retina-specific footprint (human), **203**, 1875
L-isoaspartyl/D-aspartyl methyltransferase involved in protein repair, polymorphisms resulting in amino acid changes (human), **203**, 491
ispB, encoding octaprenyl diphosphate synthase, identification (*Escherichia coli*), **202**, 340
JE, platelet-derived growth factor-inducible, induction, role of serine/threonine protein kinases (mouse), **203**, 1815
JE/MCP-1, expression in peritoneal macrophages, stimulation by interleukin-4 (mouse), **203**, 562
KC, homologous to human *MGSA/GRO*, transcription, negative regulation by glucocorticoids (mouse), **203**, 1809
Ki-*ras* and c-*myc* oncogenes, expression, measurement by coamplification PCR, **201**, 574
K-*sam*/fibroblast growth factor receptor protein, soluble form in culture medium of gastric cancer cells, characterization (human), **202**, 1387
lacY, lactose carrier-encoding, cloning and sequencing (*Citrobacter freundii*), **203**, 1882
LacZ, lectin conjugate-directed delivery to airway epithelial cells (human), **205**, 826
Long Evans Cinnamon hepatitis, localization on chromosome 16 and identification as homolog to human Wilson disease gene (rat), **202**, 512
lysosomal α-glucosidase, deletion of exon 18, as mutation in glycogen storage disease type II (human), **203**, 1535
α_2-macroglobulin, promoter, characterization and identification of triple TRE/RARE/ERE response element (human), **202**, 65
MAGE-1-related, cloning and analysis (human), **202**, 549
major histocompatibility complex class II, *DRA*, cDNA cloning and molecular evolution (bovine), **204**, 195
marker, positive and negative selectable, co-expression efficiency, effects of vector topology, **201**, 943
matrix metalloproteinase transin, expression in cultured mesangial cells, selective inhibition by heparin (rat), **203**, 1333
MDR1, actinomycin-induced expression, role of DNA binding protein MDR-NF1/YB-1 (human), **199**, 1428
melanocortin receptor, fifth family member, cloning (mouse), **200**, 1214
met, expression in fetal hepatocytes in primary culture, upregulation by hepatocyte growth factor (mouse), **204**, 1364
metabotropic glutamate receptor subtype 5 isoforms, molecular cloning and functional expression (human), **199**, 1136
mi, mutant, transcription factor encoded by, loss of DNA binding ability (mouse), **205**, 1299
mitochondrial
  RNA processing enzyme, transcription in stage I oocytes, role of novel *cis*-element (*Rana brevipoda*, *Xenopus laevis*), **202**, 225
  $\text{tRNA}^{\text{Leu(UUR)}}$, point mutation at nucleotide pair 3291, identification in MELAS syndrome patient, **202**, 1624
monocyte chemoattractant protein-1, characterization (bovine), **202**, 1272
Mrc1, macrophage mannose receptor, exon–intron structure, and chromosomal localization (mouse), **198**, 682
MUC2 and MUC3, mRNA levels, alteration of expression in colonic carcinoma cells (human), **199**, 1012
multiple tumor suppressor 1/cyclin-dependent kinase-4 inhibitor, somatic mutations, detection in primary non-small cell lung carcinomas (human), **202**, 1426
muscle phosphofructokinase, variant mutation in Japanese case of PFK-M deficiency with abnormal RNA splicing (human), **202**, 444
myelin basic protein, 3′-untranslated region, effect on immortalized oligodendrocyte mRNA levels (mouse), **204**, 1352
β-myosin heavy chain, expression, effect of 3,5,3′-triiodo-L-thyronine (human, rat), **199**, 1482
myotonic dystrophy locus, analysis for mutations involved in congenital hereditary cataract and microphthalmia (miniature Schnauzer dog), **203**, 1663
natural resistance-associated macrophage protein, *Nramp*, cDNA isolation and characterization (human), **204**, 1074
neuraminidase-encoding, *nanH*, sequence (*Bacteroides fragilis* YCH46), **203**, 914
neutrophil-activating peptide ENA-78, characterization (human), **205**, 612
neutrophil elastase, 5′ flanking region, 53-bp repetitive ele-

ment, enhancer function (human), **204**, 38
nitrate reductase fragments, enhancement of nitrite production in activated murine macrophage cell lines (barley), **201**, 284
nitric-oxide synthase
  inducible, cardiovascular homeostasis-associated, regulation of transcription in vascular smooth muscle cells, analysis (human), **200**, 802
  transcriptional induction in astroglia, limitation by nitric oxide (rat), **201**, 762
NME, decreased expression and loss of heterozygosity, correlation with teratomatous differentiation in male germ cell tumors (human), **202**, 1096
nm23-H1 and -H2, encoded nucleoside-diphosphate kinase isotypes A and B, phosphorylation by casein kinase 2 *in vitro*, **199**, 1041
oncogenes, G_{12} family as class: transforming potential of G_{13} α subunit, **201**, 603
δ-opioid receptor, expression in lymphocytes (human, rhesus monkey), **202**, 1291
κ-opioid receptor and homolog, structure and chromosomal mapping (mouse), **205**, 1353
OTK-4, FK506-binding protein homolog, molecular cloning and characterization (human), **200**, 836
p16, highly frequent homozygous deletion in esophageal cancer cell lines (human), **203**, 1090
p53, replacement with *lacZ* gene in murine embryonic stem cells and mouse with two steps of homologous recombination, **202**, 830
papillomavirus, short sequences, analysis (human), **204**, 820
parathyroid hormone/parathyroid hormone-related peptide receptor, isolation and characterization (human, mouse, rat), **200**, 1290; *erratum*, **201**, 1058
Pax, regulated expression in embryoid bodies (mouse), **199**, 552
pepsinogen Pgl isozymogen, expression in stomach mucosa following adrenalectomy, enhancement by hydrocortisone therapy (rat), **202**, 1
phenol sulfotransferase *STP* and *STM*, mapping to 16p: candidate genes for Batten disease, **205**, 482
phospho*enol*pyruvate carboxykinase (GTP), expression in 3T3-F442A adipocytes and FAO hepatoma cells, effects of fatty acids, **203**, 385
plasminogen and apoprotein(a), intergenic region separating, presence of liver-specific DNase-hypersensitive sites (human), **205**, 930
platelet-activating receptor transcript 1, expression, positive regulation by PAF via NF-κB (human), **205**, 1137
platelet-derived growth factor A-chain promoter, S1 nuclease sensitive region, identification of positive transcriptional regulatory element, **198**, 103
PMS1, human genes homologous to, cloning, characterization, and chromosomal localization (yeast), **204**, 1257
POT1, transcriptional regulation, differential effects of *ADR1* and *SNF1* (yeast), **202**, 960
prion protein, linkage to *zwitter* gene causative for epilepsy with spongiform encephalopathy in spontaneously epileptic rat, **200**, 1161
prion-related protein, endocrine pancreatic cells, hormone control (rat), **201**, 1220
progenitor toxin type C, organization (*Clostridium botulinum*), **205**, 1291
progesterone receptor, 5′ region, nucleotide sequence and DNase hypersensitive sites (mouse), **205**, 1093
prohibitin, expression during cellular senescence of diploid fibroblasts (human), **201**, 409
proliferating cell nuclear antigen
  introns, role in time of mRNA appearance in 3T3 cells stimulated by growth factors, **201**, 841
  promoter, transcriptional regulation by p53 in mammalian cells, **203**, 133
promoters, *see* Promoters
prostaglandin H synthase-2
  genomic structure, chromosomal location, and promoter characterization (human), **203**, 190
prostate-specific acid phosphatase, structural comparison in human and rat: identification of androgen response elements, **202**, 49
protease and capsid assembly protein, murine cytomegalovirus, cloning and sequencing, **203**, 472
protein kinase Cδ, expression in peritoneal macrophages, inhibition by nitric oxide (mouse), **204**, 105
protein kinase C isoforms, differential expression in erythroleukemia cell variants: implication for chemical-induced differentiation (mouse), **204**, 461
proto-oncogenes
  expression in vascular smooth muscle cells, effect of erythropoietin (rat), **199**, 977
  trkC, expression in osteoblastic cells and response to neurotrophin-3 (mouse), **203**, 1268
pyruvate kinase, cloning and sequence analysis (*Trypanoplasma borelli*), **201**, 727
ras, transformation of renal fibroblasts, effect on extracellular matrix proteoglycans (rat), **200**, 925
Rb, dephosphorylation of encoded protein, role in growth inhibition of simian virus 40-transformed keratinocytes by transforming growth factor βs (human), **201**, 673
recombinase-activating gene 1, evolutionary conservation

and molecular cloning, **205**, 687
reporter, ligand-dependent system, functional coupling of human adenosine receptors (CHO cells), **198**, 626
ret proto-oncogene, alternative splicing at intron 4 (human), **205**, 1526
RH blood group, transcripts, expression in leukocytes (human), **202**, 1497
ribosomal proteins L1 and L14, exon 1, zinc finger protein binding, characterization (*Xenopus laevis*), **205**, 1236
S_A, chromosomal assignment to 16p13.11 and demonstration of expression in kidney (human), **199**, 862
secA, *Synechococcus* PCC7942 homolog, cloning and characterization, **200**, 844
S1 elongation factor-1α family member, cDNA cloning: evolutionary pathway (human, mouse), **203**, 1371
serotonin 1Dβ receptor, genetic variation in, identification (human), **205**, 1194
serum albumin, promoter, isolation and functional analysis (bovine), **203**, 1447
single-chain antibody, intracellular expression, in autocrine inhibition of EGF receptor (NIH 3T3 cells), **204**, 666
slaty product TRP2, functional analysis as dopachrome tautomerase and effect of point mutation on catalytic function (mouse), **202**, 1060
Smg, GDP dissociation stimulator, comparison with *Dbl* gene product (SK-ES-1 cells), **198**, 811
soluble lectin L-14, induction by TSH in thyroid cells and suppression by retinoic acid in transformed neural cells (rat), **199**, 540
somatostatin receptor 5 5′-flanking region, sequence analysis (human), **205**, 1883
Spot35/calbindin-D28k, organization and expression in MDCK cells: identification of vitamin D-responsive promoter region (mouse), **204**, 889
src antisense RNA expression in K562 cells, inhibition of cell proliferation and erythropoietin-induced erythroid differentiation (human), **201**, 1534
Sry, circular and linear transcripts, detection in preimplantation embryo (mouse), **198**, 492
ζsspA, mutation, complementation by glutathione *S*-transferase–SspA fusion binding to RNA polymerase, role in phage P1 replication (*Escherichia coli*), **201**, 123
STE12, homolog *ACPR* from *Candida albicans*, induction of pseudohyphae in *Saccharomyces cerevisiae* haploids and diploids, **205**, 1079
stearoyl-CoA desaturase-1, transcriptional control by polyunsaturated fatty acids (mouse), **200**, 763
synaptobrevin-2, linkage to *tremor* gene causative for epilepsy with spongiform encephalopathy in spontaneously epileptic rat, **200**, 1161
syndecan-1, expression in liver cells (rat), **204**, 944
thrombomodulin, 3′-untranslated region, detection of functional cAMP-responsive element (human), **200**, 1391
thymidine kinase, herpes simplex virus 1, encoding gene, in regulation of recombinant human granulocyte colony-stimulating factor production in NIH3T3 cells, **200**, 1245
thyroid peroxidase, expression and DNA polymorphisms in thyroid cancer (human), **198**, 948
thyroid/steroid receptor, from cultured neuronal cells, molecular cloning (rat), **205**, 1959
thyroid transcription factor-1, structure (rat), **204**, 1358
transforming growth factor-β receptor type I, homologous with human TGF-βRI, molecular cloning (mouse), **198**, 1054
tremor, causative for epilepsy with spongiform encephalopathy, linkage to synaptobrevin-2 gene in spontaneously epileptic rat, **200**, 1161
$tRNA^{Asn}$, mitochondrial, mutation, association with chronic progressive external ophthalmoplegia (human), **204**, 482
troponin T, alternative splicing, in derivation of slow skeletal troponin T mRNA isoform (human), **199**, 841
tuberous sclerosis, TSC2, tight linkage of predisposing gene of Eker rat inherited cancer syndrome, **203**, 1302
tumor necrosis factor α receptors
  retrovirus-mediated transfer into colon cancer cells for cancer treatment (human), **202**, 1538
  type I and type II, expression, gestational profile (mouse), **202**, 1599
tumor suppressor, adenomatous polyposis coli, encoded protein, association with plakoglobin (human), **203**, 519
type-B natriuretic factor, activation in stem cell cultures induced for cardiac myogenesis (mouse), **199**, 954
tyrosine aminotransferase, transcription in hepatocyte cultures, induction, regulation by ginesenoside-Rg_1 (rat), **205**, 1696
ubiquitin, expression in skeletal muscle, tumor necrosis factor α-induced increase (rat), **201**, 682
UL9, herpes simplex virus-1, cell type-specific induction by cell signaling pathway (HeLa, PC12, Vero cells), **205**, 44
uncoupling protein, insulin-like growth factor I-induced expression in fetal rat brown adipocyte primary cultures, role of C/EBP transcription factors, **201**, 813
and undulin, expression in fat-storing cells, regulation by acetaldehyde and transforming growth factor β-1, comparison with fibronectin, **199**, 1019
upstream binding factor, regulation by multiple growth-related control elements (mouse), **205**, 1217

  uteroglobin, promoter-binding factor, inhibition, tissue distribution, and hormonal specificity (rabbit), **204**, 273
  vascular natriuretic peptide receptor, expression, effects of angiotensin-converting enzyme inhibitor and calcium channel blocker in hypertensive rat, **205**, 1595
  vasoactive intestinal peptide receptor, expression in lymphocytes (rat), **203**, 1599
  vasopressin receptor V_2, mutations, in patients with congenital nephrogenic diabetes insipidus, **205**, 552
  Vitreoscilla globin, *vgb*, oxygen-dependent regulation: evidence for positive regulation by transcriptional activator FNR, **202**, 535
  Xist, expression in urogenital ridges of midgestation male embryos (mouse), **205**, 334
  yeast *PMS1* homologs, cloning, characterization, and chromosomal localization (human), **204**, 1257
  zwitter, causative for epilepsy with spongiform encephalopathy, linkage to prion protein gene in spontaneously epileptic rat, **200**, 1161
Genetic linkage map
  construction with expanded production system of restriction landmark genomic scanning (mouse), **205**, 1922
Genetic system
  based detection of Tat homodimer formation and selection of Tat homodimer inhibitor, **201**, 701
Gene transfer
  lectin conjugate-directed, to airway epithelial cells (human), **205**, 826
  neomycin-resistant gene into L929 cells with retroviral integrase (mouse), **203**, 1756
Genistein
  attenuation of
    capacitative Ca^{2+} influx in pancreatic acinar cells (rat), **202**, 1697
    leukocyte adhesion to endothelial cell monolayers (human), **198**, 359
  effects on
    adenosine: competitive antagonist for P_1-purinergic receptor (rat FRTL-5 thyroid cells), **203**, 1488
    invasion process of macrophages by *Trypanosoma cruzi*, **203**, 967
  enhancement of ICAM-1-mediated endothelial adhesion by myelomonocytic cells, role of up-regulation of ICAM-1 and counter-receptors (human), **203**, 443
  prevention of α-adrenergic-induced cardiac muscle cell hypertrophy by inhibition of Ras-mitogen activated protein kinase signaling pathway (rat), **202**, 1586
Genomic organization
  angiotensin II type 1 receptor promoter (human), **204**, 1039
  catecholamine-sulfating phenol sulfotransferase gene (human), **205**, 1325
  endothelial nitric oxide synthase gene (human), **198**, 1027
  thyroid transcription factor-1 gene (rat), **204**, 1358
Genotyping
  direct, microsatellite loci in colonial tunicate *Botryllus schlosseri*, **203**, 646
Gentamicin
  resistance gene, isolated from R plasmid, nucleotide sequence and expression (*Serratia marcescens*), **198**, 1084
Gentiobiose
  coupled tripeptides, aminopeptidase-resistant, Na^+-dependent transport in intestine (rat), **203**, 1412
Geometry
  active site, in high oxido-reduction potential rusticyanin from *Thiobacillus ferrooxidans*, **203**, 1655
Geranylgeraniol
  for protein isoprenylation in C6 glial cells (rat), **205**, 955
Germinal vesicles
  insulin-induced breakdown in oocytes, kinetics, effect of oocyte storage (*Xenopus laevis*), **202**, 803
Germination
  spore, protein phosphorylation during, stage-specific changes, role of calmodulin (*Dictyostelium discoideum*), **201**, 430
Gestation
  rat, associated profile of serum mouse soluble interleukin-6 receptor concentration, **205**, 998
  tumor necrosis factor α type I and type II receptor gene expression in, profile (mouse), **202**, 1599
GF 109203X
  protein kinase C inhibitors, modulation of epidermal and keratinocyte growth factor, effects on keratinocyte growth (human), **204**, 1081
Ginesenoside-Rg_1
  regulation of induction of tyrosine aminotransferase gene transcription in hepatocyte cultures (rat), **205**, 1696
Ginkgo biloba extract
  EGb 761, nitric oxide-scavenging properties, **201**, 748
Glial cells, *see also* Astroglia
  C6, protein isoprenylation in, geranylgeraniol for (rat), **205**, 955
  delivery of plasmid DNA by pH-sensitive immunoliposomes (rat), **201**, 888
  production of interleukin-10 *in vitro* (mouse), **205**, 1907
Globins
  promoter, specific silencer element, localization to δ-globin gene upstream region (human), **204**, 413
Glomerulosa cells
  adrenal zona-associated, angiotensin II-stimulated, protein

kinase C activation and inositol trisphosphate release in, role of type I angiotension II receptor internalization (rat), **204**, 1292

Glucagon
 and insulin, release, specific inhibition by receptor-selective somatostatin analogs (rat), **205**, 341
 secreting cells derived from endocrine pancreas, INR1 G9, spontaneous calcium oscillations in (hamster), **205**, 435

Glucagon receptors
 cloning and characterization (human liver), **198**, 328
 expression regulation (rat), **205**, 347

Glucan 1,4-α-glucosidase
 encoding gene, exon 18 deletion, as mutation in glycogen storage disease type II (human), **203**, 1535

Glucan sulfates
 inhibition of intercellular adhesion, effect of ligand clustering (mouse), **204**, 969

Glucocorticoid receptors
 DNA binding domain, fusion protein with catalytic domain and poly(ADP-ribose) polymerase, expression and characterization (*Escherichia coli*), **202**, 880
 modulator activity of synthetic ether aminophosphoglyceride, **203**, 408
 mRNA, expression and regulation in MG-63 osteosarcoma cells, characterization (human), **205**, 1179
 transcript localization during early *Xenopus laevis* embryogenesis, and overexpression-induced inhibition of differentiation after dexamethasone treatment, **199**, 734

Glucocorticoids
 and adrenalectomy, effects on stomach mucosa cell proliferation, differentiation, and pepsinogen levels (rat), **202**, 1
 effects on nitric oxide production by microglial cells, role of protein kinase C (mouse), **199**, 633
 induction of angiotensin II type 1A receptor gene promoter (rat), **204**, 210
 mediated viral promoter induction in mammary carcinoma cells, potentiation by protein kinase C activation (mouse), **198**, 1183
 negative regulation of transcription of *KC*: murine homolog of human*MGSA/GRO*, **203**, 1809

Glucokinase
 insulin-induced expression in hepatocytes, effect of epidermal growth factor (rat), **201**, 902
 translocation by glucose in hepatocytes (rat), **204**, 252

Gluconeogenesis
 and nitric oxide synthesis and flux through phospho*enol*pyruvate carboxykinase, reciprocal changes, induction by endotoxin (rat liver), **204**, 659

Glucosamine
 incorporation into chondroitin sulfate in HL-60 cells (human), **203**, 1682

Glucose
 β-cell subpopulations with different sensitivity to, responsiveness to arginine and leucine (rat), **204**, 490
 coupled tripeptides, aminopeptidase-resistant, Na^+-dependent transport in intestine (rat), **203**, 1412
 effects on transcription factor binding to insulin-1 gene promoter (rat), **203**, 702
 elevated levels, inhibition of DNA synthesis and *c-myc* gene expression in hepatocytes *in vitro* (rat), **202**, 1476
 high concentration, activation of protein tyrosine phosphatases and deactivation of insulin receptor function in insulin-sensitive fibroblasts (rat), **201**, 71
 impermeability of hepatic microsomes for, role in complete latency of glucose dehydrogenase (rat), **200**, 1491
 and insulin
  effect on fetal lung insulin receptor mRNA and tyrosine kinase activity *in vitro* (rat), **202**, 694
  high levels in isolated adipocytes, effects on lipid synthesis (rat), **199**, 1151
  responses in isolated lymphocytes, for evaluation of *in vivo* status: effects of very low calorie diet treatment (human), **202**, 1169
 insulin-stimulated uptake in isolated adipocytes, inhibition by endothelin-1 (rat), **202**, 688; *erratum*, **203**, 1363
 metabolism in liver cells, effects of tri-Calciphor (rat liver cells), **201**, 1457
 translocation of glucokinase in hepatocytes (rat), **204**, 252
 transport
  induced by insulin and norepinephrine in primary culture of brown adipocytes, effect of wortmannin (rat), **202**, 660
  in L6 myotubes, stimulation by insulin, role of phosphatidylinositol 3-kinase activation (L6 cells), **205**, 570
 whole body utilization, and muscle glucose transporter translocation, insulin effects (mouse), **199**, 662

Glucose adducts
 Amadori, modified albumin, endothelial cell receptors for, identification (mouse), **198**, 734; *erratum*, **199**, 1088

Glucose dehydrogenase
 complete latency, role of absence of glucose uptake by hepatic microsomes (rat), **200**, 1491

Glucose-dependent insulinotropic polypeptide
 gene expression in embryonic and postnatal intestine (rat), **201**, 964

Glucose-6-phosphatase
 activity and mRNA levels in liver, effect of acute diabetes (rat), **205**, 680

- catalytic subunit cDNA, expression in Fao hepatoma cells, multihormone regulation (rat), **201**, 302
- gene expression and activity, modulation in hemorrhagic shock: evidence for heat-sensitive activator (rat), **204**, 716

Glucose tolerance
- and hepatic cytochrome P450, in diabetic and nondiabetic mice, effects of colupulone and chromium, **200**, 1455

Glucose transporters
- differential glycosylation, association with enhanced sugar transport in respiration-deficient cells (hamster V79 cells), **200**, 1313
- GLUT1, mRNA, expression in preimplantation embryo (mouse), **199**, 1525
- GLUT1, GLUT2, and GLUT4, levels in fat, muscle, and liver tissues during endotoxic shock (rat), **198**, 923
- GLUT4
  - gene expression in soleus muscle, effects of high-fat diet (rat), **202**, 519
  - insulin-responsive, translocation, induction by epidermal growth factor (CHO cells), **205**, 857
- translocation in muscle, insulin effect (mouse), **199**, 662

Glucosyl acceptor
- for glucosyltransferases, lipoteichoic acid from *Streptococcus sanguis* as, identification, **202**, 1407

Glucosylation
- of αA- and αB crystallins, site selectivity (bovine eye), **201**, 1451

Glucosylceramide
- membranes, monosialoganglioside reconstituted in, recognition: quantitative analyses by quartz crystal microbalance, **204**, 551

Glucosyltransferases
- glucosyl acceptor for, lipoteichoic acid from *Streptococcus sanguis* as, identification, **202**, 1407

Glutamate-ammonia ligase
- modification by ADP-ribosylation and adenylylation (*Streptomyces griseus*), **204**, 598

Glutamate receptors
- blockade, effect on central endothelin-1-induced hypotension (rat), **205**, 795
- metabotropic, subtype 5 isoforms, molecular cloning and functional expression (human), **199**, 1136

Glutamates
- replacement of metallothionein α-domain lysines, resulting reduction of metallothionein detoxification function (Chinese hamster), **202**, 954

Glutamate-1-semialdehyde 2,1-aminomutase
- aminotransferase homolog, identification, **198**, 138

Glutamic acid
- Glu-461 essential role in β-galactosidase activity (*Lactobacillus delbrückii bulgaricus*), **201**, 1167
- substitution for conserved lysines in α-domain of metallothionein, effects on metal binding in α and β domains (hamster), **202**, 621

Glutamine
- Gln^5, selectively monodansylated substance P, as tool for interaction studies with membranes, **203**, 359

Glutamine synthetase, *see* Glutamate-ammonia ligase

Glutathione
- conjugation with jacobine, catalysis by hepatic glutathione-*S*-transferase *in vitro* (guinea pig, rat), **198**, 516
- redox couple, role in redox susceptibility of transcription factor SP1 (human), **201**, 871
- reduced, transcapillary transport in vascular perfused brain (guinea pig), **201**, 402
- role in
  - sporulation of yeast, **205**, 1151
  - toxicity of cyanobacterial alkaloid cylindrospermopsin in cultured hepatocytes (rat), **201**, 235
- uptake in basolateral liver plasma membrane vesicles, role of BSP/bilirubin binding protein and bilotranslocase (rat), **200**, 1079

Glutathione 2,5-dimethyl pyrrole
- reduced form, glutathione peroxidase and glutathione reductase activities toward, **203**, 1668

Glutathione 2-methyl,5-pentyl pyrrole
- reduced form, glutathione peroxidase and glutathione reductase activities toward, **203**, 1668

Glutathione peroxidase
- cellular, activation by endogenous adenosine (bovine, human, rat), **201**, 508
- and glutathione reductase, activities toward glutathione-derived antioxidants, **203**, 1668
- incorporation into monoclonal antibody combining sites by chemical mutation, for generation of selenium-containing abzyme, **198**, 1240
- properties, selenium-containing abzyme with, preparation, **202**, 1645

Glutathione pyrrole
- oxidized and reduced forms, glutathione peroxidase and glutathione reductase activities toward, **203**, 1668

Glutathione reductase
- cellular, activation by endogenous adenosine (bovine, human, rat), **201**, 508
- and glutathione peroxidase, activities toward glutathione-derived antioxidants, **203**, 1668

Glutathione reductase (NADPH)
- reduction of glutathione trisulfide, **202**, 1380

Glutathione *S*-transferase, *see* Glutathione transferase
Glutathione transferase
  alpha class, gene 5′ flanking sequences, structure and function (human), **200**, 1665
  gene expression and enzyme activity, regulation by dietary selenium (rat), **202**, 271
  GST P 1-1, steady-state kinetics, role of deprotonation of bound glutathione (human placenta), **200**, 1428
  hepatic, catalysis of glutathione conjugation with jacobine *in vitro* (guinea pig, rat), **198**, 516
  microsomal isozymes, induction by 3-methylcholanthrene (*Aspergillus ochraceus* TS), **203**, 1508
  –SspA fusion, binding to RNA polymerase and complementation of *ζsspA* mutation, role in phage P1 replication (*Escherichia coli*), **201**, 123
  theta class
    Yrs gene, isolation and characterization (rat), **205**, 1250
    Yrs-Yrs′ and Yrs′-Yrs′, isolation from hepatic cytosol and activity against 5-sulfoxymethylchrysene (rat), **202**, 278
Glutathione trisulfide
  reduction by glutathione reductase (NADPH), **202**, 1380
Glycation
  αA- and αB-crystallins by glucose, site selectivity, **201**, 1451
  advanced, histone octamers in liver, *in vitro* study (rat), **203**, 588
  advanced end products, modification of β_2-microglobulin, role in interleukin-6 induction and hemodialysis-associated amyloidosis (human macrophages), **201**, 1235
  bovine serum albumin and low-density lipoprotein, protective effects of α-lipoate, **203**, 99
  induced structural alterations in collagen, inhibition by aspirin and other compounds (human), **199**, 683
Glycerol
  and antifreeze glycoproteins, as cryoprotectants for liver preservation, subsequent function and tissue morphology (rat), **200**, 732
Glycine
  and alanine, protection against hypoxic injury in isolated perfused kidney, detection by ^{23}Na NMR (rat), **202**, 1639
Glycine *N*-acyltransferase
  mitochondrial, purification to homogeneity (human liver), **205**, 1373
Glycine decarboxylase, *see* Glycine dehydrogenase (decarboxylating)
Glycine dehydrogenase (decarboxylating)
  true and processed genes, assignment to 9p23–24 and 4q12 (human), **203**, 1483
Glycoconjugates
  GSC-53, sialic acid-containing, chemically synthesized, as potent inhibitor of cellular immune responses, **203**, 1102
Glycogen storage disease
  type II, mutation in lysosomal α-glucosidase gene: deletion of exon 18 (human), **203**, 1535
Glycogen synthase
  and insulin receptor substrate-1, gene polymorphisms in Japanese subjects with non-insulin-dependent diabetes mellitus, analysis, **202**, 463
Glycoproteins
  antifreeze, and glycerol, as cryoprotectants for liver preservation, subsequent function and tissue morphology (rat), **200**, 732
  CD38, erythrocyte, self-aggregation, induction by NAD$^+$ and β-mercaptoethanol (human), **202**, 1710
  CD59, glycosylphosphatidylinositol-anchored leukocyte surface, association with ganglioside GM$_1$ (human), **203**, 1069
  complement inhibiting factor, isolation and partial characterization (*Cuscuta europea*), **202**, 186
  β_2-glycoprotein I, *see* Beta-2-glycoprotein I
  GPIb, interaction with
    bovine von Willebrand factor, requirement for Asp^{514} in A1 domain of factor (human platelets), **203**, 881
    von Willebrand factor and thrombin, inhibition by echicetin β subunit, **205**, 68
  GpIIb/IIIa, and vitronectin receptor, effects of RGDs and tetrafibricin, comparison (human), **204**, 325
  gp120
    HIV, induction of prostaglandin E_2 release by astroglial cells, regulation by nitric oxide formation (human), **203**, 87
    HIV-1, V3 domain, recognition by antibody with other specificity, with antigen/antibody specificity exchanger, **205**, 1386
  gp130, soluble, establishment of ELISA and detection in ascitic fluids of tumor-bearing mice, **202**, 637
  gp160, HIV-1, stimulated signals transduced through CD4 molecule on T cells, activation of NF-κB (human), **203**, 498
  lysosomal, protective protein, tissue distribution (human), **205**, 38
  melanoma secreted ligands for galectin-3, identification (human), **201**, 1366
  microfibril-associated, 36-kDa, isolation and characterization by isoquinolinesulfonamide affinity chromatography (bovine aorta), **198**, 1262

mini-P, overexpressed in multi-drug resistant cells, identification (mouse), **198**, 804
P-, *see* P-glycoprotein
soluble neurite outgrowth molecule, 74-kDa, detection and characterization (bovine brain), **199**, 1167
Tn (GalNAcα1←Ser/Thr), interaction with Gal, GalNAc, and GlcNAc-specific lectins (armadillo), **198**, 251
tracheal mucin, viscosity, role of sialic acid (dog), **205**, 402
vesicular stomatitus virus, intracellular transport in infected BHK cells, blocking by SS33410, **199**, 1073
Zn-α_2, role in cell adhesion (human), **201**, 1339

Glycosaminoglycans
fucose-rich, from squid ink, isolation and characterization (*Illex argentinus*), **198**, 560
regulation of alternative pathway complement activation, **198**, 52

Glycosphingolipids
in HT-29 cells, differentiation-dependent metabolic processing (human), **202**, 992

Glycosylation
CD45, pattern alternations with different cell proliferation states (human lymphocytes), **200**, 1283
differential, glucose transporter, association with enhanced sugar transport in respiration-deficient cells (hamster V79 cells), **200**, 1313
N-linked site, lipoprotein lipase, naturally occurring mutation in second codon Asn^{43}: role of Asn^{43} in catalysis and secretion (human), **205**, 506
post-translational, granulocyte colony-stimulating factor receptor (mouse), **205**, 238
prompt, calreticulin, independent of Ca^{2+} homeostasis (CHO cells), **205**, 780
related nature of testosterone 5α-reductase 2 (human prostate), **205**, 269
thyrotropin receptor, differences among mammalian species, **200**, 1207

Glycosylphosphatidylinositol
anchored leukocyte surface glycoproteins, association with ganglioside GM_3 (human), **203**, 1069
regulation of interleukin-1α and TNF-α expression in macrophages, by protein-tyrosine kinase-mediated signal transduction (*Trypanosoma brucei*), **205**, 984

Glycyrrhizic acid
100-kDa binding protein, purification, characterization as casein kinase II phosphate acceptor, and effect on CK-II phosphorylation of gp 100 *in vitro*, **198**, 1090

Glycyrrhizin, *see* Glycyrrhizic acid

GM–CSF, *see* Granulocyte–macrophage colony stimulating factor

Gö 6850
effect on neutrophil activation, **200**, 1536

Gö 6976
effect on neutrophil activation, **200**, 1536

Goblet cells
degranulation in isolated pancreatic ducts, role of intracellular mediators (guinea pig), **205**, 423

Goiter
nontoxic, inositol phospholipids pathway, role of thyrotropin (human thyroid), **201**, 1182

Golgi complex
antigen, recognized by chronic rheumatoid arthritis autoantibodies, molecular cloning and sequence analysis (human), **205**, 1399
–endoplasmic reticulum system, site of plastoquinone synthesis in spinach leaves, **205**, 714

Gonadotropin-releasing hormone, *see* Luteinizing hormone-releasing hormone

Gonadotropin-releasing hormone receptors, *see* Luteinizing hormone-releasing hormone receptors

Gonadotropin surge-inhibiting factor
purification from Sertoli cell-enriched cultural medium (rat), **199**, 1229

G protein-coupled receptor kinase 4
isoforms, identification by molecular cloning (human), **199**, 848

G protein-coupled receptors
bovine prostaglandin $F_{2\alpha}$ in transfected CHO cells, **200**, 756
gene mapping studies: identification of amino acid difference with role in functional variation between human and rodent receptors, **205**, 1952
seven transmembrane domain class, identification in NG108-15 cells with reverse transcription–PCR (mouse), **205**, 1311
structurally related to mammalian FSH, TSH, LH/CG receptor family, molecular cloning (sea anemone), **197**, 1062; *erratum*, **200**, 668

G proteins
activation of muscarinic K^+ channels, role of $G_{K\beta\gamma}$ (guinea pig atrial myocytes), **200**, 1484
chemoattractant receptor-stimulated activation and functional responses, role of carboxylmethylation (HL-60 cells), **200**, 1604
coupled receptors, *see* G protein-coupled receptors
dependent and independent pathways in dispersed intestinal smooth muscle cells, activation by fluoride (guinea pig), **202**, 1681
Giα_1, coupling of adenylyl cylclase to somatostatin receptor SSTR2 in presence of, analysis, **202**, 1188

  - $G\alpha_{12}$ and $G\alpha_{13}$, immunochemical detection in membranes of mammalian cells and tissues, **198**, 906
  - $G\alpha_{13}$
    - rapid isolation from cerebral membranes: supportive effect of ethylene glycol (bovine), **204**, 835
    - transforming potential in NIH 3T3 cells, **201**, 603
  - Gβ, –phospholipase A_2–arachidonic cascades, mediation of Ca^{2+} oscillations and pancreatic amylase secretion activated by phospholipase A_2-activating protein (rat pancreatic acini), **203**, 1716
  - G_i,
    - coupling of human α_2A-C10 and α_2C-C4 receptor subtypes in CHO cells, relationship to inhibition of cAMP accumulation (human), **199**, 869
    - phospholipase C activation, role in murine prostaglandin E receptor EP_3 mediation of calcium signals in cDNA-transfected CHO cells, **204**, 303
  - G_t, *see* Transducin
  - linked orphan receptor GPRN1/RDC1, characterization (human), **201**, 458
  - mediated pertussis toxin-sensitive signaling pathway in astrocytes, role in activation of mitogen-activated protein kinases by endothelin-1 (rat), **204**, 1325
  - pertussis-sensitive, role in
    - adenosine-induced chlorine efflux in endothelial cells (bovine), **204**, 1143
    - functional coupling of somatostatin receptor subtypes to adenylyl cyclase (human), **198**, 605
  - *Rab*3A
    - effector domain synthetic peptide, stimulation of inositol 1,4,5-trisphosphate production in permeabilized cells (human, mouse, rat), **203**, 756
    - phosphorylation by cyclic AMP-dependent protein kinase, **203**, 1927
  - *Rab*3D, distribution and regulation in tissues and PC12 cells (rat), **200**, 1257
  - Ran/TC4, homolog PfRan, cDNA cloning and expression (*Plasmodium falciparum*), **201**, 423
  - role in 1α,25-dihydroxyvitamin D_3 induction of tissue transglutaminase in peritoneal macrophages (mouse), **203**, 1773
  - small, H-YPT3 and H-ray from skeletal muscle, molecular cloning (human), **205**, 1875
  - trimeric, β-subunit WD40/β-transducin repeat regions, binding of β-adrenergic receptor kinase and β-spectrin pleckstrin homology domains, **203**, 29
- Granulocyte colony-stimulating factor
  - effects on tyrosine phosphorylation of JAK2 protein in Kasumi-1 and HL60 cells (human), **203**, 922
  - encapsulation within liposomes, **199**, 433
  - human recombinant, production, regulation with herpes simplex virus type 1 thymidine kinase gene (murine fibroblasts), **200**, 1245
  - and other cytokines, outer surfaces, comparative structural patterns, **201**, 1396
- Granulocyte colony-stimulating factor receptors
  - post-translational glycosylation (mouse), **205**, 238
- Granulocyte–macrophage colony-stimulating factor
  - gene inducibility in embryonal carcinoma cells, associated *cis*-DNA element, identification (human), **198**, 473
  - and other cytokines, outer surfaces, comparative structural patterns, **201**, 1396
  - promoter
    - induction in human T cells, role of transcription factor Sp1 (mouse), **205**, 1518
    - transcription from, activation by calcineurin in synergy with protein kinase C and NF-κB/AP-1 in T cells (human), **199**, 1064
- Granulocytes
  - in HL-60 differentiation, DMSO-induced, and associated alkaline phosphatase increase and protein kinase C decrease, potentiation by sphinganine, **199**, 888
- Granuloma
  - spermatic, spermatozoa in, free radical bombing: prevention of autoimmune switch-on (rat), **201**, 472
- Graves' disease
  - thyroid from affected patients, inositol phospholipid pathway in, effects of thyrotropin and adenosine, **205**, 584
- Growth cones
  - neuroblastoma cell, size, effects of intracellularly delivered anti-GAP antibodies, **203**, 459
- Growth cycle
  - hepatocytes in primary culture amd TGF-α-induced mitogenic transition, associated cyclin D1 mRNA expression (rat), **204**, 91
- Growth differentiation factor 5
  - recombinant, cloning and expression (human), **204**, 646
- Growth factors
  - deprivation, associated apoptosis of adipocytes *in vitro* (human), **201**, 500
  - heparin-binding, EGF-like, induction and expression in pancreatic cancer cells (human), **202**, 1705
  - stimulated 3T3 cells, time of appearance of human proliferating cell nuclear antigen mRNA, role of introns, **201**, 841
- Growth hormone, *see* Somatotropin
- Growth hormone-releasing hormone, *see* Somatoliberin
- Growth plate
  - chondrocytes, 1,25-dihydroxyvitamin D_3 in, effect of 24,25-dihydroxyvitamin D_3 *in vitro* (chicken), **202**, 1204

- GSC-53, *see* 2-(Tetradecylhexadecyl)-*O*-(5-acetamido-3,5-dideoxy-D-glycero-α-D-galacto-2-nonulopyranoslonic acid)-(2→3)-*O*-β-D-galactopyrannosyl-(1→4)-β-D-glycopyrannoside
- GTP (guanosine 5′-triphosphate)
  - –GDP exchange protein, interacting with Ash/Grb2 protein, kinetic properties, **198**, 1255
  - $P47^{phox}$ binding to, relationship to respiratory burst oxidase (human), **198**, 191
- GTPase
  - related activity, detection in SRP54 homolog Ffh (*Bacillus subtilis*), **199**, 1394
- GTPase activating protein
  - Rap1GAP, phosphorylation during cell cycle (human), **202**, 967
- GTP cyclohydrolase I
  - deficient mutant mouse HPH-1, molecular characterization, **203**, 1675
  - identification of Rabphilin-3A-interacting protein as (rat), **205**, 1409
- GTPγS, *see* Guanosine 5′-*O*-(3-thiotriphosphate)
- Guanine nucleotide exchange factors
  - CDC25, catalytic domain properties (*Saccharomyces cerevisiae*), **199**, 497
- Guanosine
  - replacement by inosine in preferred cleavage sequence 5′-AGG of chromoprotein C-1027, effect on binding mode and cutting site, **205**, 1533
- Guanosine 5′-*O*-(3-thiotriphosphate)
  - cytosol treated with, disintegration of lysosomes in vitro, **198**, 869
- Guanylate cyclase
  - colonic particulate, activation by guanylin (rat), **203**, 1432
  - soluble, activation, role in endotoxin-induced vascular hyporeactivity to vasoconstrictor agents (rat aorta), **201**, 436
- Guanylin
  - activation of colonic particulate guanylate cyclase (rat), **203**, 1432
  - major endogenous form in intestine and plasma, identification as 10-kDa proguanylin and increase in renal insufficiency (human), **205**, 1966
- Guanylyl cyclase, *see* Guanylate cyclase
- Gut and brain tissues, apoptosis after cycad toxicity (mouse), **205**, 327

H

- Halistanol trisulfate
  - inhibition of rat protein-tyrosine kinase $pp60^{v\text{-}src}$ activity (marine sponge), **203**, 260
- Halothane
  - liver cells of rats exposed to, hsp 72 nuclear translocation, **199**, 647
- Heart
  - arteries and vascular smooth muscle cells, C-type natriuretic peptide in, vascular action (pig), **205**, 765
  - calpastatin I and II specificity, modulation by reversible phosphorylation and dephosphorylation (rat), **199**, 1326
  - cardioprotective effects of alcohol, mediation by vascular alcohol dehydrogenase (human), **203**, 1858
  - copper content and Cu binding to superoxide dismutase, differential decrease in copper-deficient rat, **203**, 1028
  - developmentally regulated LIM-containing protein, cDNA isolation and characterization (human), **205**, 497
  - fetal cells, expression of β-myosin heavy chain, effect of 3,5,3′-triiodo-L-thyronine (rat), **199**, 1482
  - fibroblasts, expression of angiotensin II receptor subtype coupled to cell proliferation resistant to Losartan and PD 123319 (human), **204**, 1334
  - hypertrophy, associated changes in contractile regulatory protein subunits troponin T and troponin I (guinea pig), **202**, 384
  - infarcted, inducible NO synthase expression, dexamethasone inhibition (rabbit), **202**, 1120
  - junctional sarcoplasmic reticulum, ATP-independent Ca^{2+} uptake mechanism, stimulation by inositol tetrakisphosphate (dog), **204**, 69
  - lipoprotein lipase in, transcriptional regulation during development (rat), **202**, 838
  - membrane, adenylated dinucleotide binding to adenosine 5,5‴-P1,P4-tetraphosphate receptors (mouse), **200**, 749
  - mitochondria, large subunit of trifunctional β-oxidation complex, primary structure (swine), **198**, 431
  - myogenesis, stem cell cultures induced for, activation of gene for type-B natriuretic factor (mouse), **199**, 954
  - perfused with Ca^{2+} and cAMP, μ- and m-type calpain, differential regulation (rat), **202**, 1197
  - sarcoplasmic reticulum, ryanodine receptor, association with FK-506-binding protein (dog), **198**, 701
  - sodium channel subtypes, conductance and channel gating, modification by veratridine (rat), **199**, 1305
  - ventricular cells, run-down of calcium current in, relationship to intracellular sodium (guinea pig), **199**, 720
  - whole, during anoxic perfusion, X-ray diffraction (rat), **202**, 1244
- Heart fatty acid-binding protein
  - levels, increase in experimental diabetes (rat), **199**, 639
  - regulation of cardiac myocyte hypertrophy (pig), **205**, 1822

- Heat
  - associated apoptosis of adipocytes *in vitro* (human), **201**, 500
- Heat shock factors
  - with DNA-binding activity, occurrence in liver as form uncoupled from transcriptional activity (rat), **201**, 552
- Heat shock proteins
  - biosynthesis, possible role of oxidative stress: acetylcholinesterase partial unfolding (*Torpedo californica*), **198**, 915
  - constitutive overexpression in Cd-resistant *Euglena gracilis* cell line, **203**, 540
  - high-molecular-mass
    - cellular localization in murine cells, **200**, 1367
    - and 42°C-specific, in FM3A cells, characterization (mouse), **204**, 357
  - hsp27, 023 cells overexpressing, accelerated recovery from heat-induced nuclear protein aggregation, analysis (hamster), **204**, 1170
  - hsp70
    - BiP, as substrate for src kinase *in vitro*, **201**, 1548
    - *dnaK3* homolog gene, sequence analysis (*Synechococcus* sp. PCC7942), **201**, 848; *erratum*, **205**, 2016
    - gene transcription in HT-29 cells, effects of staurosporine (human), **202**, 476
    - mRNA, overexpression preceding butyrate-induced apoptosis in lymphoid cells (human), **198**, 257
  - hsp70RY, expression in various cell lines and characterization (human), **203**, 577
  - hsp72
    - expression during heating at 41°C in carcinoma cell lines, effect of isoquinolinesulfonamides (human), **199**, 714
    - nuclear translocation in liver cells of halothane-exposed rats, **199**, 647
  - hsp73, expression in hepatocyte monolayers from alcohol-exposed rats, effect of alcohol, **205**, 186
  - hsp90, induction of chromatin structure condensation (rat), **202**, 1657
  - hsp90α and hsp90β, genes, differential regulation in developing zebrafish embryo, **204**, 746
- Heat shock response element
  - identification response in Cu,Zn-containing superoxide dismutase 5′-flanking region (human), **201**, 1526
- Heat stress
  - CHO cells, prompt glycosylation of calreticulin independent of Ca^{2+} homeostasis, **205**, 780
- Helicase
  - bacteriophage T4 dda, DNA unwinding and ATP hydrolysis activities, inhibition by sequence specific DNA-protein complex (*Escherichia coli*), **198**, 1070
  - *ERCC6*, active-gene-repairing, yeast homolog *GTA1085*, identification and sequencing (human), **201**, 310
- Helicase-primase complex
  - HSV-1-encoded, nucleotide and DNA coeffector binding sites, characterization (human), **199**, 1333
- Helix–loop–helix factors
  - HES-3, cerebellar Purkinje cell-specific, gene structure and chromosomal locus (mouse), **203**, 594
  - Id1, Id2, Id3, activation during neuronal differentiation (rat), **199**, 1355
- Helper T cells
  - expressed differentiation antigen 3G11, identification as ganglioside $IV^3(NeuAc)_2$–$GgOse_4Cer$ (mouse), **200**, 1557
  - Th1, activation, and DNase expression in $CD4^+$ cells, induction by short immunomodulating peptides (human), **205**, 2008
- Hemagglutinin
  - –neuraminidase, Sendai virus, inhibition by viral fusion protein, **201**, 988
- Hematology
  - peripheral, multiple effects of recombinant human interleukin 12 *in vivo* (monkey), **204**, 1150
- Hematopoietic cells
  - 32D, locomotion via chemotaxis and chemokinesis, mediation by αPDGF receptor tyrosine kinase, **204**, 628
  - tyrosine phosphorylation, induction by interleukin-6 (mouse), **200**, 821
- Hematoporphyrin IX
  - and analogs, erythroid differentiation induction in erythroleukemia K562 cells (human), **198**, 720
- Heme
  - –apoprotein interactions, effects on horseradish and wheat germ peroxidases, **204**, 1
  - –myeloperoxidase interactions, MPO residues involved in, analysis by site-directed mutagenesis (human), **202**, 73
- Hemocytes
  - calcium currents, regulation by vitamin D metabolites and extracellular Ca (land snail), **204**, 1096
- Hemodialysis
  - associated amyloidosis, pathogenesis, role of macrophage interleukin-6 induction by β_2-microglobulin modified by advanced glycation end products (human), **201**, 1235
- Hemoglobin
  - A, interaction with nitric oxide, characterization by infrared spectroscopy (human), **198**, 281
  - β-chain
    - hemorphin-related endogenous fragments, isolation (bovine brain), **202**, 410
    - oligomeric structure, effect of carboxyterminal modifica-

tion (human), **204**, 956
liposome-encapsulated, and liposomes, complement activation by: evidence for anti-lipid antibodies and alternative pathway activation (rat), **205**, 255
modification by bis(3,5-dibromosalicyl) sebacate (human), **203**, 1463
peptic hydrolysate, hemorphins isolated from, inhibition of angiotensin converting enzyme, and inhibitory kinetics (bovine), **204**, 216
potential blood substitute HbXL99α, stability under high pressure, **200**, 1635; *erratum*, **202**, 645
related protein, contribution to ferric reductase activities in *Escherichia coli*, **198**, 127
S and C, rebinding of carbon monoxide after ligand photolysis, associated kinetics, nanosecond absorption study (human), **205**, 154
Vitreoscilla, *vgb* gene encoding, oxygen-dependent regulation: evidence for positive regulation by transcriptional activator FNR, **202**, 535
Hemolysis
complement-mediated, effects of human brain clusterin (guinea pig), **204**, 1131
Hemorphins
isolated from peptic hemoglobin hydrolysate, inhibition of angiotensin converting enzyme, and inhibitory kinetics (bovine), **204**, 216
related endogenous hemoglobin fragments, isolation (bovine brain), **202**, 410
Hemorrhagic shock
associated glucose-6-phosphatase gene expression and activity: evidence for heat-sensitive activator (rat), **204**, 716
Heparin
binding by butyrylcholinesterase amphiphilic forms of intestinal mucosa cells, **201**, 1376
binding region in midkine molecule, localization, **203**, 1131
2-*O*-, 6-*O*-, and *N*-sulfate groups, role in ternary complex formation with basic fibroblast growth factor and soluble fibroblast growth factor receptor-1, **203**, 450
selective inhibition of gene expression of matrix metalloproteinase transin in cultured mesangial cells (rat), **203**, 1333
size and sulfation, variations: in midulation of heparin effect on binding of VEGF_{165} to VGEF receptors, **203**, 1339
Heparin-binding EGF-like growth factor
cell surface-associated precursor form in breast carcinoma cells, biosynthesis and processing by phorbol ester (human), **204**, 592
gene expression in mesangial cells, regulation by LDL and oxidized-LDL (rat), **202**, 1001
identification as hepatocyte mitogen (rat), **198**, 25; *erratum*, **199**, 1088
induction and expression in pancreatic cancer cells (human), **202**, 1705
Hepatectomy
partial
effects on hepatic actin, profilin, and extracellular matrix mRNA expression (rat), **198**, 568
subsequent changes in 1,4,5-inositol trisphosphate binding (rat), **205**, 291
subsequent liver regeneration, effects on hepatic and uric phosphotryosine levels (mouse), **201**, 909
Hepatitis
Long Evans Cinnamon rat, causative gene, localization on chromosome 16: homolog to human Wilson disease gene, **202**, 512
Hepatitis B virus
core protein, subcellular localization, effect of surface proteins (COS-7 cells), **203**, 1348
surface antigen binding protein, functional active recombinant, cloning and production (human), **205**, 52
Hepatitis C virus
core protein, N-terminal region, nuclear localization signals, identification, **205**, 1284
induced apoptosis, role of Fas ligand (human hepatocytes), **204**, 468
NS3 protein, major linear antigenic region, cell binding Arg-Gly-Asp sequence in close proximity to, localization (human), **202**, 1352
NS5A region, production of two phosphoproteins (COS-1 cells), **205**, 320
RNA, internal initiation, role of complete 5′ noncoding region (human), **199**, 425
third major genotype, identification, **199**, 1474
type $5a^{+}$, core E2, and NS3/NS4 regions, cloning and phylogenetic analysis (human), **202**, 1308
Hepatitis delta virus
ribozyme, role in transcription after polyadenylation, **205**, 864
Hepatocyte growth factor
and deletion variant, variation in biological activity and tertiary structure (rat), **200**, 808
effect on wound repair in gastric mucosal cells *in vitro* (rabbit), **199**, 1453
identification of mouse mammary fibroblast-derived mammary growth factors as, **199**, 772
modulation of intestinal epithelial cell proliferation and migration (human), **202**, 701
regulation of transforming growth factor in hepatocellular

carcinoma cells (human), **200**, 1099
related protein HGFL, mRNA expression during liver regeneration and inflammation (rat), **203**, 666
single-chain precursor, activation, role of HGF-converting enzyme (bovine serum), **198**, 1161
stimulation of gastro-intestinal epithelial growth in primary culture (human), **205**, 1445
upregulation of met gene expression in fetal hepatocytes in primary culture (rat), **204**, 1364

Hepatocyte growth factor-converting enzyme
purification, characterization, and role in pro-HGF activation (bovine serum), **198**, 1161

Hepatocytes, *see also* Liver
alcohol dehydrogenase inhibition by acetylcarnitine (rat), **203**, 1496
apoptosis, hepatitis C virus-induced, role of Fas ligand (human), **204**, 468
ATP-depleted isolated, sodium-dependent calcium influx (rat), **202**, 360
c-myc gene expression and DNA synthesis, inhibition by elevated glucose levels *in vitro* (rat), **202**, 1476
cyclin D1 mRNA expression during growth cycle and mitogenic transition induced by TGF-α (rat), **204**, 91
cylindrospermopsin toxicity, role of glutathione (rat), **201**, 235
cytochrome P4501A1 levels *in vitro*, effect of thiabendazole (rabbit), **202**, 1483
from diabetic rat, delayed processing of insulin proreceptor by, **204**, 725
elongation factor eEF-2, multiformity detection (rat), **202**, 844
expression of syndecan-1 gene (rat), **204**, 944
fetal, in primary culture, met gene expression, upregulation by hepatocyte growth factor (rat), **204**, 1364
follistatin production, stimulation by epidermal growth factor (rat), **202**, 422
glucokinase, translocation by glucose (rat), **204**, 252
glucose metabolism, effects of tri-Calciphor (rat), **201**, 1457
halothane-exposed rats, hsp72 in, nuclear translocation, **199**, 647
HepG2, α_2-macroglobulin gene promoter expression (human), **202**, 65
inositol 1,4,5-trisphosphate production, stimulation by synthetic *Rab*3A effector domain peptide (rat), **203**, 756
insulin-induced glucokinase expression in, effect of epidermal growth factor (rat), **201**, 902
interleukin-8-related KC/gro protein release from, modulation by lipopolysaccharide or proinflammatory cytokines (rat), **203**, 1398
killing with nitric oxide, by mobilization of mitochondrial calcium, **205**, 1143
lines derived from normal liver tissue, caffeine biotransformation and effects of dibenz(*a,h*)anthracene (human), **201**, 559
Mg^{2+}-dependent nuclease activity, enhancement by cisplatin exposure (rat), **202**, 749
mitogenesis, induction by heparin-binding EGF-like growth factor (rat), *erratum*, **199**, 1088; **198**, 25
monolayers, from alcohol-exposed rats, effect of alcohol on expression of hsp73, **205**, 186
mouse hepatitis virus type 3 susceptibility, effects of cholesterol-enriched diet and phosphatidylserine treatment: correlation with membrane fluidity levels, **204**, 1299
nuclei, casein kinase 2 and protein substrate release after DNase and RNase digestion (rat), **202**, 984
from obese Zucker rats, resistance to insulin inhibitory effect on hepatic apolipoprotein B secretion, **205**, 417
plasma membrane high-molecular-weight protein, specific binding of photoreactive Leu_7-MAP (rat), **203**, 200
primary, cytochrome P4502A5 expression and inducibility by phenobarbital, modulation by cAMP (mouse), **205**, 631
proliferation in culture, reduction, role of impaired intracellular collagen synthesis (rat), **200**, 1701
single, cytoplasmic Ca^{2+} oscillation, agonist-induced, inhibition by caffeine (rat), **198**, 728
transfer *in vivo* of human α1-antitrypsin gene by small liposomes to, subsequent expression of encoded protein (mouse), **204**, 1023
tyrosine aminotransferase gene transcription, induction *in vitro*, regulation by ginesenoside-Rg_1 (rat), **205**, 1696

Herbimycin A
attenuation of leukocyte adhesion to endothelial cell monolayers (human), **198**, 359
binding to p100, correlation with depletion of *erb*B2 gene product p185 (human breast cancer cells), **201**, 1313
inhibition of thrombin-induced calcium influx and protein tyrosine phosphorylation in endothelial cells (human), **202**, 1651
selective inhibition of dexamethasone-induced apoptosis in thymocytes (rat), **202**, 128

Heregulin-like growth factor
secreted by estrogen receptor-negative MDA-MB-231 breast cancer cells stimulating estrogen receptor-positive cells, isolation (human), **202**, 1357

Herpes simplex virus type 1
encoded helicase-primase complex and UL9 origin binding protein, nucleotide and DNA coeffector binding sites, characterization, **199**, 1333

  reproduction, inhibition with hydrophobized antisense oligonucleotides (Vero cells), **203**, 959
  thymidine kinase gene, in regulation of recombinant human granulocyte colony-stimulating factor production in NIH3T3 cells, **200**, 1245
  UL9 gene, cell type-specific induction by cell signaling pathway (HeLa, PC12, Vero cells), **205**, 44

Heterogeneity
  protein kinase C in glioma cells (human, mouse), **205**, 127

Hexapeptides
  cyclic, endothelin receptor antagonists highly potent for receptor subtypes ET_A and ET_B, identification, **200**, 1708

Hexokinase II
  gene structure (human), **205**, 490

High-performance liquid chromatography
  in assay of *S*-adenosylmethionine and *S*-adenosylhomocysteine in tissue (rat), **205**, 1748

Hippocampus
  detection of arginine-vasopressin receptor mRNA (rat), **205**, 1702
  kainic acid induced seizure in, resulting mitogen-activated protein kinase phosphorylation and activation (rat), **202**, 1163
  and pituitary and cortex, inositol-1,4,5-trisphosphate content, somatostatin-14 effects (rat), **203**, 379
  reserpinized brain, altered processing of β/A4 amyloid precursor protein (rat), **202**, 293
  slices, hypoxia–hypoglycemia-induced calcium mobilization, temperature dependence (monkey), **205**, 1843

Histamine receptors
  binding studies with dimaprit analogues in melanoma cells (human), **201**, 687
  H_1
    gene cloning, chromosomal mapping, and tissue distribution (human), **201**, 894
    site-directed mutagenesis
      evidence for selective interaction of Asn^{207} with subclasses of H_1-receptor agonists (guinea pig), **201**, 295
      role of Asp107, Asn198, and Thr194, **203**, 1096
  H_2, and gene transcripts, localization in stomach (rat), **198**, 1195

Histamine release factor
  lipid-soluble, isolation from platelets (human), **201**, 443

Histatin
  and epidermal growth factor, synergistic stimulation of chondrocyte proliferation (rabbit), **198**, 274

Histidase, *see* Histidine ammonia-lyase

Histidine
  essential role in β-galactosidase activity (*Lactobacillus delbrückii bulgaricus*), **201**, 1167
  residue 418 in β-galactosidase, as Mg^{2+} ligand, evidence from site-directed mutagenesis (*Escherichia coli*), **201**, 866
  residues, role in catalytic mechanism of Fe- and Ni-Fe-Se-hydrogenases (*Desulfovibrio desulfuricans, D. vulgaris*), **201**, 128

Histidine ammonia-lyase
  Ser-143 as essential active site residue (*Pseudomonas putida*), **201**, 1433

Histidyl
  phosphorylation, P36 in Fao cells *in vitro* and *in vivo* (rat), **205**, 899

Histone H1 kinase
  –cdc2 KINASE complex, in C108 carcinoma cells, hydroxystearic acid effects (mouse), **203**, 1385

Histones
  H1, somatic variants, and testis-specific H1t, induction of testis chromatin condensation, comparison (rat), **198**, 32
  H1 and H5, linker, and high mobility group protein 1, competition for binding to four-way junction DNA: implications for transcription (bovine, chicken), **203**, 1904
  octamers, advanced glycation in liver, *in vitro* study (rat), **203**, 588
  and polylysine, lectin conjugates, directed gene transfer to airway epithelial cells (human), **205**, 826
  ubiquitinated isoforms in chromatin in mammalian cell lines, transcription inhibition effects, **203**, 344

HIV, *see* Human immunodeficiency virus

HIV-1, *see* Human immunodeficiency virus, type 1

HMG CoA reductase
  activity in COS cells, increase by cholesterol 7α-hydroxylase, **202**, 896

Homeodomains
  containing muscle protein MHox, inhibition of ternary complex formation at c*efos* serum response element, **200**, 1742

Hoogsteen mode
  reverse, for base pairing of 2′-deoxythymidine with 8-amino-2′-deoxyadenosine, identification in solution, **204**, 788

Hops
  component colupulone, and chromium, effects on glucose tolerance and hepatic cytochrome P450 in diabetic and nondiabetic mice, **200**, 1455

Horseradish peroxidase
  antiserum against, carbohydrate antigens recognized by, expression on mammalian cells (bovine, rat), **204**, 342
  effect of heme–apoprotein interactions, **204**, 1

HSV-1, *see* Herpes simplex virus type 1

HTLV-I, *see* Human T cell leukemia virus type I

Human immunodeficiency virus
- cytopathicity, inhibition by short terminally phosphorylated oligoriboguanylic acids, **203**, 1244
- gp120, dependent prostaglandin E_2 release by cultured human astrocytoma cells, regulation by nitric oxide formation, **203**, 87
- Tat protein, homodimer formation, genetic test-based detection and homodimer inhibitor selection, **201**, 701
- T22 peptide activity against, structure–activity relationships, **205**, 1729

Human immunodeficiency virus type 1
- activation by *Salmonella typhimurium* in chronically infected promonocytic cells by induction of TNF-α production (human), **201**, 16
- 3′–azido-3′deoxythymidine-resistant, inhibition by dehydroepiandrosterone *in vitro* (human), **201**, 1424
- chronically infected promonocytic U1 cells, P-glycoprotein expression, induction by *Mycobacterium tuberculosis*, **199**, 1181
- competition with polyphemusin II for cell binding, evidence for, **202**, 470
- DNA promoter region, DNA topoisomerase I and II cleavage sites, **205**, 1601
- enhancer binding by NF-κB subunits, tumor necrosis factor α and interleukin-1β effects (human), **203**, 623
- *env* gene sequence, role in TAR-independent transactivation by Tat from major immediate-early promoter of murine cytomegalovirus, **203**, 1152
- GAG protein budding site, effects of internal and myristylated N-terminus sequences of matrix domain, **204**, 1031
- gp120
  - CD4 epitope interacting with, molecule antibodies to, effect on cell-surface tryptase TL_2 (human), **201**, 1390
  - V3 domain, recognition by antibody with other specificity, with antigen/antibody specificity exchanger, **205**, 1386
- gp160-stimulated signals transduced through CD4 molecule on T cells, activation of NF-κB, **203**, 498
- infected macrophages, *in vitro* modulation of gelatinase B and inhibitors in, **204**, 1272
- infection of primary monocytes, resistance to, induction by interferon-γ, **201**, 756
- infectious molecular clones with defined mutations in protease gene, construction, **205**, 1651
- long terminal repeat, targeting by hammerhead ribozyme, **203**, 889
- modulation of expression of gelatinase A and B in monocytic cells, **205**, 1243
- Nef peptide binding to HLA class II antigens, identification, **200**, 1059
- protease, competitive inhibition by
  - 4-hydroxy-benzopyran-2-ones and 4-hydroxy-6-phenylpyran-2-ones, **200**, 1658
  - warfarin derivatives, **201**, 290
- replication in infected monocytes and peripheral blood mononuclear cells, inhibition by interleukin-10 (human), **202**, 374
- reverse transcriptase, chiral discrimination of enantiomeric 2′-deoxythymidine 5′-triphosphate, **200**, 1023
- reverse transcriptase, 138 Glu→Lys mutated, sensitivity to HIV-1-specific RT inhibitors, **201**, 1305
- subtypes A to E, infection, grouping by V3 peptide serotyping, **205**, 1658
- Tat protein
  - enhancement of interleukin-2 promoter activity via synergism with phorbol ester and calcium-mediated activation of NF-AT *cis*-regulatory motif, **205**, 467
  - mediated transactivation, inhibition by thiamine disulfide, **205**, 967

Human T-cell leukemia virus type I
- Rex protein, stabilization of interleukin-2 receptor α chain mRNA in murine L cells, **198**, 243
- Tax-induced transcriptional activation, modulation by phosphorylation, **205**, 666

Hyaluronate
- binding activity, in cell surface antigen CD38 identified as ecto-enzyme of NAD glycohydrolase (HL-60 cells), **203**, 1318

Hydride transfer
- stereospecificity, and substrate specificity, for FMN-containing NAD(P)H-flavin oxidoreductase from luminescent *Vibrio fischeri* ATCC 7744, **205**, 275

Hydrocortisone
- replacement, and adrenalectomy, effects on stomach mucosa cell proliferation, differentiation, and pepsinogen levels (rat), **202**, 1

Hydrogenase
- Fe- and Ni-Fe-Se-containing, catalytic mechanism, role of histidine residues (*Desulfovibrio desulfuricans, D. vulgaris*), **201**, 128

Hydrogen peroxide
- effects on Ca^{2+} and K^+ channel currents in pancreatic β cells (mouse), **200**, 860
- and S-nitrosothiol, induction of strand scission in pBluescript DNA (*Escherichia coli*), **200**, 966
- and organic peroxides, differential mediation of DNA damage, implications for absestos carcinogenesis (calf thy-

mus), **200**, 687
  role in photodegradation of lindane and DDT, **199**, 1284
Hydrolase
  30-kDa, cleaving ubiquitin–protein conjugates, characterization (bovine erythrocytes), **205**, 354
Hydrolysis
  ATP, related activity of membrane-bound H^+-ATP synthase, effect of sulfite, **201**, 487
  cyclic ADP-ribose, catalysis by spleen $NAD(P)^+$ glycohydrolase, mechanism (bovine), **204**, 1279
  differential, immobilized phosphatidylcholines by phospholipases A_2 and C, **205**, 113
  enzymatic and nonenzymatic, interketosidic linkages, differential reactivities of *N*-glycolylneuraminic acid dimers, **205**, 893
  polyphosphoinositides, role in photoresponse induction in type B photoreceptors (*Hermissenda crassicornis*), **202**, 299
Hydrostatic pressure
  high, stability of potential blood substitute HbXL99α under, **200**, 1635; *erratum*, **202**, 645
Hydroxyacyl enzyme
  putative intermediate of epoxide hydrolase, isolation (mouse), **198**, 850
Hydroxylamine
  in situ cleavage, actin on sequencer membranes, subsequent identification of serum actin as cytoplasmic isoform (fetal bovine), **205**, 195
  and sodium azide, stimulation of neutrophil NO production, role of oxygen radicals (human), **199**, 1245
Hydroxylation
  microsomal, oleic acid, naphthalic acid anhydride- and phenobarbitol-induced, role of cytochrome P450 (*Triticum aestivum*), **198**, 795
Hydroxyl moieties
  role in inhibition of Ca^{2+}-ATPase by trilobolide and 2,5-di(*tert*-butyl)-1,4-benzohydroquinone (rabbit), **199**, 916
Hydroxyl radicals
  as early signal involved in phorbol ester-induced monocytic differentiation of HL-60 cells, **200**, 1650
  generation
    and lipid peroxidation, inherited enhancement in galactose cataractogenesis-sensitive rat, associated DNA rearrangements, degenerative diseases, and premature aging (rat), **199**, 726
    from neocarzinostatin, mediation by NADPH/cytochrome P450 reductase via activation of enediyne chromophore, **205**, 1716
  production from peroxynitrite decomposition, analysis by electron spin resonance spin trapping, **203**, 1515
  role in photodegradation of lindane and DDT, **199**, 1284
Hydroxyproline
  mitochondrial transport mechanisms, spectroscopic analysis (rat kidney), **202**, 58
Hydroxystearic acid
  effects on cdc2/histone H1 kinase in C108 carcinoma cells (mouse), **203**, 1385
Hydroxyurea
  effect on 2′,3′-dideoxycytidine activation in H9 cells (human), **205**, 92
Hyperlipidemia
  Watanabe rabbits with, and New Zealand white rabbits, whole blood and plasma levels of 4-hydroxy-2-nonenal, **199**, 671
Hyperosmolarity
  stimulation of immunoreactive corticotropin releasing factor and adrenocorticotropic hormone secretion by B cells and T cells (human), **204**, 828
Hyperparathyroidism
  primary, effect on erythrocyte membrane calcium transport (human), **202**, 1505
Hyperplasia
  hepatic, protein kinase C isozyme pattern in (rat), **205**, 208
Hyperproliferation
  epidermal, reversal by 13-hydroxyoctadecadienoic acid via selective inhibition of protein kinase C-β activity (guinea pig), **201**, 257
Hypertension
  affected rat, accelerated endothelin-1 release from mesenteric artery following nephrectomy, augmentation by converting enzyme inhibition (rat), **202**, 246
  and nitric oxide synthesis, effect of deficiency of endogenous arginine synthesis (rat), **205**, 1391
Hyperthermia
  stimulation of immunoreactive corticotropin releasing factor and adrenocorticotropic hormone secretion by B and T cells (human), **204**, 828
Hyperthyroidism
  and hypothyroidism, effects on carnitine palmitoyltransferase-I mRNA levels and activity (rat), **201**, 932
Hypertrophy
  cardiac
    α-adrenergic-induced, prevention by genistein via Ras-mitogen protein kinase signaling pathway (rat), **202**, 1586
    related changes in contractile regulatory protein subunits troponin T and troponin I (guinea pig), **202**, 384
Hypoglycemia
  endotoxic shock-induced, role of changes in glucose trans-

porters in fat, muscle, and liver tissues (rat), **198**, 923
–hypoxia, induced calcium mobilization in hippocampal slices, temperature dependence (monkey), **205**, 1843
Hypomethylation
and hypoexpression, human cytochrome P4502E1 gene in lung tumors, **205**, 1086
Hypophysectomy
effects on myosin heavy chain mRNA levels in skeletal muscle, role of growth hormone treatment and restricted diet (rat), **198**, 97
Hyporeactivity
vascular, endotoxin-induced, to vasoconstrictor agents, role of activation of soluble guanylyl cyclase (rat aorta), **201**, 436
Hypotension
central endothelin-1-induced, effect of glutamate receptor blockade (rat), **205**, 795
Hypothyroidism
effects on TRH and TRH precursor levels in anterior pituitary (rat), **201**, 1248
and hyperthyroidism, effects on carnitine palmitoyltransferase-I mRNA levels and activity (rat), **201**, 932
Hypoxanthine–guanine phosphoribosyltransferase, *see* Hypoxanthine phosphoribosyltransferase
Hypoxanthine phosphoribosyltransferase
encoding gene
in PCR analysis of clonality in precancerous disease states and early stages of tumor progression (human), **199**, 511
YAC containing, transfer into human cells by four methods and role of homologous recombination, **200**, 1693
Hypoxia
–hypoglycemia, induced calcium mobilization in hippocampal slices, temperature dependence (monkey), **205**, 1843
induced vascular endothelial growth factor mRNA in U-937 cells, mediation by adenosine, **204**, 318
osteosarcoma cells, transcriptional induction of vascular endothelial growth factor, reverse transcription–PCR assay (human), **205**, 1474
related injury in isolated perfused kidney, protective effects of alanine and glycine, detection by ^{23}Na NMR (rat), **202**, 1639
stimulation of immunoreactive corticotropin releasing factor and adrenocorticotropic hormone secretion by B cells and T cells (human), **204**, 828

I

IBMX
effect on intracellular pH increase during meiosis in *Xenopus laevis* oocytes, **205**, 979
ICAM-1, *see* Cell adhesion molecules, ICAM-1
ICI 164,384
activation of estrogen receptor mutant exhibiting enhanced binding to estrogen response element (human), **202**, 888
ICPs, *see* Insecticidal crystal proteins
IFN-γ, *see* Interferon-γ
IL-1α, *see* Interleukin-1α
Illexins
from squid ink, isolation and characterization (*Illex argentinus*), **198**, 560
Ilmofosine
protein kinase C inhibitor, for cell arrest in G2 phase and suppression of cdc2 kinase activation (human), **199**, 937
Image analysis
cytochrome *c* oxidase in phospholipid liposomes, with Pt/C and W/Ta shadowing (bovine heart), **203**, 331
Imaging
leaf interior by optical cross-correlation interferometry (*Tradescantia zebrina*), **205**, 638
single cell, in subcellular localization of calcium elevations in aldosterone-treated vascular smooth muscle and endothelial cells (pig, rat), **204**, 475
Imidazolineoxyl *N*-oxide
therapeutic effect on endotoxin shock by direct NO scavenging (rat), **202**, 923
Iminodipeptides
containing proline with C-terminal and N-terminal residues, priming of superoxide generation in neutrophils by *N*-formyl-methionyl-leucyl-phenylalanine (human), **205**, 758
Immobilization
urease, by electron beam irradiation technique, appearance of high enzyme activity in immobilized discs, **205**, 962
Immune responses
cellular, chemically synthesized sialic acid-containining glycoconjugate GSC-53 as potent inhibitor, **203**, 1102
suppression by α-fetoprotein (transgenic mouse), **201**, 1154
Immunization
with recombinant thyrotropin receptors, associated induction of TSH-R autoantibodies and thyroiditis (mouse), **199**, 1027
in vitro, IgM antibodies raised by, specific to soluble caudate nucleus and cerebrospinal fluid acetylcholinesterase, characterization (human), **203**, 1076
Immunoaffinity chromatography
ligands, antibodies elicited by primary response as, evaluation (bovine, mouse), **201**, 1008

Immunoaffinity purification
  aminopeptidase P from lung, kidney, and serum (guinea pig), **205**, 1796
Immunoblots
  in determination of ribosomal protein *Sso*L12e stoichiometry in 50S subunits (*Sulfolubus solfataricus*), **203**, 1140
Immunocomplexes
  neutrophils binding to, in induction of tyrosine phosphorylation of FcγRII: role of phosphorylation in signaling Fc-mediated phagocytosis (human), **201**, 30
Immunocytochemistry
  in detection of parathyroid hormone-related protein in vascular endothelial cells (bovine), **199**, 547
Immunoelectrophoresis
  crossed affinity, in detection of *Choristoneura fumiferana* brush border membrane-binding molecules specific to *Bacillus thuringiensis* δ-endotoxin, **199**, 1194
Immunofluorescence microscopy
  in localization of rhodopsin in *Chlamydomonas reinhardtii*, **205**, 1025
Immunoglobulins, *see also* Antibodies; Autoantibodies; Monoclonal antibodies
  IgG
    aggregated, stimulated protein tyrosine phosphorylation in neutrophils, role of Fcγ receptors (human), **199**, 653
    binding activity of staphylococcal protein A in dipalmitoylphosphatidic acid monolayer, **201**, 1242
  IgG and IgM, lupus anticoagulants, heterogeneity and diversity in patient with systemic lupus erythematosus, **203**, 1789
  IgG2, with ELISA, in diagnosis of chronic elephantiasis (human serum), **205**, 202
  IgG4, with ELISA, in follow-up of microfilaraemic patients infected with *Brugia malayi*, **205**, 202
  IgM, raised by *in vitro* immunization, specific to soluble caudate nucleus and cerebrospinal fluid acetylcholinesterase, characterization (human), **203**, 1076
Immunoliposomes
  pH-sensitive, in transfection of plasmid DNA to glial cells (rat), **201**, 888
Immunolocalization
  annexin XI in tissues: development-related and cell-type specific nuclear localization (rat), **202**, 403
Immunomodulation
  by extracts of wild and cultured *Panax ginseng*, comparison, **200**, 1672
IMP
  binding site in carbamyl phosphate synthetase, location in COOH-terminal domain (*Escherichia coli*), **203**, 1083
IMP dehydrogenase
  type II, gene cloning and sequencing (human), **205**, 537
Imprinting
  ABL and BCR genes, lack in androgenetic and gynogenetic tissues (human), **204**, 621
Indomethacin
  effects on oxidized low-density lipoprotein-induced monocyte–endothelial cell adhesion (human), **204**, 673
Infarction
  myocardial, subsequent inducible nitric-oxide synthase activity, analysis (rabbit), **205**, 1671
Infection
  HIV-1 in primary monocytes, resistance to, induction by interferon-γ (human), **201**, 756
  Listeria monocytogenes, immunosuppressive effects of α-fetoprotein (transgenic mouse), **201**, 1154
Inflammation
  chronic hepatic, model, expression of inducible nitric oxide synthase mRNA and protein, enhancement by nitric oxide synthesis inhibition (rat), **204**, 635
  liver, effect on hepatocyte growth factor-like protein mRNA expression (rat), **203**, 666
Influenza virus
  entry into cells, inhibition by concanamycin A, **201**, 1270
  infectivity, relationship to viral fusion peptide disruption of bilayers, **202**, 1420
Infrared spectroscopy
  in analysis of nitric oxide
    bonding to cytochrome-*c* oxidase and myoglobin (bovine heart), **204**, 537
    interaction with hemoglobin A (human), **198**, 281
Injury
  balloon catheter-induced, to carotid artery, subsequent intimal thickening, inhibition by C-type natriuretic peptide (rabbit), **205**, 1051
Inosine
  replacement of guanosine in preferred cleavage sequence 5′-AGG of chromoprotein C-1027, effect on binding mode and cutting site, **205**, 1533
Inositol phospholipids
  pathway, in thyroid from Graves' disease patients, effects of thyrotropin and adenosine, **205**, 584
  pathway, in thyroid non-toxic goiter, role of thyrotropin (human), **201**, 1182
Inositol tetrakisphosphate
  isomers, effects on intracellular Ca^{2+} concentration in NIH3T3 fibroblasts, **200**, 1300
  stimulation of ATP-independent Ca^{2+} uptake mechanism in cardiac junctional sarcoplasmic reticulum (dog), **204**, 69

- Inositol-1,3,4,5-tetrakisphosphate
  - protein binding, isolation and characterization: synaptotagmin II (mouse), **205**, 1036
- Inositol-3,4,5,6-tetrakisphosphate
  - gated Ca^{2+} influx, in NIH3T3 fibroblasts, **200**, 1300
- Inositol trisphosphate
  - release in angiotensin II-stimulated adrenal zona glomerulosa cell, role of type I angiotensin II receptor internalization (rat), **204**, 1292
- Inositol 1,4,5-trisphosphate
  - activated Ca^{2+} permeable channels, detection in inside-out patches of Purkinje cells *in vitro* (mouse), **199**, 1128
  - –cGMP cascade, role in eclosion hormone-mediated signal transduction in abdominal ganglia (*Bombyx mori*), **198**, 613
  - content in various brain areas, somatostatin-14 effects (rat), **203**, 379
  - production in
    - permeabilized cells, stimulation by synthetic *Rab*3A effector domain peptide (human, mouse, rat), **203**, 756
    - plant cells, stimulation by venom peptides melittin and mastoparan (carrot), **205**, 739
- Insecticidal crystal proteins
  - CryIA family, *Bacillus thuringiensis*
    - intracellular proteolysis and limited diversity, **201**, 788
    - specific *Manduca sexta* midgut-binding proteins, ligand blot identification, **201**, 782
- Insulin
  - binding
    - to cells expressing insulin receptor mutated at Cys 524 (human), **205**, 1891
    - effect of Leu 193 mutation in cysteine-rich region of insulin receptor (human), **203**, 763
  - effects on whole body glucose utilization and muscle glucose transporter translocation (mouse), **199**, 662
  - and glucagon, release, specific inhibition by receptor-selective somatostatin analogs (rat), **205**, 341
  - and glucose
    - effect on fetal lung insulin receptor mRNA and tyrosine kinase activity *in vitro* (rat), **202**, 694
    - high levels in isolated adipocytes, effects on lipid synthesis (rat), **199**, 1151
    - responses in isolated lymphocytes, for evaluation of *in vivo* status: effects of very low calorie diet treatment (human), **202**, 1169
  - induction of
    - germinal vesicle breakdown in oocytes, kinetics, effect of oocyte storage (*Xenopus laevis*), **202**, 803
    - glucokinase expression in hepatocytes, effect of epidermal growth factor (rat), **201**, 902
    - glucose transport in primary culture of brown adipocytes, effect of wortmannin (rat), **202**, 660
    - glucose uptake in isolated adipocytes, inhibition by endothelin-1 (rat), **202**, 688; *erratum*, **203**, 1363
    - mitogen-activated protein kinase pathway in hepatoma H4EII cells, inhibition by cAMP (rat), **202**, 1104
    - tyrosine phosphorylation of protein kinase Cα in CHO cells: direct interaction of insulin receptor and protein kinase C, **200**, 1570
  - inhibitory effect on hepatic apolipoprotein B secretion, resistance of hepatocytes from obese Zucker rats, **205**, 417
  - mitogenic signaling pathway, early events, disruption by lovastatin (rat), **204**, 399
  - producing cells, RINm5F, interleukin-1β-induced expression of superoxide dismutase and nitric oxide synthase mRNA, dissociation (rat), **203**, 1542
  - regulation of hepatic glucose-6-phosphatase gene expression in Fao hepatoma cells (rat), **201**, 302
  - responsive deoxyglucose, transport in 3T3-L1 adipocytes, correlation with insulin receptor substrate-1 (human), **198**, 523
  - responsive glucose transporter GLUT4, translocation, induction by epidermal growth factor (CHO cells), **205**, 857
  - responsive regions, identification in fatty acid synthase gene promoter (rat), **203**, 943
  - stimulation of glucose transport into L6 myotubes, role of phosphatidylinositol 3-kinase activation (L6 cells), **205**, 570
  - type I, gene promoter, transcription factor binding, glucose effects (rat), **203**, 702
- Insulin degrading enzyme
  - and multicatalytic proteinase, cytosolic proteolytic complex containing, identification and isolation, **202**, 1047
- Insulin-like growth factor-binding proteins
  - IGFBP-1, insulin response sequence in promoter, binding of hepatocyte nuclear factor-3: enhancement of promoter function (mouse), **203**, 1835; *erratum*, **205**, 1496
  - IGFBP-3
    - inhibition of estrogen-stimulated breast cancer cell proliferation (human), **198**, 292
    - and insulin-like growth factors, display of disulfide isomerase activity, role of complex formation, **198**, 1225
- Insulin-like growth factor I receptors
  - cDNA, cloning: structural analysis of rat and human IGF 1 and insulin receptors, **202**, 1038
- Insulin-like growth factors
  - type I
    - and epidermal growth factor, differential effects on direc-

tional accumulation and transfer of 2-aminoisobutyrate by placental trophoblast in two-sided culture (human), **199**, 922
  gene expression and serum levels, tamoxifen-induced suppression, effects of somatostatin analogue octreotide (rat), **203**, 253
  induction of uncoupling protein gene expression in fetal rat brown adipocyte primary cultures, role of C/EBP transcription factors, **201**, 813
  mRNA expression by osteoblasts, stimulation by calcitonin (mouse), **199**, 876
  resistance in CHO cells by overexpression of insulin receptor: role of insulin receptor substrate-1, **205**, 693
Insulin proreceptor
  delayed processing by hepatocytes from diabetic rats, **204**, 725
Insulin receptor kinase
  phosphorylation of protein tyrosine phosphatase containing Src homology 2 regions and modulation of PTPase activity *in vitro*, **199**, 780
Insulin receptors
  autophosphorylation at juxtamembrane domain, stimulation by dithithreitol (human), **201**, 1439
  carbohydrate chains, effects of dexamethasone (human, rat), **200**, 852
  cysteine-rich region, Leu 193 mutation, effects on insulin receptor precursor cleavage and insulin binding (human), **203**, 763
  deactivation in insulin-sensitive fibroblasts by high glucose (rat), **201**, 71
  dephosphorylation, inhibition by hexamer peptide containing phosphotyrosyl mimetic F_2Pmp (human), **204**, 129
  evidence for direct interaction with protein kinase C in cells: insulin-stimulated tyrosine phosphorylation of PKCα, **200**, 1570
  gene expression in soleus muscle, effects of high-fat diet (rat), **202**, 519
  and IGF-I receptors, structural analysis: comparison of alternative splicing and receptor-specific domain conservation (human, rat), **202**, 1038
  mRNA and tyrosine kinase activity in fetal lung, effect of high glucose and insulin *in vitro* (rat), **202**, 694
  mutated at Cys 524, cells expressing, binding of insulin (human), **205**, 1891
  overexpression in CHO cells, subsequent resistance to insulin-like growth factor-I: role of insulin receptor substrate-1, **205**, 693
  protein tyrosine kinase, annexin I as potential inhibitor (human placenta), **203**, 813
  purified COOH-terminal, role in protein kinase stimulation and autophosphorylation of insulin receptor β subunit domain (human), **200**, 777
  signaling, role of phosphatidylinositol 3-kinase: studies with inhibitor LY294002 (human), **204**, 446
Insulin receptor substrate-1
  correlation with insulin responsive deoxyglucose transport in 3T3-L1 adipocytes (human), **198**, 523
  and glycogen synthase, gene polymorphisms in Japanese subjects with non-insulin-dependent diabetes mellitus, analysis, **202**, 463
  role in resistance to insulin-like growth factor-I in CHO cells by overexpression of insulin receptor, **205**, 693
  and β subunit, tyrosine-phosphorylated, association with p85, disruption by lovastatin (rat), **204**, 399
Integrase
  from bovine leukemia virus, in gene transfer into murine L929 cells, **203**, 1756
Integrins
  $\alpha_5\beta_1$, internalization, dependence on NPXY signals (human), **199**, 603
  β_2, expression by myelomonocytic cells, and endothelial cell ICAM-1 expression and binding, effects of genistein (human), **203**, 443
  phosphorylation, protein kinase C-mediated, role in modulation of melanoma cell metastasis and adhesion (human), **204**, 264
  platelet, GPIIb/IIIa, crosslinking sites of disintegrins albolabrin, bitistatin, echistatin, and eristostatin on, characterization (human), **202**, 135
Intercellular communication
  gap junctional, lack in limb mesenchymal cells inhibited from cartilage differentiation by phorbol ester (chicken embryo), **205**, 429
Interfacial binding
  triacylglycerol lipase, role in enzyme kinetics of lipolysis, **200**, 1321
Interferometry
  optical cross-correlation, in *in vivo* imaging of leaf interior (*Tradescantia zebrina*), **205**, 638
Interferon-α
  effects on transferrin receptor expression and intracellular iron content in epidermoid carcinoma cells (human), **203**, 281
  structure–function relationship, mutational analysis (bovine, human, mouse), **202**, 1445
Interferon-β
  and other cytokines, outer surfaces, comparative structural patterns, **201**, 1396
Interferon-γ
  activated macrophages, nitric oxide synthesis in, diacylglyc-

erol production for, role of phosphatidylcholine-specific phospholipase C (mouse), **199**, 461
  and C-terminal peptide, binding to cytoplasmic domain of IFN-γ receptor, and role in function (mouse), **201**, 215
  C-terminus, sufficiency for intracellular function in murine cell lines: recombinant IFN-γ effects, **203**, 1645
  effects on chemoattractant cytokine gene expression in fibroblasts and osteoblasts (mouse), **198**, 590
  induction of
    interleukin-12 mRNA expression by J774 macrophage cell line (mouse), **198**, 857
    nitric oxide production in osteoblasts (mouse), **201**, 924
    resistance to HIV-1 infection in primary monocytes (human), **201**, 756
  and interferon-β and dimeric interleukin-5, interhelix contact models, **201**, 1401
  and interleukin-1β, induction of nitric oxide production by retinal pigmented epithelial cells (human), **198**, 120
  mRNA levels, assay in psoralen/UVA-treated HUT-78 cells by competitive PCR (human), **203**, 935
  and other cytokines, outer surfaces, comparative structural patterns, **201**, 1396
  production, suppression by α-fetoprotein (transgenic mouse), **201**, 1154
  stimulated constitutive and inducible nitric oxide production by endothelial cells, differential regulation (mouse), **202**, 450
Interferon-γ receptors
  cytoplasmic domain, binding of IFN-γ and C-terminal peptide: role of C-terminus in function (mouse), **201**, 215
Interleukin-1
  chronotropic effects on cardiac myocytes, **205**, 992
  mediated leukocyte adhesion to endothelial cell monolayers, attenuation by tyrosine kinase inhibitors (human), **198**, 359
  pituitary sensitivity to, role of corticotropin-releasing hormone (rat), **198**, 480
Interleukin-1α
  effects on chemoattractant cytokine gene expression in fibroblasts and osteoblasts (mouse), **198**, 590
  expression in macrophages, regulation with glycosylphosphatidylinositol by protein-tyrosine kinase-mediated signal transduction (*Trypansoma brucei*), **205**, 984
Interleukin-1β
  activation of transcription factor NF-κB, inhibition by Nα-p-tosyl-L–lysine chloromethylketone (RINm5F cells), **203**, 149
  effects on NF-κB subunit binding to HIV-1 enhancer (human), **203**, 623
  expression in murine lupus nephritis, effects of omega-3 and omega-6 lipid-rich diets, **200**, 893
  gene expression, selective induction over IL-1 receptor antagonist gene expression, by signaling via MHC class II molecules (human monocytic cells), **201**, 855
  induced expression of superoxide dismutase and nitric oxide synthase mRNA in insulin-producing RINm5F cells, dissociation, **203**, 1542
  induction of
    cyclooxygenase 2 expression in A549 cells, suppression by dexamethasone, role of lipocortin-1 (human), **202**, 931
    cytosolic phospholipase A_2 gene in C6 glioma cells (rat), **205**, 12
    differential adhesiveness on endothelial cell surfaces (human), **202**, 866
    nitric oxide production in osteoblasts (mouse), **201**, 924
    transforming growth factor-β_1 production by aortic smooth muscle cells (rat), **204**, 1186
  and interferon γ, induction of nitric oxide production by retinal pigmented epithelial cells (human), **198**, 120
  modulation of interleukin-8-related KC/gro protein release from hepatocytes (rat), **203**, 1398
  processing in synovial cells from patients with rheumatoid arthritis, **199**, 1035
  regulation of $G_{i\alpha}$ gene expression via lipid mediators in tracheal muscle (guinea pig), **203**, 1889
  stimulation of catecholamine secretion from adrenal medullary cells *in vitro* (bovine), **198**, 81
Interleukin-2
  and other cytokines, outer surfaces, comparative structural patterns, **201**, 1396
  pituitary tumor cell growth response to, role of estrogen receptor (rat), **205**, 1930
  promoter activity, enhancement by HIV-1 Tat via synergism with phorbol ester and calcium-mediated activation of NF-AT *cis*-regulatory motif (Jurkat cells), **205**, 467
Interleukin-3
  β-chain transcripts, multiple transcription start sites and 5′ alternate splicing (mouse), **205**, 886
Interleukin-4
  encoding gene, regulatory P sequence, nuclear factor interacting with, relationship to NFκB and NF-AT NF(P) (human), **199**, 439
  and other cytokines, outer surfaces, comparative structural patterns, **201**, 1396
  stimulation of monocyte chemoattractant JE/MCP-1 expression in peritoneal macrophages (mouse), **203**, 562
Interleukin-5
  dimeric, and interferon-β, and inerferon-γ, interhelix contact

models, **201**, 1401
  and other cytokines, outer surfaces, comparative structural patterns, **201**, 1396
Interleukin-6
  chronotropic effects on cardiac myocytes, **205**, 992
  effects on chemoattractant cytokine gene expression in fibroblasts and osteoblasts (mouse), **198**, 590
  expression in murine lupus nephritis, effects of omega-3 and omega-6 lipid-rich diets, **200**, 893
  and IL-11, growth stimulation of malignant plasma cell lines, effects on tyrosine phosphorylation of JAK-TYK kinases (human, mouse), **202**, 596
  induction
    by β_2-microglobulin modified by advanced glycation end productions, role in hemodialysis-associated amyloidosis (human macrophages), **201**, 1235
    in osteoblastic MC3T3-E1 cells, effect of nerve growth factor (human), **205**, 1187
  induction of
    group II phospholipase A_2 in invasive gastric cancer cells (human), **198**, 878
    tyrosine phosphorylation in hematopoietic cell lines (mouse), **200**, 821
  regulation of contrapsins at mRNA level (rat), **201**, 222
  response element in *junB* promoter, transcriptional activation, mediation by stat family proteins (rat), **202**, 1181
  secretion by posterior pituitary cells *in vitro*, effects of CINC/gro (rat), **200**, 742
  signal transducr gp130 for, establishment of ELISA and detection in ascitic fluids of tumor-bearing mice, **202**, 637
Interleukin-8
  interaction with fibronectin cell binding fragments in regulation of neutrophil chemotaxis (human), **205**, 706
  related CINC/gro
    effects on hormone secretion by anterior pituitary cells *in vitro* (rat), **202**, 155
    production by anterior pituitary gland (rat), **202**, 161
  related KC/gro protein, release from hepatocytes, modulation by lipopolysaccharide or proinflammatory cytokines (rat), **203**, 1398
Interleukin-10
  production by glial cells *in vitro* (mouse), **205**, 1907
  Tat-induced secretion in H9 and U937 cells and inhibition of HIV-1 replication in infected monocytes and PBMCs (human), **202**, 374
Interleukin-11
  and IL-6, growth stimulation of malignant plasma cell lines, effects on tyrosine phosphorylation of JAK-TYK kinases (human, mouse), **202**, 596
Interleukin-12
  mRNA expression in J774 macrophage cell line, induction by interferon-γ (mouse), **198**, 857
  recombinant, human, multiple effects on peripheral hematology *in vivo* (monkey), **204**, 1150
Interleukin-1 receptor antagonist
  prevention of streptozotocin-induced diabetes (mouse), **202**, 543
Interleukin-1 receptors
  antagonist gene expression, selective induction of IL-1β gene expression over, induction by signaling via MHC class II molecules (human monocytic cells), **201**, 855
Interleukin-2 receptors
  α chain mRNA, stabilization by HTLV-1 Rex protein in L cells (mouse), **198**, 243
Interleukin-6 receptors
  serum, decidua as source: gestational profile of msIL-6R (rat), **205**, 998
Internalization
  $\alpha_5\beta_1$ integrin, role of NPXY signals (human), **199**, 603
Interphotoreceptor retinoid-binding protein
  encoding gene, retina-specific regulatory region, identification of retina-specific footprint (human), **203**, 1875
  uveitopathogenic peptide 1169-1191, specific binding of human B cell proteins, characterization (bovine), **204**, 799
Intestinal cells
  butyrylcholinesterase amphiphilic forms, heparin binding, **201**, 1376
  epithelial, proliferation and migration, modulation by hepatocyte growth factor/scatter factor (human), **202**, 701
  STC-1, cholecystokinin secretion, regulation by calcium-dependent calmodulin kinase II, differential effects of phenylalanine and cAMP (mouse), **201**, 1483
Intestine
  apolipoprotein E overexpression, effect on chylomicron remnant metabolism (mouse), **200**, 716
  cytochrome P4502E1, induction during chronic ethanol administration and withdrawal: evidence for short half-life of CYP2E1 (rat), **205**, 1064
  embryonic and postnatal, glucose-dependent insulinotropic polypeptide gene expression (rat), **201**, 964
  fetal, apolipoprotein synthesis, regulation by epidermal growth factor (human), **204**, 1340
  identification of 10-kDa proguanylin as major endogenous guanylin molecule (intestine), **205**, 1966
  Na^+-dependent transport of aminopeptidase-resistant sugar-coupled tripeptides (rat), **203**, 1412
  regional expression of epithelial dipeptidyl peptidase IV

(human), **203**, 1224
 small
  ileum, effect of ET_{B1} and ET_{B2} receptor antagonist BQ-788 (guinea pig), **205**, 168
  insoluble mucin complex apoprotein region, molecular cloning (rat), **198**, 181
 substance P, encoding by fourth isoform of preprotachykinin mRNA (rat), **202**, 796
Intracellular signaling
 insulin-receptor, role of phosphatidylinositol 3-kinase: studies with inhibitor LY294002 (human), **204**, 446
 protein kinase C-dependent and pertussis toxin-sensitive G protein-mediated pathways in astrocytes, role in activation of mitogen-activated protein kinases by endothelin-1 (rat), **204**, 1325
 role in goblet cell degranulation in isolated pancreatic ducts (guinea pig), **205**, 423
 role of interferon-γ C-terminus: recombinant IFN-γ effects on murine cell lines, **203**, 1645
 thrombin receptor, antagonization by E5510 via inhibition of NF-κB activation (human), **203**, 1181
Iodination
 role in formation of dityrosine bridges in bovine thyroglobulin, **202**, 38
Iodine
 –sodium symporter in thyroid follicles, inhibition by chloride channel blockers *in vitro* (pig), **204**, 1265
Iodoacetamide
 and dithiothreitol, effects on insulin receptor autophosphorylation: major effects in juxtamembrane domain (human placental membranes), **201**, 1439
Ion channels
 activity of H5 peptide with primary structure of presumed voltage-dependent K channel pore-forming region, **198**, 445; *erratum*, **200**, 670
 P_{2z} purinoceptor-operated, role in extracellular ATP increase of lymphocyte permeability to NH_4^+ (human), **202**, 1511
Ionic currents
 acetylcholine-induced, in isolated acinar cells of nasal gland, patch clamp analysis (guinea pig), **202**, 307
Ions
 metal, delivery by serotransferrin, effect of pH: structure–function relationship, **198**, 646
Ipriflavone
 binding and effects on preosteoclastic cell line (human), **201**, 1084
 inhibition of osteoclastic activity, mechanism (rat), **199**, 930
IRBP, *see* Interphotoreceptor retinoid binding protein
Iron
 ascorbate/Fe^{3+}/O_2-catalyzed oxidation systems, inhibition by yeast protector protein in presence of thioredoxin (*Saccharomyces cerevisiae*), **201**, 8
 cell surface, role in DNA synthesis and plasma membrane electron transport in CCl 39 cells, **203**, 16
 intracellular, and transferrin receptors, interferon-α effects (human epidermoid carcinoma cells), **203**, 281
 –sulfur cluster, Rieske, evidence for two proton dependent redox equilibrium (*Sulfolobus acidocaldarius*), **202**, 252
Iron-sulfur proteins
 high potential, redox properties, surface charge effects (*R. globiformis, C. vinosum, R. gelatinosus, E. vacuolata, E. halophila*), **203**, 436
Irradiation
 electron beam, in immobilization of urease discs, appearance of high enzyme acitivity, **205**, 962
Ischemia
 induced learning disability and neuronal loss, protection by prosaposin (gerbil), **204**, 994
Islet cells
 NO toxicity, role of poly(ADP-ribose) polymerase activation and NAD^+ depletion (rat), **199**, 1270
Islets of Langerhans
 expression of
  cloned CD38-homologous protein (rat), **202**, 629
  hamster gastric inhibitory polypeptide receptor and analysis of GIP receptor structure and function (rat), **205**, 1556
 phosphofructokinase isozyme expression: protein-coding sequence of platelet-type isozyme (human), **198**, 990
Isobutene, *see* Isobutylene
Isobutylene
 forming reaction, reconstitution with cytochrome P450rm and P450 reductase purified from *Rhodotorula minuta*, **201**, 516
Isopenicillin-*N*-epimerase
 aminotransferase homolog, identification (*Streptomyces clavuligerus*), **198**, 138
Isoprenoids
 biosynthesis, inhibition, induction of apoptosis in HL-60 cells (human), **199**, 1209
Isoprenylation
 protein, in C6 glial cells, geranylgeraniol for (rat), **205**, 955
Isoproterenol
 release of tetraethylammonium blockade of maxi-K^+ channels (guinea pig myocytes), **201**, 24
Isoquinolinesulfonamide

affinity chromatography, in isolation and characterization of 36-kDa microfibril-associated glycoprotein (bovine aorta), **198**, 1262

Isosorbide dinitrate
  ^{15}N-labeled, metabolized by erythrocytes, role in formation of nitric oxide (rat), **204**, 1055

Isradipine
  and α-tocopherol, antioxidant activity against low-density lipoprotein oxidation *in vitro*, comparison (human), **203**, 1803

Ito cells
  expression of syndecan-1 gene (rat), **204**, 944

J

Jacobine
  conjugation with glutathione, catalysis by hepatic glutathione-*S*-transferase *in vitro* (guinea pig, rat), **198**, 516

Jararhagin-C
  inhibition of collagen- and ADP-induced platelet aggregation (*Bothrops jararaca* venom), **201**, 331

Jujuboside A
  interaction with calmodulin, ^{1}H NMR and spin-labeled EPR studies, **202**, 148

K

K252a
  induced polyploidization in Meth-A cells, potentiation by cAMP (mouse), **205**, 746

Kainic acid
  induced seizure in hippocampus, resulting phosphorylation and activation of mitogen-activated protein kinase (rat), **202**, 1163

Kallikrein
  glandular, structure, modeling based on porcine pancreatic kallikrein A (human), **204**, 1251

Keratinocyte growth factor
  and epidermal growth factor, effects on keratinocyte and fibroblast growth, modulation by protein kinase C inhibitor (human), **204**, 1081
  mitogenic effects on mammary epithelium in primary culture (mouse), **204**, 1165
  recombinant, mitogenic activity and stability, effect of cysteine substitutions (human), **205**, 872

Keratinocytes
  genes expressed in, cataloging (human), **202**, 976
  growth, effects of protein kinase C interaction with epidermal and keratinocyte growth factors, comparison with fibroblast growth modulation (human), **204**, 1081
  nuclear orphan receptor-binding retinoic acid response elements (Balb/MK cells), **203**, 545
  simian virus 40-transformed, growth inhibition by transforming growth factor βs, role of dephosphorylation of Rb gene product (human), **201**, 673

Kexin
  related processing protease, PACE4
    isoform cDNAs, identification (human), **200**, 943; *erratum*, **204**, 1381
    isoform mRNA, distribution in various tissues (rat), **202**, 1215
    kexin-like protease PC7 homologous to, identification (rat), **202**, 1452

Kidney
  calpastatin I and II specificity, modulation by reversible phosphorylation and dephosphorylation (rat), **199**, 1326
  chronic failure, increase of 10-kDa proguanylin levels in, analysis (human), **205**, 1966
  cytochrome P4502E1, induction during chronic ethanol administration and withdrawal: evidence for short half-life of CYP2E1 (rat), **205**, 1064
  expression of
    G$_{M2}$ activator protein (mouse), **204**, 741
    S$_{A}$ gene assigned to 16p13.11 (rat), **199**, 862
  fructose 1,6-bisphosphatase cDNA isolation (human), **199**, 687
  isolated perfused, hypoxic injury, protective effects of alanine and glycine, ^{23}Na NMR analysis (rat), **202**, 1639
  medulla, prostaglandin synthesis, enzymatic pathway supplying arachidonic acid for, detection (rabbit), **202**, 1054
  prostaglandin E receptor subtype EP$_{3}$, isoforms derived by alternative RNA splicing, colocalization (rat), **199**, 834
  prostaglandin E2 receptor subtype EP$_{3}$, distribution (human), **198**, 999
  protein phosphorylation, regulation by 1,25-dihydroxyvitamin D$_{3}$ (rat), **204**, 807

Kidney cells
  293 (human embryonic)
    in analysis of rat choline transporter-1 functional properties, **198**, 637
    Ca^{2+}-dependent inactivation of cardiac L-type calcium channels, molecular determinants, **201**, 1117
    prohormone convertase MPC1 autoproteolytic activation, **201**, 795
    sustained cytoplasmic transgene expression system in, delivery by cationic liposomes, **200**, 1201
    vasoactive intestinal peptide$_{1}$ receptors expressed by stable

transfectants, coupling to distinct signaling pathways, **203**, 141
α_1 adrenergic receptor subtype RNAs (human), **201**, 1296
BHK (baby hamster)
Semliki forest virus and vesicular stomatitus virus entry, inhibition by concanamycin A, **201**, 1270
vesicular stomatitis virus-infected, intracellular transport of viral G glycoprotein, blocking by SS33410, **199**, 1073
COS-1 (African green monkey)
β-*N*-acetylhexosaminidase folding and endoplasmic reticulum exit, role of pro-peptide of proβ-polypeptide chain, **204**, 135
expression of
estrogen sulfotransferase cloned from human liver, **200**, 1621
thermolabile phenol sulfotransferase cDNA from human liver, **198**, 1119
production of two phosphoproteins from NS5A region of hepatitis C viral genome, **205**, 320
secretion of Alzheimer amyloid β/A4 protein, role of N-terminal site cleavage, **202**, 1517
translation initiation from non-AUG codons, mRNA species dependency, **201**, 567
COS-7 (African green monkey)
adenylate cyclase, phospholipase C, and Ca^{2+} mobilization, effects of transfection with human somatostatin receptor type 2, **200**, 986
expression of
human α-adrenergic receptor subtypes, **201**, 1296
human angiotensin II type 1 receptor subtype $AT_{1B}R$, **199**, 467
human creatine transporter, **204**, 419
human vasoactive intestinal peptide receptor-related protein cDNA, **200**, 769
human cytochrome P450 isozyme catalytic activity toward benzo[*a*]pyrene and proximate carcinogen isomers, **192**, 1373; *erratum*, **203**, 1935
p70 S6 protein kinase isoforms, subcellular localization, **198**, 780
CV 1 (African green monkey), thyroid hormone inhibition of thyrotropin receptor promoter activity: evidence for short loop regulation, **205**, 230
distal tubule, TKC2
functional difference between isoforms of rat prostaglandin E_2 receptor EP_3 subtype (mouse), **203**, 1897
immortalized, vasopressin-induced cAMP formation in, V1 and V2 vasopressin receptors in, cellular mechanisms (mouse), **202**, 680
glomerular mesangial, growth promotion by extracellular ATP, mediation by phospholipase C (rat), **202**, 234
MDCK (Madin–Darby canine)
expression of murine Spot35/calbindin-D28k gene: identification of vitamin D-responsive promoter region, **204**, 889
influenza virus entry, inhibition by concanamycin A, **201**, 1270
Vero (African green monkey), and other cell lines, cell type-specific induction of herpes simplex virus-1 UL9 gene by cell signaling pathway, **205**, 44
Killer cells
lymphokine-activated, induced cell death, effects of 3-aminobenzamide and other poly(ADP-ribose)polymerase inhibitors (human), **199**, 525
Kinetics
apohemoglobin dimer dissociation (human), **199**, 1278
carbon monoxide rebinding to hemoglobin S and C after ligand photolysis, nanosecond absorption study (human), **205**, 154
cyanometmyoglobin conformational change after electron transfer, monitoring by magnetically induced CD spectroscopy, **205**, 1724
enzyme, lipolysis, role of lipase interfacial binding, **200**, 1321
steady-state, glutathione transferase, role of deprotonation of bound glutathione (human placenta), **200**, 1428
Kinetin
delaying effect on onset of aging characteristics in human fibroblasts, **201**, 665
Kininogen
low-molecular-weight, in plasma, as precursor protein to urinary bradykinin in kininogen-deficient rat, demonstration, **204**, 1219
Klebsiella pneumoniae
evidence for nicotinamide nucleotide transhydrogenase, **198**, 928
lipopolysaccharide, binding of pulmonary surfactant protein D carbohydrate recognition domain, demonstration, **202**, 1674
SK1 serotype, native capsular polysaccharide and derived polymers, specificity of bacteriophage-borne endoglycanase for, **198**, 1128
Krabbe's disease
associated galactocerebrosidase, cDNA isolation and characterization (human), **198**, 485
Kupffer cells
cytotoxicity against in hepatoma cells, role of nitric oxide (rat), **201**, 1175

  - expression of syndecan-1 gene (rat), **204**, 944
  - isolated from regenerating liver, production of nitric oxide (rat), **204**, 1305

L

- L86-8275
  - potent inhibition of cdc2 kinase (human breast cancer cells), **201**, 589
- Lacidipine
  - and α-tocopherol, antioxidant activity against low-density lipoprotein oxidation *in vitro*, comparison (human), **203**, 1803
- Lactate
  - oxidation, role in energy production in mitochondria-like particles (*Setaria digitata*), **204**, 17
- L-Lactate dehydrogenase
  - cDNA, nucleotide and deduced amino acid sequences (*Caenorhabditis elegans*), **205**, 558
  - denaturation, protection by proline (rabbit muscle), **201**, 957
- Lactoferrin
  - cDNA characterization: assignment of relevant locus to bovine U12 synteny group (goat), **203**, 1324
- Lactogen-II
  - placental, expression, inhibition by tumor necrosis factor α via TNF-α receptor I (mouse), **202**, 1599
- β-Lactoglobulin
  - murine antisera to, evaluation as immunoaffinity chromatography ligand (bovine), **201**, 1008
- Lactose
  - coupled tripeptides, aminopeptidase-resistant, Na^+-dependent transport in intestine (rat), **203**, 1412
- Lactose carrier
  - encoding gene, cloning and sequencing (*Citrobacter freundii*), **203**, 1882
- Lactose synthase
  - functional cysteine residues, identification (human), **204**, 701
- Laminar flow
  - stimulation of ATP- and shear stress-dependent nitric oxide production in endothelial cells *in vitro* (bovine), **198**, 213
- Laminin
  - proteins binding, 67LR and galectin-3, inverse expression, correlation with invasive phenotype of trophoblastic tissue (human), **201**, 388
- Lanosterol 14-demethylase, *see* Cytochrome $P450_{14DM}$
- Lasers
  - He-Ne, separate irradiation of *in vitro* system components, subsequent increase in transcription and translation activities, **203**, 991
- Lauric acid
  - (ω-1)-hydroxylation in hepatic microsomes, role of cytochrome P450 2E1 (rat), **203**, 1168
  - as substrate for soluble fatty acid α-hydroxylase (*Sphingomonas paucimobilus*), **201**, 1554
- Lead nitrate
  - induced liver hyperplasia, protein kinase C isozyme pattern (rat), **205**, 208
  - inhibition of cytochrome P450IA2 expression in liver (rat), **200**, 1086
- Learning disability
  - and neuronal loss, ischemia-induced, protection by prosaposin (gerbil), **204**, 994
- Leaves
  - interior, *in vivo* imaging by optical cross-correlation interferometry (*Tradescantia zebrina*), **205**, 638
  - isolated guard cell protoplasts, superoxide radicals generated in, role in regulation of stomatal movements (*Vicia faba*), **205**, 30
  - plastoquinone synthesis, endoplasmic reticulum–Golgi system as site (spinach), **205**, 714
- Lectins
  - Gal, GalNAc, and GlcNAc-specific, interaction with Tn (GalNAcα1←Ser/Thr) glycoprotein (armadillo), **198**, 251
  - heparin-binding, purification and partial characterization (*Anadara granosa*), **203**, 36
  - L-14, soluble, gene expression in thyroid cells (rat), **199**, 540
  - polylysine and histone conjugates, directed gene transfer to airway epithelial cells (human), **205**, 826
- *Leishmania* spp.
  - agglutination by heparin-binding lectin purified from *Anadara granosa*, **203**, 36
- *Leishmania tropica*
  - resistant to methotrexate, increase in P-type ATPase activity, **199**, 855
- Lesions
  - arteriosclerotic, activin A expression (rabbit), **205**, 441
- Leucine
  - and arginine, responsiveness in β cell subpopulations with different sensitivity to glucose (rat), **204**, 490
  - residue 193, mutation in cysteine-rich region of insulin receptor, effects on insulin receptor precursor cleavage and insulin binding (human), **203**, 763
- Leucine zippers
  - protein kinase with, putative, cloning and sequence analysis (human brain), **202**, 613; *erratum*, **205**, 1494

related sequences
  120-kDa protein kinase PKN with, activation by unsaturated fatty acids and limited proteolysis (COS-7), **204**, 348
  protein kinase with, identification (human hippocampus), **199**, 897
Leucokinins
  isolation and identification (mosquito), **202**, 715
Leukocyte elastase
  gene 5′ flanking region, 53-bp repetitive element, enhancer function (human), **204**, 38
  mechanism-based inhibition by substituted 3-oxo-1,2,5-thiadiazolidine 1,1-dioxides (human), **198**, 341
Leukocytes
  adherence to endothelial cell monolayers, attenuation by tyrosine kinase inhibitors (human), **198**, 359
  DNA analysis for mutations involved in congenital hereditary cataract and microphthalmia (miniature Schnauzer dog), **203**, 1663
  expression of RH blood group gene transcripts (human), **202**, 1497
  12-lipoxygenase, produced in methylotrophic yeast: expression, purification, and characterization (pig), **205**, 381
  mononuclear, low-density lipoprotein receptor activity and cholesterol synthesis, melatonin effects (human), **203**, 416
  polymorphonuclear, *see* Neutrophils
  P-selectin-dependent rolling and adhesion in postcapillary venules, induction *in vivo* by mast cell activation (rat), **203**, 1043
  surface glyproteins, glycosylphosphatidylinositol-anchored, association with ganglioside GM_3 (human), **203**, 1069
Leukodystrophy
  globoid cell, *see* Krabbe's disease
LH, *see* Luteinizing hormone
Ligand-blot experiments
  identification of *Manduca sexta* midgut binding protein specific to three *Bacillus thuringiensis* CryIA-type ICPs, **201**, 782
Light
  ultraviolet, *see* Ultraviolet light
Limb buds
  mesenchymal cells
    expression of TGF β isoforms 1–4, regulation by 1,25-dihydroxyvitamin D_3 (chicken embryo), **204**, 975
    inhibited from cartilage differentiation by phorbol ester, expression of homeobox-containing gene *Msx1* and lack of gap junctional communication (chicken embryo), **205**, 429
Lindane
  induction of Ca^{2+}-dependent activation of phospholipased C and D in murine peritoneal macrophages, **199**, 699
  photodegradation, role of reactive oxygen species, **199**, 1284
Linoleic acid
  activation of 120-kDa protein kinase PKN with leucine zipper-like sequence (COS-7 cells), **204**, 348
  conjugated, effects on endotoxin-induced growth suppression and food intake depression *in vivo* (mouse), **198**, 1107
Liothyronine
  control of hepatic poly(ADP-ribose)polymerase activity (rat), **203**, 1548
  differential effects on expression of sarcoplasmic reticulum Ca^{2+}-ATPase isoforms in skeletal muscle fibers (rat), **203**, 1035
  effects on
    cardiomyocyte and neuronal differentiation in dose-dependent manner (P19 cells), **205**, 652
    myosin β heavy chain expression (human, rat), **199**, 1482
  induction of cardiac myocyte differentiation from P19 teratocarcinoma cells, associated preferential binding of RGG(T/A)CA direct
  repeats spaced by 4 base pairs in DNA (mouse), **205**, 1899
  and retinoic acid receptors, repression of c-*fos* gene transcription, identification of mediating promoter elements (GH1 cells), **205**, 135
Lipid peroxidation
  associated product, inhibition of c-*myc* expression in HL-60 leukemic cells (human), **203**, 553
  detection by luminescence method (human), **202**, 940
  and hydroxyl radical generation, inherited enhancement in galactose cataractogenesis-sensitive rat, associated DNA rearrangements, degenerative diseases, and premature aging (rat), **199**, 726
  low-density lipoproteins, effect of plasmalogen phospholipids (human), **204**, 1235
  microsomal, induction after metabolism of chloral hydrate to free radicals (mouse liver), **204**, 937
  myoglobin-dependent, stimulation by Adriamycin, **204**, 23
  plasma and lipoprotein lipids, in Apo E deficiency, effects of oxidative stress (mouse), **201**, 1567
  submitochondrial particles, protection by aminoethylcysteine ketimine decarboxylated dimer at concentration not inhibitory of electron transport (bovine heart), **205**, 264
  synaptosomal, sequence-specific, initiation by β-amyloid peptide free radical fragments, implications for Alzheimer's disease, **200**, 710
Lipids
  antibodies, and alternative pathway activation: evidence

from complement activation by liposomes and liposome-encapsulated hemoglobin (rat), **205**, 255
bilayers
channel formation by neurotoxic fragment of β-amyloid peptide, **202**, 1142
phospholipid vesicles, traversal by SecA protein (*Escherichia coli*), **203**, 326
planar, reconstitution of F_0 purified from mitochondria: potassium-selective and venturicidin-sensitive conductances (bovine heart), **203**, 1005
bipolar tetraether, liposomes made from, thermal stability, **202**, 673
cationic, effect on antisense oligonucleotide uptake and degradation in cultured cells and human serum, **197**, 818; *erratum*, **200**, 1769
charge, asymmetrical, effect on subconducting state of potassium channel from sarcoplasmic reticulum (rabbit), **199**, 1081
as mediators in interleukin-1β-regulation of $G_{i\alpha}$ gene expression in tracheal muscle (guinea pig), **203**, 1889
omega-3 and omega-6, effects on proinflammatory cytokine production in murine lupus nephritis, **200**, 893
phase transition in thylakoid membranes, Mg^{2+}-induced, effects of anions (spinach), **202**, 1724
phosphocholine, diacetylenic and short-chain, network gel formed from mixtures, formation and properties, **203**, 296
synthesis in isolated adipocytes, effects of high levels of glucose and insulin (rat), **199**, 1151
α-Lipoate
protective effects against glycation of bovine serum albumin and low-density lipoprotein, **203**, 99
Lipocalin
neutrophil gelatinase-associated, cDNA cloning and expression in various fetal and adult tissues (human), **202**, 1468
Lipocortin-1
role in dexamethasone suppression of interleukin-1β-induced cyclooxygenase 2 expression in A549 cells (human), **202**, 931
α-Lipoic acid, *see* Thioctic acid
Lipolysis
enzyme kinetics, role of lipase interfacial binding, **200**, 1321
Lipopolysaccharide-binding protein receptors
CD 14, vitamin D-stimulated expression, enhancement by topoisomerase I inhibition (human), **199**, 531
Lipopolysaccharides
binding of pulmonary surfactant protein D carbohydrate recognition domain, demonstration (*Escherichia coli*, *Klebsiella pneumoniae*, *Pseudomonas aeruginosa*), **202**, 1674
induced nitric oxide production
in activated murine macrophages, diacylglycerol production for, role of phosphatidylcholine-specific phospholipase C, **199**, 461
constitutive and inducible, by endothelial cells, differential regulation (mouse), **202**, 450
in murine osteoblasts (*Escherichia coli*), **201**, 924
induced nitric-oxide synthase production in murine RAW 264.7 macrophages, potentiation by extracellular ATP, **203**, 430
induced vascular hyporeactivity to vasoconstrictor agents, role of activation of soluble guanylyl cyclase (rat aorta), **201**, 436
modulation of interleukin-8-related KC/gro protein release from hepatocytes (rat), **203**, 1398
O-chain, induction of SDS-resistant MHC class II molecules in murine B cells (*Brucella abortus*), **203**, 1230
priming of basophils for enhanced mediator release: role of plasma cofactor and CD14 (human), **203**, 1295
stimulated macrophages, selective transport of nitric-oxide synthase inhibitors, mediation by system y^+ (mouse), **200**, 726
Lipoprotein lipase
N-linked glycosylation site, naturally occurring mutation in second codon Asn^{43}: role of Asn^{43} in catalysis and secretion (human), **205**, 506
transcriptional regulation in heart during development (rat), **202**, 838
Lipoprotein lipase deficiency
Leu^{365}→Val change resulting in loss of enzyme activity in Italian family, **199**, 570
Lipoproteins
and artificial membrane system, free cholesterol transfer between, mediation by membrane-bound cholesteryl ester proteins (human), **202**, 1322
hepatic profile in transgenic mouse, effect of expression of cynomolgus monkey cholesteryl ester transfer protein, **205**, 1257
high-density
HDL_3, complexation of soluble amyloid β protein (human plasma), **205**, 1164
induced mobilization of cellular cholesterol, impairment in dermal fibroblasts from Tangier disease subjects, **205**, 850
lipid peroxidation in Apo E-deficiency, effects of oxidative stress (mice), **201**, 1567
low-density, *see* Low-density lipoproteins
very high-density, complexation of soluble amyloid β protein (human plasma), **205**, 1164

- very-low-density
  - and low-density lipoproteins, induction of nitric oxide synthesis in macrophages (rat), **204**, 1047
  - secretion by liver, effects of dietary cholesterol (hamster), **200**, 1505

Liposomes, *see also* Immunoliposomes
- calcium-loaded, Ca release from, effects of A23187, sonication, and osmotic shock, **204**, 142
- cationic, in delivery of sustained cytoplasmic transgene expression system (293 cells), **200**, 1201
- containing PufQ of *Rhodobacter capsulatus*, association of protochlorophyllide with, **200**, 1679
- direct extraction of taste receptor proteins from intact tongue epithelium (*Rana catesbeiana*), **201**, 415
- ganglioside-containing, interaction with T-lymphocytes: confocal fluorescence microscopic study (rat), **203**, 1750
- and liposome-encapsulated hemoglobin, complement activation: evidence for anti-lipid antibodies and alternative pathway activation (rat), **205**, 255
- made from bipolar tetraether lipids, thermal stability, **202**, 673
- phospholipid, cytochrome *c* oxidase in, image analysis with Pt/C and W/Ta shadowing (bovine heart), **203**, 331
- protein encapsulation, **199**, 433
- *in vivo* transfer of human α1-antitrypsin gene to murine hepatocytes by, subsequent expression of encoded protein, **204**, 1023

Lipoteichoic acid
- as natural glucosyl acceptor for glucosyltransferases (*Streptococcus sanguis*), **202**, 1407

5-Lipoxygenase
- in HL60 and U937 cells, effects of oxidized low-density lipoproteins (human), **201**, 1014
- induction and activity in HL-60 cells, effects of vitamin D_3, retinoic acid, dimethyl sulfoxide, and transforming growth factor β (human), **205**, 1572

12-Lipoxygenase
- arachidonic acid metabolism pathway, selective inhibition by L-arginine or sodium nitroprusside in intact platelets (human), **200**, 1630
- expression in megakaryocytic DAMI cells, down-regulation by fibronectin, **204**, 606
- leukocytic, produced in methylotrophic yeast: expression, purification, and characterization (pig), **205**, 381

Listeria monocytogenes
- infection, immunosuppressive effects of α-fetoprotein (transgenic mouse), **201**, 1154

Liver, *see also* Hepatocytes
- acetaminophen toxicity, relationship to total P450 and CYP2E1- and CYP1A1-specific metabolism (mouse), **203**, 532
- actin, profilin, and extracellular matrix proteins, mRNA expression, effects of CCl_4 and partial hepatectomy (rat), **198**, 568
- *S*-adenosylhomocysteine and *S*-adenosylmethionine levels, effect of vitamin B_6 deficiency (rat), **205**, 1748
- adult, sulfotransferase specific for endogenous and xenobiotic estrogens, identification (human), **198**, 707
- apolipoprotein B secretion, insulin inhibitory effect, resistance of hepatocytes from obese Zucker rats, **205**, 417
- arginase, inhibition by N^{ω}-hydroxy-L-arginine (bovine, rat), **203**, 1614
- associated heat-resistant cholecystokinin octapeptide-degrading neuropeptidase, isolation and characterization (rat), **198**, 574
- basolateral, plasma membrane vesicles, glutathione uptake, role of BSP/bilirubin binding protein and bilotranslocase (rat), **200**, 1079
- chronic inflammation model, expression of inducible nitric-oxide synthase mRNA and protein, enhancement by nitric oxide synthesis inhibition (rat), **204**, 635
- copper content and Cu binding to superoxide dismutase, differential decrease in copper-deficient rat, **203**, 1028
- cryopreservation in glycerol and antifreeze glycoprotein solution, subsequent function and morphology (rat), **200**, 732
- cytochrome P450
  - with high homology to yeast lanosterol 14-demethylase (rat liver), **201**, 1320
  - isoforms, induction by cigarette smoke (mouse), **202**, 1731
  - P4501A1, protein and mRNA levels, effects of dietary ellagic acid inhibition of benzo[a]pyrene hydroxylase (rat), **201**, 1477
  - P4501A2, expression, inhibition by ionic lead (rat), **200**, 1086
  - P4502E1, induction during chronic ethanol administration and withdrawal: evidence for short half-life of CYP2E1 (rat), **205**, 1064
  - system, effects of coadministration of phenobarbital and dexamethasone (rat), **203**, 351
- cytosol, retinoic acid synthesis, role of retinal oxidase and retinal dehydrogenase (rabbit), **205**, 1278
- estrogen sulfotransferase, identification by cDNA cloning and expression (human), **200**, 1621
- expression of G_{M2} activator protein (mouse), **204**, 741
- fibrotic, myofibroblast lysyl oxidase cDNA from, characterization (mouse), **199**, 587

  fructose 1,6-bisphosphatase cDNA, isolation (human), **199**, 687
  fructose 2,6-bisphosphate 2-phosphatase/fructose 6-phosphate 2-kinase cDNA, isolation (frog), **198**, 1099; *erratum*, **200**, 1769
  glucagon receptor cloning and expression (human), **198**, 328
  glucose-6-phosphatase
    activity and mRNA levels, effect of acute diabetes (rat), **205**, 680
    catalytic subunit cDNA expression in Fao hepatoma cells, multihormone regulation (rat), **201**, 302
  glucose transporter levels during endotoxic shock (rat), **198**, 923
  glutathione S-transferases Yrs-Yrs′ and Yrs′-Yrs′, θ-class, isolation and purification from cytosol and effects on 5-sulfoxymethylchrysene (rat), **202**, 278
  heat shock transcription factor with DNA-binding activity uncoupled from transcriptional activity, detection (rat), **201**, 552
  hepatocyte growth factor-like protein mRNA expression during regeneration and inflammation (rat), **203**, 666
  hyperplasia, protein kinase C isozyme pattern (rat), **205**, 208
  metabolism of
    chloral hydrate to free radicals and induction of lipid peroxidation (mouse), **204**, 937
    free fatty acid and secretion of very-low-density lipoprotein, effects of dietary cholesterol (hamster), **200**, 1505
  mitochondria, Mn-containing superoxide dismutase expression, effect of ethanol treatment (rat), **201**, 1356
  mitochondrial structures, casein kinase I binding to, spermine effect (rat), **205**, 389
  nitric oxide synthesis, gluconeogenesis, and flux through phospho*enol*pyruvate carboxykinase, reciprocal changes, induction by endotoxin (rat), **204**, 659
  nuclear retinoic acid receptors, determination and physicochemical properties (rat), **204**, 439
  oxidative phosphorylation, coupling efficiency temperature dependence, role of adenine nucleotide translocator (rat), **202**, 816
  poly(ADP-ribose)polymerase activity, regulation by thyroid hormones (rat), **203**, 1548
  purification to homogeneity of mitochondrial acyl CoA:glycine *N*-acyltransferase (human), **205**, 1373
  regenerating
    cells from, production of nitric oxide (rat), **204**, 1305
    prenylated proteins in, characterization (rat), **200**, 1713
  regeneration
    nitric oxide production during, EPR evidence (rat), **202**, 571; *erratum*, **203**, 743
    after partial hepatectomy, effect on hepatic and uric phosphotryosine levels (mouse), **201**, 909
  specific DNase-hypersensitive sites, presence in intergenic region separating human plasminogen and apoprotein(a), **205**, 930
  tissues, CyP2E1 expression, effect of malotilate (rat), **200**, 1414
  transgenic mouse, lipoprotein profile, effect of expression of cynomolgus monkey cholesteryl ester transfer protein, **205**, 1257
  uteroglobin gene promoter-binding factor, detection (rabbit), **204**, 273
  variant mRNA encoding Fas antigen truncated form, identification (rat), **198**, 666
Losartan
  resistant cell proliferation, angiotensin II receptor coupled to, expression by cardiac fibroblasts (human), **204**, 1334
Lovastatin
  disruption of early events in insulin mitogenic signaling pathway (rat), **204**, 399
  effects on murine leukemia L1210 cells, **203**, 400
  induction of growth inhibition and apoptosis in malignant glioma cells (human), **205**, 1681
Low-density lipoprotein receptors
  mononuclear leukocytes, melatonin effects (human), **203**, 416
Low-density lipoproteins
  acetylated, oxidized, and native, receptor-specific uptake and degradation in monocytic Mono Mac 6sr cell line (human), **202**, 334
  cell-mediated oxidative modification, stimulation by oncostatin M (human, mouse), **205**, 60
  effects of uptake on cytoplasmic calcium concentration in fibroblasts from Niemann–Pick disease type C-affected patients, **198**, 438
  glycation, protective effect of α-lipoate (bovine), **203**, 99
  lipid peroxidation, effect of plasmalogen phospholipids (human), **204**, 1235
  oxidation
    antioxidant activity of calcium antagonists *in vitro* against, comparison with α-tocopherol (human), **203**, 1803
    by macrophages, role of NADPH oxidase (human), **202**, 1300
  oxidized
    effects on 5-lipoxygenase in HL60 and U937 cells (human), **201**, 1014
    induced hyperadhesiveness, modulation in endothelial cells (human), **204**, 673
  and oxidized-LDL, regulation of heparin-binding EGF-like

  - growth factor gene expression in mesangial cells (rat), **202**, 1001
- and positively charged proteins, activation of phosphoinositide catabolism and DNA synthesis in vascular smooth muscle cells: role of apoB polycationic nature (human), **203**, 1700
- and very-low-density lipoproteins, induction of nitric oxide synthesis in macrophages (rat), **204**, 1047

LPS, *see* Lipopolysaccharides

Luminescence
- detection of antioxidant activity and lipid peroxidation *in vitro* (human), **202**, 940

Lung
- allergan-challenged, increased expression of eotaxin mRNA (guinea pig), **205**, 788
- cytochrome P450 isoforms, induction by cigarette smoke (mouse), **202**, 1731
- DC-3F cells, multidrug-resistant variant, P-glycoprotein in, tamoxifen aziridine as affinity probe (Chinese hamster), **202**, 606
- fetal and adult, angiotensin II type 2 receptor gene expression (human), **203**, 1842
- type II cells, localization of non-specific lipid-transfer proteins to peroxisomes (rat), **205**, 1581
- uteroglobin gene promoter-binding factor, detection (rabbit), **204**, 273

Luteal cells
- monocyte chemoattractant protein-1 expression, analysis by PCR and cDNA cloning (pig), **199**, 962
- monocyte chemoattractant protein-2 expression, analysis by cDNA cloning and Northern blot (pig), **205**, 148

Luteinizing hormone
- –choriogonadotropin receptors, human recombinant, functional expression in CHO cells, **201**, 248
- effect on nitrite/nitrate circulating levels during follicular development (human), **202**, 1543
- response to luteinizing hormone-releasing hormone in men, potentiation by neuropeptide Y, **200**, 1111
- secretion by rat anterior pituitary cells *in vitro*, effects of CINC/gro, **202**, 155

Luteinizing hormone receptors
- mammalian, relationship to G-protein-coupled receptors cloned from sea anemone, **197**, 1062; *erratum*, **200**, 668

Luteinizing hormone-releasing hormone
- effect on pituitary cells (rat), **199**, 1436
- response of luteinizing hormone in men, potentiation by neuropeptide Y, **200**, 1111
- responses to, in characterization of activin A-, AB-, and B-responding pituitary cells (rat), **203**, 1739
- secretion in placenta, post-transcriptional inhibition by transforming growth factor β_1 (mouse), **204**, 1206

Luteinizing hormone-releasing hormone receptors
- pituitary and gonadal, mRNAs, nucleotide sequence (rat), **200**, 1359

LY294002, *see* 2-(4-Morpholinyl)-8-phenyl-4H-1-benzopyran-4-one

Lymphoblasts
- B, aggregation and signal transduction, LFA-1-sensitive effects of nectadrin antibodies (mouse), **198**, 1209
- SUP-T1, vasoactive intestinal polypeptide receptor, molecular cloning and functional characterization (human), **205**, 1617

Lymphocytes
- B, *see* B cells
- B cell/T cell hybrid, CEM x174, expression of δ-opioid receptor gene (human), **202**, 1291
- IM-9
  - cytosolic free Ca^{2+}, growth hormone-induced increase (human), **202**, 391
  - insulin receptor synthesis, effect of dexamethasone (human), **200**, 852
- intracellular calcium, effects of apolipoprotein E and cholesterol (human), **200**, 1185
- isolated, insulin and glucose responses in, correlation with *in vivo* status: effects of very-low-calorie diet treatment (human), **202**, 1169
- peripheral blood
  - mRNA, from familial amyotrophic lateral sclerosis patients, in deduction of Cu/Zn superoxide dismutase mutant, **204**, 572
  - reduced K^+ channel activity in aged humans, **199**, 519
- permeability to NH_4^+, augmentation by ATP, role of P_{2z} purinoceptor operated-ion channel (human), **202**, 1511
- proliferation
  - after endotoxin injection, effects of linoleic acid *in vitro* (mouse spleen), **198**, 1107
  - *in vitro*, angiotensin II-stimulated, mediation via AT_1 and AT_2 receptors (mouse spleen), **198**, 1034
- and promonocytes, attachment to synthetic $[Tyr^{5,12},Lys^7]$-polyphemusin II peptide (human), **202**, 470
- short-term cultures, deoxythymidine and deoxycytidine metabolism in, 2-chloro-2′-deoxyadenosine effects (human), **203**, 1378
- T, *see* T cells

Lymphoid cells
- cell surface, colocalization of CD4 antigen and tryptase TL_2 (human), **201**, 1390
- production of Alzheimer's 4-kDa β-amyloid peptide, role of

    - amyloid precursor protein C-terminal cytosolic domain, **204**, 1371
- Lysine
  - in metallothionein α-domain, replacement with glutamates, resulting reduction of metallothionein detoxification function (Chinese hamster), **202**, 954
  - position 122, role in synthetic peptide inhibition of cytochrome b_5 binding to cytochrome P450 2B1 (rat liver microsomes), **201**, 1090
  - residue involved in glycation of αA- and αB-crystallins by glucose, identification (bovine eye), **201**, 1451
  - substitution of glutamic acid in α-domain of metallothionein, effects on metal binding in α and β domains (hamster), **202**, 621
- Lysosomal α-glucosidase, *see* Glucan 1,4-α-Glucosidase
- Lysosomes
  - associated membrane protein-2, cDNA sequencing (human), **205**, 1
  - ceramide degradation *in vivo*, stimulation by sphingolipid activator protein D (human fibroblasts), **200**, 1440
  - disintegration in vitro, by GTPγS-treated cytosol (rat), **198**, 869
  - and endosomes, membrane fusion, role of G_{M2} activator protein (human), **201**, 90
- Lysyl oxidase
  - myofibroblast, from fibrotic liver, cDNA characterization (mouse), **199**, 587

M

- α_2-Macroglobulin
  - binding of transforming growth factor β1 and β2 to, role of cysteine 949 (human), **200**, 1578
  - and gelatinase B, *in vitro* modulation in HIV-1-infected macrophages, **204**, 1272
  - gene promoter, characterization and identification of triple TRE/RARE/ERE response element (human), **202**, 65
- Macrophage colony-stimulating factor
  - and other cytokines, outer surfaces, comparative structural patterns, **201**, 1396
- Macrophages
  - activated by IFN-γ and LPS, diacylglycerol production for NO synthesis, role of phosphatidylcholine-specific phospholipase C (mouse), **199**, 461
  - activation by Alzheimer β amyloid peptide (rat), **199**, 984
  - arginase, inhibition by N^{ω}-hydroxy-L-arginine (mouse), **203**, 1614
  - arginine analogs and related compounds in, substrate and inhibitor specificity of arginase and nitric-oxide synthase for, comparison (mouse, rat), **198**, 206
  - bone marrow-derived
    - induction of L-arginine-dependent nitric-oxide synthase activity (bovine), **198**, 510
    - priming by noncytopathic bovine viral diarrhea virus strains, effect on nitric oxide generation (bovine), **202**, 1562
  - calcium binding protein pEL98 expression (human), **202**, 94
  - ferritin synthesis in, regulation by oxygen and sulfhydryl-reactive agent (mouse), **201**, 38
  - HIV-1-infected, *in vitro* modulation of gelatinase B and inhibitors in, **204**, 1272
  - interleukin-1α and TNF-α expression, regulation with glycosylphosphatidylinositol toxin by protein-tyrosine kinase-mediated signal transduction (*Trypanosoma brucei*), **205**, 984
  - interleukin-6 induction by β_2-microglobulin modified by advanced glycation end products, role in hemodialysis-associated amyloidosis (human), **201**, 1235
  - invasion by *Trypanosoma cruzi*, effects of protein kinase inhibitors, **203**, 967
  - J774
    - interleukin-12 mRNA expression, induction by interferon-γ (mouse), **198**, 857
    - mediated low-density lipoprotein oxidative modification, stimulation by oncostatin M (mouse), **205**, 60
  - J774.2, nitric-oxide synthase induction, inhibition by spermine, effect of aldehyde dehydrogenase (mouse), **203**, 1638
  - J774A.1, activated, nitrite production, enhancement by plant nitrate reductase gene fragments, **201**, 284
  - lipopolysaccharide-stimulated, selective targeting of nitric-oxide synthase inhibitors, mediation by system y^+ (mouse), **200**, 726
  - low-density lipoprotein oxidation, role of NADPH oxidase (human), **202**, 1300
  - mannose receptor gene *Mrc1*, exon–intron structure, and chromosomal localization (mouse), **198**, 682
  - P388D1
    - activated, nitrite production, enhancement by plant nitrate reductase gene fragments, **201**, 284
    - antiviral response, role of interferon-γ C-terminus (mouse), **203**, 1645
  - peritoneal
    - Ca^{2+}-dependent activation of phospholipases C and D by γ-hexachlorocyclohexane (murine), **199**, 699
    - monocyte chemoattractant JE/MCP-1 expression, stimulation by interleukin-4 (mouse), **203**, 562
    - nitric oxide synthesis, induction by very-low- and low-

    density lipoproteins (rat), **204**, 1047
  protein kinase Cδ gene expression, inhibition by nitric oxide (mouse), **204**, 105
  tissue transglutaminase induction by 1α,25-dihydroxyvitamin D_3, role of GTP-binding proteins (mouse), **203**, 1773
 RAW 264.7
  activated, nitrite production, enhancement by plant nitrate reductase gene fragments, **201**, 284
  lipopolysaccharide-induced nitric-oxide synthase production, potentiation by extracellular ATP (mouse), **203**, 430
 regulation of satellite cell proliferation and differentiation (human), **202**, 1688
 65-kDa phosphoprotein in, identification: homology with human L-plastin (mouse), **202**, 1631
 splenic, specific non-angiotensin CGP 42112 binding sites, localization (rat), **200**, 1049
Magnesium
 efflux from ascites cells, activation by cAMP via Na/Mg antiporter (mouse), **202**, 1209
 extracellular, effect on stimulus–secretion coupling in parietal cells (rat), **204**, 512
 induced lipid phase transition in thylakoid membranes, effects of anions (spinach), **202**, 1724
 intracellular, concentration in isolated adipocytes, effects of pioglitazone (rat), **202**, 416
 –Na antiporter in ascites cells, stimulation by cAMP, effect on magnesium efflux (mouse), **202**, 1209
Magnetic fields
 60 Hz, effects on bioluminescence (*Vibrio fischeri*), **198**, 40
Malachite green
 biodegradation by cecal microflora (rat), **200**, 1544
Malignancy
 occurrence of adipocyte apoptosis (human), **205**, 625
Malotilate
 effect on CYP2E1 expression in hepatic tissue (rat), **200**, 1414
Maltoporin
 monodisperse, crystallization from wild-type and mutant strains of enterobacteriaceae, **199**, 767
Maltose
 coupled tripeptides, aminopeptidase-resistant, Na$^+$-dependent transport in intestine (rat), **203**, 1412
Mammary gland
 epithelium, mitogenic effects of keratinocyte and acidic fibroblast growth factors (mouse), **204**, 1165
Mammary gland receptors
 dissociation of prolactin from, mechanism of action (rabbit), **202**, 1395
Mammary growth factor
 purified from mammary fibroblasts, identification as hepatocyte growth factor (mouse), **199**, 772
Mammary tumor virus
 promoter, glucocorticoid-mediated induction in mammary carcinoma cells, potentiation by protein kinase C activation (mouse), **198**, 1183
Manidipine
 effect on vascular natriuretic peptide receptor gene expression in hypertensive rat, **205**, 1595
Mannose receptors
 macrophage, encoding gene *Mrc1*, exon–intron structure, and chromosomal localization (mouse), **198**, 682
α-1,3(6)-Mannosylglycoprotein β-1,6-*N*-acetylglucosaminyltransferase
 cDNA cloning and chromosomal mapping (human), **198**, 318; *erratum*, **200**, 668
MAP kinase
 activation
  by endothelin-1 via independent signaling pathways in astrocytes (rat), **204**, 1325
  phenylephrine-induced, in cardiac muscle cells, role of Ras activity (rat), **205**, 1417
  vasopression-induced, in vascular smooth muscle cells, inhibition by peptide and non-peptide arginine vasopressin antagonists (rat), **200**, 1155
  via wortmannin-sensitive pathway: mechanism of cytosolic phospholipase A_2 activation in CHO cells carrying somatostatin receptor, **205**, 18
 cascade in BaF/ER cells, activation through erythropoietin receptor, **203**, 1912
 insulin-stimulated pathway, in hepatoma H4EII cells, inhibition by cAMP (rat), **202**, 1104
 p42
  and p44 isoforms, regulation in Rat-1 fibroblasts stably transfected with α_2C10 adrenoceptors, **200**, 1529
  relationship to dual effect of epidermal growth factor on A431 cell proliferation (human), **203**, 984
 phosphorylation
  and activation by kainic acid-induced seizure in hippocampus (rat), **202**, 1163
  and nuclear translocation in Nb2 lymphoma cells, induction by prolactin (rat), **204**, 1158
 and Ras, signaling pathway, inhibited by genistein, in prevention of cardiac muscle cell hypertrophy (rat), **202**, 1586
 related pathway, limited modulation by cyclic AMP in parotid acinar cells (rat), **202**, 743
 thrombin-induced tyrosine phosphorylation and activation, role in late arachidonic acid release in platelets

(human), **198**, 497

  and thymidine incorporation, activation by extracellular ATP in glomerular mesangial cells (rat), **202**, 234

MAP kinase-activated protein kinase 2

  primary structure (human), **200**, 1118

  proline-rich region, effect on catalytic properties and binding to c-abl SH3 domain *in vitro* (mouse), **203**, 1188

Margatoxin

  synthesis and structure–function studies, **198**, 619

Mast cells

  activation, induction of P-selectin-dependent leukocyte rolling and adhesion in postcapillary venules *in vivo* (rat), **203**, 1043

Mastoparan

  stimulated human neutrophils, phospholipase D activation in, modulation by okadaic acid, **205**, 1481

  stimulation of inositol 1,4,5-trisphosphate production in plant cells (carrot), **205**, 739

Matrilysin

  proteolytic inactivation of α_1-antitrypsin: comparison with other matrix metalloproteinases (human), **204**, 613

Mechanical responses

  Deiters cells of organ of Corti, phalangeal process, induction by photo-released intracellular calcium (guinea pig), **201**, 1263

Megakaryocytes

  DAMI, cell spreading and down-regulation of 12-lipoxygenase expression, induction by fibronectin, **204**, 606

Meiosis

  in oocytes

    intracellular pH increase during, effect of forskolin and methylxanthines (*Xenopus laevis*), **205**, 979

    reinitiation, nuclear Ca^{2+} requirements (starfish), **203**, 674

Meiotic cells

  protein factor, enhancement of meiotic DNA polymerase (*Coprinus cinereus*), **198**, 1232

Melanocortin receptors

  MC1

    alternative points of attachment for [Nle^4,D-Phe^7]-α-melanocyte stimulating hormone and α-MSH, demonstration (human), **202**, 1266

    peripheral, cloned, binding of melanotropin peptides α-MSH, MTI, and MTII (human), **204**, 1137

  MC5

    gene cloning (mouse), **200**, 1214

    molecular cloning and characterization (rat), **200**, 1007

Melanocytes

  6-biopterin-induced cytotoxicity (human), **204**, 43

  effects of estrogen and estrogen receptor (human), **199**, 1407

α-Melanocyte stimulating hormone, *see* Melanotropin

Melanotropin

  α-MSH, MTI, and MTII peptides, binding to cloned human peripheral melanocortin receptor hMC1R and effect on second messenger cAMP, **204**, 1137

  and stereoisomer [Nle^4,D-Phe^7]-α-MSH, alternative points of attachment at melanocortin-1 receptor, demonstration (human), **202**, 1266

MELAS syndrome

  point mutation at nucleotide pair 3291 of mitochondrial tRNA$^{\mathrm{Leu(UUR)}}$ gene, identification in affected patient, **202**, 1624

Melatonin

  effects on low-density lipoprotein receptor activity and cholesterol synthesis in mononuclear leukocytes (human), **203**, 416

Melittin

  stimulation of inositol 1,4,5-trisphosphate production in plant cells (carrot), **205**, 739

Membranes, *see also* Basement membrane; Plasma membrane

  A$_3$ adenosine receptors, selective agonist affinity label, synthesis (CHO cells, RBL-2H3 mast cells), **203**, 570

  artificial system, and lipoproteins, free cholesterol transfer between, mediation by membrane-bound cholesteryl ester proteins (human), **202**, 1322

  associated aromatic nitroreductase, identification in cell-free extracts of *Phanerochaete chrysosporum*, **205**, 298

  bilayers

    disruption by viral fusion peptides, relationship to influenza virus infectivity, **202**, 1420

    stability and fusion, effect of orientation of SIV fusion peptide, **205**, 1938

  bound aminopeptidase P, identification as proline peptidase family member (guinea pig), **205**, 1790

  brush border, binding molecules specific to *Bacillus thuringiensis* δ-endotoxin, detection by crossed affinity immunoelectrophoresis (*Choristoneura fumiferana*), **199**, 1194

  cardiac, adenylated dinucleotide binding to adenosine 5,5'''-P1,P4-tetraphosphate receptors (mouse), **200**, 749

  cardiomyocyte, phospholipids, α-1-adrenoceptor-mediated degradation *in vitro*, dynamics (rat), **198**, 366

  cellular, fluctuations, and cell filterability and metastatic potential of lymphoid cell lines, direct correlation (murine BW5147 cells), **203**, 899

  cerebral, isolation of Gα_{13}: supportive effect of ethylene glycol (bovine), **204**, 835

  disk, rod outer segment, Ca^{2+}-ATPase in, characterization (bovine), **204**, 813

- endosomal and lysosomal, fusion, role of G_{M2} activator protein (human), **201**, 90
- erythrocyte
  - calcium transport, effect of primary hyperparathyroidism (human), **202**, 1505
  - photophysical alteration by 4,5′,8-trimethylpsoralen (rat), **199**, 1413
- fluidity, correlation with hepatocyte susceptibility to mouse hepatitis virus type 3 in cholesterol-enriched and phosphatidylserine-treated A/J mouse, **204**, 1299
- interaction studies, Gln^5 selectively monodansylated substance P as tool for, **203**, 359
- lipid, formation of channels by light chain of botulinum neurotoxin, **205**, 751
- mammalian cells and tissues, immunochemical detection of G_{12} and G_{13} α subunits, **198**, 906
- methanol-grown *Methylobacillus flagellatum* KT, identification of two *o*-type oxidases, **204**, 428
- microsomal
  - associated endopeptidase characteristic of thimet oligopeptidase, assay and partial purification (porcine brain), **198**, 787
  - translocation of recombinant polypeptides translated from pUMA vector-derived cRNAs (*Xenopus laevis*), **204**, 1346
- mitochondrial, physical-chemical properties, association with inherited hyperproduction of free radicals (rat liver), **205**, 180
- placental insulin receptors from, autophorylation: major effects at juxtamembrane domain (human), **201**, 1439
- resting potentials, ranging between 0 mV and −85 mV, in placental cells, analysis (human), **198**, 1078
- sequencer, *in situ* hydroxylamine cleavage of actin on, subsequent identification of serum actin as cytoplasmic isoform (fetal bovine), **205**, 195
- sperm, abnormal physical architecture in oligospermia (human), **198**, 266
- sphingomyelin and glucosylceramide, monosialoganglioside reconstituted in, recognition: quantitative analyses by quartz crystal microbalance, **204**, 551
- thylakoid, Mg^+-induced lipid phase transitions in, effects of anions (spinach), **202**, 1724
- vesicles, superoxide production, enhancement in hyposaline environment (*Halobacterium halobium*), **205**, 1736

Menstrual cycle
- follicle development phase, nitrite/nitrate circulating levels during, effects of ovarian/sex hormones (human), **202**, 1543

Menthol
- effect on cytosolic calcium levels in cultured airway epithelium (dog), **201**, 1333

2-Mercaptoethanol
- and NAD^+, induction of self-aggregation in erythrocyte CD38 glycoprotein (human), **202**, 1710

Mesangial cells
- expression of matrix metalloproteinase transin gene, selective inhibition by heparin (rat), **203**, 1333
- heparin-binding EGF-like growth factor gene expression, regulation by LDL and oxidized-LDL (rat), **202**, 1001
- mechanosensitive single channel calcium currents (rat), **203**, 773

Mesenchymal cells
- limb bud
  - expression of TGF β isoforms 1–4, regulation by 1,25-dihydroxyvitamin D_3 (chicken embryo), **204**, 975
  - inhibited from cartilage differentiation by phorbol ester, expression of homeobox-containing gene *Msx1* and lack of gap junctional communication (chicken embryo), **205**, 429

Mesoporphyrin IX
- and analogs, erythroid differentiation induction in erythroleukemia K562 cells (human), **198**, 720

Metabolism
- chylomicron remnants in intestine, effect of apolipoprotein E overexpression (mouse), **200**, 716
- differentiation-dependent, glycosphingolipids in HT-29 cells (human), **202**, 992
- inhibition in myocytes, intracellular sodium regulation during, role of Na^+/H^+ exchange and Na^+/K^+ pump (guinea pig), **203**, 93
- specific sterols in *Pneumocystis carinii*, **198**, 236

Metalloproteinases
- cleaving substrates derived from N-terminus of β-amyloid protein, purification and characterization (human brain), **201**, 45
- matrix, and matrilysin, proteolytic inactivation of α_1-antitrypsin, comparison (human), **204**, 613

Metallothionein
- cDNA, PCR-cloning (goldfish, tilapia), **205**, 368
- detoxification function, reduction by replacement of α-domain lysines with glutamates (Chinese hamster), **202**, 954
- substitution of glutamic acids for conserved lysines in α-domain, effects on metal binding in α and β domains (hamster), **202**, 621
- zinc release, induction by nitric oxide destruction of zinc–sulfur clusters (horse, rabbit), **200**, 1105

Metallothionein-II
- and ferritin H, mRNA levels, increase in HeLa cells exposed to arsenite (human), **205**, 590

Metastasis
  B16 melanoma variants with different potentials for, cathepsin B expression, transcriptional regulation (mouse), **202**, 429
  lymphoid cell line potential for, direct correlation with cell membrane fluctuations and cell filterability (murine BW5147 cells), **203**, 899
  melanoma cells, modulation, role of integrin phosphorylation mediated via protein kinase C (human), **204**, 264
  in nude mouse, potential of CHO cells expressing human carcinoembryonic antigen, **200**, 1748
Methanol
  grown *Methylobacillus flagellatum* KT, membranes, identification of two *o*-type oxidases, **204**, 428
Methanolysis
  cyclic ADP-ribose, catalysis by spleen NAD(P)$^+$ glycohydrolase, mechanism (bovine), **204**, 1279
Methionine
  Met-134 and Ala-146 in second transmembrane segment of tachykinin NK$_3$ receptor, identification as residues involved in SR 48968 binding (human), **198**, 961
  replacement as axial ligand for *Achromobacter cycloclastes* cytochrome c_{554} at high pH, **204**, 120
Methotrexate resistance
  Leishmania tropica with, increased P-type ATPase activity, **199**, 855
Methoxsalen
  plus UVA, and γ-rays and UVC, cytotoxic response in V79 cells, effect of polyamine depletion, **201**, 1
9-Methoxy-N^2-methylellipticinium acetate
  cellular uptake as determinant of cytotoxicity to human brain tumor cells, **200**, 1762
8-Methoxypsoralen, *see* Methoxsalen
N-2-(Methylamino)ethyl-5-isoquinoline-sulfonamide
  effect on heat shock gene expression during heating at 41°C in carcinoma cell lines (human), **199**, 714
Methylation
  dependent stimulation of Alu transcription *in vitro*, **203**, 845
3-Methylcholanthrene
  induction of microsomal glutathione *S*-transferase isozymes (*Aspergillus ochraceus* TS), **203**, 1508
5-Methyl deoxycytidine
  attached to spermine via N^4, oligonucleotides incorporating, triplex formation at physiological pH, **205**, 1665
Methyl 2,5-dihydroxycinnamate
  attenuation of capacitative Ca^{2+} influx in pancreatic acinar cells (rat), **202**, 1697
Methylene blue
  in photodegradation of lindane and DDT, role of reactive oxygen species, **199**, 1284
Methyl esterification
  C-terminal, protein phosphatase 2A, reversal, brain enzymatic activity catalyzing (bovine), **203**, 1710
Methy mercury, *see* Dimethylmercury
N-Methyl nicotinamide
  electrochemical reduction, induction of hydrophobic folding in model protein to perform mechanical work, **204**, 230
Methylobacillus flagellatum
  methanol-grown, identification of two membrane *o*-type oxidases, **204**, 428
Methyltransferase
  methylation of protein phosphatase 2A, direct inhibition by okadaic acid and microcystin-LR (bovine), **202**, 1023
5-Methyltryptophan
  resistance, encoding sequence from tryptophan-hyperproducing strain of *Corynebacterium glutamicum*, characterization, **201**, 1255
Mevalonic acid
  derived materials, incorporation into proteins, analysis in *Halobacteria*, **203**, 972
Micelles
  reversed, as microreactor in fatty acid acylation of RNase A, **196**, 447; *erratum*, **198**, 410
Microbalane
  quartz crystal, *see* Quartz crystal microbalance
Microcystin-LR
  and okadaic acid, inhibition of methylation of protein phosphatase 2A by specific methyltransferase (bovine), **202**, 1023
Microfibrils
  associated 36-kDa glycoproteins, isolation and characterization by isoquinolinesulfonamide affinity chromatography (bovine aorta), **198**, 1262
Microflora
  cecal, biodegradation of malachite green and rhodamine B (rat), **200**, 1544
Microglial cells
  nitric oxide production, inhibition by glucocorticoid, role of protein kinase C (mouse), **199**, 633
β_2-Microglobulin
  modification by advanced glycation end productions, role in interleukin-6 induction and hemodialysis-associated amyloidosis (human macrophages), **201**, 1235
Microneedle
  actin filament nano-manipulation by, in analysis of energy transduction by actomyosin motor (rabbit), **199**, 1057
Micronucleus
  increased induction, by combination of 5-fluorouracil with

    - 2,6-dihydroxypyridine (mouse), **203**, 1124

Microphthalmia
- associated mutations, leukocyte DNA analysis (miniature Schnauzer dog), **203**, 1663

Microreactors
- reversed micelles as, in fatty acid acylation of RNase A, **196**, 447; *erratum*, **198**, 410

Microsatellites
- in colonial tunicate *Botryllus schlosseri*, cloning and direct PCR-typing, **203**, 646
- markers in region q22.3–q31 of chromosome 9 in skin squamous cell carcinomas, genetic instability (human), **201**, 1495

Microsomes
- cerebral, Ca^{2+}-binding protein calstorin, identification in lumen (rat), **203**, 828
- hepatic
    - cytochrome P450 system, effects of phenobarbital and dexamethasone coadministration (rat), **203**, 351
    - ω-hydroxylation of lauric acid, role of cytochrome P450 2E1 (rat), **203**, 1168
    - in proliferating cells, localization of cyclin A and cdk2 (rat), **201**, 1072
    - UDP-glucuronosyltransferase, effects of nonoxynol, *p*-nitrophenol spectrophotometric assay (rabbit), **200**, 1093
- impermeability to glucose, role in complete latency of glucose dehydrogenase (rat), **200**, 1491
- membranes, translocation of recombinant polypeptides translated from pUMA vector-derived cDNAs (*Xenopus laevis*), **204**, 1346

Microtubules
- associated protein 1B, identification as substrate of ecto-protein kinase in cortical cell cultures undergoing synaptogenesis (rat), **205**, 1467
- ligand-modulated cross-bridging by phosphofructokinase, **204**, 585

Microvessels
- cerebral, elevation of nitric-oxide synthase activity in Alzheimer's disease (human), **205**, 659

Midgut
- extracts, from *Bacillus thuringiensis*-susceptible and -resistant strains of *Plodia interpunctella*, differences in proteolytic processing of Bt protoxins, **198**, 940

Midkine
- heparin-binding, neurite outgrowth, and antigenic regions, localization, **203**, 1131

Mifepristone
- effects on calcium levels in spermatozoa (human), **204**, 1009

Migration
- cellular, *see* Cell migration

Milk
- Lewis-type and plasma-type α-L-fucosyltransferases, affinity elution with lactose and differentiation with synthetic sulfated copolymer inhibitor and synthetic and natural acceptors (human), **198**, 350

Mineralization
- in osteoblast-like osteosarcoma cells, stimulation by androgens (human), **204**, 905

Mineralocorticoid receptors
- A/B region, role in aldosterone response selectivity (human), **205**, 1610
- putative, detection in cytosol of *Nicotiana tabacum* cells, **200**, 1230

Mitochondria
- aspartate aminotransferase N-terminal region, direction of cytosolic dihydrofolate reductase import *in vitro*, **201**, 1059
- brown fat uncoupling protein gene, 5′-proximal regulatory region, identification of tissue-specific protein binding domain (rat), **204**, 867
- Ca^{2+}- and inorganic phosphate-induced permeability transition, associated status of ADP, AMP, ATP, and NAD(P)H (rat liver), **200**, 1615
- cardiac
    - anaplerotic effect of propionyl carnitine (rat), **199**, 949
    - DNA from, fragmentation associated with premature aging (human), **202**, 102
    - F$_0$ purified from, reconstitution in planar lipid bilayers: potassium-selective and venturicidin-sensitive conductances (bovine), **203**, 1005
    - and hepatic, ATPase F$_1\gamma$ subunit activity, comparison (bovine), **200**, 671
    - large subunit of trifunctional β-oxidation complex, primary structure (swine), **198**, 431
- DNA
    - 4977-bp deletion, and respiratory chain enzyme activities, correlation in aging skeletal muscles (human), **205**, 772
    - multiple deletions
        - in polymyalgia rheumatica (human muscle), **205**, 375
        - in senescent brain (mouse), **202**, 654
- in encephalomyopathies, associated point mutations, rapid and sensitive PCR screening method (human), **200**, 938
- evidence for site-specific endonuclease recognizing sequence 5′GCCGGC (yeast), **201**, 208
- fatty acid β-oxidation trifunctional protein, cDNAs for subunits of, structural analysis (human), **199**, 818

- HeLa cell, ribonucleotide reductase activity, **203**, 46
- hepatocytic, deenergizing by nitric oxide, **205**, 1143
- hydroxyproline transport mechanisms, spectroscopic analysis (rat kidney), **202**, 58
- Lettre Ehrlich ascite tumor cell, mRNA splicing, role of associated endoribonuclease (mouse), **196**, 47; *erratum*, **205**, 2013
- at low oxygen tension, potent and reversible deenergization by nitric oxide (rat), **204**, 169
- manganese-containing superoxide dismutase expression, effect of chronic and acute ethanol treatment, **201**, 1356
- porins, structure and homologies with bacterial porins (human), **200**, 908
- protein import into, studies with modified form of cytochrome $P450_{scc}$ precursor (rat liver), **203**, 866
- related particles, energy production in, role of lactate oxidation (*Setaria digitata*), **204**, 17
- respiration
  - impairment, association with inherited hyperproduction of free radicals (rat liver), **205**, 180
  - inhibition by aminoethylcysteine ketimine decarboxylated dimer impairment of electron transport on Complex I (bovine), **199**, 755
- structures, casein kinase I binding to, spermine effect (rat liver), **205**, 389
- submitochondrial particles, protection from lipid peroxidation by aminoethylcysteine ketimine at concentration not inhibitory of electron transport (bovine heart), **205**, 264
- topoisomerase-like activity (*Saccharomyces cerevisiae*), **198**, 387
- $tRNA^{Asn}$ gene, association with chronic progressive external ophthalmoplegia (human), **204**, 482
- $tRNA^{Leu(UUR)}$ gene, point mutation at nucleotide pair 3291, identification in MELAS syndrome patient, **202**, 1624

Mitochondrial RNA processing enzyme
- gene transcription in stage I oocytes, role of novel *cis*-element (*Rana brevipoda*, *Xenopus laevis*), **202**, 225

Mitogen-activated protein kinase, *see* MAP kinase

Mitogenesis
- A10 vascular smooth muscle cells, regulation by ras proteins (rat), **202**, 1252
- effects of mutagenesis of fibroblast growth factor-1 nuclear localization sequence (mouse), **198**, 1203
- hepatocytes, induction by heparin-binding EGF-like growth factor (rat), *erratum*, **199**, 1088; **198**, 25
- hepatocyte transition in primary culture to, TGF-α-induced, associated cyclin D1 mRNA expression (rat), **204**, 91

Mitogenicity
- recombinant keratinocyte growth factor, effect of cysteine substitutions (human), **205**, 872

Mitogenic signals
- control of early growth response gene-1 translation in myogenic cells (mouse), **202**, 1337

Modulator
- synthetic ether aminophosphoglyceride analog, partial modulator activity toward glucocorticoid receptor, **203**, 408

Molecular dynamics
- reduced superoxide dismutase (bovine), **202**, 1088

Molecular mechanics
- and ^1H NMR, in conformational study of AKH/RPCH family neuropeptide (praying mantis), **198**, 228

Molecular modeling
- based on conformational analysis, *N*-alkylated benzazepinones: CNS agent design motifs, **205**, 98

Molecular structure, *see also* Conformation
- β-structure, β-peptides and amylin, CD and NMR spectrosopic comparisons (human), **204**, 1088
- collagen, sugar-induced alterations, inhibitory effects of aspirin and other compounds (human), **199**, 683
- cyclic hexameric peptides, inhibiting phosphatidylinositol 3-kinase p85 SH2 domain binding, **201**, 1148
- cyclic hexapeptide endothelin receptor antagonists highly potent for both ET_A and ET_B subtypes, **200**, 1708
- cytokine outer surfaces, comparison, **201**, 1396
- α,α-di-n-propylglycine, coexistence of folded and extended conformations, **198**, 424
- interferon-β, inerferon-γ, and dimeric interleukin-5, modeling of interhelix contacts, **201**, 1401
- Lys-Ser-Ala-Tyr-Met-Arg-Phe amide (*Panagrellus redivivus*), **200**, 973
- mammalian RCK1 and *Shaker* potassium channel pore-region deletion mutants, **203**, 513

Moloney murine leukemia virus
- mediated gene transfer of tumor necrosis factor-α receptors into human colon cancer cells for cancer treatment, **202**, 1538

Monoacetone glucose-3 butyrate
- selective induction of apoptosis in myeloid leukemic cell lines (human), **201**, 266

Monoamine oxidase B, *see* Amine oxidase (flavin-containing)

Monoclonal antibodies
- in analysis of structure–function of *Bacillus anthracis* edema factor (mouse), **199**, 676
- against CD4 epitope, blocking effects on cell-surface tryptase TL_2 (human), **201**, 1390
- to chitinase A1, isolation and characterization (*Bacillus circulans*), **204**, 7
- combining sites, incorporating glutathione peroxidase by

    chemical mutation, for generation of selenium-containing abzyme, **198**, 1240
  in detection of retinoid X receptors (mouse), **204**, 525
  to gp130, in development of ELISA for detection of soluble gp130 in ascitic fluids (mouse), **202**, 637
  to human transferrin receptor, conjugation with adenovirus type 2 for protein delivery into cells, **203**, 582
  IgG paraproteins, susceptibility to plasmic cleavage by glycerin-stabilized plasmin (human serum), **202**, 367
  MAb1A2, reactive antigen in nuclei of cancer tissues: nuclear antigen with dead-box RNA helicase motifs (human), **199**, 748
  to prostate-specific antigen, interaction with PSA expressed on surface of filalmentous phage (human), **200**, 1346
  recognizing cancer-associated antigens expressed on mucin-type sugar chains, production (mouse), **203**, 1828
Monocyte chemotactic protein-1
  analog JE/MCP-1
    encoding gene, platelet-derived growth factor-inducible, induction, role of serine/threonine protein kinases (mouse), **203**, 1815
    expression in peritoneal macrophages, stimulation by interleukin-4 (mouse), **203**, 562
  encoding gene, characterization (bovine), **202**, 1272
  expression in luteal cells, analysis by PCR and cDNA cloning (pig), **199**, 962
Monocyte chemotactic protein-2
  attractive properties for eosinophils and effects on eosinophil chemotaxis towards RANTES (human), **200**, 1470
  expression by luteal cells, analysis by cDNA cloning and Northern blot (pig), **205**, 148
Monocyte chemotactic protein-3
  attractive properties for eosinophils and effects on eosinophil chemotaxis towards RANTES (human), **200**, 1470
Monocyte chemotactic protein 1 receptors
  cDNA cloning and functional expression (human), **202**, 1156
Monocytes
  adherence to cultured endothelial cell monolayer, cigarette smoking-induced increase (human), **203**, 929
  arachidonate release, role of synergism between platelet-activating factor and C-C chemokines (human), **199**, 761
  calcium binding protein pEL98 expression (human), **202**, 94
  cell surface, colocalization of CD4 antigen and tryptase TL_2 (human), **201**, 1390
  fructose 1,6-bisphosphatase, cDNA isolation (human), **199**, 687
  HIV-1 replication, inhibition by interleukin-10 (human), **202**, 374
  HL-60 cell differentiation to, phorbol ester-induced, hydroxyl radicals as early signal involved in, **200**, 1650
  and lymphocytes, attachment to synthetic $[\mathrm{Tyr}^{5,12},\mathrm{Lys}^{7}]$-polyphemusin II peptide (human), **202**, 470
  Mono Mac 6sr, receptor-specific uptake and degradation of acetylated, oxidized, and native LDL (human), **202**, 334
  and neutrophils, differential expression of *N*-formylpeptide receptor gene cluster (human), **201**, 174
  THP-1, ICAM-1-mediated endothelial binding, enhancement by genistein via induction of ICAM-1 and counter-receptors (human), **203**, 443
Monodansylcadaverine
  Gln^5 selective labeling of substance P with transglutaminase reaction, **203**, 359
Monolayers
  dipalmitoylphosphatidic acid, staphylococcal protein A-containing, characterization on aqueous and solid surfaces, **201**, 1242
  phospholipid, modified staphylococcal protein A-containing, characterization on solution and slide surfaces, **200**, 1463
N^G-Monomethyl-L-arginine
  chronotropic effects on cardiac myocytes, **205**, 992
  and N^G-iminoethyl-L-ornithine, transport in LPS-stimulated macrophages, mediation by system y^+ (mouse), **200**, 726
Mononuclear cells
  peripheral blood
    HIV-1 replication, inhibition by interleukin-10 (human), **202**, 374
    δ-opioid receptor gene expression (rhesus monkey), **202**, 1291
    quiescent, apoptosis induction by D(−)-ribose and deoxy-D-ribose (human), **201**, 1109
Monophenol monooxygenase
  gene promoter, activation by neurofibromin (human), **205**, 1984
Monosialoganglioside
  GM_3, reconstituted in sphingomyelin and glucosylceramide membranes against wheat germ agglutinin, recognition: quantitative analyses by quartz crystal microbalance, **204**, 551
Morphine
  induction of tyrosine phosphorylation of 58-kDa protein in neuroblastoma cells (human), **200**, 797
Morphogenesis
  role of androgen-induced growth factor FGF-8 gene (mouse), **204**, 882
2-(4-Morpholinyl)-8-phenyl-4H-1-benzopyran-4-one
  in analysis of role of phosphatidylinositol 3-kinase in insulin

receptor signaling (human), **204**, 446

Morphology
  BALB/c3T3 cells, changes accompanying actin stress fiber disorganization and protein tyrosine phosphorylation, induction by vascular endothelial growth factor (mouse), **202**, 1716
  coronary artery and aortic endothelial cells in culture, comparison (pig), **202**, 504

Motilide
  induced smooth muscle contractions, blockage by ANQ-11125 *in vitro* (rabbit), **198**, 411

Motilin
  agonist ANQ-11125, blockage of motilide-induced smooth muscle contractions (rabbit), **198**, 411
  induction of endothelium-dependent smooth muscle relaxation and elevation of cytosolic calcium in endothelial cells *in situ* (pig), **202**, 346
  synthetic analogs, contractile activity and behavior as motilin receptor antagonists (rabbit duodenal muscle), **205**, 449

Motilin receptors
  motilin synthetic analogs as, analysis (rabbit), **205**, 449

Mouse hepatitis virus
  type 3, susceptibility of hepatocytes from cholesterol-enriched and phosphatidylserine-treated A/J mouse, correlation with membrane fluidity, **204**, 1299

Mouse mammary tumor virus receptors
  activation, effect on mammary epithelial cell sensitivity to prolactin, **205**, 524

Mucins
  class III, expression in stomach mucosa following adrenalectomy, effects of hydrocortisone replacement therapy (rat), **202**, 1
  constitutive secretion, linkage to CFTR in epithelial cells (canine gallbladder), **203**, 1457
  insoluble complex, cDNA encoding apoprotein region, cloning (rat small intestine), **198**, 181
  MUC2 and MUC3, mRNAs, alteration of expression in colonic carcinoma cells (human), **199**, 1012
  related sugar chains, monoclonal antibodies to cancer-associated antigens expressed on, production (bovine), **203**, 1828
  tracheal, glycoprotein viscosity, role of sialic acid (dog), **205**, 402

Mucor hiemalis
  endo-β-*N*-acetylglucosaminidase, transglycosylation activity, **203**, 244

Mucosal cells
  gastric
    pepsinogen gene expression, proliferation, and differentiation, effects of adrenalectomy and hydrocortisone replacement (rat), **202**, 1
  wound repair
    effect of myosin light-chain kinase inhibitor wortmannin (rabbit), **199**, 799
    hepatocyte growth factor effects *in vitro* (rabbit), **199**, 1453
    role of extracellular matrix (rabbit), **202**, 285

Multicatalytic endopeptidase complex
  identification as possible γ-secretase for amyloid precursor protein (human), **204**, 333
  subunits resolved by two-dimensional gels, partial sequencing (human), **205**, 1785

Multicatalytic proteinase
  and insulin degrading enzyme, cytosolic proteolytic complex containing, identification and isolation, **202**, 1047

Multidrug resistance
  expression by okadaic acid-resistant CHO cells, **203**, 1210
  variant leukemia cell lines, P-glycoprotein-related protein overexpressed in, identification (mouse), **198**, 804

Multiple tumor suppressor 1
  –cyclin-dependent kinase-4 inhibitor gene, somatic mutations, detection in primary non-small cell lung carcinomas (human), **202**, 1426

Muscle, *see also* Skeletal muscle; Smooth muscle
  cardiac
    myotonic dystrophy gene product, identification and localization (human, rabbit, rat), **203**, 1365
    myotonin-protein kinase levels, reduction in myotonic dystrophy (human), **202**, 577
  glucose transporter levels during endotoxic shock (rat), **198**, 923
  severe childhood autosomal recessive muscular dystrophic, selective defect of sarcoglycan complex (human), **203**, 979

Muscle cells, *see also* Smooth muscle cells
  cardiac, α-adrenergic-induced hypertrophy, prevention by genistein via Ras-mitogen protein kinase signaling pathway (rat), **202**, 1586
  L6, myotubes, insulin-stimulated glucose transport into, role of phosphatidylinositol 3-kinase activation, **205**, 570

Muscular dystrophy
  severe childhood autosomal recessive, selective defect of sarcoglycan complex (human muscle), **203**, 979

Mutagenesis
  deletion analysis, in analysis of regions of neurokinin A receptors involved in generation of second messengers and receptor desensitization (human), **199**, 626

  in identification of AMP deaminase functional domains (human, rat), **205**, 1010
  nuclear localization sequence of fibroblast growth factor-1, effects on protein stability and mitogenic activity (mouse), **198**, 1203
  site-directed, *see* Site-directed mutagenesis

Mutants
  carboxy-truncated Jak2, dominant negative effects on erythropoietin-induced proliferation and Jak2 activation, **204**, 278
  cytokinesis, isolation by restriction enzyme-mediated integration of blastocidin S resistance marker (*Dictyostelium discoideum*), **205**, 1808
  HPH-1 mouse, deficient in GTP cyclohydrolase I, molecular characterization, **203**, 1675
  mi locus, transcription factor encoded by, DNA binding ability, loss (mouse), **205**, 1299
  single-cysteine, in probe of location of disulfide bond in LamB protein (*Escherichia coli*), **201**, 242

Mutational analysis
  role for carboxy-terminus encoding region in nerve growth factor-induced stabilization of GAP-43 mRNA, **205**, 1380

Mutations
  ADR1 and *SNF1*, differential effects on transcriptional regulation of yeast *POT1* gene, **202**, 960
  adrenoleukodystrophy gene, cytosine to guanine transversion in nucleotide 1451 in exon 5, detection (human), **205**, 1638
  cardiac mitochondrial DNA, associated with premature aging, analysis (human), **202**, 102
  chemical, incorporating glutathione peroxidase into monoclonal antibody combining sites, for generation of selenium-containing abzyme, **198**, 1240
  deletion
    highly frequent homozygous, p16 gene in esophageal cancer cell lines (human), **203**, 1090
    induction in target DNA by retrotransposition of *Drosophila* LINE 1 element, **202**, 111
    in mitochondrial DNA, associated levels of mitochondrial transcription factor A (human), **200**, 1374
    two-base-pair, identification in five unrelated families with adrenoleukodystrophy, **202**, 647
  dependent stimulation of Alu transcription *in vitro*, **203**, 845
  138 Glu→Lys, HIV-1 reverse transcriptase, sensitivity to HIV-1-specific inhibitors, **201**, 1305
  in glycogen storage disease type II: deletion of exon 18 (human), **203**, 1535
  HIV-1 protease gene, infectious clones with, construction, **205**, 1651
  homologous dinucleotide deletion, identification in Japanese patients with chronic granulomatous disease with $p47^{phox}$ deficiency, **199**, 1372
  Leu 193 in cysteine-rich region of insulin receptor, effects on insulin receptor precursor cleavage and insulin binding (human), **203**, 763
  leukocyte DNA, associated with congenital hereditary cataract and microphthalmia, analysis (miniature Schnauzer dog), **203**, 1663
  lipoprotein lipase, Leu^{365}→Val change resulting in loss of enzyme activity: primary LPL deficiency in Italian family (human), **199**, 570
  microsatellite, $CAG_{24\rightarrow18}$ in androgen receptor gene, detection in prostate cancer (human), **198**, 74
  missense
    in albumin gene, detection in dysalbuminemic hyperthyroxinemia (human), **202**, 781
    Cu/Zn superoxide dismutase gene, identification in Japanese familial amyotrophic lateral sclerosis, **200**, 695
  mitochondrial encephalomyopathy-associated, rapid and sensitive PCR screening method (human), **200**, 938
  mitochondrial $tRNA^{Asn}$ gene, association with chronic progressive external ophthalmoplegia (human), **204**, 482
  naturally occurring, at second base of codon Asn^{43} in *N*-linked glycosylation site of lipoprotein lipase: role of Asn^{43} in catalysis and secretion (human), **205**, 506
  nonsense
    ALD protein cDNA from adrenoleukodystrophy-affected patient, identification, **198**, 632
    detection in transcobalamin II deficiency (human), **204**, 1111
  at nucleotide 5460 of mitochondrial NADH dehydrogenase, relationship to Alzheimer's disease (human brain), **203**, 745
  point
    effect on dopachrome tautomerase function of *slaty* gene product TRP2 dopachrome tautomerase (mouse), **202**, 1060
    homoplasmic, and deletion mutation, association in mitochondrial DNA of ocular myopathy patient, **202**, 1606
    mitochondrial encephalomyopathy-associated, rapid and sensitive PCR screening method (human), **200**, 938
    mitochondrial $tRNA^{Leu(UUR)}$ gene at nucleotide pair 3291, identification in MELAS syndrome patient, **202**, 1624
    in muscle phosphofructokinase deficiency variant in Japanese case with abnormal RNA splicing (human), **202**, 444

    - in thyrotropin receptor, determining structural requirements for binding to TSH and stimulation of adenylate cyclase, analysis (human), **199**, 612
    - tryptophan 800 in smooth muscle myosin light chain kinase, effect on calmodulin-binding site (turkey), **202**, 1329
  - potassium channel pore-region, mammalian, comparison with *Shaker* K channel, **203**, 513
  - proline, one S4 segment of sodium channel II, analysis (rat brain), **202**, 1438
  - SH2 domain in X-linked agammaglobulinemia, structural basis (human), **205**, 1270
  - somatic, multiple tumor suppressor 1/cyclin-dependent kinase-4 inhibitor gene, detection in primary non-small cell lung carcinoma (human), **202**, 1426
  - Δ*sspA* gene, complementation by glutathione *S*-transferase–SspA fusion binding to RNA polymerase, role in phage P1 replication (*Escherichia coli*), **201**, 123
  - substitution, during divergent evolution, analysis: 400 by 400 dipeptide substitution matrix, **199**, 489
  - in vasopressin receptor V_2 gene in patients with congenital nephrogenic diabetes insipidus, **205**, 552

Mycobacterium tuberculosis
  - induction of P-glycoprotein expression in promonocytic U1 cells chronically infected with HIV-1, **199**, 1181

Mycoplasma
  - and other life forms, evolutionary relationships of lactate dehydrogenases, **205**, 558

Myelin basic protein
  - gene 3′-untranslated region, effect on immortalized oligodendrocyte mRNA levels (mouse), **204**, 1352

Myeloblastin
  - and myeloperoxidase, expression during promyelocytic leukemia cell differentiation *in vitro*, comparison (human), **200**, 1130

Myeloperoxidase
  - and myeloblastin, expression during promyelocytic leukemia cell differentiation *in vitro*, comparison (human), **200**, 1130
  - site-directed mutagenesis: identification of residues involved in catalytic activity and heme interaction (human), **202**, 73

Myoblasts
  - L6, cytosolic Ca^{2+} level increase and cell damage, induction by 3-hydroxy-3-methylglutaryl-CoA reductase inhibitors (rat), **202**, 1579

Myocardium
  - angiotensin II receptor populations during aortacaval fistulae, characterization relative to β-adrenergic receptor antagonism and blockade of AII (rat), **203**, 1865
  - infarction, subsequent inducible nitric-oxide synthase activity, analysis (rabbit), **205**, 1671

Myocytes
  - atrial, muscarinic K^+ channel activation, effects of transducin α and βγ subunits (guinea pig), **200**, 1484
  - cardiac
    - chronotropic effects of cytokines and N^G-monomethyl-L-arginine (rat), **205**, 992
    - differentiation induced by 3,5,3′-triiodo-L-thyronine in P19 teratocarcinoma cells, associated preferential binding of RGG(T/A)CA direct repeats spaced by 4 base pairs in DNA (mouse), **205**, 1899
    - endothelin-1 production and responsiveness to ET-1 *in vitro*, effects of high and low levels of oxygen (rat), **202**, 1612
    - hypertrophy, regulation by heart fatty acid-binding protein (rat), **205**, 1822
    - I_{sK} potassium channels, inhibitory effects of class III antiarrhythmics NE-10044 and NE-10133 (guinea pig), **202**, 265
  - intracellular sodium regulation during metabolic inhibition, role of Na^+/H^+ exchange and Na^+/K^+ pump (guinea), **203**, 93
  - isolated, intracellular Na^+ and Ca^{2+} transients in, simultaneous measurement: strophanthidin effects (guinea pig), **203**, 1050
  - taenia coli, maxi-K^+ channels, β-adrenergic receptor activation, enhancement by GM1 ganglioside (guinea pig), **200**, 1341

Myogenesis
  - cardiac, stem cell cultures induced for, activation of gene for type-B natriuretic factor (mouse), **199**, 954

Myogenic cells
  - early growth response gene-1 translation in, control by mitogenic signals (mouse), **202**, 1337

Myoglobin
  - dependent lipid peroxidation, stimulation by Adriamycin (horse), **204**, 23
  - nitric oxide binding to, characterization by infrared spectroscopy (bovine heart), **204**, 537
  - oxidation, induction by Adriamycin (horse), **204**, 30

Myometrium
  - smooth muscle contractions, oxytocin-stimulated, inhibition by neomycin (rat), **205**, 245

Myopathy
  - ocular, *see* Ocular myopathy

Myosin
  - heavy chain, mRNA levels in skeletal muscle, regulation by

    - growth hormone, modulation by restricted diet in hypophysectomized rat, **198**, 97
  - light chain, 20-kDa regulatory, dephosphorylation, stimulation by cyclic strain in vascular smooth muscle cells (bovine aorta), **205**, 79
  - light chain 2, superfast, from cat, cDNA isolation and structure and evidence for identity of human homolog, **200**, 1277

β-Myosin
  - heavy chain, expression, effect of 3,5,3′-triiodo-L-thyronine (human, rat), **199**, 1482

Myosin-light-chain kinase
  - role in bundling of actin filaments (chicken smooth muscle), **199**, 786
  - smooth muscle, calmodulin-binding site, role of tryptophan 800 (turkey), **202**, 1329

Myosin-light-chain kinase inhibitors
  - wortmannin, effect on wound repair of cultured gastric mucosal cells (rabbit), **199**, 799

Myotonic dystrophy
  - gene product, identification and localization in skeletal and cardiac muscles (human, rabbit, rat), **203**, 1365
  - myotonin-protein kinase levels in, analysis in muscle and brain tissues (human), **202**, 577

Myotonin-protein kinase
  - decrease in skeletal and cardiac muscles in myotonic dystrophy (human), **202**, 577

Myotubes
  - insulin-stimulated glucose transport into, role of phosphatidylinositol 3-kinase activation (L6 cells), **205**, 570

Myristic acid
  - flavin-supported oxidation by heme domain of cytochrome P450$_{BM-3}$ (*Bacillus megaterium*), **203**, 1745
  - substrate for soluble fatty acid α-hydroxylase (*Sphingomonas paucimobilus*), **201**, 1554

N

NAD$^+$ (oxidized nicotinamide adenine dinucleotide)
  - depletion in islet cells after nitric oxide exposure, role in NO toxicity (rat), **199**, 1270
  - and β-mercaptoethanol, induction of self-aggregation in erythrocyte CD38 glycoprotein (human), **202**, 1710

NAD$^+$ ADP-ribosyltransferase
  - activation in islet cells after nitric oxide exposure, role in NO toxicity (rat), **199**, 1270
  - catalytic domain, fusion protein with DNA binding domain of glucocorticoid receptor, expression and characterization (*Escherichia coli*), **202**, 880
  - hepatic, control by thyroid hormones (rat), **203**, 1548
  - inhibitors, and 3-aminobenzamide, protective effects against cytotoxic effector cell-associated cell death (human), **199**, 525

NAD glycohydrolase
  - ecto-enzyme, identification of cell surface antigen CD38 with hyaluronate-binding activity as (HL-60 cells), **203**, 1318

NADH (reduced nicotinamide adenine dinucleotide)
  - and ADP, AMP, and ATP, status during Ca^{2+}- and inorganic phosphate-induced mitochondrial permeability transition (rat liver), **200**, 1615
  - in separation of soluble fatty acid α-hydroxylase (*Sphingomonas paucimobilus*), **201**, 1554

NADH dehydrogenase
  - mitochondrial, DNA mutations at nucleotide 5460, relationship to Alzheimer's disease (human brain), **203**, 745

NADH oxidase
  - purification, characterization, and properties, and coupling to adenylyl phosphosulfate reductase (*Desulfovibrio vulgaris*), **203**, 839

NAD(P)$^+$ glycohydrolase, *see* NAD(P)$^+$ nucleosidase

NADPH (reduced nicotinamide adenine dinucleotide phosphate)
  - and ADP, AMP, and ATP, status during Ca^{2+}- and inorganic phosphate-induced mitochondrial permeability transition (rat liver), **200**, 1615
  - P47^{phox}, binding to, relationship to respiratory burst oxidase (human), **198**, 191

NADPH-cytochrome P450 reductase
  - bleomycin binding to, in creation of semi-artificial hydroxylating enzymes, **200**, 722
  - interaction with cytochrome P450 CYP2E1, role of CYP2E1 NH$_2$ terminal region (rabbit), **203**, 156
  - mediation of free radical generation by neocarzinostatin via activation of enediyne chromophore (rat liver), **205**, 1716

NADPH dehydrogenase (flavin)
  - FMN-containing, from luminescent *Vibrio fischeri* ATCC 7744, hydride transfer stereospecificity and substrate specificity for, **205**, 275

NAD(P)H-flavin oxidoreductase, *see* NADPH dehydrogenase (flavin)

NADPH-flavin reductase
  - erythrocyte, cDNA, cloning and nucleotide sequencing (human), **198**, 1170

NADPH oxidase
  - plasma membrane-associated, activation in neutrophils, role of protein rac (human), **198**, 1216

role in low-density lipoprotein oxidation by macrophages (human), **202**, 1300

NAD(P)$^+$ nucleosidase

in spleen, catalysis of cyclic ADP-ribose hydrolysis and methanolysis, mechanism (bovine), **204**, 1279

NAD(P)$^+$ transhydrogenase (B-specific)

identification in *Klebsiella pneumoniae*, **198**, 928

Naphthalic acid anhydride

induced microsomal oleic acid hydroxylation, role of cytochrome P450 (*Triticum aestivum*), **198**, 795

Natriuretic peptides, *see specific types*

Natural killer cells

impairment of cytoskeleton function, cell death caused by, effect of 3-aminobenzamide (human), **199**, 1250

induced cell death, effects of 3-aminobenzamide and other poly(ADP-ribose)polymerase inhibitors (human), **199**, 525

Nectadrin

antibodies, LFA-1-sensitive effects on B lymphoblast aggregation and signal transduction (mouse), **198**, 1209

Neocarzinostatin, *see* Zinostatin

Neomycin

inhibition of oxytocin-stimulated smooth muscle contractions in myometrial tissue (rat), **205**, 245

Nephrectomy

subsequent accelerated endothelin-1 release from mesenteric arteries, augmentation by converting enzyme inhibition (rat), **202**, 246

Nephritis

murine lupus, proinflammatory cytokine and superoxide dismutase expression, effects of omega-3 and omega-6 lipid-rich diets, **200**, 893

Neprilysin

CGS 26303 as inhibitor, pharmacological profile (rat), **204**, 407

Nerve fibers

and electric organ, excitation process, effects of temperature changes (*Malapterurus electricus*), **200**, 704

Nerve growth factor

effects on growth response of neurofibroma cells in neurofibromatosis type 1 (rat), **198**, 827

induced stabilization of GAP-43 mRNA, role for carboxy terminus encoding region, mutational analysis, **205**, 1380

related neurotrophins, expresssion in osteoblastic cell line (mouse), **198**, 891

stimulation of differentiation of osteoblastic MC3T3-E1 cells (mouse), **205**, 1187

Nerve signals

mammalian, multiple-channel fractal information coding, **199**, 911

Netrosin

binding to 5-aminodansyl-dU-DNA in minor groove, correlation with fluorophore changes in major groove, **203**, 53; *erratum*, **204**, 437

Neural cells

differentiation, associated activation of helix-loop-helix proteins Id1, Id2, and Id3 (rat), **199**, 1355

NF-κB binding to HIV-1 enhancer, tumor necrosis factor α and interleukin-1β effects (human), **203**, 623

Neuraminidase

nanH gene encoding, sequence (*Bacteroides fragilis* YCH46), **203**, 914

Neurite growth factor

induced stabilization of GAP-43 mRNA, mediation by 3′ untranslated region and carboxy-terminus peptide-encoding segment (PC12 cells), **200**, 789

Neurite outgrowth

associated 74-kDa molecule, detection in brain (bovine), **199**, 1174

associated region in midkine molecule, localization, **203**, 1131

Neurofibromatosis

type 1, neurofibroma cells in, growth regulation (human), **198**, 827

Neurofibromin

activation of tyrosinase gene promoter (human), **205**, 1984

Neurokinin 2 receptors

human, transfected CHO cells, tachykinin-induced intracellular Ca^{2+} rise, pharmacological characterization, **200**, 1512

Neurokinin A receptors

regions involved in generation of second messengers and receptor desensitization (human), **199**, 626

Neuromere 2

diencephalic, regional expression of *Cwnt-4* gene in developing chick CNS in relation to, **203**, 1581

Neuronal cells

B104, morphological differentiation and G2-M arrest, induction by apigenin (rat), **204**, 578

Neuronatin

highly expressed in neonatal brain, molecular cloning (rat), **201**, 1227

Neurons

BI class A calcium channel, stable expression in BHK cells, **203**, 1821

calcium signaling, effects of apolipoprotein E and cholesterol, role in β-amyloid neurotoxicity (murine brain), **200**, 1185

and cardiomyocytes, differentiation, dose-dependent effect

of 3,5,3′-triiodo-L-thyronine (P19 cells), **205**, 652
cerebellar, apoptosis, induction by methyl mercury in primary culture (rat), **204**, 310
constitutive nitric-oxide synthase, biphasic effect of estrogen via Ca^{2+}–calmodulin-dependent mechanism (rabbit cerebellum), **203**, 1013
cortical, synchronous oscillation of intracellular Ca^{2+} in culture, inhibition by endoglycoceramidase (rat), **202**, 398
forebrain, thyroid/steroid receptor NOR-1, molecular cloning (rat), **205**, 1959
ischemia-induced loss, protection by prosaposin (gerbil), **204**, 994
neocortical, survival in culture, effects of synthetic peptides corresponding to C-terminal amino acids of neuron-specific and non-neuronal enolase (rat), **202**, 25
Neuropeptidase
heat-resistant cholecystokinin octapeptide-degrading, isolation and characterization (rat liver), **198**, 574
Neuropeptides
Emp-AKH, conformational study with ^{1}H NMR and molecular mechanics (praying mantis), **198**, 228
pigment-dispersing hormone family, novel member, identification from cloning of PDH precursors (blue crab), **205**, 410
Neuropeptide Y
potentiation of luteinizing hormone response to LH-releasing hormone in men, **200**, 1111
Neurospora crassa
associated porins, structure and homologies with mitochondrial porins, **200**, 908
Neurotensin
induced calcium mobilization, desensitization in transfected PC12 cells expressing neurotensin receptor (rat), **198**, 400
Neurotensin receptors
expression in colon cancer cell lines and normal colonic epithelium, binding studies and RT-PCR (human), **203**, 465
transfected PC12 cells expressing, neurotensin-induced calcium mobilization in, desensitization (rat), **198**, 400
Neurotoxicity
β-amyloid, implications of apolipoprotein E and cholesterol effects on neuronal calcium signaling (murine brain), **200**, 1185
pheochromocytoma PC12 cells, amyloid β protein-induced, prevention by rifampicin *in vitro* (rat), **204**, 76
25-35 region of amyloid peptides, conformational mapping, **205**, 120
Neurotoxins
botulinum type G, proteolysis of rat synaptobrevin 2 Ala^{81}–Ala^{82} bond, **200**, 829
Neurotrophin-3
expression in osteoblastic cell line (mouse), **198**, 891
response of *trk*C expressed in osteoblastic cells (mouse), **203**, 1268
Neutral endopeptidase, *see* Neprilysin
Neutrophil chemoattractants
CINC/gro, interleukin-8-like
effects on hormone secretion by anterior pituitary cells *in vitro* (rat), **202**, 155
production by anterior pituitary gland (rat), **202**, 161
Neutrophil elastase, *see* Leukocyte elastase
Neutrophils
activation of plasma membrane-associated NADPH oxidase, role of protein rac (human), **198**, 1216
aggregated IgG-stimulated protein tyrosine phorylation, role of Fcγ receptors, **199**, 653
binding to immunocomplexes, induction of tyrosine phosphorylation of FcγRII: role of phosphorylation in signaling Fc-mediated phagocytosis (human), **201**, 30
calcium binding protein pEL98 expression (human), **202**, 94
cell-free system derived from, superoxide generation, inhibition by peptides corresponding to region adjacent to His-94 in small subunit of cytochrome b_{558} (human), **204**, 924
chemotaxis, regulation via interaction of fibronecting cell binding fragments and interleukin-8 (human), **205**, 706
cytosolic Ca^{2+}, receptor agonist-mediated elevation, role of protein kinase C (human), **203**, 998
cytosolic rho A–rho GDP dissociation inhibitor complex purified from, stability, role of bound GDP, **205**, 174
formyl peptide- and mastoparan-stimulated, phospholipase D activation in, modulation by okadaic acid (human), **205**, 1481
function regulation, role of c- and n-protein kinase C isozymes (human), **200**, 1536
hydroxylamine- and sodium azide-stimulated, NO production, role of oxygen radicals (human), **199**, 1245
mature, tyrosine phosphorylation of JAK2 protein, effect of granulocyte colony-stimulating factor (human), **203**, 922
and monocytes, differential expression of *N*-formylpeptide receptor gene cluster (human), **201**, 174
respiratory burst, priming by diadenosine polyphosphates AP$_4$A and AD$_3$A, role of intracellular calcium (human), **202**, 218
superoxide generation induced by *N*-formyl-methionyl-leucyl-phenylalanine, priming by iminodipeptides containing proline with C-terminal and N-terminal residues (human), **205**, 758

- tyrosine phosphorylation of phospholipase C-γ2, role in Fc receptor activation of phosphoinositide hydrolysis (human), **201**, 1100

Nickel
- divalent cations, elevation of osteocyte cytosolic calcium (chicken), **204**, 519

Nicotinamide nucleotide transhydrogenase, *see* NAD(P)$^+$ transhydrogenase (B-specific)

Nicotine
- downregulation of Na,K-ATPase α_2 isoform at blood–brain barrier and brain (rat), **199**, 1422

Niemann–Pick disease
- type C, fibroblasts from affected patients, cytoplasmic Ca concentration, effects of low-density lipoprotein uptake, **198**, 438

Nifedipine
- and α-tocopherol, antioxidant activity against low-density lipoprotein oxidation *in vitro*, comparison (human), **203**, 1803

Nitrate reductase
- gene fragments, enhancement of nitrite production in activated murine macrophage cell lines (barley), **201**, 284

Nitrates
- formation from L-arginine by platinum electrode-induced catalytic conversion, **202**, 1347
- –nitrite, circulating levels during follicular development, effects of ovarian/sex hormones (human), **202**, 1543
- plasma levels, measurement by high-performance capillary electrophoresis (human), **200**, 951

Nitric oxide
- L-arginine-dependent pathway, and FcεRII/CD23, role in IgE-mediated activation of bone marrow eosinophils (human), **203**, 265
- binding to intact erythrocytes, electron paramagnetic resonance monitoring (human), **203**, 176
- bonding to cytochrome-*c* oxidase and myoglobin, characterization by infrared spectroscopy (bovine heart), **204**, 537
- destruction of zinc–sulfur clusters, effects on metallothionein Zn release and yeast transcription activator LAC9, **200**, 1105
- effect on arachidonic acid metabolism in intact platelets containing both lipoxygenase and cyclooxygenase: L-arginine and sodium nitroprusside effects (human), **200**, 1630
- endogenous, modulation of endothelin-1-induced contraction of bovine oviduct, **201**, 143
- exogenous, inhibition of proliferation of cultured vascular endothelial cells (bovine), **203**, 1160
- formation
  - in bovine bone marrow-derived macrophages, effect of priming by noncytopathic bovine viral diarrhea virus strains, **202**, 1562
  - by erythrocyte-metabolized ^{15}N-isosorbide dinitrate (rat), **204**, 1055
- inducible, expression in lung epithelial cells, cytokine effects (human), **203**, 209
- inhibition of protein kinase Cδ gene expression in peritoneal macrophages (mouse), **204**, 105
- interaction with hemoglobin A, characterization by infrared spectroscopy (human), **198**, 281
- killing of hepatocytes by mobilization of mitochondrial calcium, **205**, 1143
- mediation of apoptosis in mastocytoma cells (mouse), **204**, 244
- modulation by ovarian/sex hormones (human), **202**, 1543
- and nitroxyl, discrimination by bioassay with L-cysteine, **201**, 54
- potent and reversible deenergization of mitochondria at low oxygen tension (rat), **204**, 169
- production by
  - cells isolated from regenerating liver (rat), **204**, 1305
  - endothelial cells
    - ATP- and shear stress-dependent, *in vitro* stimulation by laminar flow (bovine), **198**, 213
    - constitutive and inducible pathways, differential regulation by inflammatory stimuli (mouse), **202**, 450
    - dependence on preceding tetrahydrobiopterin synthesis (mouse), **199**, 504
  - Kupffer cells, role in cytotoxicity against hepatoma cells (rat), **201**, 1175
  - microglial cells, inhibition by glucocorticoid, role of protein kinase C (mouse), **199**, 633
  - regenerating liver, EPR evidence (rat), **202**, 571; *erratum*, **203**, 743
  - retinal pigmented epithelial cells in response to interferon γ and interleukin-1β (human), **198**, 120
  - sodium azide- and hydroxylamine-stimulated neutrophils, role of oxygen radicals (human), **199**, 1245
- release in endothelial cells, stimulatory effect of extracellular ATP, role of ecto-ATPase as ATP receptor (bovine aorta), **203**, 1237
- role in
  - HIV gp120-induced prostaglandin E_2 release by astroglial cells (human), **203**, 87
  - red blood cell functional properties (human), **199**, 447
  - soluble guanylyl cyclase activation in endotoxin-induced vascular hyporeactivity (rat aorta), **201**, 436

- scavenging, mediation of imidazolineoxyl *N*-oxide therapy of endotoxin shock (rat), **202**, 923
- spin trapping by nitronylnitroxides: measurement of NO synthase activity (rat cerebellum), **202**, 195
- synthesis
  - and gluconeogenesis and flux through phospho*enol*pyruvate carboxykinase, reciprocal changes, induction by endotoxin (rat liver), **204**, 659
  - and hypertension, effect of deficiency of endogenous arginine synthesis (rat), **205**, 1391
  - inhibition, in enhancement of inducible nitric oxide synthase mRNA and protein expression in chronic liver inflammation model (rat), **204**, 635
  - in macrophages
    - induction by very-low- and low-density lipoproteins (rat), **204**, 1047
    - lipopolysaccharide and IFN-γ-activated cells, diacylglycerol production for, role of phosphatidylcholine-specific phospholipase C (mouse), **199**, 461
  - pathway from L-arginine, intermediate N^{ω}-hydroxy-L-arginine, inhibition of liver and macrophage arginase (bovine, mouse, rat), **203**, 1614
  - regulatory role of arginase: N^{G}-hydroxy-L-arginine inhibition of liver arginase (rat), **202**, 174
- tetrahydrobiopterin as (human), **205**, 516
- toxicity in islet cells, role of poly(ADP-ribose) polymerase activation and NAD$^+$ depletion (rat), **199**, 1270

Nitric-oxide synthase
- and arginase, substrate and inhibitor specificity for arginine analogues and related compounds in macrophages, comparison (mouse, rat), **198**, 206
- L-arginine-dependent, induction in bone marrow-derived macrophages (bovine), **198**, 510
- constitutive
  - calcium-dependent inhibition (rat brain), **203**, 8
  - endothelial, increased expression in aorta during pregnancy (rat), **205**, 905
  - and inducible enzyme, mRNA, retinal expression (human), **205**, 85
  - neuronal, estrogen biphasic effect via Ca^{2+}–calmodulin-dependent mechanism (rabbit), **203**, 1013
- elevation in cerebral microvessels in Alzheimer's disease (human), **205**, 659
- endothelial, gene structure, polymorphism, and mapping to chromosome 7 (human), **198**, 1027
- EPR measurement: spin trapping of NO by nitronylnitroxides (rat cerebellum), **202**, 195
- expression and nitric oxide release in pulmonary epithelial cells, cytokine effects (human), **203**, 209
- inducible
  - activity in myocardium after infarction (rabbit), **205**, 1671
  - cardiovascular homeostasis-associated, regulation of gene transcription in vascular smooth muscle cells (human), **200**, 802
  - expression
    - enhancement by nitric oxide synthesis inhibition in chronic liver inflammation model (rat), **204**, 635
    - in infarcted myocardium, inhibition by dexamethasone (rabbit), **202**, 1120
    - in pulmonary epithelial cells in response to cytokines (mouse), **198**, 835
- induction in J774.2 macrophages, inhibition by spermine, effect of aldehyde dehydrogenase, **203**, 1638
- inhibition by 2-iminobiotin (mouse, rat), **204**, 962
- lipopolysaccharide-induced production in murine RAW 264.7 macrophages, potentiation by extracellular ATP, **203**, 430
- mRNA
  - induction in epithelial cells by oxidative stress (human), **199**, 1518
  - and superoxide dismutase mRNA, interleukin-1β-induced expression in insulin-producing RINm5F cells, dissociation, **203**, 1542
- purification from *Nocardia* species YC-122540, **203**, 1251

Nitrites
- –nitrate, circulating levels during follicular development, effects of ovarian/sex hormones (human), **202**, 1543
- plasma levels, measurement by high-performance capillary electrophoresis (human), **200**, 951
- production in activated murine macrophage cell lines, enhancement by barley plant nitrate reductase gene fragments, **201**, 284

Nitrobenzyl groups
- protein conjugates, ultraviolet cleavage, **201**, 1213

Nitronyl nitroxides
- spin trapping of nitric oxide: measurement of NO synthase activity (rat cerebellum), **202**, 195

p-Nitrophenol
- in spectrophotometric assay of nonoxynol effects on hepatic microsomal UDP-glucuronosyltransferase (rabbit), **200**, 1093

5-Nitro-2(3-phenylpropylamino)benzoic acid
- inhibition of Na$^+$/I$^-$ symporter in thyroid follicles *in vitro* (pig), **204**, 1265

Nitrophenyls
- substrate derivatives, photoreactive, inhibition of β-1,3-galactosyl-*O*-glycosyl-glycoprotein β-1,6-*N*-acetylglucosaminyltransferase from acute myeloid leukemia cells

(human), **198**, 417

S-Nitrosothiol
  and H_2O_2, induction of strand scission in pBluescript DNA (*Escherichia coli*), **200**, 966

Nitroxyl
  and nitric oxide, discrimination by bioassay with L-cysteine, **201**, 54

NMR, *see* Nuclear magnetic resonance

Nocardia YC-122540
  purification of nitric-oxide synthase, **203**, 1251

Nonenzymatic modifications
  age-related abnormal, on collagen II, associated antigenic determinant (human), **200**, 1641

Nonoxynol
  effects on hepatic microsomal UDP-glucuronosyltransferase, *p*-nitrophenol spectrophotometric assay (rabbit), **200**, 1093

Norepinephrine
  endotoxin-induced vascular hyporeactivity to, role of activation of soluble guanylyl cyclase (rat aorta), **201**, 436
  induction of glucose transport in primary culture of brown adipocytes, effect of wortmannin (rat), **202**, 660

Northern blot
  in analysis of luteal cell expression of monocyte chemoattractant protein-2 (pig), **205**, 148

Noxiustoxin
  secondary structure, from hydropathy power spectral analysis, **201**, 186

Nuclear factors
  cell-type, binding site identical to fibroblast growth factor receptor 1 gene expression region, determination (mouse), **198**, 1020
  helix-loop-helix, Id1, Id2, Id3, activation during neural differentiation (rat), **199**, 1355
  hepatocyte, type 3, binding to insulin response sequence in IGF binding protein-1 promoter: enhancement of promoter function (mouse), **203**, 1835; *erratum*, **205**, 1496
  NF(P), interacting with interleukin-4 gene regulating P sequence, relationship to NF-κB and NF-AT (human), **199**, 439

Nuclear localization signals
  for angiogenin targeting to nucleolus (human), **203**, 1765
  engagement of facilitated translocation by nuclear pore complex and subsequent intranuclear binding (*Xenopus laevis* oocytes), **205**, 529
  fibroblast growth factor-1, mutagenesis, effects on protein stability and mitogenic activity (mouse), **198**, 1203
  identification in core protein of hepatitis C virus, **205**, 1284

Nuclear magnetic resonance
  amylin and designer β-peptide β-structures, comparison (human), **204**, 1088
  ^{13}C and ^{1}H, conformational analysis of *N*-alkylated benzazepinones: CNS agent design motifs, **205**, 98
  ^{1}H
    in analysis of calmodulin interaction with jujuboside A, **202**, 148
    in characterization of high oxido-reduction potential rusticyanin from *Thiobacillus ferrooxidans*, **203**, 1655
    and molecular mechanics, in conformational study of AKH/RPCH family neuropeptide (praying mantis), **198**, 228
    and sedimentation equilibrium centrifugation, in analysis of calmodulin and polylysine interaction, **198**, 309
    2D TOCSY, structural analysis of cluster-coordinating cysteines on oxidized ferredoxin (*Clostridium pasteurianum*), **202**, 591
  ^{23}Na, detection of alanine and glycine protection against hypoxic injury in isolated perfused kidney (rat), **202**, 1639
  reduced superoxide dismutase (bovine), **202**, 1088

Nuclear pore complex
  facilitated translocation by, engagement by nuclear localization signal, subsequent intranuclear binding (*Xenopus laevis* oocytes), **205**, 529

Nuclear receptors
  orphan
    binding by retinoic acid response elements in keratinocytes, **203**, 545
    superfamily member closely related to Rev-ErbA, identification (rat), **204**, 49

Nuclease
  Mg^{2+}-dependent, enhancement in liver cells exposed to cisplatin (rat), **202**, 749

Nucleobindin
  calcium binding activity, mediation by EF hand moiety (human, mouse), **199**, 1388

Nucleolus
  angiogenin targeting, nuclear localization signal for, identification (human), **203**, 1765

Nucleoproteins
  heat-induced aggregation, acclerated recovery of O23 cells overexpressing Hsp27, analysis (Chinese hamster), **204**, 1170

Nucleoside-diphosphate kinase
  phosphorylation by casein kinase 2 *in vitro* (human), **199**, 1041

Nucleoside 1-thiotriphosphates
  synthesis procedure, **204**, 150

5′-Nucleotidase
  purine, cytosolic, molecular cloning (human placenta), **205**, 917
Nucleotide binding motifs
  P-loop related, GxxGxxK, in estrogen sulfotransferase, as binding site for sulfate donor, evaluation (guinea pig), **204**, 1178
Nucleotide excision repair
  in vitro measurement of damage-specific DNA (human), **202**, 788
Nucleotides
  binding to HSV-1 encoded helicase-primase complex and UL9 origin binding protein, site characterization, **199**, 1333
Nucleotide sequence
  N-acetylglucosaminyltransferase V cDNA (human), **198**, 318; *erratum*, **200**, 668
  α-adrenergic receptor α1A cDNA (human), **201**, 1296
  adrenomedullin gene (human), **203**, 631
  alcohol dehydrogenase class IV cDNA (human), **203**, 219
  amelogenin cDNA (rat), **198**, 755
  *amo*B gene 3′ portion (*Nitrosomonas europaea*), **204**, 759
  angiotensin converting enzyme cDNA, comparison in stroke-prone spontaneously hypertensive and Wistar-Kyoto rats, **198**, 380
  angiotensin II type 1 receptors
    gene 5′ flanking region (human), **204**, 1039
    gene promoter (human), **200**, 1264
    subtype $AT_{1b}R$ cDNA (human), **199**, 467
  angiotensin II type 2 receptors
    cDNA (human), **205**, 645
    gene (human), **200**, 1449; **203**, 1842
  apolipoprotein F cDNA (human), **203**, 1146
  aromatase gene exon 1 cDNA (human brain), **198**, 1153
  aryl hydrocarbon receptor gene promoter cDNA (human), **203**, 615
  Aspergillus ficuum acid phosphatase gene, **204**, 69
  bone marrow stromal cell antigen 1 cDNA (mouse), **203**, 1309
  bone morphogenetic protein type IA receptor cDNA (rat), **204**, 203
  bovine serum albumin gene promoter, **203**, 1447
  bphA and *bphB* genes (*Pseudomonas* sp. KKS102), **202**, 850
  E-cadherin cDNA (human), **200**, 1754
  calmitine cDNA (human), **203**, 1477
  capsanthin-capsorubin cDNA (*Capsicum annuum*), **199**, 1144; *erratum*, **201**, 486
  carboxylesterase ES-3 cDNA (rat liver), **203**, 1404
  casein kinase-1 $hhp1^+$ and $hhp2^+$ isoform cDNAs (*Schizosaccharomyces pombe*), **203**, 231
  catecholamine-sulfating phenol sulfotransferase gene (human), **205**, 1325
  α(E)-catenin cDNA (human colon), **203**, 1691
  CD38-homologous protein cDNA (rat), **202**, 629
  cGMP-stimulated phosphodiesterase cDNA (rat brain), **205**, 1850
  CHIP29 water channel cDNA (bovine), **204**, 861
  cofactor-independent phosphoglycerate mutase cDNA (*Zea mays*), **203**, 1204
  complement regulatory antigen 512 cDNA (rat), **198**, 819
  conglutinin gene 5′-flanking region sequence (bovine), **198**, 597
  corazonin gene (*Drosophila melanogaster*), **204**, 292
  creatine transporter hCRT-BS2M cDNA (human), **204**, 419
  Cry j I cDNA (*Cryptomeria japonica*), **199**, 619
  γ-crystallin isoform cDNAs (hybrid teleostean fish), **202**, 527
  Cu,Zn-containing superoxide dismutase 5′-flanking region (human, rat), **201**, 1526
  cyclin D1 cDNA (rat), **204**, 691
  CYP3A5 5′-flanking region, comparison with CYP3A4 and CYP3A7 (human), **205**, 1741
  cytoplasmic phospholipase A_2 gene, 5′ region (human), **205**, 6
  cytosolic purine 5′-nucleotidase cDNA (human placenta), **205**, 917
  dnaK homologs (*Synechococcus* sp. PCC7942), **201**, 466
  Drosophila melanogaster homolog of ribosomal protein L27a cDNA, **198**, 748
  E-cadherin gene 5′ region (human), **203**, 1284
  endothelin-converting enzyme cDNA (bovine), **203**, 1417
  eotaxin cDNA (guinea pig lung), **205**, 788
  erythrocyte NADPH-flavin reductase cDNA (human), **198**, 1170
  estrogen sulfotransferase cDNA (human liver), **200**, 1621
  Fas antigen cDNA, truncated and transmembrane form (rat), **198**, 666
  Fas ligand cDNA (human hepatocytes), **204**, 468
  ferritin H genes (human), **205**, 944
  fibrillin cDNA (*Capsicum annuum*), **199**, 1144; *erratum*, **201**, 486
  fructose 2,6-bisphosphate 2-phosphatase/fructose 6-phosphate 2-kinase cDNA (frog), **198**, 335, 1099; *erratum*, **200**, 1769
  galactocerebrosidase cDNA (human), **198**, 485
  gastrin/CCK_B receptor gene (rabbit), **202**, 947
  gentamicin resistance gene (*Serratia marcescens*), **198**, 1084
  glucagon receptor cDNA (human liver), **198**, 328

glucose-6-phosphatase cDNA (rat liver), **201**, 302
glutathione *S*-transferase
  class alpha, 5′ flanking sequences (human), **200**, 1665
  class theta, Yrs gene (rat), **205**, 1250
β_2-glycoprotein I cDNA (mouse), **200**, 1521
Golgi antigen cDNA (human), **205**, 1399
gonadotropin-releasing hormone receptor mRNAs, pituitary and gonadal (rat), **200**, 1359
G protein-coupled receptor
  cDNA encoding product structurally related to mammalian FSH, TSH, LH/CG receptor family (sea anemone), **197**, 1062; *erratum*, **200**, 668
  gene GPR1 (rat), **205**, 1952
growth/differentiation factor 5 DNA (human), **204**, 646
heparin-binding protein HBp15 cDNA (mouse), **199**, 706
hepatic cytosolic acetoacetyl-CoA thiolase cDNA (human), **201**, 478
hepatic growth factor cDNA (mouse), **199**, 772
Hes-3 gene (mouse), **203**, 594
hexokinase II gene (human), **205**, 490
hippocampal autoantigen ple21 cDNA (human), **199**, 1200
histidine ammonia-lyase near Ser-143 residue: wild-type and mutagenic oligonucleotide (*Pseudomonas putida*), **201**, 1433
HMGI-C phosphoprotein cDNA (human), **201**, 63
human papillomavirus short amplicons, **204**, 820
2α-hydroxysteroid dehydrogenase cDNA (rat corpus luteum), **201**, 1289
keratinocyte-expressed genes, analysis of 607 randomly isolated cDNA sequences (human), **202**, 976
kexin-like protease PC7 cDNA (rat), **202**, 1452
L-lactate dehydrogenase cDNA (*Caenorhabditis elegans*), **205**, 558
lactoferrin cDNA (goat), **203**, 1324
lacY cDNA (*Citrobacter freundii*), **203**, 1882
leucine zipper putative protein kinase cDNA (human brain), **202**, 613; *erratum*, **205**, 1494
LIM-containing cysteine-rich heart protein cDNA (human), **205**, 497
lysosome-associated membrane protein-2 cDNA (human), **205**, 1
α_2-macroglobulin gene promoter (human), **202**, 65
major histocompatibility complex class II *DRA* gene cDNA (bovine), **204**, 195
MAP kinase-activated protein kinase 2 cDNA (human), **200**, 1118
mast cell protease 1 cDNA (rat), **199**, 593
MC5 melanocortin receptor cDNA (rat), **200**, 1007
metabotropic glutamate receptor subtype 5 isoform cDNA (human), **199**, 1136
metallothionein cDNAs (goldfish, tilapia), **205**, 368
5-methyltryptophan resistance sequence from tryptophan-hyperproducing strain of *Corynebacterium glutamicum*, **201**, 1255
mitochondrial fatty acid β-oxidation trifunctional protein subunit cDNAs (human), **199**, 818
monocyte chemoattractant protein-1
  cDNA (porcine luteal cells), **199**, 962
  gene (bovine), **202**, 1272
murine cytomegalovirus U_L80 open reading frame, **203**, 472
natural resistance-associated macrophage protein gene cDNA (human), **204**, 1074
neuraminidase-encoding gene *nanH* (*Bacteroides fragilis* YCH46), **203**, 914
neuronatin (neonatal rat brain), **201**, 1227
neutrophil-activating peptide ENA-78 genomic DNA (human), **205**, 612
neutrophil gelatinase-associated lipocalin cDNA (human), **202**, 1468
nitric-oxide synthase, inducible, 5′-flanking region cDNA (human), **200**, 802
nuclear antigen cDNA with DEAD-box RNA helicase motif (human), **199**, 748
nuclear receptor Rev-ErbAβ cDNA (rat), **204**, 49
κ-opioid receptor and homolog genes (mouse), **205**, 1353
ORF A and B (*Clostridium botulinum*), **205**, 1291
OTK-4 cDNA (human), **200**, 836
PACE-4 cDNA (human), **200**, 943; *erratum*, **204**, 1381
parathyroid hormone/parathyroid hormone-related peptide receptor genes (human, mouse, rat), **200**, 1290; *erratum*, **201**, 1058
peptidylglycine α-amidating monooxygenase cDNA (human pancreas), **205**, 282
peroxisomal acyl-CoA oxidase cDNA (human), **198**, 1113
phenylethylamine oxidase gene (*Arthrobacter globiformis*), **199**, 1096
phosphofructokinase platelet-type isozyme from pancreatic islet cDNA (human), **198**, 990
phospholipase A_2 cDNA (cobra), **199**, 969
phospholipase C-α cDNA (bovine), **204**, 375
pigment-dispersing hormone precursors cDNAs (blue crab), **205**, 410
PINCH open reading frame (human fetal liver), **201**, 1124
progesterone receptor gene 5′ region (mouse), **205**, 1093
prostacyclin synthase cDNA
  bovine, **203**, 59
  human, **200**, 1728
prostaglandin E_2 receptor cDNA (rat), **200**, 1329

prostaglandin H synthase-2 gene promoter region (human), **203**, 190
prostate-specific acid phosphatase gene (human, rat), **202**, 49
prostate transglutaminase cDNA (human), **203**, 1117
protein kinase with leucine zipper-like sequences and catalytic domain homologous to protein kinase C (human hippocampus), **199**, 897
protein-tyrosine phosphatase with homology to band 4.1 (murine thymus), **203**, 479
pyruvate carboxylase cDNA (human), **202**, 1009
RAC protein kinase α and β cDNAs (rat), **205**, 817
ribosomal proteins
  L13 cDNA (rat), **201**, 102
  L15 cDNA (rat), **201**, 108
  S11 cDNA (*Xenopus laevis*), **203**, 768
  S15a cDNA (rat), **200**, 1498
  S23 cDNA (rat), **202**, 314
ROR/RZR orphan receptor RORγ cDNA (human), **205**, 1976
secA gene (*Synechococcus* PCC7942), **200**, 844
secretin cDNA (mouse), **200**, 1066
S1 elongation factor-1α cDNAs from brain (human, mouse), **203**, 1371
small GTP-binding protein H-YPT3 and H-ray cDNA (human), **205**, 1875
somatostatin receptor 5 5′-flanking region (human), **205**, 1883
sperm peptide antigen cDNA for antigen recognized by monoclonal autoantibody 4A11 from vasectomized mouse, **205**, 1503
Spot35/calbindin-D28k gene promoter (mouse), **204**, 889
superfast myosin light chain 2 cDNA (cat), **200**, 1277
testicular follitropin receptor cDNA (horse), **201**, 201
thermolabile phenol sulfotransferase cDNA (human liver), **198**, 1119
thromboxane synthase gene promoter (human), **201**, 379
transcription factor-1 gene (rat), **204**, 1358
transforming growth factor-β receptor type I cDNA
  ESK2 (mouse), **198**, 1054
  mTFR40 (mouse), **198**, 1063
transforming growth factor-β receptor type II promoter (human), **203**, 1020
α-tropomyosin cardiac isoform cDNA (*Ambystoma mexicanum*), **203**, 319
tropomyosin-related cDNA encoding transmembrane protein with highly basic C-terminal region (*Saccharomyces cerevisiae*), **199**, 1363
upstream binding factor gene (mouse), **205**, 1217
vascular-type vasopressin receptor cDNA (human), **203**, 72
vasoactive intestinal peptide receptor-related protein cDNA (human), **200**, 769
venom protease cDNA for enzyme with β-fibrinogenase activity (Taiwan habu), **205**, 1707
vgb gene promoter (*Vitreoscilla*), **202**, 535
zinc finger protein cDNA
  Br140 (human), **198**, 1143
  FIII/YY1 (*Xenopus laevis*), **205**, 1236
Nucleus
  annexin XI development-related and cell-type specific immunolocalization (rat), **202**, 403
  caudate, *see* Caudate nucleus
  cyclin/cdk2 complexes, localization (HeLa cells), **203**, 1527
  epidermoid carcinoma cells, selective transport of μ-calpain (human), **204**, 544
  liver cells
    casein kinase 2 and protein substrate release after DNase and RNase digestion (rat), **202**, 984
    halothane-exposed rats, hsp72 translocation, **199**, 647
  oocytes, calcium requirements for meiosis reinitiation (*Asterina pectinifera*), **203**, 674
  osteoblast-like cells, localization of tumor necrosis factor α (human), **201**, 1445
  p185^{neu} tyrosine kinase localization, and association with transcriptional transactivation (rat), **203**, 1589
  rhabdomyosarcoma cells, mutant p53 accumulation, role in TPA-induced rhabdomyosarcoma cell differentiation (human), **202**, 17

O

Ochnaflavone
  naturally occurring biflavonoid, inactivation of phospholipase A_2 (rat platelets), **205**, 843
Octamer motif
  IgH gene, single-stranded DNA-binding proteins recognizing, identification (mouse), **200**, 1307
Octaprenyl diphosphate synthase
  ispB gene encoding, identification (*Escherichia coli*), **202**, 340
Octreotide
  effects on tamoxifen-induced suppression of insulin-like growth factor I gene expression and serum levels (rat), **203**, 253
Ocular myopathy
  association between deletion and homoplasmic point mutation in mitochondrial DNA (human), **202**, 1606
Okadaic acid
  CHO cells resistant to, expression of multidrug-resistant phenotype, **203**, 1210

  enhancement of α*Amy3* gene expression in cultured rice cells, **205**, 807
  inhibition of carboxyl methylation of protein phosphatase 2A from *Xenopus laevis* eggs, **198**, 372
  interference with amylase secretion in pancreatic acinar signal transduction (rat), **201**, 1470
  and microcystin-LR, inhibition of methylation of protein phosphatase 2A by specific methyltransferase (bovine), **202**, 1023
  modulation of phospholipase D activation in formyl peptide- and mastoparan-stimulated human neutrophils, **205**, 1481
Okazaki fragments
  equal amounts of leading- and lagging-strand sequences, **198**, 844
Oleate
  effect on phospho*enol*pyruvate carboxykinase (GTP) gene expression in adipocytes and hepatoma cells, **203**, 385
Oleic acid
  activation of 120-kDa protein kinase PKN with leucine zipper-like sequence (COS-7 cells), **204**, 348
  microsomal hydroxylation, naphthalic acid anhydride- and phenobarbitol-induced, role of cytochrome P450 (*Triticum aestivum*), **198**, 795
Oligodendrocytes
  immortalized, mRNA levels, effect of myelin basic protein gene 3′-untranslated region (mouse), **204**, 1352
  precusors, transformed, soluble lectin L-14 gene expression, suppression by retinoic acid (rat), **199**, 540
Oligonucleotides
  antisense
    anti-β2 subunit, modulation of surface expression of α1 subunit of N-type ω-conotoxin-sensitive Ca^{2+} channels in neuroblastoma cells (human), **201**, 180
    cdc2 and cdk2, suppression of neointimal smooth muscle cell accumulation in carotid artery *in vivo* (rat), **198**, 16
    hydrophobized, inhibition of herpes simplex virus-1 reproduction in Vero cells, **203**, 959
  high-molecular-weight multimers, synthesis, PCR-based technique, **205**, 475
  leucine-zipper putative protein kinase, cloning (human brain), **202**, 613; *erratum*, **205**, 1494
  5-Me-dC-(N^4-spermine)-incorporating, triplex formation at physiological pH, **205**, 1665
  phosphodiester, antisense, uptake and degradation in cultured cells and human serum, effect of cationic lipids, **197**, 818; *erratum*, **200**, 1769
  phosphofructokinase, muscle type, variation with abnormal RNA splicing (human), **202**, 444
Oligoriboguanylic acids
  short, terminally phosphorylated, inhibition of HIV cytopathicity, **203**, 1244
Oligosaccharides
  complex, transfer to *N*-acetylglucosamine moieties of peptides, associated transglycosylation activity of endo-β-*N*-acetylglucosaminidase (*Mucor hiemalis*), **203**, 244
Oligospermia
  lipophilic domains of sperm membrane in, identification of abnormal physical architecture (human), **198**, 266
Onconase
  inhibition of cell-free and cellular protein synthesis, mechanism (rabbit reticulocytes, *Xenopus* oocytes), **204**, 156
Oncostatin M
  stimulation of cell-mediated low-density lipoprotein oxidative modification (human, mouse), **205**, 60
Ontogeny
  dopachrome isomerase isozyme patterns in *Manduca sexta*, **200**, 1072
Oocytes, *see also* Eggs
  export of recombinant polypeptides translated from pUMA vector-derived cDNAs translocated through microsomal membranes (*Xenopus laevis*), **204**, 1346
  facilitated translocation by nuclear pore complex, engagement by nuclear localization signal, subsequent intranuclear binding (*Xenopus laevis*), **205**, 529
  identification of Fas antigen associated with apoptosis (mouse), **203**, 1438
  I_{sK} potassium channels, inhibitory effects of class III antiarrhythmics NE-10044 and NE-10133 (*Xenopus laevis*), **202**, 265
  localization of activin and follistatin proteins (*Xenopus laevis*), **202**, 484
  meiosis
    intracellular pH increase during, effect of forskolin and methylxanthines (*Xenopus laevis*), **205**, 979
    reinitiation, nuclear Ca^{2+} requirements (*Asterina pectinifera*), **203**, 674
  oscillatory current responses, generation, role of protein synthesis (*Xenopus laevis*), **204**, 505
  protein N-glycosylation and secretion, inhibition by antisense RNA to N-glycosylation gene, ALG7 (*Xenopus laevis*), **198**, 1248
  protein synthesis, inhibition by onconase, mechanism (*Xenopus laevis*), **204**, 156
  stage I, mitochondrial RNA processing enzyme gene transcription, role of novel *cis*-element (*Rana brevipoda*, *Xenopus laevis*), **202**, 225
  storage, effect on kinetics of insulin-induced germinal vesi-

- cle breakdown in oocytes (*Xenopus laevis*), **202**, 803
- unfertilized, and adult tissues, expression of bFGF sense and antisense RNA transcripts (human), **205**, 577

Open reading frames
- multiple mRNAs containing, generation with fibroblast growth factor receptor 1 gene by alternative splicing (mouse), **205**, 1057
- PINCH, nucleotide sequence (human fetal liver), **201**, 1124
- pRT-9 cDNA, high homology to yeast $P450_{14DM}$ (rat liver), **201**, 1320

Ophthalmoplegia
- chronic progressive external, association with mitochondrial $tRNA^{Asn}$ gene mutation (human), **204**, 482

Opioid receptors
- δ, expression in lymphocytes (human, rhesus monkey), **202**, 1291
- κ
  - and homolog MOR-C, gene structure and chromosomal mapping (mouse), **205**, 1353
  - placental cDNA, isolation and characterization (human), **202**, 1431
- μ, δ, and κ, mRNA, distinct distributions in brain (rat), **205**, 1438
- N-terminally protected penta- and tetrapeptides based on pentapeptide sequence in cobra venom as antagonists, evaluation, **202**, 1285

Opioids
- selective dipeptides, synthesis, **198**, 933

Organ of Corti
- Deiters cells, mechanical responses in phalangeal process, induction by photo-released intracellular calcium (guinea pig), **201**, 1263

Ornithine decarboxylase
- antizyme, functional regions, characterization (rat), **200**, 1721
- epidermal activity, 12-O-tetradecanoylphorbol-13-acetate-induced modulation by calcium and verapamil (mouse), **199**, 582

Orphan receptors
- G protein-linked, GPRN1/RDC1, characterization (human), **201**, 458
- nuclear
  - binding by retinoic acid response elements in keratinocytes, **203**, 545
  - superfamily member closely related to Rev-ErbA, identification (rat), **204**, 49

Osmolarity, *see also* Hyperosmolarity
- in extracellular solution, changes, effects on electrical activity of pancreatic B cells (mouse), **204**, 641

Osmotic shock
- effects on release of bound and free calcium from Ca-loaded liposomes, **204**, 142

Osteoblasts
- MC3T3-E1
  - alkaline phosphatase, induction by bone morphogenetic protein-2 (*Xenopus laevis*), **198**, 1267
  - chemoattractant cytokine gene expression, effects of proinflammatory stimuli (mouse), **198**, 590
  - differentiation, stimulation by nerve growth factor (mouse), **205**, 1187
  - insulin-like growth factor 1, c-fos, type 1 collagen, and osteocalcin mRNA expression, stimulation by calcitonin (mouse), **199**, 876
  - nerve growth factor family neurotrophin expression (mouse), **198**, 891
  - *trk*C expression, and response to neurotrophin-3 (mouse), **203**, 1268
- MG-63, responses to TGF-β_1, modulation by 1,25-dihydroxyvitamin D_3 (human), **204**, 918
- prostaglandin-endoperoxide synthase-1 and -2 expression (human), **198**, 955
- related cell line HOS TE85, nuclear localization of tumor necrosis factor α (human), **201**, 1445

Osteocalcin
- insulin-like growth factor 1, expression by osteoblasts, stimulation by calcitonin (mouse), **199**, 876

Osteoclastic acid
- secretion, regulation by cGMP-dependent protein kinase (chicken), **204**, 565

Osteoclasts
- activity, direct inhibition by ipriflavone (rat), **199**, 930
- bone resorption
  - effects of extracellular calcium (bovine, rat), **202**, 456
  - role of c-src (mouse), **199**, 1237
- Ca^{2+} receptors, modulation by extracellular protons (rat), **199**, 742
- differentiation, stimulation by persistent c-*fos* expression (chicken), **205**, 1547
- plasma membrane 17β-estradiol-binding sites, identification (chicken), **200**, 899; *erratum*, **202**, 643
- precursor cell line, ipriflavone binding and effects (human), **201**, 1084
- secretion of osteoclastic acid, regulation by cGMP-dependent protein kinase (chicken), **204**, 565

Osteocytes
- cytosolic calcium, elevation by divalent cations (chicken), **204**, 519

Osteogenic protein-1
- binding sites in cultured bone cells (human), **201**, 1140;

  erratum, **202**, 1196
  localization during embryonic development and basement membrane binding affinity (human), **198**, 693
Osteopontin
  phosphorylation motifs, identification (bovine), **198**, 200
Ovalbumin
  challenged lungs, increased expression of eotaxin mRNA (guinea pig), **205**, 788
Ovary
  apoptosis-associated Fas antigen, detection (mouse), **203**, 1438
  34-kDa glutathione-binding protein, detection in mature rat, **201**, 149
  uteroglobin gene promoter-binding factor, detection (rabbit), **204**, 273
Oviduct
  endothelin-1-induced contraction, modulation by endogenous nitric oxide (bovine), **201**, 143
Oxalate
  initiation of DNA synthesis in LLC-PK1 cells (porcine kidney), **205**, 1632
Oxidases
  o-type, different, identification in membranes of methanol-grown *Methylobacillus flagellatum* KT, **204**, 428
Oxidation
  fatty acid, flavin-supported, by heme domain of cytochrome $P450_{BM-3}$ (*Bacillus megaterium*), **203**, 1745
  lactate, role in energy production in mitochondria-like particles (*Setaria digitata*), **204**, 17
  low-density lipoproteins
    antioxidant activity of calcium antagonists *in vitro* against, comparison with α-tocopherol (human), **203**, 1803
    by macrophages, role of NADPH oxidase (human), **202**, 1300
  metal-catalyzed systems, inhibition by yeast protector protein in presence of thioredoxin (*Saccharomyces cerevisiae*), **201**, 8
  myoglobin, induction by Adriamycin, **204**, 30
  pyridine nucleotides, and ADP and ATP depletion, during Ca^{2+}- and inorganic phosphate-induced mitochondrial permeability transition (rat liver), **200**, 1615
β-Oxidation
  mitochondrial fatty acids, associated trifunctional protein, subunit cDNAs, structural analysis (human), **199**, 818
  very-long-chain fatty acids in hepatoma cells, peroxisomal acyl-CoA oxidase as rate-limiting enzyme (rat), **201**, 1541
β-Oxidation complex
  trifunctional, *see* Trifunctional β-oxidation complex
Oxidative modification
  low-density lipoprotein, cell-mediated, stimulation by oncostatin M (human, mouse), **205**, 60
Oxidative phosphorylation
  hepatic, coupling efficiency, temperature dependence, role of adenine nucleotide translocator (rat), **202**, 816
Oxidative stress
  accumulation during cellular aging of human diploid fibroblasts, **203**, 1063
  DNA base modification in epidermal cells after near-ultraviolet light exposure: 8-hydroxy-2-deoxyguanosine (hairless mouse), **201**, 1132
  effects on plasma and lipoprotein lipid peroxidation in Apo E-deficiency (mouse), **201**, 1567
  induction of NF-κB DNA binding and inducible nitric-oxide synthase mRNA in epithelial cells (human), **199**, 1518
  in pheochromocytoma PC12 cells, effects of human brain clusterin (rat), **204**, 1131
  transformation of acetylcholinesterase to molten globule state (*Torpedo californica*), **198**, 915
Oxido-reduction potential
  high, rusticyanin with, active site geometry (*Thiobacillus ferrooxidans*), **203**, 1655
Oxophenylarsine
  activation of phospholipase D in basophilic leukemia cells (rat), **199**, 792
3-Oxo-1,2,5-thiadiazolidine 1,1-dioxides
  mechanism-based inhibition of leukocyte elastase and cathepsin G (human), **198**, 341
Oxygen
  high and low levels, effects on endothelin-1 production and responsiveness to ET-1 in cultured cardiac myocytes (rat), **202**, 1612
  singlet
    detection under *in vivo* conditions, considerations, **202**, 10
    role in photodegradation of lindane and DDT, **199**, 1284
  and sulfhydryl-reactive agent, in regulation of ferritin synthesis in macrophages (mouse), **201**, 38
  vgb gene promoter, regulatory role, evidence for positive regulation by transcriptional activator FNR (*Vitreoscilla*), **202**, 535
Oxygen radicals
  role in NO production in sodium azide- and hydroxylamine-stimulated neutrophils (human), **199**, 1245
Oxygen tension
  low, mitochondria under conditions of, potent and reversible deenergization by nitric oxide (rat), **204**, 169
Oxytocin
  interaction with oxytocin receptor, modeling, **202**, 1569

- stimulated smooth muscle contractions in myometrial tissue, inhibition by neomycin (rat), **205**, 245
- –vasopressin superfamily, identification of annetocin as member (*Eisenia foetida*), **198**, 393

Oxytocin receptors
- selectivity, modeling, **202**, 1569

Ozonation
- products, effects on phospholipase A_2 hydrolytic activity: bis(1-hydroxyheptyl)peroxide as precursor of 1-hydroxy-1-hydroperoxyheptane, **203**, 80

P

Palmitic acid
- activation of 120-kDa protein kinase PKN with leucine zipper-like sequence (COS-7 cells), **204**, 348
- as substrate for soluble fatty acid of α-hydroxylase (*Sphingomonas paucimobilus*), **201**, 1554

Pancreas
- cholecystokinin-A receptor gene expression in diabetic rat, **199**, 482
- endocrine
  - derived clonal glucagon-secreting cells, INR1 G9, spontaneous calcium oscillations in (hamster), **205**, 435
  - hormonal regulation of prion-related protein gene expression (rat), **201**, 1220
- islets, *see* Islets of Langerhans
- isolated ducts, goblet cell degranulation in, role of intracellular mediators (guinea pig), **205**, 423
- isolation and functional expression of peptidylglycine α-amidating monooxygenase (human), **205**, 282

Pancreatic acinar cells
- AR-42J, PAP mRNA expression, induction by acute pancreatitis-derived serum *in vitro* (rat), **204**, 238
- inositol 1,4,5-trisphosphate production, stimulation by synthetic *Rab*3A effector domain peptide (rat), **203**, 756

Pancreatic acini
- Ca^{2+} oscillations and pancreatic amylase secretion, elicitation by phospholipase A_2-activating protein via mediation by Gβ/phospholipase A_2/arachidonic acid cascades (rat), **203**, 1716

Pancreatic ribonuclease
- digestion of liver cell nuclei, resulting release of casein kinase 2 and protein substrates (rat), **202**, 984
- fatty acid acylation with reversed micelle as microreactor (bovine), **196**, 447; *erratum*, **198**, 410

Pancreatitis
- acute, derived serum, induction of PAP mRNA expression in pancreatic acinar AR-42J cells *in vitro* (rat), **204**, 238

Papillomavirus
- short sequences, analysis (human), **204**, 820

Parafusin
- phosphoglucomutase activity distinct from, identification (*Paramecium tetraurelia*), **200**, 1353

Paramecium tetraurelia
- phosphoglucomutase distinct from parafusin in, identification, **200**, 1353

Paraneoplastic neurologic syndrome
- and small cell lung carcinoma, associated hippocampal autoantigen, isolation (human), **199**, 1200

Paraproteins
- monoclonal IgG, susceptibility to plasmic cleavage by glycerin-stabilized plasmin (human serum), **202**, 367

Parathyroid cells
- PT-r, cyclin D1 expression, modulation by calcium (rat), **204**, 691

Parathyroid hormone
- and 1,25-dihydroxyvitamin D_3, synergistic induction of 1,25-dihydroxyvitamin D-24-hydroxylase in UMR-106 cells (rat), **205**, 674
- expressed in cultured astrocytes, identification and characterization (rat), **200**, 1042
- hPTH(1–34), production via recombinant DNA technique (human), **200**, 1735

Parathyroid hormone receptors
- –parathyroid hormone-related peptide receptor, gene isolation and characterization (human, mouse, rat), **200**, 1290; *erratum*, **201**, 1058

Parathyroid hormone-related peptide
- overexpression by athersclerotic coronary smooth muscle cells (human), **200**, 1028
- regulating sodium-dependent phosphate transport in UMR-106 cells, stimulation by protein kinase C (rat), **199**, 1216

Parathyroid hormone-related peptide receptors
- expressed in cultured astrocytes, identification and characterization (rat), **200**, 1042
- –parathyroid hormone receptor, gene isolation and characterization (human, mouse, rat), **200**, 1290; *erratum*, **201**, 1058

Parathyroid hormone-related protein
- production by cultured endothelial cells, role in angiogenesis (human), **198**, 740
- proliferative effect on hypercalcemic Walker 256 carcinoma (rat), **198**, 1281
- in vascular endothelial cells, immunocytochemical detection (bovine), **199**, 547

Parietal cells
- gastric, localization of histamine H_2 receptor mRNA (rat), **198**, 1195

- stimulus–secretion coupling, extracellular magnesium effect (rat), **204**, 512

Particles
- mitochondria-like, energy production in, role of lactate oxidation (*Setaria digitata*), **204**, 17
- submitochondrial, protection from lipid peroxidation by aminoethylcysteine ketimine at concentration not inhibitory of electron transport (bovine heart), **205**, 264
- zymosan, opsinized, induced cytosolic Ca^{2+} responses in neutrophils, role of protein kinase C (human), **203**, 998

Patch clamp studies
- acetylcholine-induced ionic currents in isolated acinar cells of nasal gland (guinea pig), **202**, 307
- run-down of calcium current during, relationship to intracellular sodium (guinea pig), **199**, 720

PCNA, *see* Proliferating cell nuclear antigen

P-component, *see* Amyloid, serum

PCR, *see* Polymerase chain reaction

PD 123319
- resistant cell proliferation, angiotensin II receptor coupled to, expression by cardiac fibroblasts (human), **204**, 1334

PDGF, *see* Platelet-derived growth factor

Pentapeptides
- N-terminally protected, based on pentapeptide sequence in cobra venom, evaluation as opioid antagonist, **202**, 1285

Pepsinogen
- gene expression in gastric mucosal cells, and cell differentiation and proliferation, effects of adrenalectomy and hydrocortisone replacement (rat), **202**, 1

Peptide bonds
- Ala^{81}-Ala^{82} bond, synaptobrevin 2, proteolysis by botulinum neurotoxin type G (rat), **200**, 829

Peptides, *see also specific types*
- 7- and 17-kDa, noncovalent complex, localization of estradiol receptor ligand binding site (pig), **199**, 826
- acetylation, effect on interaction with antipeptide antibody, **205**, 1688
- *N*-acetylglucosamine moieties, transfer of complex oligosaccharides to, associated transglycosylation activity of endo-β-*N*-acetylglucosaminidase (*Mucor hiemalis*), **203**, 244
- with affinity for single-stranded DNA, selection with phage display library, **204**, 849
- amphiphilic, stimulation of inositol 1,4,5-trisphosphate production in plant cells (carrot), **205**, 739
- amyloid, *see* Amyloid
- antimicrobial, isolation from Korean frog skin, **205**, 948
- atrial natriuretic, *see* Atrial natriuretic peptide
- based on N-terminal domain of tissue inhibitor of metalloproteinases-1, inhibition of human stromelysin, **205**, 1156
- calcitonin gene-related, effect on cyclic AMP accumulation (human), **205**, 1226
- CGP 42112, specific non-angiotensin binding sites, localization in splenic macrophages (rat), **200**, 1049
- corresponding to region adjacent to His-94 in small subunit of cytochrome b_{558}, inhibition of superoxide generation in cell-free system derived from neutrophils (human), **204**, 924
- cyclic, in inhibition of phosphatidylinositol 3-kinase p85 SH2 domain binding, **201**, 1148
- designer β sheet-forming, and amylin, β-structure in, CD and NMR spectroscopic comparisons (human), **204**, 1088
- farnesylated, proteolytic processing: assay and partial purification of brain membrane endopeptidase characteristic of thimet oligopeptidase (swine), **198**, 787
- fusion, influenza virus, disruption of bilayers, relationship to viral infectivity, **202**, 1420
- H5, with primary structure of presumed voltage-dependent K channel pore-forming region, synthesis and ion channel activity, **198**, 445; *erratum*, **200**, 670
- hemorphin-related endogenous hemoglobin fragments, isolation (bovine brain), **202**, 410
- hexamer, containing phosphotyrosyl mimetic F_2Pmp, inhibition of insulin receptor dephosphorylation (human), **204**, 129
- hypotensive, adrenomedullin, effect as *in vivo* bronchodilator (guinea pig), **205**, 251
- interaction with oxytocin receptor, modeling, **202**, 1569
- interferon-γ C-terminal
  - binding to cytoplasmic domain of IFN-γ receptor and role in function (mouse), **201**, 215
  - human and murine recombinant, effect on antiviral response of murine $P388D_1$ cells, **203**, 1645
- melanotropin α-MSH, MTI, and MTII, binding to cloned human peripheral melanocortin receptor hMC1R and effect on second messenger cAMP, **204**, 1137
- multiple antigen, MAP, photoreactive derivative Leu_7-MAP, leucine-specific binding to high-molecular-weight plasma membrane protein (rat hepatocytes), **203**, 200
- Nef, HIV-1, HLA class II antigen binding activity, **200**, 1059
- neutrophil-activating, ENA-78, genomic DNA, characterization (human), **205**, 612
- NPXY sequences, role in $\alpha_5\beta_1$ integrin internalization (human), **199**, 603
- parathyroid hormone-related, *see* Parathyroid hormone-related peptide

- prolylendopeptidase-inhibiting, isolation from brain (bovine), **202**, 809
- Ps4, thyrotropin-releasing hormone-potentiating, and receptors, distribution in brain and peripheral tissues (rat), **200**, 958
- RGDS and tetrafibricin, effects on glycoprotein IIb/IIIa and vitronectin receptor, comparison (human), **204**, 325
- SAMS, in assay of 5′-AMP-activated protein kinase in human liver, **200**, 1551
- serum amyloid P component residues 160–204, binding to SAP in presence of calcium (human), **205**, 1172
- short immunomodulating, activation of T helper 1 cells and induction of DNase expression in CD4$^+$ T cells (human), **205**, 2008
- substrates for specific monitoring of casein kinases 1 and 2, design and synthesis, **198**, 898
- synthetic
  - calcitonin gene-related peptide constrained analogues, synthesis and testing, **202**, 497
  - corresponding to C-terminal portion of neuron-specific and non-neuronal enolase, effects on survival of cultured neocortical neurons (rat), **202**, 25
  - inhibition of cytochrome b_5 binding to cytochrome P450 2B1, role of Lys-122 and Arg-125 residues (rat liver microsomes), **201**, 1090
  - myotonin-protein kinase, antibodies, in identification of MT-PK levels in brain and muscle tissues in myotonic dystrophy (human), **202**, 577
  - *Rab*3A effector domain, stimulation of inositol 1,4,5-trisphosphate production in permeabilized cells (human, mouse, rat), **203**, 756
  - right-handed 16-residue peptide helix, incorporation of helix breaking D-Phe-Pro sequence in center, **202**, 241
  - thrombin receptor-tethered ligand, SFFLRNP, consecutive phenylalanine residues, role in thrombin receptor activation in epithelial-like SH-EP cells, **203**, 366
  - [Tyr^{5,12},Lys^7]-polyphemusin II, attachment of lymphocytes and promonocytes, **202**, 470
- T22, with anti-HIV activity, structure–activity relationships, **205**, 1729
- thrombin receptor-activating, *see* Thrombin receptor-activating peptide
- thrombin receptor N-terminal, inhibition of thrombomodulin in umbilical vein endothelial cells *in vitro* (human), **199**, 1262
- uveitopathogenic, 1169-1191, bovine IRBP, specific binding of human B cell proteins, characterization, **204**, 799
- V3, serotyping, for grouping of HIV-1 infection in subtypes A to E, correlation with sequence analysis, **205**, 1658

Peptidyl-dipeptidase A
- cDNA cloning and enzymatic properties, comparison in stroke-prone spontaneously hypertensive and Wistar-Kyoto rats, **198**, 380
- inhibition
  - by hemorphins isolated from peptic hemoglobin hydrolysate, and inhibition kinetics (bovine), **204**, 216
  - role in augmentation of accelerated endothelin release from mesenteric artery following nephrectomy (rat), **202**, 246
- inhibitor derapril, down-regulation of vascular natriuretic peptide receptor gene expression in hypertensive rat, **205**, 1595
- testis-specific isozyme found in mammals, absence in chicken, **205**, 1916

Peptidylglycine α-amidating monooxygenase
- isolation and functional expression (human pancreas), **205**, 282

Peptidyl hydroxamic acids
- inhibition of collagenase, gelatinase, and stromelysin (human), **199**, 1442

Peptidylpropyl isomerase
- cyclosporin A-sensitive, in *Holobacterium cutirubrum*, identification and purification, **198**, 466

Perchlorate
- inhibition of Na$^+$/I$^-$ symporter in thyroid follicles *in vitro* (pig), **204**, 1265

Perforin
- recombinant, expressed in baculovirus–*Spodoptera frugiperda* cell system, characterization (mouse), **201**, 318

Perfusion
- vascular, hepatic, carbon monoxide as endogenous modulator (rat), **205**, 1333

Permeability
- mitochondrial, Ca^{2+}- and inorganic phosphate-induced transition, associated status of ADP, AMP, ATP, and NAD(P)H (rat liver), **200**, 1615

Peroxidation
- lipids, *see* Lipid peroxidation

Peroxides
- organic, and H$_2$O$_2$, differential mediation of DNA damage, implications for absestos carcinogenesis (calf thymus), **200**, 687

Peroxisomes
- in lung type II cells, detection of non-specific lipid-transfer protein (rat), **205**, 1581
- targeting signal -SKL, binding to PAS10 protein, role of PAS10 tetratricopeptide repeat-domain (*Saccharomyces cerevisiae*), **204**, 1016

Peroxynitrite
  decomposition, electron spin resonance spin trapping analysis: lack of hydroxyl radical production, **203**, 1515
Pertussis toxin
  G protein-mediated, signaling pathway sensitive to, in astrocytes, role in activation of mitogen-activated protein kinases by endothelin-1 (rat), **204**, 1325
  sensitive G protein, role in adenosine-induced chlorine efflux in endothelial cells (bovine), **204**, 1143
PGH$_2$/PGE$_2$ isomerase, *see* Prostaglandin-E synthase
P-glycoprotein
  expression in promonocytic U1 cells chronically infected with HIV-1, induction by *Mycobacterium tuberculosis*, **199**, 1181
  [^{3}H]tamoxifen aziridine as affinity probe for, in multidrug-resistant cells (hamster lung), **202**, 606
  soluble, detection in culture media and extracellular fluid (human), **203**, 506
PH
  dependency of ATPase F$_1\gamma$ tissue-specific subunits (bovine), **200**, 671
  effects on redox potential of high potential sulfur-iron proteins (*R. globiformis, C. vinosum, R. gelatinosus, E. vacuolata, E. halophila*), **203**, 436
  high, methionine replacement of lysine as axial ligand of *Achromobacter cycloclastes* cytochrome c_{554} at, spectroscopic detection, **204**, 120
  intracellular
    increase during meiosis in *Xenopus laevis* oocytes, effect of forskolin and methylxanthines, **205**, 979
    during metabolic inhibition, role of Na$^+$/H$^+$ exchange and Na$^+$/K$^+$ pump (guinea pig myocytes), **203**, 93
  role in serotransferrin conformational change and metal ion release: structure–function relationship, **198**, 646
Phagocytosis
  Fc-mediated, signaling for, role of tyrosine phosphorylation of FcγRII induced by neutrophil binding to immunocomplexes (human), **201**, 30
Phanerochaete chrysosporum
  identification of aromatic nitroreductase in cell-free extracts, **205**, 298
Phase transitions
  lipids in thylakoid membranes, Mg^{2+}-induced, anion effects (spinach), **202**, 1724
PH domains, *see* Pleckstrin homology domains
o-Phenanthroline
  teratological effects (*Xenopus laevis*), **200**, 1398
Phenobarbital
  coadministration with dexamethasone, effects on hepatic P450 system (rat), **203**, 351
  cytochrome P4502A5 inducible by, modulation by cAMP in primary hepatocytes (mouse), **205**, 631
  induced microsomal oleic acid hydroxylation, role of cytochrome P450 (*Triticum aestivum*), **198**, 795
Phenol
  metabolism in *Pseudomonas cepacia* AC1100, identification of *meta*-cleavage pathway, **204**, 983
Phenol sulfotransferase, *see* Aryl sulfotransferase
Phenoxyacetic acid
  metabolism in *Pseudomonas cepacia* AC1100, identification of *meta*-cleavage pathway, **204**, 983
Phentolamine
  and propranolol, effects on epinepherine-induced aggregation and intracellular free calcium concentration in platelets (human), **202**, 1069
Phenylalanine
  and cAMP, differential effects on calcium-dependent calmodulin kinase II, regulation of cholecystokinin secretion (murine intestinal cells), **201**, 1483
  consecutive residues in thrombin receptor-tethered ligand peptides, role in thrombin receptor activation in epithelial-like SH-EP cells, **203**, 366
Phenylalanine hydroxylase
  electrostatic activation resulting from protein kinase A-catalyzed phosphorylation of Ser$_{16}$ residue, analysis (rat), **198**, 174
N-Phenylanthranilic acid
  inhibition of Na$^+$/I$^-$ symporter in thyroid follicles *in vitro* (pig), **204**, 1265
Phenylarsine oxide, *see* Oxophenylarsine
Phenylephrine
  and endothelin-1, stimulated cardiomyocytes, phosphoinositide cycle responses (neonatal rat), **203**, 422
  induced activation of mitogen-activated protein kinase in cardiac muscle cells, role of Ras activity (rat), **205**, 1417
  induced cardiac muscle cell hypertrophy, prevention by genistein via Ras-mitogen protein kinase signaling pathway (rat), **202**, 1586
  induced cytoplasmic Ca^{2+} oscillation in single hepatocytes, inhibition by caffeine (rat), **198**, 728
Phenylethylamine oxidase
  gene cloning and sequencing and identification of Tyr-382 as precursor to covalently bound quinone cofactor (*Arthrobacter globiformis*), **199**, 1096
Phorbol esters, *see also specific phorbol esters*
  HIV-1 Tat synergism with, enhancement of interleukin-2 promoter activity (Jurkat cells), **205**, 467

stimulated phospholipase D activity in multidrug-resistant breast cancer cells, correlation with increased drug resistance (human), **202**, 211

Phorbol myristate acetate
  induced monocytic differentiation of HL-60 cells, hydroxyl radicals as early signal involved in, **200**, 1650

Phorbol 12-myristate 13-acetate
  activation of
    non-actomyosin component of aortic wall contraction (guinea pig), **199**, 944
    protein kinase C, inhibition of C-type natriuretic peptide-stimulated cyclic GMP production in pituitary AtT-20 tumor cells (mouse), **204**, 1318
  inhibition of MH1C1 hepatoma cell growth, role of protein kinase C alpha isoenzyme (rat), **205**, 1589
  processing of cell surface-associated precursor form of heparin-binding EGF-like growth factor (human breast carcinoma cells), **204**, 592

Phosphatase
  activity of calcineurin, FKBP-59/HBI effects *in vitro* (rabbit), **203**, 750

Phosphate
  inorganic, and calcium, induced mitochondrial permeability transition, associated status of ADP, AMP, ATP, and NAD(P)H (rat liver), **200**, 1615
  in proteins and amino acids, study with photoacoustic Fourier-transform infrared spectroscopy, **205**, 618

Phosphate transport
  sodium-dependent, by parathyroid hormone-related peptides in UMR-106 cells, stimulation by protein kinase C (rat), **199**, 1216

Phosphatidylcholine
  immobilized synthesized forms, differential hydrolysis by phospholipases A_2 and C, **205**, 113
  specific phospholipase C, role in production of diacylglycerol for nitric oxide synthesis in macrophages activated by IFN-γ and lipopolysaccharide, **199**, 461
  specific phospholipase D activity, elevation in v-Fps-transformed fibroblasts (rat), **203**, 1195

Phosphatidylinositol
  pathway, in thyroid non-toxic goiter, role of thyrotropin (human), **201**, 1182

Phosphatidylinositol 4,5-bisphosphate
  hydrolysis, role in photoresponse induction in type B photoreceptors (*Hermissenda crassicornis*), **202**, 299

Phosphatidylinositol 3-kinase
  activation, role in insulin-stimulated glucose transport into L6 myotubes, **205**, 570
  p85 SH2 domain binding, cyclic peptide inhibitors, **201**, 1148
  role in insulin receptor signaling: studies with inhibitor LY294002 (human), **204**, 446

Phosphatidylinositol 3-kinase inhibitors
  wortmannin, inhibition of insulin-like effects of growth hormone (rat adipocytes), **203**, 306

Phosphatidylserine
  and Ca^{2+}, β-adducin interaction with Rabphilin-3A in presence of (bovine), **205**, 460
  effect on hepatocyte susceptibility to mouse hepatitis virus type 3: correlation with membrane fluidity, **204**, 1299

3′-Phosphoadenosine-5′-phosphosulfate
  binding to estrone sulfotransferase, P-loop motif GxxGxxK as binding site, evaluation, **204**, 1178

Phosphodiesterase
  cGMP-stimulated, detection in brain (rat), **205**, 1850

Phospho*enol*pyruvate
  cleavage by vanadate, **201**, 155

Phospho*enol*pyruvate carboxykinase
  related flux, and hepatic nitric oxide synthesis and gluconeogenesis, reciprocal changes, induction by endotoxin (rat), **204**, 659

Phospho*enol*pyruvate carboxykinase (GTP)
  gene expression in 3T3-F442A adipocytes and FAO hepatoma cells, effects of fatty acids, **203**, 385

Phosphofructokinase
  cross-bridging of microtubules, ligand modulation, **204**, 585

Phosphofructo-1-kinase
  highly conserved residues near active site, site-directed mutagenesis (*Escherichia coli*), **199**, 577

6-Phosphofructokinase
  platelet-type, protein-coding sequence, cloning from pancreatic islet cDNA (human), **198**, 990

6-Phosphofructo-2-kinase
  –fructose 2,6-bisphosphate 2-phosphatase, L-type and M-type, cDNA, cloning and expression in skeletal muscle (frog), **198**, 1099; *erratum*, **200**, 1769

Phosphofructokinase deficiency
  muscle type, variant in Japanese case with abnormal RNA splicing (human), **202**, 444

Phosphoglucomutase
  distinct from parafusin, identification (*Paramecium tetraurelia*), **200**, 1353

Phosphoglycerate mutase
  cofactor-independent, gene isolation and characterization (maize), **203**, 1204

Phosphoinositide cycle
  α_1-adrenergic agonist- and endothelin-1-evoked responses in cultured cardiomyocytes (neonatal rat), **203**, 422

Phosphoinositide 3-kinase
- serum-induced activation in CHRF-288 cells, inhibition by wortmannin, **202**, 1619

Phosphoinositides
- catabolism, activation in vascular smooth muscle cells by low-density lipoprotein and positively charged proteins: role of polycationic nature of apolipoprotein B (human), **203**, 1700
- hydrolysis, activation by Fc receptors, role of tyrosine phosphorylation of phospholipase C-γ2 (human neutrophils), **201**, 1100
- metabolism, alteration by attenuation of cAMP, role of H-*ras* oncogene (mouse), **205**, 1121
- signaling, role of thyrotropin receptor residues 684-692 in intracellular region adjacent to plasma membrane, **199**, 1497

Phospholamban
- induced inhibition of cardiac sarcoplasmic reticulum Ca^{2+}-ATPase, reversal by tannin (rabbit), **202**, 1668

Phospholipase A$_2$
- activating protein, activation of Ca^{2+} oscillations and pancreatic amylase secretion in pancreatic acini, mediation by Gβ/phospholipase A$_2$/arachidonic acid cascades (rat), **203**, 1716
- cytosolic
  - activation in CHO cells carrying somatostatin receptor: wortmannin-sensitive pathway activating mitogen-activated protein kinase, **205**, 18
  - encoding gene
    - induction by interleukin-1β in C6 glioma cells (rat), **205**, 12
    - isolation of 5′-flanking region (human), **205**, 6
  - stimulation by endothelin-1 in CHO cells stably expressing human ET$_A$ or ET$_B$ receptor subtypes, **199**, 992
- effects of sialic acid and sialoglycoconjugates (bovine brain), **199**, 1158
- group I, pro-form, conversion to receptor binding and active forms by plasmin, **198**, 10
- group II, induction by interleukin-6 in invasive gastric cancer cells (human), **198**, 878
- hydrolytic activty, effects of bis(1-hydroxyheptyl)peroxide hydrolysis products, **203**, 80
- inactivation by ochnaflavone (rat platelets), **205**, 843
- inhibiting protein from cobra plasma, isolation and characterization (*Naja naja kaouthia*), **200**, 784
- and phospholipase C, differential hydrolysis of immobilized phosphatidylcholines, **205**, 113
- role in arachidonic acid release from intact cells (mouse), **198**, 220
- sequence analysis and expression (cobra), **199**, 969

Phospholipase A$_2$ inhibitor
- plasma, 25-kDa and 31-kDa subunits, structural similarities to urokinase-type plasminogen activator receptor and Ly-6-related proteins (cobra), **204**, 1212

Phospholipase C
- activation
  - by extracellular ATP in glomerular mesangial cells, role in cell growth (rat), **202**, 234
  - by G$_i$, in calcium signaling mediated by murine prostaglandin E receptor EP$_3$ subtype in cDNA-transfected CHO cells, **204**, 303
- and adenylyl cyclase, coupling to somatostatin receptor subtype SSTR1, demonstration (human), **204**, 176
- α isoform, cDNA, molecular cloning and characterization: redesignation proposal (bovine), **204**, 375
- δ1 isoform, D-*myo*-inositol 1,4,5-trisphosphate-binding domain, localization, **205**, 1563
- γ2 isoform, tyrosine phosphorylation, role in Fc receptor activation of phosphoinositide hydrolysis (human neutrophils), **201**, 1100
- in peritoneal macrophages, Ca^{2+}-dependent activation by γ-hexachlorocyclohexane (murine), **199**, 699
- phosphatidylcholine-specific, role in diacylglycerol production for nitric oxide synthesis in macrophages activated by IFN-γ and lipopolysaccharide (mouse), **199**, 461
- and phospholipase A$_2$, differential hydrolysis of immobilized phosphatidylcholines, **205**, 113
- stimulation by human somatostatin receptor type 2 after transfection in COS-7 cells (monkey), **200**, 986
- in vascular smooth muscle cells, effect of erythropoietin (rat), **199**, 977

Phospholipase D
- activation
  - in formyl peptide- and mastoparan-stimulated neutrophils, modulation by okadaic acid (human), **205**, 1481
  - by phenylarsine oxide in basophilic leukemia cells (rat), **199**, 792
- increased activity in multidrug-resistant breast cancer cells (human), **202**, 211
- in peritoneal macrophages, Ca^{2+}-dependent activation by γ-hexachlorocyclohexane (murine), **199**, 699
- phosphatidylcholine-specific activity, elevation in v-Fps-transformed fibroblasts (rat), **203**, 1195

Phospholipidic probe
- photoactivatable, in identification of transmembrane domains of erythrocyte calcium pump (human), **201**, 194

Phospholipids
- analogs, incorporation into plasma membrane, effects on

    - ATP-induced vesiculation of erythrocyte ghosts (human), **199**, 881
  - in cardiomyocyte membranes, α-1-adrenoceptor-mediated degradation *in vitro*, dynamics (rat), **198**, 366
  - monolayer containing modified staphylococcal protein A, characterization on both solution and slide surfaces, **200**, 1463
  - plasmalogen, effect on lipid peroxidation of low-density lipoproteins (human), **204**, 1235
  - vesicles, lipid bilayers, traversal by SecA protein (*Escherichia coli*), **203**, 326

- Phosphonodifluoromethyl phenylalanine
  - hexamer peptide containing, inhibition of insulin receptor dephosphorylation (human), **204**, 129
- Phosphoprotein phosphatase
  - carboxyl methylation in eggs, stimulation by cAMP and inhibition by okadaic acid (*Xenopus laevis*), **198**, 372
  - differential effects on intracellular signals initiated by v-Src and mediated by HaRas, **205**, 1043
  - inhibitors, enhancement of α*Amy3* gene expression in cultured rice cells, **205**, 807
  - regulation of L-type calcium channels expressed in skeletal muscle, role of channel α_1-subunit (rabbit), **198**, 166
  - type 2A
    - C-terminal methyl esterification, reversal, brain enzymatic activity catalyzing (bovine), **203**, 1710
    - methylation by specific methyltransferase, inhibition by okadaic acid and microcystin-LR (bovine), **202**, 1023
- Phosphoproteins
  - 56-kDa and 58-kDa, production from NS5A region of hepatitis C viral genome (COS-1 cells), **205**, 320
  - 65-kDa, homologous with human L-plastin, identification in macrophages (mouse), **202**, 1631
  - high-mobility group, HMGI-C, cDNA cloning and expression (human), **201**, 63
- 5′-Phosphopyridoxyl-D-L-7-azatryptophan
  - synthesis and spectral characterization, **198**, 1007
- Phosphopyruvate hydratase
  - neuron-specific and non-neuronal, synthetic peptide corresponding to C-terminal portion, effects on survival of cultured neocortical neurons (rat), **202**, 25
- Phosphorylation, *see also* Autophosphorylation; Dephosphorylation
  - actin filament adenine nucleotides in neuronal cytoskeletal fractions, phosphorylation states (rat pheochromocytoma cells), **201**, 1490
  - calnexin by *Clostridium difficile* cytotoxin B in cultured McCoy cells: hyperphosphorylation, **203**, 22
  - calponin by protein kinase C, block by F-actin *in vitro*, **203**, 1502
  - c-Raf-1, mapping to Ser259 (human), **204**, 841
  - dynamin by cdc2 kinase (rat), **202**, 1127
  - effect on Tax-induced HTLV-I transcriptional activation, **205**, 666
  - Egr-1 transcription factor, effect on DNA binding (NIH3T3 cells), **200**, 1271
  - eIF-2 β-subunit, sites, identification (rabbit reticulocytes), **201**, 1279
  - erythrocyte membrane proteins, relationship to casein kinase release (human), **203**, 681
  - farnesol, in cell-free system from *Botryococcus braunii*, **200**, 1036
  - glycyrrhizin-binding protein *in vitro* by casein kinase II, effects of glycyrrhizin, dexamethasone, and olean-11,13(18)-diene-3β, 30-diol, **198**, 1090
  - histidyl, P36 in Fao cells *in vitro* and *in vivo* (rat), **205**, 899
  - integrin, protein kinase C-mediated, role in modulation of melanoma cell metastasis and adhesion (human), **204**, 264
  - L-type calcium channel α_1 subunit in skeletal muscle, requirement for protein kinase C-mediated regulation (chicken), **202**, 857
  - mitogen-activated protein kinase
    - by kainic acid-induced seizure in hippocampus (rat), **202**, 1163
    - in Nb2 lymphoma cells, induction by prolactin (rat), **204**, 1158
  - motifs in osteopontin, identification (bovine), **198**, 200
  - NM23/nucleoside-diphosphate kinase by casein kinase 2 *in vitro* (human), **199**, 1041
  - oxidative, *see* Oxidative phosphorylation
  - particulate and cytosolic proteins in kidney, regulation by 1,25-dihydroxyvitamin D_3 (rat), **204**, 807
  - phenylalanine hydroxylase Ser_{16} residue by protein kinase A, role in electrostatic activation (rat), **198**, 174
  - protein, stage-specific changes during spore germination, role of calmodulin (*Dictyostelium discoideum*), **201**, 430
  - protein tyrosine kinase $p56^{lck}$ by Ca^{2+}/calmodulin-dependent protein kinase, **198**, 67
  - protein tyrosine phosphatase with Src homology 2 regions and modulation of PTPase activity *in vitro* by insulin receptor kinase, **199**, 780
  - Rabphilin-3A
    - by calmodulin-dependent protein kinase II, **205**, 1776
    - by cyclic AMP-dependent protein kinase, **203**, 1927
  - Rap1GTPase activating protein, during cell cycle (human), **202**, 967

  reversible, modulation of calpastatin I and II specificity in various tissues (rat), **199**, 1326
  rhodopsin, inhibition by non-myristoylated recombinant recoverin (bovine), **203**, 121
  sites in bacterially expressed cytosolic domain of KDR VEGF-receptor, identification, **205**, 728
  tyrosine
    aggregated IgG-stimulated, proteins in neutrophils, role of Fcγ receptors (human), **199**, 653
    in cellular proteins, association with actin stress fiber disorganization induced by vascular endothelial growth factor in BALB/c3T3 cells (mouse), **202**, 1716
    defective signaling, role in ultraviolet-induced DNA fragmentation and cell death after bromodeoxyuridine sensitization of B16 melanoma cells, **203**, 1629
    in endothelial cell proteins, thrombin-induced, inhibition by herbimycin A (human), **202**, 1651
    FcγRII, induction by neutrophil binding to immunocomplexes: role of phosphorylation in signaling Fc-mediated phagocytosis (human), **201**, 30
    58-kDa protein, induction by morphine in neuroblastoma cells (human), **200**, 797
    induction by interleukin-6 in hematopoietic cell lines (mouse), **200**, 821
    JAK2 protein in HL60 and Kasumi-1 cells, granulocyte colony-stimulating factor effects (human), **203**, 922
    JAK-TYK kinases in malignant plasma cell lines, effects of stimulation by interleukins 6 and 11 (human, mouse), **202**, 596
    mitogen-activated protein kinases, and activation, thrombin-induced, role in late arachidonic acid release in platelets (human), **198**, 497
    phospholipase C-γ2, role in F2 receptor activation of phosphoinositide hydrolysis (human neutrophils), **201**, 1100
    protein kinase Cα in CHO cells: direct interaction of insulin receptor and PKC, **200**, 1570
    regulation of plakoglobin–adenomatous polyposis coli association (human), **203**, 519
  tyrosine kinase, role in regulation of muscarinic receptor-activated cation channels (guinea pig ileum), **203**, 1392
Phosphotidylserine
  and Ca^{2+}, binding to annexins, structural determinants, **200**, 867
Phosphotyrosyl mimetics
  F_2Pmp, hexamer peptide containing, inhibition of insulin receptor dephosphorylation, **204**, 129
Photodegradation
  lindane and DDT in presence of photodynamic sensitizers, role of reactive oxygen species, **199**, 1284
Photolysis
  DM-nitrophen, associated $[Ca^{2+}]_i$ increase, effects on evoked mechanical response in phalangeal process of Deiters cells in organ of Corti (guinea pig), **201**, 1263
  ligand, subsequent rebinding of carbon monoxide to hemoglobin S and C, associated kinetics, nanosecond absorption study (human), **205**, 154
  ultraviolet cleavage of nitrobenzyl–protein conjugates, **201**, 1213
Photophysical probes
  5′-phosphopyridoxyl-D-L-7-azatryptophan as, development, **198**, 1007
Photoreceptors
  G-protein transducin, identification as substrate for ubiquitin-dependent proteolysis (bovine), **200**, 1169
  type B, photoresponse, induction by hydrolysis of polyphosphoinositides (*Hermissenda crassicornis*), **202**, 299
Photosystem II
  extrinsic proteins, distribution, properties, and evolutionary implications, **205**, 1497
Phototherapy
  psoralen, erythrocyte membrane response, mechanism: alterations by 4,5′,8-trimethylpsoralen (rat), **199**, 1413
Phylogeny, *see also* Evolution
  hepatitis C virus type $5a^+$ core, E2, and NS3/NS4 regions (human), **202**, 1308
  plastids, implications of distribution and properties of extrinsic proteins of photosystem II, **205**, 1497
Phytophthora infestans
  inhibition by 27-kDa antifungal protein from fruits of *Diospyro texana*, **202**, 666
Pichia pastoris
  expression of porcine leukocyte 12-lipoxygenase, **205**, 381
Pigment-dispersing hormone
  precursors, cDNA cloning: identification of novel member of PDH neuropeptide family (blue crab), **205**, 410
Pioglitazone
  effects on intracellular Mg^{2+} concentration in isolated adipocytes (rat), **202**, 416
Pituitary, *see also* Anterior pituitary cells
  anterior
    production of interleukin-8-like CINC/gro (rat), **202**, 161
    TRH and TRH precursor levels, effects of hypothyroidism (rat), **201**, 1248
  and hippocampus and cortex, inositol-1,4,5-trisphosphate content, somatostatin-14 effects (rat), **203**, 379
  posterior, cellular interleukin-6 secretion *in vitro*, effects of CINC/gro (rat), **200**, 742

sensitivity to interleukin-1, role of corticotropin-releasing hormone (rat), **198**, 480

Pituitary cells, *see also* Anterior pituitary cells
- activin A-, AB-, and B-responding, characterization by responses to hypothalamic releasing hormones (rat), **203**, 1739
- AtT-20, C-type natriuretic peptide-stimulated cyclic GMP production, inhibition by activation of protein kinase C by phorbol ester (mouse), **204**, 1318
- effects of hypothalamic releasing hormones (rat), **199**, 1436
- GH1, c-*fos* gene transcription, repression by thyroid hormone and retinoic acid receptors, identification of mediating promoter elements, **205**, 135

Placenta
- growth hormone releasing factor secretion, post-transcriptional inhibition by transforming growth factor-β1 (mouse), **204**, 1206
- lactogen-II expression, inhibition by tumor necrosis factor-α via TNF-α receptor I (mouse), **202**, 1599
- stem cell factor and c-*kit* mRNA localization in tissues (human), **205**, 1762

Placental cells
- resting membrane potentials, ranging between 0 mV and −85 mV, analysis (human), **198**, 1078

Plakoglobin
- association with adenomatous polyposis coli and regulation by tyrosine phosphorylation (human), **203**, 519
- in stomach cancer cells, association with *cerbB*-2 gene product (human), **205**, 73

Plant cells
- carrot, inositol 1,4,5-trisphosphate production, stimulation by venom peptides melittin and mastoparan, **205**, 739
- *Nicotiana tabacum*, cytosol, detection of putative mineralocorticoid receptor, **200**, 1230
- and plants, functional expression of *Chlorella* virus adenine methyltransferase gene promoter, **204**, 187
- rice, α*Amy3* gene expression, enhancement by protein phosphatase inhibitors, **205**, 807

Plants
- *Panax ginseng*, wild and cultured, differences in immunomodulating effects, **200**, 1672

Plasma, *see also* Blood; Serum
- cofactor, role in lipopolysaccharide priming of basophil mediator release (human), **203**, 1295
- C-type natriuretic peptide levels, determination in septic shock patients, **198**, 1177
- identification of 10-kDa proguanylin as major endogenous guanylin molecule (intestine), **205**, 1966
- lipid peroxidation, in APO E-deficiency, effects of oxidative stress (mouse), **201**, 1567
- low-molecular-weight kininogen, as precursor protein to urinary bradykinin in kininogen-deficient rat, demonstration, **204**, 1219
- nitrite and nitrate levels, measurement by high-performance capillary electrophoresis (human), **200**, 951
- phospholipase A_2 inhibitor
  - isolation and characterization (*Naja naja kaouthia*), **200**, 784
  - 25-kDa and 31-kDa subunits in, structural similarities to urokinase-type plasminogen activator receptor and Ly-6-related proteins (cobra), **204**, 1212
- proadrenomedullin N-terminal 20 peptide immunoreactivity in, characterization (human), **202**, 1081
- soluble amyloid β protein, complexation to high-density lipoprotein 3 and VHDL (human), **205**, 1164
- and whole blood, concentrations of 4-hydroxy-2-nonenal in New Zealand White and hyperlipidemic rabbits, **199**, 671

Plasmalogen
- effect on lipid peroxidation of low-density lipoproteins (human), **204**, 1235

Plasma membrane
- associated NADPH oxidase, activation in neutrophils, role of protein rac (human), **198**, 1216
- basolateral liver, vesicles, glutathione uptake, role of BSP/bilirubin-binding protein and bilitranslocase (rat), **200**, 1079
- Ehrlich cell, functional reconstitution of ferricyanide reductase, **205**, 1109
- electron transport, inhibition by iron chelator (CCl 39 cells), **203**, 16
- F-type and P-type ATPase, immunological and functional localization (*Synechococcus* PCC6301), **200**, 884
- ganglioside sialidase, in neuroblastoma cells, role in growth control and differentiation (human), **199**, 1188
- hepatocyte, leucine-specific binding of photoreactive Leu_7-MAP to high-molecular-weight protein (rat), **203**, 200
- incorporation of phospholipid analogs, effects on ATP-induced vesiculation of erythrocyte ghosts (human), **199**, 881
- osteoclast, 17β-estradiol binding sites, identification (chicken), **200**, 899; *erratum*, **202**, 643
- synaptic, identification of amyloid precursor protein (rat), **196**, 240; *erratum*, **198**, 409
- thyrotropin receptor residues in intracellular region adjacent to, role in phosphoinositide signaling and agonist-induced adenylate cyclase activation, **199**, 1497

Plasmids
- damage-specific incision, measurement by nucleotide exci-

sion repair *in vitro*, **202**, 788
  injected into mouse and rabbit, production of antibodies against δ-endotoxin (*Bacillus thuringiensis*), **202**, 1227
  λ, replication, regulatory role of *ori*λ transcriptional activation (*Escherichia coli*), **205**, 802
  pRSETA, for bacterial expression of soluble rat T cell receptor α chain, **202**, 1280
  pUMA vector, derived cRNA, recombinant polypeptides translated from, translocation through microsomal membranes and export out of oocytes (*Xenopus laevis*), **204**, 1346
  R, gentamicin resistance gene isolated from, nucleotide sequence and expression (*Serratia marcescens*), **198**, 1084

Plasmin
  conversion of phospholipase A_2 group I pro-form to receptor binding and active forms, **198**, 10
  glycerin-stabilized, susceptibility of monoclonal IgG paraproteins to plasmic cleavage by, analysis (human serum), **202**, 367

Plasminogen
  and apoprotein(a) genes, intergenic region separating, presence of liver-specific DNase-hypersensitive sites (human), **205**, 930

Plasminogen activator inhibitor
  type 1, production in A549 cells, promotion by thrombospondin and transforming growth factor β (human), **203**, 857

Plasminogen activator receptors
  urokinase-type, structural similarity to phospholipase A_2 inhibitor 25-kDa and 31-kDa subunits in cobra plasma, **204**, 1212

Plasmodium falciparum
  and other life forms, evolutionary relationships of lactate dehydrogenases, **205**, 558
  Ran/TC4 GTP-binding protein, homolog PfRan, cDNA cloning and expression, **201**, 423

Plastids
  phylogeny, implications of distribution and properties of extrinsic proteins of photosystem II, **205**, 1497

L-Plastin
  homology with murine 65-kDa phosphoprotein in macrophages (human), **202**, 1631

Plastoquinone
  synthesis in spinach leaves, endoplasmic reticulum–Golgi system as site, **205**, 714

Platelet-activating factor
  and C-C chemokines, synergism, for arachidonate release in monocytes (human), **199**, 761
  positive regulation of PAF receptor transcript 1 gene expression via NF-κB (human), **205**, 1137

Platelet-activating factor receptors
  mRNA, in B cells, detection by reverse transcript-PCR (human), **202**, 1373; *erratum*, **204**, 436
  transcript 1, gene expression, positive regulation with PAF via NF-κB (human), **205**, 1137
  transcript 2, positive and negative regulation by estrogen and transforming growth factor-β1 (human), **205**, 1130

Platelet-derived growth factor
  A-chain gene promoter, S1 nuclease sensitive region, identification of positive transcriptional regulatory element, **198**, 103
  inducible *JE* gene, induction, role of serine/threonine protein kinases (mouse), **203**, 1815
  induction of PGH_2/PGE_2 isomerase in NIH3T3 and pEJ transformed fibroblasts, **198**, 298
  mitogenic signal transduction induced in vascular smooth muscle cells by, role of diacylglycerol kinase (rat), **205**, 1338
  PDGF-AA and PDGF-BB, growth regulatory effects on neurofibroma cells in neurofibromatosis type 1 (human), **198**, 827

α-Platelet-derived growth factor receptors
  tyrosine kinase, mediation of locomotion of 32D hematopoietic cells and NIH 3T3 fibroblasts via chemotaxis and chemokinesis, **204**, 628

Platelets
  activated, endothelial cell activation factors released from, induction of E-selectin expression and tumor cell adhesion to endothelial cells (human), **203**, 1605
  aggregation and adhesion, effects of beta-amyloid protein (human), **205**, 1829
  arachidonic acid metabolism by 12-lipoxygenase and cyclooxygenase pathways, effects of L-arginine and sodium nitroprusside (human), **200**, 1630
  collagen- and ADP-induced aggregation, inhibition by jararhagin-C from snake venom (human), **201**, 331
  epinepherine-induced, and free intracellular calcium levels, effects of propranolol and phentolamine (human), **202**, 1069
  glycoprotein Ib, interaction with bovine von Willebrand factor, requirement for Asp^{514} in A1 domain of vWF (human), **203**, 881
  isolation of lipid-soluble histamine release factor (human), **201**, 443
  late arachidonic acid release, role of thrombin-induced tyrosine phosphorylation and activation of mitogen-activated protein kinase (human), **198**, 497

  - phopholipase A_2, inactivation by ochnaflavone (rat), **205**, 843
  - physiological responses, mediation by interactions of spectrin and protein 4.1 with cytoskeleton (human), **198**, 111
  - procoagulant activity, effect of thrombin receptor-activating peptide (human), **202**, 321
  - thrombin receptor signal transduction through 33-kDa protein kinase in platelets (human), **203**, 907

- Platinum–carbon shadowing
  - and W/Ta shadowing, in image analysis of cytochrome *c* oxidase in phospholipid liposomes (bovine heart), **203**, 331
- Pleckstrin homology domains
  - β-adrenergic receptor kinase and β-spectrin, binding to WD40/β-transducin repeat regions of trimeric G-protein β-subunits, **203**, 29
- P-loop
  - related nucleotide binding motif GxxGxxK in estrogen sulfotransferase, evaluation as sulfate donor binding site (guinea pig), **204**, 1178
- *Pneumocystis carinii*
  - sterol composition and metabolism, analysis, **198**, 236
- Pollen
  - *Cry j* I allergen in, cDNA, cloning and sequencing (*Cryptomeria japonica*), **199**, 619
- Polyadenylation
  - alternate, in cells, resulting differential expression of cyclin B1 mRNAs (hamster, rat), **202**, 908
  - hepatitis delta virus mRNA, subsequent transcription, role of ribozyme, **205**, 864
- Poly(ADP-ribose)
  - non-covalent interactions with cellular proteins, detection by Western blotting, **198**, 45
- Poly(ADP-ribose) polymerase, *see* NAD$^+$ ADP-ribosyltransferase
- Polyamines
  - depletion in V79 cells by difluoromethylornithine, effect on cytotoxic response to PUVA, γ-rays, and UVC, **201**, 1
  - role in activation of c-*myc* proto-oncogene and c-*fos* genes by c-*ras* (rat), **202**, 720
  - transport, negative regulation by antizyme, role in antizyme delay of spermine restoration of growth (murine FM3A cells), **203**, 608
- Polyanions
  - binding site on factor H, interactions with glycosaminoglycans, effects on factor H binding to complement C3b-target complex, **198**, 52
- Poly(A)polymerase II
  - in *Escherichia coli*, identification and purification, **198**, 459
- Polychlorinated biphenyls
  - and biphenyls, *bphA* and *bphB* genes degrading, indentification in *Pseudomonas* sp. KKS102, **202**, 850
- Polylysine
  - and histone, lectin conjugates, directed gene transfer to airway epithelial cells (human), **205**, 826
  - interaction with calmodulin, analysis by ^{1}H NMR and sedimentation equilibrium centrifugation, **198**, 309
  - role in src kinase phosphorylation of proteins and synthetic polypeptides, **201**, 1548
- Polymerase chain reaction
  - in analysis of
    - clonality in precancerous disease states and early stages of tumor progression (human), **199**, 511
    - monocyte chemoattractant protein-1 expression in luteal cells (pig), **199**, 962
  - cloning of metallothionein cDNAs (goldfish, tilapia), **205**, 368
  - competitive, in assay of interferon-γ mRNA levels in psoralen/UVA-treated HUT-78 cells (human), **203**, 935
  - in direct typing of microsatellite loci in colonial tunicate *Botryllus schlosseri*, **203**, 646
  - identification of differentially expressed homeobox families (tobacco), **198**, 1012
  - obtained products from multigene family, associated chimerism (human), **205**, 944
  - optimized long amplification, in identification of multiple deletions of mitochondrial DNA in polymyalgia rheumatica (human muscle), **205**, 375
  - reverse transcription
    - in assay of transcriptional induction of vascular endothelial growth factor under hypoxia, **205**, 1474
    - in detection of platelet-activating factor receptor mRNA in B cells (human), **202**, 1373; *erratum*, **204**, 436
    - in identification of seven transmembrane domain receptor subtypes in NG108-15 cells (mouse), **205**, 1311
    - neurotensin receptor protein and mRNA expression in colon cancer cell lines and normal colonic epithelium (human), **203**, 465
  - and RFLP, mismatch detection of dopamine D2 receptor SER311CYS polymorphism (human), **202**, 757
  - screening method for point mutations associated with mitochondrial encephalomyopathies (human), **200**, 938
  - in synthesis of high-molecular-weight multimers of oligonucleotides, **205**, 475
- Polymers
  - native capsular polysaccharide-derived, specificity of bacteriophage-borne endoglycanase for (*Klebsiella pneumoniae* SK1), **198**, 1128

  poly[0.73(GVGVP),0.27(GKGVP)], reduction-driven hydrophobic folding to perform mechanical work, demonstration, **204**, 230
Polymyalgia rheumatica
  mitochondrial DNA from muscles of affected patients, identification of multiple deletions, **205**, 375
Polypeptides
  β-*N*-acetylhexosaminidase proβ chain, pro-peptide, role in protein folding and exit from endoplasmic reticulum (human), **204**, 135
  ammonia monooxygenase 43-kDa component, *amo*B gene encoding, sequencing (*Nitrosomonas europaea*), **204**, 759
  recombinant, translated from pUMA vector-derived cRNA, translocation through microsomal membranes and export out of oocytes (*Xenopus laevis*), **204**, 1346
Polyphemusin-II
  synthetic [$Tyr^{5,12}$,Lys^7]-polyphemusin II peptide, attachment of lymphocytes and promonocytes, **202**, 470
Polyploidization
  induced in Meth-A cells by K252a, potentiation by cAMP (mouse), **205**, 746
Polysaccharides
  native capsular, and derived polymers, specificity of bacteriophage-borne endoglycanase for (*Klebsiella pneumoniae* SK1), **198**, 1128
Polyspermy, *see* Fertilization, polyspermy
Porins
  mitochondrial, structure and homologies with bacterial porins (human), **200**, 908
Porphyromonas gingivalis
  trypsin-like proteases secreted by, identification as natural ligand for neutrophil formyl peptide receptor, **199**, 1489
Postlabeling
  fluorescence, *see* Fluorescence postlabeling assay
Potassium
  efflux, in erythrocytes, role of nitric oxide (human), **199**, 447
  selective conductance with venturicidin sensitivity, detection in F_0 purified from mitochondria and reconstituted in planar lipid bilayers (bovine heart), **203**, 1005
Potassium channels
  in articular chondrocytes, blockage by propofol (swine), **202**, 31
  ATP-sensitive
    in intestinal cholecystokinin-secreting STC-1 cells, characterization, **204**, 855
    variations, as evidence for inherent metabolic oscillations in β cells (human, mouse), **205**, 880
  and Ca^{2+} channels, associated currents in pancreatic β cells, effects of H_2O_2 and 2,2′-dithio-bis(5-nitropyridine) (mouse), **200**, 860
  I_{sK} and I_{Ks}, inhibition by antiarrhythmics NE-10064 and NE-10133 (*Xenopus* oocytes, guinea pig cardiac myocytes), **202**, 265
  large conductance Ca^{2+}-activated, biophysical and pharmacological properties (mouse), **205**, 596
  mammalian RCK1, pore-region mutations, comparison with *Shaker* K channel, **203**, 513
  maxi-K^+
    β-adrenergic receptor activation, enhancement by GM1 ganglioside (guinea pig myocytes), **200**, 1341
    blockade by tetraethylammonium, release by isoproterenol (guinea pig myocytes), **201**, 24
  muscarinic, effects of transducin subunits (guinea pig atrial myocytes), **200**, 1484
  peripheral blood lymphocytes, reduced activity in aged humans, **199**, 519
  from sarcoplasmic reticulum, subconducting state of, effect of asymmetrical lipid charge (rabbit), **199**, 1081
  tonoplastic, activation by cytoplasmic ATP (*Arabidopsis thaliana*), **200**, 1143
  voltage-dependent
    in human T lymphocytes, inhibitor margatoxin, synthesis and structure–function studies, **198**, 619
    pore-forming region, synthesis of H5 peptide with presumed primary structure and analysis of ion channel activity, **198**, 445; *erratum*, **200**, 670
Prasterone
  inhibition of 3′-azido-3′deoxythymidine-resistant HIV-1 infection *in vitro* (human), **201**, 1424
Pravastatin
  induction of increase in cytosolic Ca^{2+} levels and cell damage in L6 myoblasts (rat), **202**, 1579
  pretreatment of cholesterol-poor endothelial cells, effect on migration activity (bovine), **203**, 1355
Preadipocytes
  Ob1771, differentiation, synergistic action of fatty acids and retinoids (mouse), **204**, 498
  3T3-F442A, adipogenesis, inhibition by retinoic acid, role of cytoplasmic retinoic acid-binding protein, **204**, 257
Precipitation
  two-step method for removal of free SDS and thiol reagents from diluted solutions for protein recovery and quantitation, **200**, 916
Pregnancy
  associated atrial natriuretic peptide receptor expression in uterine tissue (human), **203**, 602
  associated increase in expression of endothelial constitutive

    nitric-oxide synthase in aorta (rat), **205**, 905
  cylo-oxygenase regulation in amnion at term, role of mRNA-binding proteins (human), **203**, 67
Prenols
  and other isoprenoid compounds, biosynthesis in cattle filarial parasite *Setaria digitata*, **205**, 24
Prenylation
  proteins in regenerating liver, characterization (rat), **200**, 1713
Preprotachykinin
  fourth isoform, encoding for substance P in intestine (rat), **202**, 796
Primase
  –helicase complex, *see* Helicase–primase complex
Prion protein
  gene encoding, linkage to *zwitter* gene causative for epilepsy with spongiform encephalopathy in spontaneously epileptic rat, **200**, 1161
Prion-related protein
  gene expression, hormonal control in endocrine pancreatic cells (rat), **201**, 1220
Proadrenomedullin
  N-terminal 20 peptide, immunoreactivities in tissue, plasma, and urine (human), **202**, 1081
Probenecid
  inhibition of Na^+/I^- symporter in thyroid follicles *in vitro* (pig), **204**, 1265
Procoagulant activity
  platelet, effect of thrombin receptor-activating peptide (human), **202**, 321
Procollagen
  type II, alternatively spliced variants in bovine vitreous, **203**, 289
Profilin
  hepatic, mRNA expression, effects of CCl_4 and partial hepatectomy (rat), **198**, 568
Progenitor toxin
  type C, molecular construction and gene organization (*Clostridium botulinum*), **205**, 1291
Progesterone
  effect on nitrite/nitrate circulating levels during follicular development (human), **202**, 1543
  treated tissues, uteroglobin gene promoter-binding factor detection (rabbit), **204**, 273
Progesterone receptors
  encoding gene, 5′ region, nucleotide sequence and DNase hypersensitive sites (mouse), **205**, 1093
Proguanylin
  10-kDa, identification as major guanylin molecule in intestine and plasma and increase in renal insufficiency (human), **205**, 1966
Prohibitin
  gene expression during cellular senescence of diploid fibroblasts (human), **201**, 409
Prolactin
  amino acids in amino terminal region, role in prolactin receptor binding and Nb2 cell proliferation (rat), **205**, 312
  dissociation from mammary gland receptor, mechanism of action (rabbit), **202**, 1395
  induction of mitogen-activated protein kinase phosphorylation and nuclear translocation in Nb2 lymphoma cells (rat), **204**, 1158
  mammary epithelial cell sensitivity to, effect of mouse mammary tumor virus receptor activation, **205**, 524
  secretion by
    GH3 cells, thyrotropin-releasing hormone-induced, role of tyrosine kinase (rat), **199**, 1447
    rat anterior pituitary cells *in vitro*, effects of CINC/gro, **202**, 155
Prolactin receptors
  binding activity, role of amino acids in amino terminal region of rat prolactin, **205**, 312
Proliferating cell nuclear antigen
  expression in DU-145 prostate carcinoma cells, effects of suramin (human), **201**, 581
  mRNA, time of appearance in 3T3 cells stimulated by growth factors, role of introns (human), **201**, 841
  promoter, transcriptional regulation by p53 in mammalian cells, **203**, 133
Proliferation
  cellular, *see* Cell proliferation
Proline
  addition and deletion on S4 segment of sodium channel II, analysis (rat brain), **202**, 1438
  C-terminal and N-terminal residues, iminodipeptides with, priming of superoxide generation in neutrophils by *N*-formyl-methionyl-leucyl-phenylalanine (human), **205**, 758
  MAPKAP kinase 2 region rich in, effect on catalytic properties and binding to c-abl SH3 domain *in vitro* (mouse), **203**, 1188
Proline peptidase
  enzyme family, identification of membrane-bound aminopeptidase P as member (guinea pig), **205**, 1790
Prolylendopeptidase, *see* Prolyloligopeptidase
Prolyloligopeptidase
  inhibiting peptides, isolation from brain (bovine), **202**, 809
Promonocytes
  U1, HIV-1-infected

    - gelatinase A and B expression, modulation by HIV-1 (human), **205**, 1243
    - P-glycoprotein expression, induction by *Mycobacterium tuberculosis* (human), **199**, 1181

Promoter-binding factor
  - uteroglobin gene, inhibition, tissue distribution, and hormonal specificity (rabbit), **204**, 273

Promoters
  - adenine methyltransferase gene of *Chlorella* virus, functional expression in bacteria and plants, **204**, 187
  - angiotensin II type 1 receptor
    - cloning and characterization (human), **200**, 1264
    - genomic organization and functional analysis (human), **204**, 1039
  - angiotensin II type 1A receptor gene, induction by glucocorticoid (rat), **204**, 210
  - aryl hydrocarbon receptor gene, cloning and and analysis (human), **203**, 615
  - bovine leukemia virus, activation by downstream regulatory element, **202**, 1553
  - brown fat uncoupling, transcriptional activation by CCAAT/-enhancer-binding proteins α and β (mouse), **198**, 653
  - E-cadherin gene, characterization (human), **203**, 1284
  - calcitriol 24-hydroxylase gene, vitamin D receptor homodimer-type response element in, identification (rat), **202**, 1366
  - c-*fos*, serum response element, ternary complex formation at, inhibition by muscle homeodomain protein MHox, **200**, 1742
  - constitutive internal, in tryptophan operon, analysis (*Corynebacterium glutamicum*), **203**, 820
  - Cu,Zn-containing superoxide dismutase 5′-flanking region (human, rat), **201**, 1526
  - cytochrome P450 1A1 gene, regulation by retinoid receptors: presence of retinoid responsive element (human), **201**, 1205
  - cytosolic phospholipase A_2 gene, isolation of 5′-flanking region (human), **205**, 6
  - elastin
    - identification of transforming growth factor-β responsive element (human), **199**, 1041
    - regulation by transforming growth factor-β in transgenic mouse (human), **203**, 485
    - suppression by dexamethasone in cultured skin fibroblasts (human), **201**, 1189
  - fatty acid synthase gene, identification of insulin-responsive regions (rat), **203**, 943
  - globin, specific silencer element, localization to δ-globin gene upstream region (human), **204**, 413
  - granulocyte–macrophage colony-stimulating factor
    - induction in human T cells, role of transcription factor Sp1 (mouse), **205**, 1518
    - transcription activation in synergy with protein kinase C and NF-κB/AP-1 in T cells (human), **199**, 1064
  - HIV-1 DNA, DNA topoisomerase I and II cleavage sites, **205**, 1601
  - insulin-1 gene, transcription factor binding, glucose effects (rat), **203**, 702
  - insulin-like growth factor-binding protein-1, insulin response sequence, binding of hepatocyte nuclear factor-3: enhancement of promoter function (mouse), **203**, 1835; *erratum*, **205**, 1496
  - interleukin-2 gene, enhancement by HIV-1 Tat via synergism with phorbol ester and calcium-mediated activation of NF-AT *cis*-regulatory motif (Jurkat cells), **205**, 467
  - *junB*, interleukin-6 response element in, transcriptional activation, mediation by stat family proteins (rat), **202**, 1181
  - α_2-macroglobulin gene, characterization and identification of triple TRE/RARE/ERE response element (human), **202**, 65
  - major immediate-early, murine cytomegalovirus, Tat from, TAR-independent transactivation by, role of HIV-1 *env* gene sequence, **203**, 1152
  - mammary tumor virus, glucocorticoid-mediated induction in mammary carcinoma cells, potentiation by protein kinase C activation (mouse), **198**, 1183
  - mediated repression of c-*fos* gene transcription by thyroid hormone and retinoic acid receptors (GH1 cells), **205**, 135
  - PDGF A-chain gene, S1 nuclease-sensitive region, identification of positive transcriptional regulatory element, **198**, 103
  - proliferating cell nuclear antigen, transcriptional regulation by p53 in mammalian cells, **203**, 133
  - prostaglandin H synthase-2 gene, characterization (human), **203**, 190
  - prostate-specific acid phosphatase genes, structural comparison in human and rat: identification of androgen response elements, **202**, 49
  - Rex-1 zinc finger-containing gene, octamer motif binding to Oct-1 and Oct-3 transcription factors expressed by embryonal carcinoma and embryonic stem cells (human, mouse), **203**, 1795
  - serum albumin gene, isolation and functional analysis (bovine), **203**, 1447
  - thromboxane synthase gene, cloning and characterization (human), **201**, 379

thymidine kinase gene, G1 phase-specific complex Yi1 binding, cyclin D1/cdk2 kinase in, detection (mouse), **205**, 1859
thyrotropin receptor, inhibition by thyroid hormone: evidence for short loop regulation (CV-1, FRTL-5 cells), **205**, 230
Tn3 sequence, role in gentamicin resistance gene expression (*Serratia marcescens*), **198**, 1084
transforming growth factor β receptor type II gene, cloning and expression (human), **203**, 1020
tyrosinase gene, activation by neurofibromin (human), **205**, 1984
vitamin D-responsive region of Spot35/calbindin-D28k gene, identification (mouse), **204**, 889
Vitreoscilla globin gene, oxygen-dependent regulation: evidence for positive regulation by transcriptional activator FNR, **202**, 535

Pro-peptides
in proβ-polypeptide chain of β-*N*-acetylhexosaminidase, role in protein folding and exit from endoplasmic reticulum (human), **204**, 135

Propionyl carnitine
anaplerotic effect in cardiac mitochondria (rat), **199**, 949

Propofol
induced potassium channel block in articular chondrocytes (swine), **202**, 31

Propranolol
and phentolamine, effects on epinepherine-induced aggregation and intracellular free calcium concentration in platelets (human), **202**, 1069

Prosaposin
protective effect on ischemia-induced learning disability and neuronal loss (gerbil), **204**, 994

Prosomatostatin
human, expression in AtT20 cells: generation of somatostatin-14 and -28 in different secretory pathways, **205**, 221

Prostacyclin
production by endothelial cells, stimulation by ancrod-formed fibrin via *de novo* cyclooxygenase synthesis (human umbilical vein), **203**, 1920
secretion by coronary artery and aortic endothelial cells in culture, comparison (pig), **202**, 504

Prostacyclin-stimulating factor
expression in bovine and human cells and rat tissues *in vitro*, **202**, 1490

Prostacyclin synthase, *see* Prostaglandin-I synthase

Prostaglandin
synthesis in renal medulla, arachidonoyl CoA as arachidonic acid source for evaluation (rabbit), **202**, 1054

Prostaglandin D synthase, *see* Prostaglandin-H$_2$ D-isomerase

Prostaglandin E$_2$
HIV gp120-induced release by astroglial cells, regulation by nitric oxide (human), **203**, 87

Prostaglandin-endoperoxide synthase
type 1 and type 2, expression in osteoblasts (human), **198**, 955
type 2, tyrosyl radical in, characterization (human), **202**, 1592

Prostaglandin E receptors
EP$_3$ subtype
derived by alternative RNA splicing, colocalization (rat kidney), **199**, 834
with different efficiencies, enhancement of adenylate cyclase stimulation, **201**, 340
mediation of calcium signals via G$_i$ in cDNA-transfected CHO cells (mouse), **204**, 303

Prostaglandin E$_2$ receptors
EP$_3$ subtype
cloning and expression (human), **198**, 999
isoforms, functional difference (rat kidney), **203**, 1897
molecular cloning and expression (rat), **200**, 1329

Prostaglandin-E synthase
induction in NIH3T3 and pEJ transformed fibroblasts by platelet-derived growth factor, **198**, 298

Prostaglandin F$_{2\alpha}$ receptors
expression in CHO cells, intracellular transduction and G protein coupling (bovine), **200**, 756

Prostaglandin G/H synthase-2
heterologous expression and characterization (human), **201**, 356

Prostaglandin-H$_2$ D-isomerase
purification from cerebrospinal fluid: identity with β-trace (human), **203**, 1110

Prostaglandin H synthase 2
encoding gene, genomic structure, chromosomal location, and promoter characterizations (human), **203**, 190

Prostaglandin-I synthase
molecular cloning and characterization (bovine), **203**, 59
molecular cloning and expression (human), **200**, 1728

Prostate
testosterone 5α-reductase 2 purified from, glycosylated nature (human), **205**, 269
transglutaminase, cDNA, molecular cloning and characterization from cDNA library (human), **203**, 1117
ventral, castration-induced regression, associated expression of p53 protein and mRNA (rat), **198**, 1189

Prostate-specific antigen
expression on surface of filamentous phage (human), **200**, 1346

  structure, modeling based on porcine pancreatic kallikrein A (human), **204**, 1251
Prostatic acid phosphatase
  gene and promoter in human and rat, structural comparison: identification of androgen response elements, **202**, 49
Protamines
  activation of phosphoinositide catabolism and DNA synthesis in vascular smooth muscle cells: comparison with signaling/growth effects of low-density lipoprotein (human), **203**, 1700
  P1 and P2, competitive binding to DNA, role of zinc (human spermatozoa), **201**, 1197
Proteases, *see* Proteinases
Proteasome, *see* Multicatalytic endopeptidase complex
Protein A
  staphylococcal, *see* Staphylococcal protein A
Proteinases
  calcium-dependent, detection in root cultures (*Arabidopsis thaliana*), **199**, 1089
  and capsid assembly protein, murine cytomegalovirus, gene cloning and sequencing, **203**, 472
  HIV-1
    competitive inhibition
      by 4-hydroxy-benzopyran-2-ones and 4-hydroxy-6-phenylpyran-2-ones, **200**, 1658
      by warfarin derivatives, **201**, 290
    with defined mutations, infectious clones containing, construction, **205**, 1651
  kexin-like
    PACE4 isoforms
      identification of encoding cDNAs (human), **200**, 943; *erratum*, **204**, 1381
      mRNA, distribution in various tissues (rat), **202**, 1215
    PC7, and isoforms, homologous to PACE4A, characterization and expression in brain (rat), **202**, 1452
  mast cell, type 1, molecular cloning and development of specific probes for gene transcript (rat), **199**, 593
  midgut, altered protoxin activation by, role in insect resistance to *Bacillus thuringiensis* (*Plodia interpunctella*), **198**, 940
  p57 membrane, cleaving C3, and generation by erythrocyte ankyrin (human), **204**, 453
  Ti, alternative ATP-binding subunit, *clpX* encoding, expression independent of *clpP* (*Escherichia coli*), **203**, 798
  trypsin-like, identification as natural ligand for neutrophil formyl peptide receptor (*Porphyromonas gingivalis*), **199**, 1489
  venom, with β-fibrinogenase activity, purification and cDNA sequence analysis (Taiwan habu), **205**, 1707
Protein disulfide-isomerase
  calcium binding properties (rabbit liver), **202**, 556
Protein factors
  meiotic, enhancement of meiotic DNA polymerase (*Coprinus cinereus*), **198**, 1232
Protein folding
  β-*N*-acetylhexosaminidase, role of pro-peptide of proβ-polypeptide chain (human), **204**, 135
  hydrophobic, reduction-driven, demonstration in model protein with performance of mechanical work: electromechanical transduction, **204**, 230
Protein-glutamine γ-glutamyltransferase
  cDNA, molecular cloning and characterization from prostate cDNA library (human), **203**, 1117
  1,3,4,5-tetramethyl-2-[(2-oxopropyl)thio]imidazolium chloride inhibitory effects during egg fertilization and development (*Sphaerechinus granularis*), **205**, 565
  tissue, induction in peritoneal macrophages by 1α,25-dihydroxyvitamin D_3, role of GTP-binding proteins (mouse), **203**, 1773
Protein-L-isoaspartate(D-aspartate) *O*-methyltransferase
  involved in protein repair, amino acid polymorphisms (human), **203**, 491
Protein kinase
  33-kDa, in thrombin receptor signal transduction in platelets (human), **203**, 907
  5′-AMP-activated, hepatic, characterization with specific peptide substrates and effects of 5′-AMP analogues (human), **200**, 1551
  Ca^{2+}/calmodulin-dependent, *see* Ca^{2+}/calmodulin-dependent protein kinase
  c-Raf-1, aminoterminus, binding of 28-kDa cellular protein, **203**, 1560
  cyclic AMP-dependent, *see* Protein kinase A
  cyclic GMP-dependent
    activity in pulmonary microvascular endothelial cells (rat), **202**, 728
    regulation of osteoclastic acid secretion (chicken), **204**, 565
  cyclin-dependent, *see* Cyclin-dependent kinases
  DNA-dependent activity, stimulation by high mobility group proteins 1 and 2 (pig), **202**, 736
  double-stranded DNA-stimulated, inhibiting 41-kDa protein, detection in proliferating HL-60 cells and purification (human), **202**, 1530
  inhibitor K252a, induced polyploidization in Meth-A cells, potentiation by cAMP (mouse), **205**, 746
  with leucine-zipper domain, cloning and sequence analysis (human brain), **202**, 613; *erratum*, **205**, 1494
  mitogen-activated, *see* MAP kinase

  myotonic dystrophy gene product, identification and localization in skeletal and cardiac muscles (human, rabbit, rat), **203**, 1365
  myotonin-, *see* Myotonin-protein kinase
  p34^{cdc2}, suramin effects *in vitro* and in H69 cell extracts: double mechanism of action (human), **203**, 1574
  phosphorylating Ser259 of c-Raf-1, binding by c-Raf-1 aminoterminus (human), **204**, 841
  PITSLREβ1, ectopic expression, induced late telophase delay, inhibition by 2-aminopurine (CHO cells), **199**, 1167
  p70 S6, isoforms, subcellular localization (COS-7 cells), **198**, 780
  RAC
    α and β, molecular cloning and association with protein kinase C ζ (rat), **205**, 817
    pleckstrin homology domain, association with regulatory domain of protein kinase C ζ, **205**, 1770
  stability, role of insulin receptor COOH-terminal (human), **200**, 777
  subunits, asymmetric expression in kidney tumors (human), **202**, 141
  with zipper-like sequences and catalytic domain homologous to protein kinase C, identification (human hippocampus), **199**, 897
Protein kinase II
  calmodulin-dependent, phosphorylation of Rabphilin-3A (rat brain), **205**, 1776
Protein kinase A
  catalyzed phosphorylation of phenylalanine hydroxylase Ser$_{16}$ residue, role in electrostatic activation (rat), **198**, 174
  phosphorylation of
    eIF-2 β-subunit, site identification (rabbit reticulocytes), **201**, 1279
    N-terminal region of endothelial actin-binding protein expressed in *Escherichia coli* (human), **202**, 764
    rabphilin-3A: putative target protein for *Rab3A*, **203**, 1927
  regulation of L-type calcium channels expressed in skeletal muscle, role of channel α_1-subunit (rabbit), **198**, 166
Protein kinase C
  activation
    in angiotensin II-stimulated adrenal zona glomerulosa cell, role of type I angiotensin II receptor internalization (rat), **204**, 1292
    effect on immunocyte binding to polyphemusin II peptide, **202**, 470
    by phorbol ester, inhibition of C-type natriuretic peptide-stimulated cyclic GMP production in pituitary AtT-20 tumor cells (mouse), **204**, 1318
    synergistic induction by phorbol esters and retinoic acid (rat brain), **204**, 112
  alpha isoform
    role in phorbol ester-induced inhibition of MH1C1 hepatoma cell growth (rat), **205**, 1589
    tyrosine phosphorylation: direct interaction of insulin receptor and PKC, **200**, 1570
  beta isoform, selective inhibition, in 13-hydroxyoctadecadienoic acid reversal of epidermal hyperproliferation (guinea pig), **201**, 257
  Ca^{2+}-independent isoenzymes, expression and regulation in cell differentiation in murine NG108-15 cells, **203**, 1423
  calponin phosphorylation, block by F-actin *in vitro* (chicken gizzard), **203**, 1502
  delta isoform
    gene expression in peritoneal macrophages, inhibition by nitric oxide (mouse), **204**, 105
    overexpression in U-251 MG glioma cells, effects on cell growth properties (human), **201**, 363
  DMSO-induced decrease associated with the HL-60 cell granulocytic differentiation, potentiation by sphinganine, **199**, 888
  gamma isoform, overexpression in U-251 MG glioma cells, effects on cell growth properties (human), **201**, 363
  in glioma cells
    effects of simvastatin during cell cycle (rat), **200**, 1143
    heterogeneity (human, mouse), **205**, 127
  isoforms
    encoding genes, differential expression in erythroleukemia cell variants: implication for chemical-induced differentiation (mouse), **204**, 461
    pattern in liver hyperplasia (rat), **205**, 208
  mediated integrin phosphorylation, role in modulation of melanoma cell metastasis and adhesion (human), **204**, 264
  mediated regulation of L-type Ca channels from skeletal muscle, α_1 subunit phosphorylation requirement (chicken), **202**, 857
  n-PKC and c-PKC isozymes, role in regulation of neutrophil functions (human), **200**, 1536
  phosphorylation site on eIF-2 β-subunit, identification (rabbit reticulocytes), **201**, 1279
  potentiation of glucocorticoid-mediated induction of viral promoter in mammary carcinoma cells (mouse), **198**, 1183
  purification and characterization from higher plant (*Brassica campestris*), **203**, 311

- redistribution in reserpinized brain, correlation with alteration of β/A4 amyloid precursor protein metabolism (rat), **202**, 293
- regulation during NG108-15 cell differentiation (mouse), **201**, 135
- related signaling pathway in astrocytes, role in activation of mitogen-activated protein kinases by endothelin-1 (rat), **204**, 1325
- role in
  - control of receptor agonist-mediated elevation in cytosolic Ca^{2+} in neutrophils (human), **203**, 998
  - glucocorticoid inhibition of nitric oxide production by microglial cells (mouse), **199**, 633
  - thyroid cell protein synthesis (rat), **203**, 780
- stimulation of sodium-dependent phosphate transport by parathyroid hormone-related peptide in UMR-106 cells (rat), **199**, 1216
- in T cells, in synergy with calcineurin, activation of transcription from GM–CSF promoter (human), **199**, 1064
- zeta isoform
  - association with RAC protein kinases α and β (rat), **205**, 817
  - regulatory domain, association with pleckstrin homology domain of RAC protein kinase, **205**, 1770

Protein kinase C inhibitors
- GF 109203X, modulation of epidermal and keratinocyte growth factors, effects on keratinocyte growth (human), **204**, 1081
- ilmofosine, induction of cell arrest in G2 phase and suppression of cdc2 kinase activation (human), **199**, 937

Protein kinase N
- 120-kDa, with leucine zipper-like sequence, activation by unsaturated fatty acids and limited proteolysis (COS-7 cells), **204**, 348

Protein kinase (tyrosine), *see* Protein-tyrosine kinase

Protein phosphatase, *see* Phosphoprotein phosphatase

Proteins
- 4.1, and spectrin, interaction with cytoskeleton, mediation of platelet physiological response (human), **198**, 111
- 30-kDa, secreted by bladder carcinoma cells, cell adhesion activity (human), **198**, 1046
- 41-kDa, inhibiting double-stranded DNA-stimulated protein kinase, detection in proliferating HL-60 cells and purification (human), **202**, 1530
- 58-kDa, induced by morphine in neuroblastoma cells, tyrosine phosphorylation (human), **200**, 797
- 100-kDa, phosphorylated before embryonic myoblast fusion, identification as eukaryotic elongation factor-2 (chicken), **198**, 132
- 1085-amino acid, homology with human active-gene-repairing helicase *ERCC6* (*Saccharomyces cerevisiae*), **201**, 310
- actin-binding
  - 25-kDa, with homology to chicken SM22 protein, purification, characterization, and partial sequence analysis (bovine aorta), **198**, 1275
  - endothelial, N-terminal region, expression in *Escherichia coli* and phosphorylation with cAMP-dependent protein kinase (human), **202**, 764
- acute phase, type II, contrapsins as, regulation by interleukin-6 at mRNA level (rat), **201**, 222
- β-adducin, interacting with Rabphilin-3A in presence of Ca^{2+} and phosphatidylserine (bovine), **205**, 460
- adenomatous polyposis coli, association with plakoglobin (human), **203**, 519
- ALD, cDNA from adrenoleukodystrophy-affected patient, nonsense mutation, identification, **198**, 632
- amyloid, *see* Amyloid
- antifungal, 27-kDa, isolation from fruits of *Diospyro texana* and characterization, **202**, 666
- Ash/Grb2, interacting with GDP/GTP exchange protein, kinetic properties, **198**, 1255
- B cell, specific binding to uveitopathogenic peptide 1169-1191 of bovine IRBP, characterization (human), **204**, 799
- Bence Jones, detection of amidase activity (human), **204**, 57
- bilirubin-binding, *see* Bilirubin binding protein
- bone morphogenetic, *see* Bone morphogenetic protein
- calcium-binding
  - calmitine, cloning: identity with calsequestrine (human), **203**, 1477
  - pEL98, expression during differentiation of HL-60 cells, **202**, 94
  - S100 family, MRP8 and MRP14, mRNA, increased coexpression with CFTR mRNA in cystic fibrosis tracheal gland cells (human), **201**, 1518
- capsid assembly, and protease, from murine cytomegalovirus, gene cloning and sequencing, **203**, 472
- casein kinase 2 substrates, release from liver cell nuclei by DNase and RNase digestion (rat), **202**, 984
- CCAAT/enhancer-binding, C/EBPα and C/EBPβ, role as transcriptional activators of brown fat uncoupling gene promoter (mouse), **198**, 653
- CD38-homologous, cloning and expression in pancreatic islets (rat), **202**, 629
- cell–cell adhesion regulator, purification from seminal vesicle fluid (pig), **205**, 1206
- cellular
  - 28-kDa, in A431 cell lysates, binding by aminoterminus of c-RAF-1, **203**, 1560

  binding central conserved region of p53, identification (human), **202**, 490
  non-covalent interactions with poly(ADP-ribose), detection by Western blotting, **198**, 45
CenE, identification as β-1,4-glucanase and stereochemical characterization of hydrolytic action (*Cellulomonas fimi*), **199**, 1223
cerbB-2, association with catenins in stomach cancer cells (human), **205**, 73
cholesteryl ester transfer
  expression in transgenic mouse, effect on hepatic lipoprotein profile (cynomolgus monkey), **205**, 1257
  membrane-bound, mediation of free cholesterol transfer between lipoproteins and artificial membrane system (human), **202**, 1322
c-*kit*, mRNA, localization in placental tissue (human), **205**, 1762
cysteine-rich heart protein hCHRP containing LIM, encoding cDNA, isolation and characterization (human), **205**, 497
cytoplasmic retinoic acid-binding, role in 3T3 adipogenesis inhibition by retinoic acid, **204**, 257
dda, from bacteriophage T4, effect on unwinding of triplex DNA, **204**, 1119
delivery into cells with protein–adenovirus conjugates (human), **203**, 582
DNA-binding
  MDR-NF1/YB-1, role in actinomycin D-induced MDR1 gene expression (human), **199**, 1428
  QUAD, stabilization of tetrahelical DNA, **205**, 305
–DNA complex
  mediation of strand exchange, role of DNA helicase, **205**, 1004
  sequence-specific, inhibition of bacteriophage T4 dda helicase-mediated DNA unwinding and ATP hydrolysis (*Escherichia coli*), **198**, 1070
DNA regions binding, in and near cytochrome P450bm-3 gene (*Bacillus megaterium*), **198**, 862
erythrocyte membrane, phosphorylation, effect on casein kinase release (human), **203**, 681
E26 transformation-specific, associated with serum response factor: ternary complex factors and PEAS3-binding factor (human), **201**, 1406
extracellular matrix, hepatic, mRNA expression, effects of CCl_4 and partial hepatectomy (rat), **198**, 568
extrinsic, in photosystem II, distribution, properties, and evolutionary implications, **205**, 1497
Fas, and CD40, chimeric receptor constructed from (human), **204**, 1102
fatty acid-binding
  in heart, increase in experimental diabetes (rat), **199**, 639
  purified and recombinant, and cytosolic heme-binding protein, immunological identity, determination by Western blots of 2D gels (rat liver), **204**, 163
fish antifreeze, cysteine-rich, production as active proprotein precursor in Sf21 cells (sea raven), **203**, 1851
FK-506-binding
  12-kDa, gene homologous to, molecular cloning and characterization (human), **200**, 836
  interaction with FK-506 and metabolites, **202**, 437
FKBP-59/HBI, recombinant, effect on calcineurin activity *in vitro* (rabbit), **203**, 750
Fur, interaction with target DNA, analyses by gel retardation, footprinting, and electron microscopy, **201**, 346
fusion, *see* Fusion proteins
G, *see* G proteins
GAG, HIV-1, budding site, effects of internal and myristylated N-terminus sequences of matrix domain, **204**, 1031
GDP/GTP exchange
  Dbl gene product identification as, comparison with *Smg* GDP dissociation stimulator (SK-ES-1 cells), **198**, 811
  interacting with Ash/Grb2 protein, kinetic properties, **198**, 1255
glutathione-binding, 34-kDa, identification in mature ovary (rat), **201**, 149
N-glycosylation and secretion by *Xenopus* oocytes, inhibition by antisense RNA to N-glycosylation gene ALG7, **198**, 1248
glycyrrhizin-binding, purification, characterization as casein kinase II phosphate acceptor, and effect on CK-II phosphorylation of gp 100 *in vitro*, **198**, 1090
G_{M2} activator, expression in tissues (mouse), **204**, 741
G1 phase-specific complex Yi1 binding thymidine kinase gene promoter, cyclin D1/cdk2 kinase in, detection (mouse), **205**, 1859
growth-associated, GAP-43
  antibodies, effects on neuroblastoma cell growth cone morphology after intracellular delivery, **203**, 459
  mRNA
    nerve growth factor-induced stabilization, role for carboxy terminus encoding region, mutational analysis, **205**, 1380
    3′ untranslated region and carboxy-terminus peptide-encoding segment, mediation of neurite growth factor-induced stabilization (PC12 cells), **200**, 789
GTPase-activating, identification of repeating amino acid motif WWP, **205**, 1201
GTP-binding, *see* G proteins

hCDC10, homologous to yeast CDC10, molecular cloning (human fetal lung), **202**, 82
heat shock, *see* Heat shock proteins
heat-stable phosphocarrier, amino acid sequence and comparative molecular modeling (*Streptococcus mutans*), **199**, 1297
heme-binding, cytosolic, and purified and recombinant fatty acid-binding protein, immunological identity, determination by Western blots of 2D gels (rat liver), **204**, 163
hemoglobin-like, contribution to ferric reductase activities in *Escherichia coli*, **198**, 127
heparin-binding, HBp15, identification as mammalian ribosomal protein L22 (bovine, mouse), **199**, 706
hepatitis B virus
  core, subcellular localization, effect of surface proteins (COS-7 cells), **203**, 1348
  surface antigen-binding, functional active recombinant, cloning and production (human), **205**, 52
hepatitis C virus
  core, N-terminal region, nuclear localization signals, identification, **205**, 1284
  NS3, major linear antigenic region, cell binding Arg-Gly-Asp sequence in close proximity to, localization (human), **202**, 1352
hepatocyte growth factor-like, mRNA expression during liver regeneration and inflammation (rat), **203**, 666
high mobility group
  HMG1, and linker histones, competition for binding to four-way junction DNA: implications for transcription (bovine), **203**, 1904
  HMGs 1 and 2, stimulation of DNA-dependent protein kinase activity (pig), **202**, 736
high potential iron-sulfur, redox properties, surface charge effects (*C. vinosum, E. vacuolata, E. halophila, R. gelatinosus, R. globiformis*), **203**, 436
homeodomain, MHox, from muscle, inhibition of ternary complex formation at ce*fos* serum response element, **200**, 1742
hybrid, import into mitochondria, studies with modified form of cytochrome P450$_{scc}$ precursor (rat liver), **203**, 866
inositol 1,3,4,5-tetrakisphosphate-binding, isolation and characterization: synaptotagmin II (mouse), **205**, 1036
insulin-like growth factor binding, *see* Insulin-like growth factor-binding proteins
isoprenoid-modified, identification in *Halobacteria*, **203**, 972
isoprenylation in C6 glial cells, geranylgeraniol for (rat), **205**, 955
JAK2, tyrosine phosphorylation in HL60 and Kasumi-1 cells, granulocyte colony-stimulating factor effects (human), **203**, 922
KC/gro, interleukin-8-related, release from hepatocytes, modulation by lipopolysaccharide or proinflammatory cytokines (rat), **203**, 1398
K-*sam*/fibroblast growth factor receptor, soluble form in culture medium of gastric cancer cells, characterization (human), **202**, 1387
LamB, disulfide bond, probe of location by single-cysteine mutants (*Escherichia coli*), **201**, 242
laminin-binding, 67LR and galectin-3, inverse expression, correlation with invasive phenotype of trophoblastic tissue (human), **201**, 388
LIM, with autoepitope homologous to senescent cell antigen, isolation (human fetal liver), **201**, 1124
lipopolysaccharide-binding, receptor, *see* Lipopolysaccharide-binding protein receptors
Ly-6-related, structural similarity to phospholipase A_2 inhibitor 25-kDa and 31-kDa subunits in cobra plasma, **204**, 1212
lysosomal protective, tissue distribution (human), **205**, 38
lysosome-associated membrane
  h-lamp-2, cDNA sequencing (human), **205**, 1
  LAMP-1 and LAMP-2, identification as melanoma cellular ligands for galectin-3 (human), **201**, 1366
Mac-2-binding, identification as melanoma secreted ligand for galectin-3 (human), **201**, 1366
MAGE-1, localization to cytosol of melanoma cells (human), **204**, 710
membrane-associated P36, histidyl phosphorylation in Fao cells *in vitro* and *in vivo* (rat), **205**, 899
microtubule-associated, MAP1B, identification as substrate of ecto-protein kinase in cortical cell cultures undergoing synaptogenesis (rat), **205**, 1467
migration inhibitory factor-related, and CFTR, increased coexpression in cystic fibrosis tracheal gland cells (human), **201**, 1518
mitochondrial aspartate aminotransferase N-terminal region–cytosolic dihydrofolate reductase chimera, mitochondrial import, **201**, 1059
monocyte chemotactic, *see* Monocyte chemotactic proteins
natural resistance-associated macrophage, encoding gene, cDNA isolation and characterization (human), **204**, 1074
in neutrophils, aggregated IgG-stimulated tyrosine phosphorylation, role of Fcγ receptors (human), **199**, 653
non-specific lipid-transfer, localization in peroxisomes of lung type II cells (rat), **205**, 1581
P-30, *see* Onconase

p40^{phox}, association with p67^{phox} and absence in chronic granulomatous disease patients, **199**, 1378
p47^{phox}
  binding to GTP, ATP, and NADPH, relationship to respiratory burst oxidase (human), **198**, 191
  deficiency associated with chronic granulomatous disease, homologous dinucleotide deletion inducing, identification in Japanese patients, **199**, 1372
p53
  enhanced expression in ventral prostate during castration-induced regression (rat), **198**, 1189
  mutant, dephosphorylation and nuclear accumulation, role in TPA-induced rhabdomyosarcoma cell differentiation (human), **202**, 17
  T antigen-binding region, cellular proteins interacting with, identification (human), **202**, 490
  transcriptional regulation of proliferating cell nuclear antigen promoter in mammalian cells, **203**, 133
p85, association with tyrosine phosphorylated insulin receptor substrate-1 and β subunit, disruption by lovastatin (rat), **204**, 399
p100, binding of benzoquinoid ansamycins to, correlation with depletion of *erb*B2 gene product p185 (human breast cancer cells), **201**, 1313
PAP, mRNA expression in pancreatic acinar AR-42J cells, induction by acute pancreatitis-derived serum *in vitro* (rat), **204**, 238
parathyroid hormone-related, *see* Parathyroid hormone-related protein
particulate and cytosolic, phosphorylation in kidney, regulation by 1,25-dihydroxyvitamin D_3 (rat), **204**, 807
PAS10, tetratricopeptide repeat-domain, role in binding peroxisomal targeting signal -SKL (*Saccharomyces cerevisiae*), **204**, 1016
P-glycoprotein-related, overexpressed in multi-drug resistant cells, identification (mouse), **198**, 804
phosphates in, study with photoacoustic Fourier-transform infrared spectroscopy, **205**, 618
phospholipase A_2-activating, activation of Ca^{2+} oscillations and pancreatic amylase secretion in pancreatic acini, mediation by Gβ/phospholipase A_2/arachidonic acid cascades (rat), **203**, 1716
phospholipase A_2-inhibiting, from plasma, isolation and characterization (*Naja naja kaouthia*), **200**, 784
phosphorylation, stage-specific changes during spore germination, role of calmodulin (*Dictyostelium discoideum*), **201**, 430
plasma membrane, high-molecular-weight, specific binding to photoreactive Leu_7-MAP (rat hepatocytes), **203**, 200
poly[0.73(GVGVP),0.27(GKGVP)], reduction-driven hydrophobic folding to perform mechanical work, demonstration, **204**, 230
positively charged, activation of phosphoinositide catabolism and DNA synthesis in vascular smooth muscle cells: comparison with signaling/growth effects of low-density lipoprotein (human), **203**, 1700
prenylated, in regenerating liver, characterization (rat), **200**, 1713
presecretory, size, relationship to extent of signal recognition particle-mediated arrest of translation, **205**, 603
prion, *see* Prion protein; Prion-related protein
protector, inhibition of metal-catalyzed oxidation systems in presence of thioredoxin (*Saccharomyces cerevisiae*), **201**, 8
PufQ, protochlorophyllide association with (*Rhodobacter capsulatus*), **200**, 1679
Rabphilin-3A-interacting, identification as GTP cyclohydrolase I in PC12 cells (rat), **205**, 1409
rac, role in plasma membrane during NADPH activation in neutrophils (human), **198**, 1216
Ras
  and mitogen protein kinase, signaling pathway, inhibition by genistein, in prevention of cardiac muscle cell hypertrophy (rat), **202**, 1586
  regulation of multiple mitogenic pathways in A10 vascular smooth muscle cells (rat), **202**, 1252
Ras2, full-length and C-terminal truncated, activity of *Saccharomyces cerevisiae* CDC25 catalytic domain on, **199**, 497
Ras-related RAP2A, expressed in baculovirus–insect cell system, characterization, **198**, 973
recovery and quantitation in dilute solutions, two-step precipitation method removing free SDS and thiol reagents, **200**, 916
repair, associated L-isoaspartyl/D-aspartyl methyltransferase, amino acid polymorphisms (human), **203**, 491
retinoic acid-binding, expression during differentiation of trophoblast cells (human), **202**, 772
ribosomal
  L1 and L14, exon 1 of encoding gene, zinc finger protein FIII/YY1 binding, characterization (*Xenopus laevis*), **205**, 1236
  L13, primary structure (rat), **201**, 102
  L15, primary structure (rat), **201**, 108
  L22, mammalian, identification of heparin-binding protein HBp15 as (bovine, mouse), **199**, 706
  L24, primary structure (rat), **202**, 1176
  L27a, *Drosophila melanogaster* homolog, isolation and

sequencing, **198**, 748
P0, acidic, mRNA, increased expression after phorbol ester treatment (rat), **203**, 780
S11, cloning and sequencing of cDNA and primary structure analysis (*Xenopus laevis*), **203**, 768
S15a, primary structure (rat), **200**, 1498
S23, primary structure (rat), **202**, 314
*Sso*L12e, stoichiometry in 50S subunits, immunoblot assay (*Sulfolubus solfataricus*), **203**, 1140
SecA, traversal of lipid bilayer of phospholipid vesicles (*Escherichia coli*), **203**, 326
SH3-binding Yes-associated, YAP65, identification of repeating amino acid motif WWP, **205**, 1201
single-stranded DNA-binding, recognizing octamer motif in IgH gene, identification (mouse), **200**, 1307
sirolimus effector, p210, isolation from Molt-4, BJAB, and human T cells, **203**, 1
SM22, bovine aorta homolog, purification, characterization, and partial sequence analysis (chicken), **198**, 1275
sp38, with zona pellucida-binding property, purification and characterization from epididymal sperm (pig), **196**, 196; *erratum*, **198**, 408
sperm, P26h, antibodies, induction of polyspermy in sea urchin eggs (hamster), **202**, 181
sphingolipid activator, *see* Sphingolipid activator proteins
stat family, mediation of transcriptional activation of interleukin-6 response element in *junB* promoter (rat), **202**, 1181
sterol regulatory element-binding, SREBP-1a, 1b, 1c and SREBP-2, sterol-mediated regulation in hepatoma cells (human), **202**, 1460
stringent starvation, SspA, fused with glutathione *S*-transferase, binding to RNA polymerase and complementation of Δ*sspA* mutation, role in phage P1 replication (*Escherichia coli*), **201**, 123
surfactant D, pulmonary, carbohydrate recognition domain, expression and binding to lipopolysaccharides of gram-negative bacteria (bovine), **202**, 1674
taste receptor, direct extraction from intact tongue epithelium by liposome (*Rana catesbeiana*), **201**, 415
Tat
HIV-1
enhancement of interleukin-2 promoter activity via synergism with phorbol ester and calcium-mediated activation of NF-AT *cis*-regulatory motif (Jurkat cells), **205**, 467
induction of interleukin-10 secretion in infected H9 and U937 cells (human), **202**, 374
mediated transactivation, inhibition by thiamine disulfide, **205**, 967
from major immediate-early promoter of murine cytomegalovirus, TAR-independent transactivation by, role of HIV-1 *env* gene sequence, **203**, 1152
Tax, induced HTLV-I transcriptional activation, modulation by phosphorylation, **205**, 666
T4 dda, role in DNA–protein complex mediation of strand exchange, **205**, 1004
tetraheme, ammonia-forming cytochrome *c* nitrite reductase, molecular composition and spectroscopic properties (*Sulfurospirillum deleyianum*), **205**, 911
tissue-specific domains binding, identification in 5′-proximal regulatory region of mitochondrial brown fat uncoupling protein gene (rat), **204**, 867
transmembrane, with highly basic C-terminal region, tropomyosin-related cDNA encoding, isolation (*Saccharomyces cerevisiae*), **199**, 1363
trifunctional, mitochondrial fatty acid β-oxidation-associated, subunit cDNAs, structural analysis (human), **199**, 818
tyrosine residues, thrombin-induced phosphorylation in endothelial cells, inhibition by herbimycin A (human), **202**, 1645
–ubiquitin conjugates, 30-kDa hydrolase cleaving, characterization (bovine erythrocytes), **205**, 354
UL9, HSV-1-encoded, nucleotide and DNA coeffector binding sites, characterization (human), **199**, 1333
vasoactive intestinal peptide receptor-related, cDNA, cloning and functional expression in COS-7 cells (human), **200**, 769
VDJP, mediated DNA joining, distance and end configuration effects, **202**, 1134
water channel CHIP29, from ocular ciliary epithelium, cloning of cDNA homologous to CHIP28 (bovine), **204**, 861
zinc-containing, *see* Zinc proteins
zinc finger, *see* Zinc finger proteins
Protein synthesis
cell-free and cellular, inhibition by onconase, mechanism (rabbit reticulocytes, *Xenopus* oocytes), **204**, 156
role in generation of oscillatory current responses in oocytes (*Xenopus laevis*), **204**, 505
Protein-tyrosine kinase
Bruton's agammaglobulinemia, SH2 domain mutations, structural basis (human), **205**, 1270
c-abl, SH3 domain, interaction with MAPKAP kinase 2 *in vitro*, effect of MAPKAP kinase 2 proline-rich region (mouse), **203**, 1188
cytosolic, CPTK71, identity with p72^{syk} (porcine platelets), **200**, 1592

  insulin receptor, annexin I as potential inhibitor (human placenta), **203**, 813
  JAK-TYK, tyrosine phosphorylation in malignant plasma cell lines, effects of stimulation by interleukins 6 and 11 (human, mouse), **202**, 596
  Janus family, erythropoietin-induced activation, and cell proliferation, dominant negative effects of carboxy-truncated Jak2 mutant, **204**, 278
  KDR, VEGF-receptor, bacterially expressed cytosolic domain, biological activity and phosphorylation sites, **205**, 728
  mitogen-activated cascade, activation via erythropoietin receptor in BaF/ER cells, **203**, 1912
  p56^{lck}
    association with CD45, role of CD4, CD8, and T cell receptor stimulation (human), **198**, 88
    effect of CD28 crosslinking in leukemic Jurkat cells (human), **199**, 1466
    phosphorylation by Ca^{2+}/calmodulin-dependent protein kinase type II, **198**, 67
  p72^{syk}, from spleen, and cytosolic protein-tyrosine kinase CPTK71 from platelets, relationship (pig), **200**, 1592
  p185, depletion through binding of benzoquinoid ansamycins to p100, **201**, 1313
  α-platelet-derived growth factor receptor, mediation of locomotion of hematopoietic cells and fibroblasts via chemotaxis and chemokinesis, **204**, 628
  pp56^{lck}, specificity for tyrosine, role of motif at subdomain VIII, **205**, 1114
  pp60$^{v\text{-}src}$, inhibition by halistanol trisulfate from marine sponge (transformed rat cells), **203**, 260
  receptor, *see* Receptor tyrosine kinase
  related activity of fetal lung insulin receptors, effect of high glucose and insulin *in vitro* (rat), **202**, 694
  role in
    regulation of muscarinic receptor-activated cation channels (guinea pig ileum), **203**, 1392
    thyrotropin-releasing hormone-induced prolactin secretion in GH3 cells (rat), **199**, 1447
  signal transduction mediated by, in glycosylphosphatidylinositol toxin regulation of interleukin-1α and TNF-α expression in macrophages (*Trypansoma brucei*), **205**, 984
  Src
    BiP as substrate *in vitro*, **201**, 1548
    phosphorylation of PTP1C containing Src homolgy-2 domains for down-regulation of cell proliferation (rat fibroblasts), **204**, 874
  v-Fps, transformed fibroblasts, phosphatidylcholine-specific phospholipase D activity, elevation (rat), **203**, 1195
  v-HaRas and v-Src, intracellular signals mediated by, differential effects of protein phosphatase 2A (mouse), **205**, 1043
Protein-tyrosine kinase inhibitors
  genistein, effect on adenosine: competitive antagonist for P$_1$-purinergic receptor (rat FRTL-5 thyroid cells), **203**, 1488
Protein-tyrosine phosphatase
  activation in insulin-sensitive fibroblasts by high glucose (rat), **201**, 71
  in adipocytes, identification by molecular cloning (rat), **202**, 902
  inhibition by angiotensin II in pheochromocytoma cells, role of angiotensin II type 2 receptor (rat), **198**, 60
  non-receptor-type PTP36, with homology to band 4.1, cDNA cloning and expression in T-lineage cells (murine thymus), **203**, 479
  PTP1C, with Src homology-2 domains for down-regulation of cell proliferation, tyrosine phosphorylation by Src kinase (rat fibroblasts), **204**, 874
  with Src homology 2 regions, phosphorylation and *in vitro* modulation by insulin receptor kinase, **199**, 780
  transmembrane, mIA-2, isolated from brain, sequence and bacterial expression (mouse), **204**, 930
Proteoglycans
  fibroblast extracellular matrix, effect of *ras* transformation (rat kidney), **200**, 925
  synthesis
    and distribution in endothelial cells, comparative effects of thrombin and thrombin peptide activating receptor (human), **205**, 1625
    during HL-60 cell differentiation (human), **203**, 1682
Proteoliposomes
  cytochrome *c* oxidase in, image analysis with Pt/C and W/Ta shadowing (bovine heart), **203**, 331
Proteolysis
  β-amyloid peptide from Alzheimer disease brain by gelatinase A (human), **205**, 1755
  α$_1$-antitrypsin, catalytic effects of matrilysin: comparison with other matrix metalloproteinases (human), **204**, 613
  enhancement in CHO cells, enhancement by arsenite, **202**, 1015
  limited, and unsaturated fatty acids, activation of 120-kDa protein kinase PKN with leucine zipper-like sequence (COS-7 cells), **204**, 348
  ubiquitin-dependent, photoreceptor G-protein transducin as substrate (bovine), **200**, 1169
Protochlorophyllide
  association with PufQ protein of *Rhodobacter capsulatus*, **200**, 1679

Protons
  ejection by Ca^{2+} pump of sarcoplasmic reticulum, interaction with vanadate oligoanions (rabbit), **205**, 161
  extracellular, modulation of osteoclast Ca^{2+} receptors (rat), **199**, 742
  –tetracycline antiporter, truncated at last transmembrane helix, rapid degradation in *Escherichia coli* and protective effect of overproduced GroEL/ES, **202**, 258
Protoplasts
  guard cell, superoxide radicals generated in, role in regulation of stomatal movements (*Vicia faba*), **205**, 30
Protoporphyrin IX
  and analogs, erythroid differentiation induction in erythroleukemia K562 cells (human), **198**, 720
Protoxins
  altered activation by midgut enzymes from *Bacillus thuringiensis*-resistant strain of *Plodia interpunctella*, **198**, 940
Pseudogenes
  17β-hydroxysteroid dehydrogenase I, differential transcription: potential role as breast–ovarian cancer gene (human), **201**, 1327
Pseudohyphae
  induction in *Saccharomyces cerevisiae* haploids and diploids by acid proteinase-related gene, **205**, 1079
Pseudomonas aeruginosa
  lipopolysaccharide, binding of pulmonary surfactant protein D carbohydrate recognition domain, demonstration, **202**, 1674
  Vitreoscilla globin gene promoter in, regulatory characteristics in response to oxygen availability, **202**, 535
Pseudomonas cepacia
  strain AC1100, metabolism of phenoxyacetic acid and phenol, *meta*-cleavage pathway for, identification, **204**, 983
Pseudomonas sp.
  KKS102, *bphA* and *bphB* genes involved in degradation of biphenyl and polychlorinated biphenyls, identification, **202**, 850
Psoralen
  –ultraviolet light A-treated HUT-78 cells, interferon-γ mRNA levels, assay by competitive PCR (human), **203**, 935
Ps4 receptors
  distribution in brain and peripheral tissues (rat), **200**, 958
Purinergic receptors
  P$_1$, genistein as competitive antagonist in rat FRTL-5 thyroid cells, **203**, 1488
  P$_{2z}$, operated ion channel, role in extracellular ATP increase of lymphocyte permeability to NH$_4^+$ (human), **202**, 1511
Purkinje cells
  inside-out patches, detection of inositol 1,4,5-trisphosphate-activated Ca^{2+} permeable channels (mouse), **199**, 1128
Putrescine
  effect on restoration of DNA synthesis and expression of UV resistance in Cockayne syndrome cells, **205**, 1018
PUVA, *see* Methoxsalen, plus UVA
Pyridine
  induction of dermal cytochrome P450 isozymes 1A1, 2B1, and 3A (mouse), **199**, 1400
Pyridine nucleotides
  and adenine nucleotides, status during Ca^{2+}- and inorganic phosphate-induced mitochondrial permeability transition (rat liver), **200**, 1615
Pyrrole
  derivatized compounds, as glutathione-derived antioxidants, glutathione peroxidase and glutathione reductase activities toward, **203**, 1668
Pyruvate carboxylase
  cDNA, cloning (human kidney), **202**, 1009
Pyruvate dehydrogenase
  E1 component, enzymatically active, expression in *Escherichia coli* (human), **203**, 225

Q

Quartz crystal microbalance
  in quantitative analyses of monosialoganglioside reconstituted in sphingomyelin and glucosylceramide membranes against wheat germ agglutinin, **204**, 551
Quinoid dihydrobiopterin
  6-biopterin reduction to, catalysis by thioredoxin reductase (human melanocytes), **204**, 43
Quinones
  Q$_6$ and Q$_8$, and other isoprenoid compounds, biosynthesis in cattle filarial parasite *Setaria digitata*, **205**, 24

R

Rabphilin-3A
  interacting protein, identification
    as β-adducin (bovine), **205**, 460
    as GTP cyclohydrolase I in PC12 cells (rat), **205**, 1409
  localization
    to Ca^{2+}-dependent exocytosis sites in PC12 cells (rat), **198**, 158
    to synaptic vesicle (rat), **202**, 1235
  phosphorylation
    by calmodulin-dependent protein kinase II, **205**, 1776

    - by cyclic AMP-dependent protein kinase, **203**, 1927

Radiation
- apoptotic response of WEHI 231 cells to, mediation by ceramide (mouse), **202**, 710

Random amplified polymorphic DNA
- markers distinguishing inbred mouse strains Balb/c and SJL/J, identification with arbitrary single short primers, **203**, 659

RANTES, *see* Chemokines, RANTES

Rapamycin, *see* Sirolimus

Rapid amplification of cDNA ends
- in cloning of vascular-type vasopressin receptor (human), **203**, 72

Receptor tyrosine kinase
- p185^{neu}, nuclear localization and association with transcriptional transactivation (rat), **203**, 1589

Recombinase
- activating gene 1, evolutionary conservation and molecular cloning, **205**, 687

Recombination
- homologous
    - in p53 gene replacement with *lacZ* gene in murine stem cells and in mouse, **202**, 830
    - role in transfer of hypoxanthine phosphoribosyltransferase gene-containing YAC into human cells, **200**, 1693

Reconstitution
- functional, Ehrlich cell plasma membrane ferricyanide reductase, **205**, 1109

Recoverin
- non-myristoylated recombinant, inhibition of rhodopsin phosphorylation (bovine), **203**, 121

Redox equilibrium
- two-proton-dependent, evidence in archael Rieske iron–sulfur cluster (*Sulfolobus acidocaldarius*), **202**, 252

Redox potential
- cytochrome c_{554}, change with pH (*Achromobacter cycloclastes*), **204**, 120

Reduction
- disulfide by superoxide *in vitro:* model of intracellular redox modulation, **200**, 1586
- driven hydrophobic folding, demonstration in model protein with performance of mechanical work: electromechanical transduction, **204**, 230

Regulatory elements
- downstream, activation of bovine leukemia virus promoter, **202**, 1553

Renin
- –angiotensin system, role in regulation of vascular natriuretic peptide receptor in hypertensive rat, **205**, 1595

Replication
- discontinuous, DNA: Okazaki fragments (*Escherichia coli*), **198**, 844
- herpes simplex virus-1, inhibition with hydrophobized antisense oligonucleotides (Vero cells), **203**, 959
- HIV-1 in infected monocytes and peripheral blood mononuclear cells, inhibition by interleukin-10 (human), **202**, 374
- λ plasmid, regulatory role of *ori*λ transcriptional activation (*Escherichia coli*), **205**, 802
- phage P1, role of glutathione *S*-transferase–SspA fusion binding to RNA polymerase and complementing Δ*sspA* mutation, **201**, 123
- simian virus 40 daughter chromosomes, inverse relationship between catenation and superhelicity (CV-1), **201**, 1510
- viral, enveloped animal viruses into cells, inhibition by concanamycin A, **201**, 1270

Repulsion molecules
- carcinoembryonic antigens function as, evidence in various cell types, **204**, 1225

Reserpine
- effect on processing of β/A4 amyloid precursor protein in hippocampus (rat), **202**, 293

Resorption
- osteoclastic, bone, effects of extracellular calcium (bovine, rat), **202**, 456

Respiration
- mitochondrial
    - impairment, association with inherited hyperproduction of free radicals (rat liver), **205**, 180
    - inhibition by aminoethylcysteine ketimine decarboxylated dimer impairment of electron transport on Complex I (bovine), **199**, 755
- V79 cell mutant deficient in, enhanced sugar transport, correlation with glucose transporter glycosylation (hamster), **200**, 1313

Respiratory burst
- neutrophil, priming by diadenosine polyphosphates AP_4A and AD_3A, role of intracellular calcium (human), **202**, 218

Respiratory burst oxidase
- activation, role of p47^{phox} binding to GTP, ATP, and NADPH (human), **198**, 191
- cytosolic component p40^{phox}, association with p67^{phox} and absence in chronic granulomatous disease patients, **199**, 1378

Respiratory chain enzymes, *see also specific enzymes*
- and mitochondrial DNA 4977-bp deletion, correlation in aging skeletal muscles (human), **205**, 772

Response elements, *see also specific response elements*
  homodimer-type, vitamin D receptor-associated, identification in calcitriol 24-hydroxylase gene promoter (rat), **202**, 1366
  TAR, independent transactivation by Tat from major immediate-early promoter of murine cytomegalovirus, role of HIV-1 *env* gene sequence, **203**, 1152
  TRE/RARE/ERE, identification in α_2-macroglobulin gene promoter (human), **202**, 65
Restriction endonucleases
  EcoRII, two subunits, interaction with two DNA recognition sites (human), **198**, 885
  mediated integration of blastocidin S resistance marker, in isolation of cytokinesis mutants (*Dictyostelium discoideum*), **205**, 1808
Restriction fragment length polymorphism
  at atrial natriuretic peptide gene locus, association with aldosterone responsiveness to angiotensin in aldosterone-producing adenoma (human), **204**, 1312
  and PCR, mismatch detection of dopamine D2 receptor polymorphism (human), **202**, 757
Restriction landmark genomic scanning
  expanded production system, in construction of genetic linkage map (mouse), **205**, 1922
Restriction map
  κ-opioid receptor and homolog genes (mouse), **205**, 1353
  transcription factor-1 gene (rat), **204**, 1358
Reticulocytes
  lysate, protein synthesis, inhibition by onconase, mechanism (rabbit), **204**, 156
Retina
  expression of constitutive and inducible isoforms of nitric-oxide synthase mRNA (human), **205**, 85
  specific footprint, in retina-specific regulatory region of interphotoreceptor retinoid-binding protein gene, identification (human), **203**, 1875
Retinal dehydrogenase
  role in retinoic acid synthesis in hepatic cytosol (rabbit), **205**, 1278
Retinal oxidase
  role in retinoic acid synthesis in hepatic cytosol (rabbit), **205**, 1278
Retinoic acid
  all-*trans* isomer
    and 9-*cis* isomer, induction of cellular retinoic acid-binding protein-II in osteosarcoma cells (human), **200**, 1125
    and 1α,25-dihydroxyvitamin D_3, synergistic induction of U937 cell differentiation, association with retinoid X receptor α expression (human), **203**, 272
  effects on
    fibroblast-induced collagen gel contraction (human gingiva), **205**, 455
    5-lipoxygenase induction and activity in HL-60 cells (human), **205**, 1572
  induced CD38 in HL-60 cells, GDP-ribosyl cyclase activity as measure (human), **205**, 722
  inhibition of 3T3 adipogenesis, role of cytoplasmic retinoic acid-binding protein, **204**, 257
  and phorbol esters, synergy in induction of protein kinase C activation (rat brain), **204**, 112
  suppression of soluble lectin L-14 gene expression in transformed neural cells (rat), **199**, 540
  synthesis in hepatic cytosol, role of retinal oxidase and retinal dehydrogenase (rabbit), **205**, 1278
Retinoic acid receptors
  mRNA, expression and regulation in MG-63 osteosarcoma cells, characterization (human), **205**, 1179
  nuclear, determination and physicochemical properties (rat liver), **204**, 439
  subtypes α, β, and γ, mRNAs, expression during differentiation of trophoblast cells (human), **202**, 772
  and triiodothyronine, repression of c-*fos* gene transcription, identification of mediating promoter elements (GH1 cells), **205**, 135
Retinoic acid response elements
  cis-acting, identification in 5′-flanking region of α-fetoprotein (rat), **205**, 700
  detection in cytochrome P450 1A1 gene promoter region (human), **201**, 1205
  nuclear orphan receptor-binding, detection in keratinocytes, **203**, 545
Retinoid receptors
  role in regulation of cytochrome P450 1A1 gene (human), **201**, 1205
Retinoids
  and fatty acids, synergistic action on adipose cell differentiation (mouse), **204**, 498
Retinoid X receptors
  detection with specific monoclonal and polyclonal antibodies (mouse), **204**, 525
  expression in P19 embryonal carcinoma cells and embryonic stem cells (mouse), **200**, 1252
  type α, expression in U937 cells treated with all-*trans*-retinoic acid and 1α,25-dihydroxyvitamin D_3, association with monocytic differentiation (human), **203**, 272
Retrotransposition
  LINE 1 element, induction of deletion in target DNA: model for deletion and variable length duplication (*Drosophila*

melanogaster), **202**, 111
Retrotransposons
  copia, differential expression in *Drosophila hydei* and *D. melanogaster* cell lines, strong transcriptional activator responsible for, **203**, 392
Reverse transcriptase, *see* RNA-directed DNA polymerase
RFLP, *see* Restriction fragment length polymorphism
Rheumatoid arthritis
  chronic, autoantibodies from affected patient, Golgi antigen recognized by, molecular cloning and sequence analysis, **205**, 1399
  synovial cells from affected patients, interleukin-1β processing, **199**, 1035
Rho A
  complex with rho GDP dissociation inhibitor, purified from neutrophil cytosol, stability, role of bound GDP, **205**, 174
Rhodamine B
  biodegradation by cecal microflora (rat), **200**, 1544
Rhodopsin
  immunofluorescence microscopic localization in *Chlamydomonas reinhardtii*, **205**, 1025
  phosphorylation, inhibition by non-myristoylated recombinant recoverin (bovine), **203**, 121
  secondary structure, assignment of structural elements, **198**, 1040
Riboflavin
  in photodegradation of lindane and DDT, role of reactive oxygen species, **199**, 1284
Ribonucleoproteins
  heterogeneous, A1 and A2/B1, ADP-ribosylation in HeLa cells (human), **204**, 772
Ribonucleotide reductase
  association with HeLa cell mitochondria, **203**, 46
D-Ribose
  induction of apoptosis in quiescent peripheral blood mononuclear cells (human), **201**, 1109
Ribosomes
  associated proteins, *see* Proteins, ribosomal
  large subunit, detection of channel-like projection (*Thermomyces lanuginosus*), **205**, 1869
Ribozymes
  hammerhead, targeting of HIV-1 long terminal repeat, **203**, 889
  hepatitis delta virus, role in transcription after polyadenylation, **205**, 864
Ricin
  associated domain, identification at *Mrc1* gene N-terminus (mouse), **198**, 682
Rifampicin, *see* Rifampin
Rifampin
  prevention of amyloid β protein aggregation and neurotoxicity *in vitro* (rat), **204**, 76
RNA
  alternative splicing
    calcitonin/calcitonin gene-related peptide minigene transcripts (human thyroid cells), **200**, 993
    fibroblast growth factor receptor 1 mRNA, generation of multiple mRNAs with two open reading frames (mouse), **205**, 1057
    fibronectin IIICS domain, regulation by cytokines (human), **199**, 1005
    role in derivation of isoforms of renal EP_3 receptor (rat), **199**, 834
    tissue-dependent, mRNA for precursor of non-Aβ component of Alzheimer's disease amyloid (human), **205**, 1366
  antisense
    expression with binary *tet*-system for specific silencing of target gene, **202**, 1664
    to N-glycosylation gene, ALG7, inhibition of protein N-glycosylation and secretion by *Xenopus* oocytes, **198**, 1248
    src, expression, inhibition of cell proliferation and erythropoietin-induced erythroid differentiation in K562 human leukemia cells, **201**, 1534
  complementary, pUMA vector-derived, recombinant polypeptides translated from, translocation through microsomal membranes and export out of oocytes (*Xenopus laevis*), **204**, 1346
  hepatitis C virus, internal initiation, role of complete 5′ noncoding region (human), **199**, 425
  messenger
    acidic ribosomal protein P0, increased expression after phorbol ester treatment (rat), **203**, 780
    activin-βA subunit, overexpression, association with decreased testicular activin type II receptor mRNA levels (mouse), **203**, 105
    α1C-adrenergic receptor, distribution in tissues, analysis by RNase protection assay and comparison with α1B and α1D (rat), **200**, 1177
    ALG7 gene, expression, correlation with dolichol-P-dependent *N*-acetylglucosamine-1-P transferase activity during postnatal submandibular gland development (hamster), **204**, 284
    α-amylase, poly(A) tail shortening in vegetative tissues of *Oryza sativa*, **202**, 1031
    β-amyloid protein precursor, expression in C6 glioma

cells, effect of ciliary neurotrophic factor (rat), **204**, 391
angiotensin II type 2 receptor gene, expression in lung (human), **203**, 1842
arginine-vasopressin receptor, detection in hippocampus (rat), **205**, 1702
atrial natriuretic peptide, expression in gastrointestinal tract (rat), **202**, 562
atrial natriuretic peptide receptor, expression in uterine tissue during pregnancy (human), **203**, 602
basic fibroblast growth factor, sense and antisense transcripts, expression in unfertilized oocytes and differentiated adult tissues (human), **205**, 577
cathepsin B, transcriptional regulation in B16 melanomas of varying metastatic potential (mouse), **202**, 429
CD44, expression in colorectal adenocarcinomas (human), **200**, 1015
cellular retinoic acid-binding protein-II and retinoic acid receptors, expression during differentiation of trophoblast cells (human), **202**, 772
cholesterol 7α-hydroxylase, expression in HepG2 cells, effects of bile acids and steroid/thyroid hormones (human), **198**, 546
contrapsins, regulation by interleukin-6 (rat), **201**, 222
cyclin B1, differential expression in rodent cells, resulting from alternate polyadenylation (Chinese hamster, rat), **202**, 908
cyclin D1, expression
  during growth cycle and TGF-α-induced mitogenic transitions in primary hepatocytes (rat), **204**, 91
  in vascular endothelial cells, suppression by TNP-470 (human), **204**, 1067
cyclo-oxygenase, expression in amnion at term
  enzyme types 1 and 2 (human), **198**, 304
  regulation by mRNA-binding proteins (human), **203**, 67
cystic fibrosis transmembrane regulator, increased coexpression with S100 calcium-binding protein MRP8 and MRP14 mRNAs in cystic fibrosis tracheal gland cells (human), **201**, 1518
cytochrome P4501A1
  effects of dietary ellagic acid inhibition of benzo[a]pyrene hydroxylase (rat liver), **201**, 1477
  levels in hepatocytes *in vitro*, effect of thiabendazole (rabbit), **202**, 1483
cytochrome P4503A, levels after ethylbenzene exposure (rat), **202**, 1259
differential display method for gene identification and screening, improvements (mouse), **199**, 564
elastin, suppression by dexamethasone in cultured dermal fibroblasts (human), **201**, 1189
encoding variant Fas antigen truncated form, identification (rat liver), **198**, 666
eotaxin, increased expression in allergen-challenged lung (guinea pig), **205**, 788
ferritin H, increase in HeLa cells exposed to arsenite (human), **205**, 590
fibroblast growth factor and FGF receptor gene families, expression in upper gastrointestinal tract (human), **199**, 1113
GAP-43, 3′ untranslated region and carboxy-terminus peptide-encoding segment, mediation of neurite growth factor-induced stabilization (PC12 cells), **200**, 789
$G_{i\alpha}$ gene, interleukin-1β-regulated expression via lipid mediators in tracheal muscle (guinea pig), **203**, 1889
β-globin, intronless and 3′ splice site-deleted transcripts, accumulation mechanisms (mouse), **203**, 128
glucocorticoid receptor, localization during early *Xenopus laevis* embryogenesis, **199**, 734
glucose-6-phosphatase, hepatic levels, effect of acute diabetes (rat), **205**, 680
GLUT1, expression in preimplantation embryo (mouse), **199**, 1525
γ-glutamyl transpeptidase, multiple expression in postnatal epididymis, developmental regulation (rat), **198**, 554
gonadotropin-releasing hormone receptors, pituitary and gonadal, nucleotide sequence (rat), **200**, 1359
G protein-coupled receptor kinase 4 isoforms, identification by molecular cloning (human), **199**, 848
growth associated protein GAP-43, nerve growth factor-induced stabilization, role of carboxy terminus-encoding region, mutational analysis, **205**, 1380
hepatic actin, profilin, and extracellular matrix proteins, effects of CCl_4 and partial hepatectomy (rat), **198**, 568
hepatitis delta virus, transcription after polyadenylation, role of ribozyme, **205**, 864
hepatocyte growth factor-like protein, expression during liver regeneration and inflammation (rat), **203**, 666
histamine H_2 receptor and associated protein, localization in stomach (rat), **198**, 1195
HIV-1 5′-TAR region, targeting by hammerhead ribozyme, **203**, 889
hsp70, overexpression preceding butyrate-induced apoptosis in lymphoid cells (human), **198**, 257
in immortalized oligodendrocytes, levels, effect of myelin basic protein gene 3′-untranslated region (mouse), **204**, 1352
insulin-like growth factor 1, expression by osteoblasts, stimulation by calcitonin (mouse), **199**, 876
insulin receptor from fetal lung, abundance, effect of high

glucose and insulin *in vitro* (rat), **202**, 694
interferon-γ, assay in psoralen/UVA-treated HUT-78 cells by competitive PCR (human), **203**, 935
interleukin-12, interferon-γ-induced expression in J774 macrophages (mouse), **198**, 857
interleukin-2 receptor α chain, stabilization by HTLV-1 Rex protein in L cells (mouse), **198**, 243
kexin-like processing protease PACE4 isoforms, distribution in various tissues (rat), **202**, 1215
lipoprotein lipase, regulation in heart during development (rat), **202**, 838
in lymphocytes from familial amyotrophic lateral sclerosis patients, in deduction of Cu/Zn superoxide dismutase mutant, **204**, 572
manganese-containing superoxide dismutase, expression in hepatic mitochondria, effect of chronic and acute ethanol treatment, **201**, 1356
mast cell protease 1, development of specific probes from cDNA, **199**, 593
metallothionein-II, increase in HeLa cells exposed to arsenite (human), **205**, 590
MUC2 and MUC3, alteration of expression in colonic carcinoma cells (human), **199**, 1012
myosin heavy chain, growth hormone-regulated levels in skeletal muscle, modulation by restricted diet in hypophysectomized rat, **198**, 97
NCAM 140-kDa isoform, expression in dermal microvascular endothelial cells (human), **203**, 686
nerve growth factor, brain-derived neurotrophic factor, and neurotrophin-3, expression in osteoblastic cell line (mouse), **198**, 891
neuronatin, highly expressed in neonatal brain, cloning (rat), **201**, 1227
neurotensin receptor, expression in colon cancer cells and normal colonic epithelium, binding studies and RT-PCR (human), **203**, 465
nitric-oxide synthase
  constitutive and inducible enzymes, retinal expression (human), **205**, 85
  endothelial constitutive enzyme, increased expression in aorta during pregnancy (rat), **205**, 905
  inducible enzyme, expression enhancement by nitric oxide synthesis inhibition in model of chronic liver inflammation (rat), **204**, 635
  induction in epithelial cells by oxidative stress (human), **199**, 1518
  interleukin-1β-induced expression in insulin-producing RINm5F cells, dissociation, **203**, 1542
opioid receptors μ, δ, and κ, distinct distributions in brain (rat), **205**, 1438
p53
  enhanced expression in ventral prostate gland during castration-induced regression (rat), **198**, 1189
  transcription in rhabdomyosarcoma cells, effects of TPA (human), **202**, 17
PAP, expression in pancreatic acinar AR-42J cells, induction by acute pancreatitis-derived serum *in vitro* (rat), **204**, 238
platelet-activating factor receptor, detection in B cells by reverse transcript-PCR (human), **202**, 1373; *erratum*, **204**, 436
preprotachykinin, fourth isoform, encoding for substance P in intestine (rat), **202**, 796
prion-related protein, expression in rat endocrine pancreatic cells, regulation by human growth hormone and dexamethasone, **201**, 1220
prostacyclin synthase, tissue distribution (human), **200**, 1728
prostaglandin-endoperoxide synthase-1 and -2, detection in osteoblasts (human), **198**, 955
RH blood group, expression in leukocytes (human), **202**, 1497
RhPI-α and RhPI-β isoforms expressed in immature erythroblasts, identification (human), **198**, 1135
ryanodine receptor, identification in neonatal and slow- and fast-twitch skeletal muscles (rabbit), **203**, 1725
S100 calcium-binding protein MRP8 and MRP14, and CRTR, increased coexpression in cystic fibrosis tracheal gland cells (human), **201**, 1518
slow skeletal troponin T isoform, derivation from alternative splicing of single gene (human), **199**, 841
somatostatin receptor subtype, expression in GH_3 cells, regulation by somatostatin (rat), **202**, 1738
splicing in Lettre Ehrlich ascites tumor cell mitochondria, role of associated endoribonuclease (mouse), **196**, 47; *erratum*, **205**, 2013
stem cell factor and c-*kit*, localization in placental tissue (human), **205**, 1762
steroid hormone receptors, expression and regulation in MG-63 osteosarcoma cells, characterization (human), **205**, 1179
superoxide dismutase, interleukin-1β-induced expression in insulin-producing RINm5F cells, dissociation, **203**, 1542
transforming growth factor-β_1, increase in cardiac fibroblasts after angiotensin II-induced expression of transcription factors (neonatal rat), **205**, 105
vascular endothelial growth factor
  expression in cardiac cells, stimulation by cobalt (rat), **204**, 794

hypoxia-induced expression in U-937 cells, mediation by adenosine, **204**, 318
modification, fluorescence postlabeling assay, **200**, 1239
non-AUG codons in COS-1 cells, translation initiation from, dependence on mRNA species, **201**, 567
seven transmembrane domain receptor subtypes, in reverse transcription–PCR identification of receptors in NG108-15 cells (mouse), **205**, 1311
small cytoplasmic, formation of ribonucleoprotein complex with SRP54 homolog Ffh *in vivo* (*Bacillus subtilis*), **199**, 1394
syndecan-1, expression in liver cells (rat), **204**, 944
transfer
asparagine-accepting, gene mutation, association with chronic progressive external ophthalmoplegia (human), **204**, 482
inactivation, role in onconase inhibition of protein synthesis in reticulocyte lysates and oocytes (frog, rabbit), **204**, 156
mitochondrial tRNA-Leu(UUR) gene, point mutation at nucleotide pair 3291, identification in MELAS syndrome patient, **202**, 1624
in vitro transcribed, and other *in vitro* system components, separate irradiation with He-Ne laser, subsequent increase in transcription and translation activities, **203**, 991
RNA-directed DNA polymerase
differential requirements in detection of circular and linear *Sry* gene transcripts in preimplantation embryo (mouse), **198**, 492
HIV-1
chiral discrimination of enantiomeric 2′-deoxythymidine 5′-triphosphate, **200**, 1023
with Glu→Lys mutation at position 138, sensitivity to HIV-1-specific RT inhibitors, **201**, 1305
RNA-directed DNA polymerase inhibitors
HIV-1-specific, sensitivity of HIV-1 RNA-directed DNA polymerase with Glu→Lys mutation at position 138, **201**, 1305
RNA helicase
DEAD-box family, nuclear antigen homolog, cDNA cloning and sequencing (human), **199**, 748
RNA polymerase
DNA-directed, *see* DNA-directed RNA polymerase
RNase A, *see* Pancreatic ribonuclease
RNase protection assay
in mapping of α1C-adrenergic receptor mRNA distribution in tissues, and comparison with α1B and α1D (rat), **200**, 1177
Root cultures
detection of calcium-dependent proteinase (*Arabidopsis thaliana*), **199**, 1089
ROR/RZR orphan receptors
RORγ, identification, cloning, and expression in skeletal muscle (human), **205**, 1976
Rose bengal
in photodegradation of lindane and DDT, role of reactive oxygen species, **199**, 1284
RT-PCR, *see* Polymerase chain reaction, reverse transcription
RU486, *see* Mifepristone
Rusticyanin
with high oxido-reduction potential, active site geometry (*Thiobacillus ferrooxidans*), **203**, 1655
Ryanodine
sensitive Ca^{2+} oscillations, expression in cardiac myocytes, regulation by transforming growth factor-β_1 (rat), **204**, 678
Ryanodine receptors
transcripts, identification in neonatal and slow- and fast-twitch skeletal muscles (rabbit), **203**, 1725

S

Saccharomyces cerevisiae
associated porins, structure and homologies with mitochondrial porins, **200**, 908
cloning of cDNA homologous to yeast CDC10 (human), **202**, 82
defective in mitochondrial ATP synthase subunit 8, rescue by heterologous gene from *Aspergillus nidulans*, **203**, 1567
expression of soluble active human β-1,4-galactosyltransferase, **201**, 160
haploids and diploids, pseudohyphae formation in, induction by acid proteinase related gene *ACPR*, **205**, 1079
human Oct-2 C-terminus function as activation domain in, analysis, **205**, 1998
mitochondria
detection of topoisomerase like activity, **198**, 387
evidence for site-specific endonuclease recognizing sequence 5′GCCGGC, **201**, 208
open reading frame *GTA1085*, homology with human active-gene-repairing helicase *ERCC6*, **201**, 310
sporulation, role of glutathione, **205**, 1151
starved cells, cAMP, ethanol, and CO_2 production, effects of D-glucose anomer addition, **203**, 640
suil gene translation initiation factor, human isolog, identification with expressed sequenced tags, **198**, 288
Salinity
effect on superoxide production by membrane vesicles

(*Halobacterium halobium*), **205,** 1736

Salivary glands
- submandibular, postnatal development, dolichol-P dependent *N*-acetylglucosamine-1-P transferase and ALG7 gene expression during, correlation (hamster), **204,** 284

Salmonella typhimurium
- activation of HIV-1 in chronically infected promonocytic cells by induction of TNF-α production (human), **201,** 16

Sarcoglycan complex
- selective defect, in severe childhood autosomal recessive muscular dystrophy (human), **203,** 979

Sarcoplasmic reticulum
- Ca^{2+}-ATPase isoforms, expression in skeletal muscle fibers, differential effects of thyroid hormone (rat), **203,** 1035
- Ca^{2+} channels, regulation by calsequestrin, **199,** 1120
- Ca^{2+} pump, protons ejected by, interaction with vanadate oligoanions (rabbit), **205,** 161
- cardiac
  - Ca^{2+}-ATPase, phospholamban-induced inhibition, reversal by tannin (rabbit), **202,** 1668
  - junctional, ATP-independent Ca^{2+} uptake mechanism, stimulation by inositol tetrakisphosphate (dog), **204,** 69
  - ryanodine receptor, association with FK-506-binding protein (dog), **198,** 701
- potassium channels from, subconducting state of, effect of asymmetrical lipid charge (rabbit), **199,** 1081
- streptozotocin-induced diabetic heart, Ca^{2+}-ATPase expression (rat), **203,** 113

Satellite cells
- proliferation and differentiation, regulation by macrophages (human), **202,** 1688

Scatter factor, *see* Hepatocyte growth factor

Schizophrenia
- role of dopamine D2 receptor polymorphism detected by mismatch PCR RFLP (human), **202,** 757

Schizosaccharomyces pombe
- protein extracts, detection of UV-induced excision pair enzymes, **198,** 770
- UV-inducible transcripts from, isolation, **202,** 1113

Screening
- pharmacophore-directed, in identification of ET_A-selective endothelin antagonists (human), **201,** 228

SDS, *see* Sodium dodecyl sulfate

γ-Secretase
- for amyloid precursor protein, identification of multicatalytic enzyme as (human), **204,** 333

Secretin
- cDNA sequence and genomic organization (mouse), **200,** 1066

Sedimentation equilibrium centrifugation
- and ^1H NMR, in analysis of calmodulin and polylysine interaction, **198,** 309

Seed molecules
- amyloid β protein long-tail form Aβ1-42/43, in cerebral deposits of Alzheimer's disease, biochemical evidence (human), **205,** 834

Seeds
- cycad, preparation, apoptosis in brain and gut tissues after feeding (mouse), **205,** 327

E-Selectin
- expression on endothelial cells, and tumor cell adhesion, induction by endothelial cell activation factors released from activated platelets (human), **203,** 1605
- role in xenograft rejection, evidence from molecular and functional analysis (pig), **204,** 763

L-Selectin
- inhibition of binding in intercellular adhesion, effect of ligand clustering (mouse), **204,** 969

P-Selectin
- dependent leukocyte rolling and adhesion in postcapillary venules, induction *in vivo* by mast cell activation (rat), **203,** 1043

Selectins
- fucosylated structures as ligands for, biosynthetic control: substrate inhibition by precursor structures (human), **201,** 78

Selenium
- containing abzyme
  - generation by chemical mutation process, **198,** 1240
  - physicochemical and enzymic properties, **202,** 1645
- dietary, regulation of glutathione *S*-transferase gene expression and enzyme activity, **202,** 271

Seminal vesicle fluid
- purification of cell–cell adhesion regulator (pig), **205,** 1206

Semliki Forest virus
- entry into cells, inhibition by concanamycin A, **201,** 1270

Senescence, *see also* Aging
- brain, multiple deletions in mitochondrial DNA during, detection (mouse), **202,** 654
- cellular, diploid fibroblasts, prohibitin expression during (human), **201,** 409
- homologous autoepitope erythrocytes, associated antigen, LIM protein containing (human fetal liver), **201,** 1124

Sepiapterin reductase inhibitors
- suppression of induced nitric oxide production, in analysis of role of tetrahydrobiopterin in NO production by endothelial cells (mouse), **199,** 504

Septic shock
- C-type natriuretic peptide plasma levels in affected patients,

  - determination, **198,** 1177
- Sequence tags
  - expressed, in identification of human isolog of *Saccharomyces cerevisiae suil* gene translation initiation factor, **198,** 288
- Serine
  - Ser259 in c-Raf-1, protein kinase phosphorylating, binding by C-Raf-1 amino terminus (human), **204,** 841
- Serine protease inhibitors
  - SPI-1, SPI-2, and SPI-3, as type II acute phase proteins, regulation by interleukin 6 at mRNA level (rat), **201,** 222
- Serine/threonine kinase receptors
  - CFK-43a, specifically binding to bone morphogenetic proteins BMP-2 and BMP-4, molecular cloning and characterization, **205,** 1944
- Serine/threonine protein kinase
  - role in induction of platelet-derived growth factor-inducible *JE* gene (mouse), **203,** 1815
- Serotonin 1Dβ receptors
  - encoding gene, genetic variation in, identification (human), **205,** 1194
- Serotransferrin
  - structure–function relationship: role of pH on conformational change and metal ion release, **198,** 646
- Serotyping
  - V3 peptide, for grouping of HIV-1 infection in subtypes A to E, correlation with sequence analysis, **205,** 1658
- *Serratia marcescens*
  - gentamicin resistance gene isolated from R plasmids, nucleotide sequence and expression, **198,** 1084
- Serum
  - actin, identification as cytoplasmic isoform after *in situ* hydroxylamine cleavage on sequencer membranes (fetal bovine), **205,** 195
  - acute pancreatitis-derived, induction of PAP mRNA expression in pancreatic acinar AR-42J cells *in vitro* (rat), **204,** 238
  - antisense oligonucleotide uptake and degradation, effect of cationic lipids (human), **197,** 818; *erratum,* **200,** 1769
  - autoimmune disease patients, autoantibodies, reactivity with recombinant human single chain T cell receptor, **201,** 1502
  - hepatocyte growth factor-converting enzyme, purification (bovine), **198,** 1161
  - induced phosphoinositide 3-kinase and CHRF-288 cell proliferation, inhibition by wortmannin, **202,** 1619
  - insulin-like growth factor-I levels, tamoxifen-induced suppression, effects of somatostatin analog octreotide (rat), **203,** 253
  - nitrite/nitrate levels during follicular development, effects of ovarian/sex hormones (human), **202,** 1543
  - soluble interleukin-6 receptor, decidua as source: gestational profile of msIL-6R (rat), **205,** 998
- Serum albumin
  - bovine, –nitrobenzyl conjugates, **201,** 1213
  - gene promoter, isolation and functional analysis (bovine), **203,** 1447
  - glycation, protective effect of α-lipoate (bovine), **203,** 99
- Serum amyloid, *see* Amyloid, serum
- Serum response element
  - c-*fos,* ternary complex formation at, inhibition by muscle homeodomain protein MHox, **200,** 1742
- Serum response factor
  - associated ETS proteins: ternary complex factors and PEAS3-binding factor (human), **201,** 1406
  - recruitment of ternary complex factors to cytomegaloviral CArG boxes, **205,** 545
- *Setaria digitata*
  - biosynthesis of isoprenoid compounds, **205,** 24
- Sexual dimorphism
  - and protein kinase C isozyme pattern in liver hyperplasia (rat), **205,** 208
- SH3, *see* Src-homology 3
- Shear stress
  - dependent nitric oxide production in endothelial cells, *in vitro* stimulation by laminar flow (bovine), **198,** 213
  - fluid, effect on thrombomodulin expression in cultured human endothelial cells, **205,** 1345
- Sialic acid
  - effects on cytosolic phospholipase A_2 (bovine brain), **199,** 1158
  - glycoconjugate GSC-53 containing, chemically synthesized, as potent inhibitor of cellular immune responses, **203,** 1102
  - role in viscosity of tracheal mucin glycoprotein (dog), **205,** 402
- Sialidase
  - and acid-catalyzed hydrolysis of interketosidic linkages, differential reactivities of *N*-glycolylneuraminic acid dimers, **205,** 893
- 3-Sialo Galβ1,3/4GlcNAcβ-0-R
  - high affinity substrate for α1,3/4-L-fucosyltransferase with substrate inhibition ability: biosynthetic control on structures acting as ligands for selectins (human), **201,** 78
- Sialoglycopeptide
  - in presence of TNF-α, selective cytotoxicity of transformed and normal fibroblasts (mouse), **205,** 215
- Sialoglycoproteins
  - effects on cytosolic phospholipase A_2 (bovine brain), **199,** 1158

Signaling, *see also* Intracellular signaling; Signal transduction
  in cell type-specific induction of herpes simplex virus-1 UL9 gene (HeLa, PC12, Vero cells), **205,** 44
Signal recognition particle
  mediated arrest of presecretory protein translation, extent, relationship to protein size, **205,** 603
Signal transduction
  in abdominal ganglia, eclosion hormone-mediated, role of inositol 1,4,5-trisphosphate–cGMP cascade (*Bombyx mori*), **198,** 613
  B lymphoblast, LFA-1-sensitive effects of nectadrin antibodies (mouse), **198,** 1209
  CD4 molecule, HIV-1 gp160-stimulated, activation of NF-κB in human T cells, **203,** 498
  in CHO cells, regions of human neurokinin A receptor involved in, deletion analysis, **199,** 626
  growth hormone, mechanism: induced increases in cytosolic free Ca^{2+} in cultured IM-9 lymphocytes (human), **202,** 391
  human angiotensin II type 1 receptor subtype $AT_{1a}R$ and $AT_{1b}R$ in transfected CHO cells, mechanism, **199,** 475
  interleukin-6, associated transducer gp130, soluble form, ELISA establishment and detection in ascitic fluids of tumor-bearing mice, **202,** 637
  intracellular, in CHO cells transfected with bovine prostaglandin $F_{2\alpha}$ receptor, analysis, **200,** 756
  mitogenic, in vascular smooth muscle cells, induced by platelet-derived growth factor, role of diacylglycerol kinase (rat), **205,** 1338
  monoaminergic system, role in regulation of β/A4 amyloid precursor protein processing in hippocampus (rat), **202,** 293
  pancreatic acinar cells, amylase secretion in, interference by calyculin A, okadaic acid, and W-7 (rat), **201,** 1470
  protein-tyrosine kinase-mediated, in glycosylphosphatidylinositol toxin regulation of interleukin-1α and TNF-α expression in macrophages (*Trypansoma brucei*), **205,** 984
  Ras pathway, role in phenylephrine-induced activation of mitogen-activated protein kinase in cardiac muscle cells (rat), **205,** 1417
  regulation of stomatal movements, role of superoxide radicals (*Vicia faba*), **205,** 30
  somatostatin receptor subtype SSTR1, characterization (human), **204,** 176
  by thrombin receptor through 33-kDa protein kinase in platelets (human), **203,** 907
  transmembrane, by chemoattractant-stimulated G proteins, role of carboxylmethylation (HL-60 cells), **200,** 1604
  vasoactive intestinal peptide$_1$ receptor in stably transfected human 293 cells and CHO cells, distinct pathways, **203,** 141
Silencer elements
  globin promoter-specific, localization to δ-globin gene upstream region (human), **204,** 413
Silver
  ions, induction of CopA and CopB ATPases, and Ag^+ extrusion by CopB (*Enterococcus hirae*), **202,** 44
Simian immunodeficiency virus
  derived fusion protein, membrane orientation, role in fusion protein effect on bilayer stability and promotion of membrane fusion, **205,** 1938
Simian virus 40
  large T antigens, role in binding of cellular proteins to p53 in Hep3B cells (human), **202,** 490
  newly replicated daughter chromosomes, inverse relationship between catenation and superhelicity (CV-1 cells), **201,** 1510
Simvastatin
  and acid form, induction of increase in cytosolic Ca^{2+} levels and cell damage in L6 myoblasts (rat), **202,** 1579
  effects on protein kinase C activity and cell cycle in C6 glioma cells (rat), **200,** 1143
  pretreatment of cholesterol-poor endothelial cells, effect on migration activity (bovine), **203,** 1355
Sirolimus
  effector protein p210, isolation from Molt-4, BJAB, and human T cells, **203,** 1
Site-directed mutagenesis
  in analysis of
    myeloperoxidase: residues involved in catalytic activity and heme interaction (human), **202,** 73
    Ser-143 role in histidine ammonia-lyase: essential active site residue (*Pseudomonas putida*), **201,** 1433
    tetracycline/H^+ antiporter, degradation of TET truncated at last transmembrane helix and protection by overproduced GroEl/ES (*Escherichia coli*), **202,** 258
  highly conserved residues near active site of phosphofructo-1-kinase (*Escherichia coli*), **199,** 577
  histamine H_1 receptor
    evidence for selective interaction of Asn^{207} with subclasses of H_1-receptor agonists (guinea pig), **201,** 295
    roles of Asp107, Asn198, and Thr194, **203,** 1096
  in identification of functional cysteine residues in galactosyltransferase (human), **204,** 701
  interferon-α, in analysis of structure–function relationship in L929, MDBK, and WISH cells (bovine, human, mouse), **202,** 1445

Skeletal muscle
- actin, behavior in *Acanthamoeba castellanii* soluble extracts, comparison with *Acanthamoeba* actin (rabbit), **196,** 569; *erratum,* **198,** 1290
- aging, mitochondrial DNA 4977-bp deletion and respiratory chain enzyme activities in, correlation (human), **205,** 772
- bicep, ubiquitin levels, effects of high-force eccentric exercise (human), **204,** 1193
- Ca^{2+}-ATPase sarcoplasmic reticulum isoforms, expression, differential effects of thyroid hormone (rat), **203,** 1035
- calpastatin I and II specificity, modulation by reversible phosphorylation and dephosphorylation (rat), **199,** 1326
- expression of ROR/RZR orphan receptor RORγ (human), **205,** 1976
- fructose 2,6-bisphosphate 2-phosphatase/fructose 6-phosphate 2-kinase, isolation and expression (frog), **198,** 1099; *erratum,* **200,** 1769
- glucose transporter translocation, insulin effect (mouse), **199,** 662
- L-type calcium channel expression, regulation by protein kinase A and protein phosphatase-1C, role of channel α_1-subunit (rabbit), **198,** 166
- myosin heavy chain mRNA levels, regulation by growth hormone, modulation by restricted diet in hypophysectomized rat, **198,** 97
- myotonic dystrophy gene product, identification and localization (human, rabbit, rat), **203,** 1365
- myotonin-protein kinase levels, reduction in myotonic dystrophy (human), **202,** 577
- Na$^+$ channel density in cells, Ca^{2+}/calmodulin-dependent regulation during development in culture (chicken embryo), **203,** 852
- neonatal and slow- and fast-twitch, identification of ryanodine receptor transcripts (rabbit), **203,** 1725
- slow troponin T mRNA isoform, derivation from alternative splicing of single gene (human), **199,** 841
- small GTP-binding proteins H-YPT3 and H-ray, molecular cloning (human), **205,** 1875
- sodium channel subtypes, conductance and channel gating, modification by veratridine (rat), **199,** 1305
- soleus, expression of GLUT4 and insulin receptor genes, effects of high-fat diet (rat), **202,** 519
- thin filament, 3D structure, calcium-induced change, cryoelectron microscopic analysis (rabbit), **203,** 951; *erratum,* **205**, 976

Skin
- cytochrome P450 isozymes 1A1, 2B1, and 3A, induction by pyridine (mouse), **199,** 1400
- fibroblasts, collagenase secretion, stimulation by tissue inhibitor of metalloproteinase-1 (human), **203,** 874
- Korean frog, isolation of antimicrobial peptides, **205,** 948

Small intestine
- cDNA library, isolation of bacterial P-type ATPases with histidine-rich heavy-metal-associated sequences (human), **205,** 1644

Smooth muscle
- aortic wall, non-actomyosin component of contraction, activation by phorbol ester (guinea pig), **199,** 944
- coronary artery, tension and cytosolic calcium levels, effects of motilin (pig), **202,** 346
- motilide-induced contractions, blockage by ANQ-11125 *in vitro* (rabbit), **198,** 411
- myometrial, oxytocin-stimulated contractions, inhibition by neomycin (rat), **205,** 245
- myosin light-chain kinase from, role in bundling of actin filaments (chicken), **199,** 786
- tracheal, interleukin-1β-regulated $G_{i\alpha}$ gene expression via lipid mediators (guinea pig), **203,** 1889

Smooth muscle cells
- aortic, transforming growth factor β_1 production, induction by interleukin-1β (rat), **204,** 1186
- arterial, proliferating in culture, expression of type I fibroblast growth factor receptor (human), **204,** 557
- cardiac, mitogen-activated protein kinase, phenylephrine-induced activation, role of Ras activity (rat), **205,** 1417
- coronary, athersclerotic, overexpression of parathyroid hormone-related peptides (human), **200,** 1028
- ileum, tyrosine kinase phosphorylation, role in regulation of muscarinic receptor-activated cation channels (guinea pig), **203,** 1392
- intestinal, dispersed, G-protein-dependent and independent pathways in, activation by fluoride (guinea pig), **202,** 1681
- neointimal, *in vivo* accumulation in carotid artery, suppression by antisense cdc2 and cdk2 oligonucleotides (rat), **198,** 16
- vascular
  - A7r5, interaction with atrial natriuretic peptide (rat), **204,** 1286
  - A10, multiple mitogenic pathways in, regulation by ras proteins (rat), **202,** 1252
  - adrenomedullin production, augmentation by TNF-α (bovine, rat), **203,** 719
  - and coronary arteries, C-type natriuretic peptide in, vascular action (pig), **205,** 765
  - dephosphorylation of 20-kDa regulatory myosin light chain in, stimulation by cyclic strain (bovine aorta), **205,** 79

DNA synthesis, proto-oncogene expression, and phospholipase C activity in, effect of erythropoietin (rat), **199,** 977
expression of prostacyclin-stimulating factor *in vitro* (bovine), **202,** 1490
free intracellular calcium, elevation by aldosterone, subcellular localization by single cell imaging (pig, rat), **204,** 475
inducible nitric-oxide synthase, regulation of gene transcription, analysis (human), **200,** 802
MAP kinase activation, vasopressin-induced, inhibition by peptide and non-peptide arginine vasopression (rat), **200,** 1155
mitogenic signal transduction induced by platelet-derived growth factor, role of diacylglycerol kinase (rat), **205,** 1338
phosphoinositide catabolism and DNA synthesis, activation by low-density lipoprotein and positively charged proteins: role of polycationic nature of apolipoprotein B (human), **203,** 1700
thrombin-induced proliferation, role of NF-κ activation (human), **204,** 950
S1 nuclease
sensitive region in PDGF A-chain gene promoter, identification of positive transcriptional regulatory element, **198,** 103
Sodium
dependent calcium influx, in isolated hepatocytes undergoing ATP depletion (rat), **202,** 360
dependent transport of aminopeptidase-resistant sugar-coupled tripeptides in intestine (rat), **203,** 1412
intracellular
and Ca^{2+} transients, simultaneous measurement in isolated myocytes: strophanthidin effects (guinea pig), **203,** 1050
during metabolic inhibition, role of Na^+/H^+ exchange and Na^+/K^+ pump (guinea pig myocytes), **203,** 93
relationship to run-down of calcium current (guinea pig), **199,** 720
–iodine symporter in thyroid follicles, inhibition by chloride channel blockers *in vitro* (pig), **204,** 1265
–Mg antiporter in ascites cells, stimulation by cAMP, effect on magnesium efflux (mouse), **202,** 1209
role in choline uptake by HEK-293 fibroblasts *in vitro* (human), **199,** 1320
Sodium arsenite
exposed HeLa cells, increase in mRNA levels of ferritin H and metallothionein-II (human), **205,** 590
Sodium azide
and hydroxylamine, stimulation of neutrophil NO production, role of oxygen radicals (human), **199,** 1245
Sodium butyrate
induced apoptosis in lymphoid cells, transient hsp70 mRNA overexpression preceding, detection (human), **198,** 257
Sodium channels
subtypes in brain, heart, and skeletal muscle, functional differences in presence of veratridine (rat), **199,** 1305
type II, S4 segment, proline mutations on, analysis (rat brain), **202,** 1438
voltage-dependent, density, Ca^{2+}/calmodulin-dependent regulation in skeletal muscle cells during development in culture (chicken embryo), **203,** 852
Sodium dodecyl sulfate
free reagents, removal from dilute solutions with two-step precipitation method for protein recovery and quantitation, **200,** 916
resistant MHC class II molecules, induction in murine B cells by O-chain of *Brucella abortus* lipopolysaccharide, **203,** 1230
Sodium/hydrogen exchange
role in $[Na^+]_i$ regulation during metabolic inhibition (guinea pig myocytes), **203,** 93
Sodium nitroprusside
and L-arginine, effects on arachidonic acid metabolism by 12-lipoxygenase and cyclooxygenase pathways in intact platelets (human), **200,** 1630
biotransformation into dinitrosyl iron complexes in ascites tumors (mouse), **202,** 168
Solutions
dilute, protein recovery and quantitation in, two-step precipitation method removing free SDS and thiol reagents, **200,** 916
Solvents
dielectric, base pairing of 2′-deoxythymidine with 8-amino-2′-deoxyadenosine in, identification of reverse Hoogsteen mode, **204,** 788
Somatoliberin
activin A-, AB-, and B-responding pituitary cells in response to, characterization (rat), **203,** 1739
effect on pituitary cells (rat), **199,** 1436
Somatostatin analogs
octreotide, effects on tamoxifen-induced suppression of insulin-like growth factor I gene expression and serum levels (rat), **203,** 253
Somatostatin receptors
analogs selective for, specific inhibition of pancreatic insulin or glucagon release (rat), **205,** 341
CHO cells with, cytosolic phospholipase A_2 activation in: wortmannin-sensitive pathway activating mitogen-acti-

vated protein kinase, **205,** 18
  hsstr gene 5′-flanking region, sequence analysis (human), **205,** 1883
  subtype mRNA, expression in GH_3 cells, regulation by somatostatin (rat), **202,** 1738
  type 1, multiple effector coupling (human), **204,** 176
  type 1 through 5, functional coupling to adenylyl cyclase (human), **198,** 605
  type 2
    coupling to adenylyl cyclase in presence of Giα1 protein (human), **202,** 1188
    effects on adenylate cyclase, phospholipase C, and Ca^{2+} mobilization in transfected COS-7 cells (human), **200,** 986
Somatostatins
  regulation of somatostatin receptor mRNA subtype expression in GH_3 cells (rat), **202,** 1738
  SST-14, effects on inositol-1,4,5-trisphosphate in various brain areas (rat), **203,** 379
  SST-14, SST-18, and SST-28, generation in different secretory pathways, evidence from processing of human prosomatostatin in AtT20 cells, **205,** 221
Somatotropin
  and cytokines, outer surfaces, comparative structural patterns of outer surfaces, **201,** 1396
  induced increases in cytosolic free Ca^{2+} in cultured IM-9 lymphocytes (human), **202,** 391
  insulin-like effects in adipocytes, wortmannin effects (rat), **203,** 306
  regulation of skeletal muscle myosin heavy chain mRNA levels, modulation by restricted diet in hypophysectomized rat, **198,** 97
  regulatory role in prion-related protein gene expression in rat endocrine pancreatic cells, **201,** 1220
  secretion by rat anterior pituitary cells *in vitro*, effects of CINC/gro, **202,** 155
Sonification
  effects on release of bound and free calcium from Ca-loaded liposomes, **204,** 142
Spectrin
  and protein 4.1, interaction with cytoskeleton, mediation of platelet physiological response (human), **198,** 111
β-Spectrin
  pleckstrin homology domain, binding to WD40/β-transducin repeat regions of trimeric G-protein β-subunits, **203,** 29
Spectrometry
  and autophotographic methods, for determination of DNA concentrations, comparison, **203,** 834
Spectrophotometry
  with *p*-nitrophenol, in assay of nonoxynol effects on hepatic microsomal UDP-glucuronosyltransferase (rabbit), **200,** 1093
Spectroscopy, *see also specific types*
  hydropathy power, in analysis of noxiustoxin and charybdotoxin secondary structure, **201,** 186
Spermatogenesis
  testosterone withdrawal during, induction of apoptosis *in vivo* (rat), **202,** 1315
Spermatogonia
  localization of zinc finger Br140 homologous to TFIID (human), **198,** 1143
Spermatozoa
  calcium levels, effects of RU486 (human), **204,** 1009
  epididymal, 38-kDa protein sp38 with zona pellucida-binding property, purification and characterization (pig), **196,** 196; *erratum,* **198,** 408
  free radical bombing in spermatic granuloma: in prevention of autoimmune switch-on (rat), **201,** 472
  membrane, lipophilic domains, abnormal physical architecture in oligospermia (human), **198,** 266
  peptide antigen recognized by monoclonal autoantibody 4A11 from vasectomized mouse, identification and characterization, **205,** 1503
  polyspermy, induction by antibodies against hamster sperm protein (*Strongylocentrotus dröebachiensis*), **202,** 181
Spermine
  effect on casein kinase I binding to liver mitochondrial structures (rat), **205,** 389
  inhibition of nitric-oxide synthase induction in J774.2 macrophages, effect of aldehyde dehydrogenase, **203,** 1638
  with 5-methyl deoxycytidine attached via N^4, oligonucleotides incorporating, triplex formation at physiological pH, **205,** 1665
  restoration of growth of polyamine-deficient cells, antizyme-induced delay, role of negative regulation of polyamine transport (murine FM3A cells), **203,** 608
Sphinganine
  potentiation of DMSO-induced granulocytic differentiation, increase of alkaline phosphatase activity, and decrease of protein kinase C activity in HL-60 cells, **199,** 888
Sphingolipid activator proteins
  SAP-D, stimulation of lysosomal degradation of ceramide *in vivo* (human fibroblasts), **200,** 1440
Sphingomyelins
  membranes, monosialoganglioside reconstituted in, recognition: quantitative analyses by quartz crystal microbalance, **204,** 551
Sphingosine kinase
  in BALB/C 3T3 fibroblasts variant A31, regulation by phor-

bol esters: cell type-specific response (mouse), **198,** 1

- Spinal cord
  - dorsal domain, regional expression of *Cwnt-4* gene in developing chick CNS in relation to, **203,** 1581
- Spin trapping
  - electron spin resonance, in analysis of peroxynitrite decomposition: lack of hydroxyl radical production, **203,** 1515
  - nitric oxide by nitronyl nitroxides: measurement of NO synthase activity (rat cerebellum), **202,** 195
- Spleen
  - expression of G_{M2} activator protein (mouse), **204,** 741
- Splenocytes
  - proliferation *in vitro*, effects of specific B vitamin deprivation (mouse), **198,** 451
- Splicing
  - alternative
    - with fibroblast growth factor receptor 1 gene, in generation of muliple mRNAs containing open reading frames (mouse), **205,** 1057
    - IGF-1 and insulin receptors, comparison (human, rat), **202,** 1038
    - *ret* proto-oncogene at intron 4 (human), **205,** 1526
    - tissue-dependent, mRNA for precursor of non-Aβ component of Alzheimer's disease amyloid (human), **205,** 1366
  - 5′ alternate, and multiple transcription start sites, interleukin-3 β-chain transcripts (mouse), **205,** 886
- Spores
  - germination, protein phosphorylation during, stage-specific changes, role of calmodulin (*Dictyostelium discoideum*), **201,** 430
- Sporulation
  - *Saccharomyces cerevisiae*, role of glutathione, **205,** 1151
- SR 48968
  - binding affinities for human and rat tachykinin NK_3 receptors, comparison (human), **198,** 967
  - species-selective binding by tachykinin NK_3 receptor, role of Met-134 and Ala-146 in second transmembrane segment (human), **198,** 961
- Src-homology 3
  - domain of protein tyrosine kinase c-abl, interaction with MAPKAP kinase 2 *in vitro*, effect of MAPKAP kinase 2 proline-rich region (mouse), **203,** 1188
- Src kinase, *see* Protein-tyrosine kinase, Src
- SS33410
  - effect on intracellular transport vesicular stomatitis virus of G glycoprotein in infected BHK cells, **199,** 1073
- Stability
  - heat and acid, keratinocyte growth factor, effect of cysteine substitutions (human), **205,** 872
  - thermal, liposomes made from bipolar tetraether lipids, characterization, **202,** 673
- Stabilization
  - effect in hepatitis delta virus transcription after polyadenylation, role of ribozyme, **205,** 864
  - tetrahelical DNA by quadruplex DNA binding protein *QUAD*, **205,** 305
- Staphylococcal protein A
  - modified, phospholipid monolayer containing, on both solution and slide surfaces, characterization, **200,** 1463
  - phospholipid monolayers containing, characterization on aqueous and solid surfaces (*Staphylococcus aureus*), **201,** 1242
- Staurosporine
  - effects on
    - invasion process of macrophages by *Trypanosoma cruzi*, **203,** 967
    - transcription of hsp70 heat shock gene in HT-29 cells, **202,** 476
- Stearoyl-CoA desaturase-1
  - encoding gene, transcriptional control by polyunsaturated fatty acids (mouse), **200,** 763
- Stellate cells
  - perisinusoidal, morphology, proliferation, and collagen synthesis, modulation by extracellular matrix and L-ascorbic acid 2-phosphate (rat), **200,** 999
- Stem cell factor
  - mRNA, localization in placental tissue and effects on DNA synthesis in primary cultured cytotrophoblasts (human), **205,** 1762
- Stem cells
  - cerebral neural, proliferation, enhancement by Alzheimer amyloid protein precursor (rat fetus), **205,** 936
  - embryonic, *see* Embryonic stem cells
- Stereoselectivity
  - [Nle^4,D-Phe^7]-α-melanocyte stimulating hormone and α-MSH attachment at melanocortin-1 receptor, demonstration (human), **202,** 1266
- Stereospecificity
  - hydride transfer, and substrate specificity, for FMN-containing NAD(P)H-flavin oxidoreductase from luminescent *Vibrio fischeri* ATCC 7744, **205,** 275
- Sterols
  - composition and metabolism in *Pneumocystis carinii*, **198,** 236
  - mediated regulation of sterol regulatory element-binding proteins SREBP-1a, -1b, and -1c and SREBP-2 in hepatoma cells (human), **202,** 1460

and other isoprenoid compounds, biosynthesis in cattle filarial parasite *Setaria digitata*, **205,** 24
Stimulus–secretion coupling
  in parietal cells, extracellular magnesium effect (rat), **204,** 512
Stoichiometry
  ribosomal protein *Sso*L12e in 50S subunits, immunoblot assay (*Sulfolobus solfataricus*), **203,** 1140
Stomach
  localization of histamine H_2 receptor and gene transcripts (rat), **198,** 1195
Stomata
  movements, regulation by signal transduction, role of superoxide radicals (*Vicia faba*), **205,** 30
Strand scission
  pBluescript DNA, induction by S-nitrosothiol with H_2O_2 (*Escherichia coli*), **200,** 966
Streptococcus mutans
  heat-stable phosphocarrier protein, amino acid sequence and comparative molecular modeling, **199,** 1297
Streptomyces griseus
  glutamine synthetase, modification by ADP-ribosylation and adenylylation, **204,** 598
Streptonigrin
  induced topoisomerase II sites, exhibition of base preferences in middle of enzyme stagger (human), **203,** 1259
Streptozocin
  induced diabetes, cardiac sarcoplasmic reticulum Ca^{2+}-ATPase expression, **203,** 113
  low-dose, induced diabetes, prevention by interleukin-1 receptor antagonist (mouse), **202,** 543
Streptozotocin, *see* Streptozocin
Stress, *see* Heat stress; Oxidative stress; Shear stress
Stress fibers
  actin, disorganization accompanied by morphological changes and protein tyrosine phosphorylation in BALB/c3T3 cells, induction by vascular endothelial growth factor (mouse), **202,** 1716
Stromelysin
  inhibition by
    peptides based on N-terminal domain of tissue inhibitor of metalloproteinases-1 (human), **205,** 1156
    peptidyl hydroxamic acid (human), **199,** 1442
Stromelysin 1
  gene expression in mesangial cells, selective inhibition by heparin (rat), **203,** 1333
Strophanthidin
  effects on intracellular Na^+ and Ca^{2+} transients in isolated myocytes (guinea pig), **203,** 1050
Structure–function relationships
  margatoxin, **198,** 619
  serotransferrin: role of pH on conformational change and metal ion release, **198,** 646
Substance P
  Gln^5 selective labeling with monodansylcadaverine, for membrane interaction studies, **203,** 359
  induction of apoptosis in lung cancer cells *in vitro* (human), **199,** 1313
  in intestine, encoding by fourth isoform of preprotachykinin mRNA (rat), **202,** 796
Substitution matrix
  dipeptide, 400 by 400, in analysis of amino acid substitution during divergent evolution, **199,** 489
Subtilisin Carlsberg
  cross-linked, X-ray crystal structure in water and acetonitrile, **198,** 675
Sugar chains
  mucin-type, cancer-associated antigens expressed on, monoclonal antibodies recognizing, production (bovine), **203,** 1828
Sugars, *see also specific sugars*
  –DNA molecular recognition: specific interaction of α-1,4-glucopyranose chains with DNA in minor groove, **202,** 204
  induced structural alterations in collagen, inhibition by aspirin and other compounds (human), **199,** 683
Sugar transport
  in respiration-deficient cells, association with differential glycosylation of glucose transporter (hamster V79 cells), **200,** 1313
Sulfamethoxazole
  as ET_A-selective endothelin antagonist, identification by pharmacophore-directed screening (human), **201,** 228
Sulfate
  incorporation into chondroitin sulfate in HL-60 cells (human), **203,** 1682
Sulfisoxazole
  as ET_A-selective endothelin antagonist, identification by pharmacophore-directed screening (human), **201,** 228
Sulfobromophthalein sodium
  inhibition of Na^+/I^- symporter in thyroid follicles *in vitro* (pig), **204,** 1265
3-Sulfo Galβ1,3/4GlcNAcβ-0-R
  high affinity substrate for α1,3/4-L-fucosyltransferase with substrate inhibition ability: biosynthetic control on structures acting as ligands for selectins (human), **201,** 78
Sulfolobus acidocaldarius
  archael Rieske iron–sulfur cluster, evidence for two proton

dependent Redox equilibrium, **202,** 252

Sulfolobus solfataricus
- ribosomal protein *Sso*L12e, stoichiometry in 50S subunits, immunoblot assay, **203,** 1140

5-Sulfoxymethylchrysene
- activity of θ-class glutathione *S*-transferases Yrs-Yrs′ and Yrs′-Yrs′ in hepatic cytosol (rat), **202,** 278

Sulfur
- –iron cluster, Rieske, evidence for two proton dependent redox equilibrium (*Sulfolobus acidocaldarius*), **202,** 252
- –zinc clusters, destruction by nitric oxide, effects on metallothionein Zn release and yeast transcription activator LAC9, **200,** 1105

Sulfurospirillum deleyianum
- ammonia-forming cytochrome *c* nitrite reductase, molecular composition and spectroscopic properties, **205,** 911

Sulfur trioxide
- anion radicals, induction of 8-hydroxy-2′-deoxyguanosine formation and DNA damage, **205,** 141

Superhelicity
- inverse relationship with catenation in newly replicated simian virus 40 daughter chromosomes (CV-1 cells), **201,** 1510

Superoxide dismutase
- copper binding, in liver, heart, and brain of copper-deficient rat, differential decrease, **203,** 1028
- Cu/Zn-containing
  - 5′-flanking region, characterization (human), **201,** 1526
  - gene mutation, identification in Japanese familial amyotrophic lateral sclerosis, **200,** 695
  - mutant, deduced from lymphocyte mRNA from familial amyotrophic lateral sclerosis patients, **204,** 572
- expression in murine lupus nephritis, effects of omega-3 and omega-6 lipid-rich diets, **200,** 893
- inhibition of superoxide reduction of disulfide *in vitro:* possible model of intracellular redox modulation, **200,** 1586
- manganese-containing, expression in hepatic mitochondria, effect of chronic and acute ethanol treatment (rat), **201,** 1356
- mRNA, and nitric oxide synthase mRNA, interleukin-1β-induced expression in insulin-producing RINm5F cells, dissociation, **203,** 1542
- reduced, X-ray, NMR, and molecular studies (bovine), **202,** 1088

Superoxide radicals
- generation
  - in cell-free system derived from neutrophils, inhibition by peptides corresponding to region adjacent to His-94 in small subunit of cytochrome b_{558} (human), **204,** 924
  - by cisplatin interaction with DNA in cell-free system (bovine thymus), **203,** 1175
  - in membrane vesicles, enhancement in hyposaline environment (*Halobacterium halobium*), **205,** 1736
  - from neocarzinostatin, mediation by NADPH/cytochrome P450 reductase via activation of enediyne chromophore, **205,** 1716
  - in neutrophils, *N*-formyl-methionyl-leucyl-phenylalanine-induced, priming by iminodipeptides containing proline with C-terminal and N-terminal residues (human), **205,** 758
- reaction with ferrous cytochrome P450$_{cam}$, role of spectral intermediate (*Pseudomonas putida*), **201,** 1349
- reduction of disulfide *in vitro:* possible model of intracellular redox modulation, **200,** 1586
- role in
  - photodegradation of lindane and DDT, **199,** 1284
  - signal transduction regulation of stomatal movements (*Vicia faba*), **205,** 30

Suramin
- effect on p34^{cdc2} kinase *in vitro* and in H69 cell extracts: double mechanism of action (human), **203,** 1574

Surface charge
- asymmetrical lipid, effect on subconducting state of potassium channel from sarcoplasmic reticulum (rabbit), **199,** 1081
- effects on redox properties of high potential sulfur-iron proteins (*R. globiformis, C. vinosum, R. gelatinosus, E. vacuolata, E. halophila*), **203,** 436

Symporters
- Na$^+$/I$^-$, in thyroid follicles, inhibition by chloride channel blockers *in vitro* (pig), **204,** 1265

Synaptic vesicles
- localization of Rabphilin-3A (rat brain), **202,** 1235

Synaptobrevin 2
- Ala^{81}-Ala^{82} bond, proteolysis by botulinum neurotoxin type G (rat), **200,** 829
- gene encoding, linkage to *tremor* gene causative for epilepsy with spongiform encephalopathy in spontaneously epileptic rat, **200,** 1161

Synaptogenesis
- cortical cell cultures undergoing, microtubule-associated protein 1B, identification as substrate of ecto-protein kinase (rat), **205,** 1467

Synaptosomes
- sequence-specific lipoperoxidation, initiation by β-amyloid peptide free radical fragments, implications for Alzheimer's disease, **200,** 710

Synaptotagmin II
- isolation and characterization as inositol 1,3,4,5-tetrakisphosphate-binding protein (mouse), **205,** 1036

- Syndecan-1
  - gene expression in liver cells (rat), **204,** 944
- *Synechococcus*
  - PCC6301, plasma membrane F-type and P-type ATPase, immunological and functional localization, **200,** 884
  - PCC7942
    - identification of *dnaK* multigene family, **201,** 466
    - *secA* homolog, cloning and characterization, **200,** 844
- Synovial cells
  - from patients with rheumatoid arthritis, interleukin-1β in, processing, **199,** 1035
- Synteny group
  - U12, assignment of relevant locus of goat lactoferrin cDNA (bovine), **203,** 1324
- Systemic lupus erythematosus
  - associated anticoagulant autoantibody, induction of apoptosis in umbilical vein endothelial cells, role of annexin V (human), **205,** 1488
  - IgM and IgG lupus anticoagulants from affected patient, heterogeneity and diversity, **203,** 1789

T

- T$_3$, *see* Liothyronine
- Tachykinin
  - induced intracellular Ca^{2+} rise in human NK$_2$ receptor-transfected CHO cells, pharmacological characterization, **200,** 1512
- Tachykinin receptors
  - NK$_3$
    - human and rat, binding affinities of SR 48968 for, comparison, **198,** 967
    - second transmembrane segment, Met-134 and Ala-146 identification as residues involved in SR 48968 binding (human), **198,** 961
- Tacrolimus, *see* FK-506
- Tamoxifen
  - induced suppression of insulin-like growth factor type I gene expression and serum levels, effects of somatostatin analogue octreotide (rat), **203,** 253
- Tamoxifen aziridine
  - as affinity probe for P-glycoprotein in multidrug-resistant cells (hamster lung), **202,** 606
- Tandem repeats
  - 53-bp nucleotide sequence in 5′ flanking region of neutrophil elastase gene, enhancer function (human), **204,** 38
- Tangier disease
  - affected subjects, dermal fibroblasts from, impairment of high-density lipoprotein- and apolipoprotein A-1-induced mobilization of cellular cholesterol, **205,** 850
- Tannic acid
  - effect on phospholamban-induced inhibition of cardiac sarcoplasmic reticulum Ca^{2+}-ATPase (rabbit), **202,** 1668
- Tannin, *see* Tannic acid
- Targeting signal
  - peroxisomal, -SKL, binding to PAS10 protein, role of PAS10 tetratricopeptide repeat-domain (*Saccharomyces cerevisiae*), **204,** 1016
- TATA factor
  - identification as 75-kDa protein complex (rat liver), **204,** 1125
- Taxol
  - inhibition of T47D breast cancer cell proliferation (human), **202,** 1413
- T cell receptors
  - recombinant single chain, construction and serological characterization (human), **201,** 1502
  - soluble, α chain, bacterial expression (rat), **202,** 1280
  - stimulation, effect on CD45 association with protein tyrosine kinase p56^{lck} (human), **198,** 88
- T cells
  - CD4$^+$ and CD8$^+$, effects of recombinant human interleukin-12 *in vivo* (monkey), **204,** 1150
  - CD4-mediated signals stimulated by HIV-1 gp160, activation of NF-κB (human), **203,** 498
  - cell proliferation state, associated alteratons in CD45 glycosylation pattern (human), **200,** 1283
  - expression of non-receptor-type protein tyrosine phosphatase with homology to cytoskeletal protein 4.1 (mouse), **203,** 479
  - helper, *see* Helper T cells
  - H9 lymphoblasts
    - attachment to synthetic [Tyr^{5,12}, Lys^7]-polyphemusin II peptide (human), **202,** 470
    - interleukin-10 secretion, stimulation by HIV-1 infection (human), **202,** 374
  - induction of murine GM-CSF promoter, role of transcription factor Sp1 (human), **205,** 1518
  - interaction with ganglioside-containing liposomes: confocal fluorescence microscopic study (rat), **203,** 1750
  - MT-4, HIV-induced cytopathicity, inhibition by short terminally phosphorylated oligoriboguanylic acids (human), **203,** 1244
  - secretion of immunoreactive corticotropin-releasing factor and adrenocorticotropic hormone in response to cellular stress factors (human), **204,** 828
  - transcription from GM–CSF promoter, activation by calcineurin in synergy with κB/AP-1 or protein kinase C (human), **199,** 1064

  vasoactive intestinal peptide receptor gene expression (rat), **203,** 1599
  voltage-dependent potassium channel inhibitor margatoxin, synthesis and structure–function studies (human), **198,** 619
Tecogalan sodium
  effect on development of collateral circulation after acute arterial occlusion (rat), **202,** 1149
Temperature
  changes in, induced excitation of electric organ (*Malapterurus electricus*), **200,** 704
  effect on
    coupling efficiency of hepatic oxidative phosphorylation, role of adenine nucleotide translocator (rat), **202,** 816
    hypoxia–hypoglycemia-induced calcium mobilization in hippocampal slices (monkey), **205,** 1843
Teratology
  1,10-phenanthroline, analysis in *Xenopus laevis* embryo, **200,** 1398
Ternary complex factor
  binding sites, and CArG boxes, co-occurrence in cytomegaloviral genome, **205,** 545
  and PEAS-3 binding factor: serum response factor associated ETS proteins (human), **201,** 1406
Tertiary structure
  hepatocyte growth factor and deletion variant, analysis (rat), **200,** 808
Testis
  activin type II receptor mRNA levels, relationship to activin-βA subunit mRNA expression (murine), **203,** 105
  chromatin, condensation, induction by histones: comparison of testis-specific H1t and somatic H1 variants (rat), **198,** 32
  expression of G_{M2} activator protein (mouse), **204,** 741
  localization of zinc finger Br140 homologous to TFIID (human), **198,** 1143
  seminiferous epithelium, apoptosis, induction by testosterone withdrawal during spermatogenesis *in vivo* (rat), **202,** 1315
  specific calcineurin B isoform β1, *in situ* localization in developing testis (rat), **203,** 1275
Testosterone
  hydroxylation by cytochromes P450 2A10 and 2A11, structure–function analysis (rabbit), **203,** 373
  5α-reductase 2, glycosylated nature (human prostate), **205,** 269
  withdrawal during spermatogenesis, induction of apoptosis *in vivo* (rat), **202,** 1315
Testosterone 5α-reductase 2
  glycosylated nature (human prostate), **205,** 269
Tetrabromosulfophthalein
  –bilirubin binding protein, and bilitranslocase, role in glutathione uptake in basolateral liver plasma membrane vesicles (rat), **200,** 1079
Tetracycline
  repressible inhibition of eukaryotic gene expression, **202,** 1664
Tetracycline/H^+ antiporter
  truncated at last transmembrane helix, rapid degradation in *Escherichia coli,* and protective effect of overproduced GroEL/ES, **202,** 258
12-*O*-Tetradecanoylphorbol 13-acetate
  effect on
    acidic ribosomal protein P0 mRNA expression in FRTL-5 cells (rat), **203,** 780
    coupling of human α_2AC10 and α_2C-C4 receptor subtypes in CHO cells, relationship to receptor inhibition of cAMP accumulation, **199,** 869
  epidermal ornithine decarboxylase activity induced by, modulation by calcium and verapamil (mouse), **199,** 582
  limb mesenchymal cells inhibited from cartilage differentiation by, expression of homeobox-containing gene *Msx1* and lack of gap junctional communication (chicken embryo), **205,** 429
  potentiation of glucocorticoid-mediated viral promoter induction in mammary carcinoma (mouse), **198,** 1183
  protein kinase C activation, role in attachment of immunocytes to polyphemusin II, **202,** 470
  regulation of sphingosine kinase in BALB/C 3T3 fibroblast variant A31: cell type-specific response (mouse), **198,** 1
  and retinoic acid, synergy in induction of protein kinase C activation (rat brain), **204,** 112
  rhabdomyosarcoma cell differentiation induced by, role of dephosphorylation and nuclear accumulation of mutant p53 (human), **202,** 17
  TNF-α production induced by, in leukemia cell lines, enhancement by thalidomide (human), **199,** 455
2-(Tetradecylhexadecyl)-*O*-(5-acetamido-3,5-dideoxy-D-glycero-α-D-galacto-2-nonulopyranosylonic acid)-(2→3)-*O*-β-D-galactopyrannosyl-(1→4)-β-D-glucopyrannoside
  chemically synthesized, as potent inhibitor of cellular immune responses, **203,** 1102
Tetraethylammonium
  blockade of maxi-K^+ channels, release by isoproterenol (guinea pig myocytes), **201,** 24
Tetrafibricin
  and RGDs, effects on glycoprotein IIb/IIIa and vitronectin receptor, comparison (human), **204,** 325
Tetrahydrobiopterin
  constitutive secretion by vascular endothelial cells (mouse),

203, 1522
  identification as endothelium-derived relaxing factor (human), **205,** 516
  synthesis by endothelial cells, nitric oxide production (mouse), **199,** 504
1,3,4,5-Tetramethyl-2-[(2-oxopropyl)thio]imidazolium chloride
  inhibition of transglutaminase, effects during egg fertilization and development (*Sphaerechinus granularis*), **205,** 565
Tetrapeptides
  N-terminally protected, based on pentapeptide sequence in cobra venom, evaluation as opioid antagonist, **202,** 1285
TGF, *see* Transforming growth factor
Thalidomide
  effect on phorbol ester-induced production of TNF-α by leukemia cell lines (human), **199,** 455
Theophylline
  effect on intracellular pH increase during meiosis in *Xenopus laevis* oocytes, **205,** 979
Thermal stability
  liposomes made from bipolar tetraether lipids, characterization, **202,** 673
Thiabendazole
  effect on cytochrome P4501A1 levels in hepatocytes *in vitro* (rabbit), **202,** 1483
Thiamine disulfide
  inhibition of tat-mediated transactivation of HIV-1, **205,** 967
Thimet oligopeptidase
  brain membrane endopeptidase characteristic of, assay and partial purification (swine), **198,** 787
Thioctic acid
  effects on c-*fos* expression in Jurkat T cells (human), **200,** 1136
  supplementation, prevention of vitamin E deficiency symptoms (mouse), **204,** 98
Thiols
  free reagents, removal from dilute solutions with two-step precipitation method for protein recovery and quantitation, **200,** 916
  reactive, mediation of blastocyst–uterine interactions during implantation (mouse), **198,** 150
Thioredoxin
  inhibition of metal-catalyzed oxidation systems by, yeast protector protein in presence of (*Saccharomyces cerevisiae*), **201,** 8
Thioredoxin reductase
  reduction of 6-biopterin to quinoid dihydrobiopterin in melanocytes (human), **204,** 43
Thiyl radicals
  generation from neocarzinostatin, mediation by NADPH –cytochrome P450 reductase via activation of enediyne chromophore, **205,** 1716
Threonine
  Thr^{194}, role in site-directed mutagenesis of histamine H_1 receptor, **203,** 1096
  Thr^{203} residue, role in transmembrane domain 5 of histamine H_1-receptor, analysis by site-directed mutagenesis of H_1-receptor (guinea pig), **201,** 295
Thrombin
  α-fibrinogenase, isolation of multiple isoforms from rattlesnake *Crotalus atrox,* N-terminal sequence homology with ancrod from Malayan pit viper, **201,** 1414
  induced Ca^{2+} influx and protein tyrosine phosphorylation in endothelial cells, inhibition by herbimycin A (human), **202,** 1651
  induced tyrosine phosphorylation and activation of mitogen-activated protein kinase, role in late arachidonic acid release in platelets (human), **198,** 497
  interaction with glycoprotein Ib, inhibition by echicetin β subunit, **205,** 68
  related activity directed toward fibrinogen β chain, venom protease with, purification and cDNA sequence analysis (Taiwan habu), **205,** 1707
  and thrombin peptide activating receptor, comparative effects on proteoglycan synthesis and distribution in endothelial cells (human), **205,** 1625
  vascular smooth muscle cell proliferation induced by, role of NF-κ activation (human), **204,** 950
  in vitro antagonists, defibrotide aptamer sequences acting as, isolation and identification (human), **200,** 933
Thrombin–antithrombin III complex
  receptor-mediated endocytosis by U937 monocytoid cells (human), **200,** 1334
Thrombin receptor-activating peptide
  effect on platelet procoagulant activity (human), **202,** 321
  and thrombin, comparative effects on proteoglycan synthesis and distribution in endothelial cells (human), **205,** 1625
Thrombin receptors
  activation in epithelial-like SH-EP cells, role of consecutive phenylalanine residues in thrombin receptor-tethered ligand peptides, **203,** 366
  N-terminal peptide, inhibition of thrombomodulin in umbilical vein endothelial cells *in vitro* (human), **199,** 1262
  signaling, antagonization by E5510 via inhibition of NF-κB activation (human), **203,** 1181
  signal transduction through 33-kDa protein kinase in platelets (human), **203,** 907
Thrombomodulin
  encoding gene, 3′-untranslated region, detection of functional cAMP-responsive element (human), **200,** 1391

  expression by cultured human endothelial cells, effect of fluid shear stress (human), **205,** 1345
  in umbilical vein endothelial cells, inhibition by thrombin receptor agonist peptide *in vitro* (human), **199,** 1262
Thrombospondin
  promotion of plasminogen activator inhibitor type 1 production and stimulation of tumor cell attachment *in vitro* (human), **203,** 857
Thromboxane synthase
  gene promoter, cloning and characterization (human), **201,** 379
Thylakoids
  membranes, Mg^+-induced lipid phase transitions in, effects of anions (spinach), **202,** 1724
Thymidine
  incorporation in glomerular mesangial cells, and MAP kinase activation, effects of extracellular ATP (rat), **202,** 234
Thymidine kinase
  gene promoter, G1 phase-specific complex Yi1 binding, cyclin D1/cdk2 kinase in, detection (mouse), **205,** 1859
  herpes simplex virus type 1, encoding gene, in regulation of recombinant human granulocyte colony-stimulating factor production in NIH3T3 cells, **200,** 1245
  sequence insertion effects on intronless β-globin gene mRNA accumulation (mouse), **203,** 128
Thymocytes
  apoptosis
    dexamethasone-induced, selective inhibition by herbimycin A (rat), **202,** 128
    formation of high-molecular-weight DNA fragments during, role of Ca^{2+} (human), **202,** 120
    role of cyclin-dependent protein kinase Cdc2 (rat), **202,** 1400
  apoptosis and differentiation, modulation by cholinergic stimulation via nicotinic effect on thymic epithelium (mouse), **203,** 1057
  expression of non-receptor-type protein tyrosine phosphatase with homology to cytoskeletal protein 4.1 (mouse), **203,** 479
  isolation of nuclear DNase forms α, β, and γ and analysis of enzyme changes during apoptosis (rat), **203,** 789
  vasoactive intestinal peptide receptor gene expression (rat), **203,** 1599
Thyroglobulin
  dityrosine bridges, detection and role of iodination in formation (bovine), **202,** 38
Thyroid
  from Graves' disease patients, inositol phospholipid pathway in, effects of thyrotropin and adenosine, **205,** 584
  non-toxic goiter, inositol phospholipids pathway, role of thyrotropin (human), **201,** 1182
  transcription factor-1, gene structure (rat), **204,** 1358
  tumors, thyrotropin receptor expression, Western blot analysis, correlation with thyrotropin-binding assay (human), **205,** 361
Thyroid cells
  FRTL-5
    actions of adenosine and derivatives, genistein effects: identification as competitive antagonist fir P_1 purinergic receptors, **203,** 1488
    expression of soluble lectin L-14, gene, induction by TSH (rat), **199,** 540
    increased expression of acidic ribosomal protein P0 after phorbol ester treatment (rat), **203,** 780
    thyroid hormone inhibition of thyrotropin receptor promoter activity: evidence for short loop regulation (rat), **205,** 230
Thyroid follicles
  Na^+/I^- symporter in, inhibition by chloride channel blockers *in vitro* (pig), **204,** 1265
Thyroid hormones
  inhibition of thyrotropin receptor promoter activity: evidence for short loop regulation (CV-1, FRTL-5 cells), **205,** 230
Thyroiditis
  and thyrotropin receptor autoantibodies, induction in mice immunized with recombinant TSH-R, **199,** 1027
Thyroid peroxidase
  expression and DNA polymorphisms in thyroid cancer (human), **198,** 948
Thyroid/steroid receptors
  NOR-1, from cultured neuronal cells, gene cloning (rat), **205,** 1959
Thyroid-stimulating hormone, *see* Thyrotropin
Thyroliberin, *see* Thyrotropin-releasing hormone
Thyrotropin
  and adenosine, effects on inositol phospholipid pathway in thyroid from Graves' disease patients, **205,** 584
  binding assay, and Western blot analysis, thyrotropin receptor expression in thyroid tumors, correlation (human), **205,** 361
  binding to thyrotropin receptors, TSHR point mutations determining structural requirements (human), **199,** 612
  effect on inositol phospholipids pathway in thyroid non-toxic goiter (human), **201,** 1182
  induction of soluble lectin L-14 gene expression in thyroid cells (rat), **199,** 540
Thyrotropin receptors
  autoantibodies to, and thyroiditis, induction in mice immu-

nized with recombinant TSH-R, **199,** 1027
expression in thyroid tumors, Western blot analysis and thyrotropin-binding assay, correlation (human), **205,** 361
glycosylation, differences among mammalian species, **200,** 1207
point mutations determining structural requirements for ability to bind thyrotropin and stimulate adenylate cyclase activity (human), **199,** 612
promoter activity, inhibition by thyroid hormone: evidence for short loop regulation (CV-1, FRTL-5 cells), **205,** 230
residues 684–692 in intracellular region adjacent to plasma membrane, role in phosphoinositide signaling and agonist-induced adenylate cyclase activation, **199,** 1497

Thyrotropin-releasing hormone
  activin A-, AB-, and B-responding pituitary cells in response to, characterization (rat), **203,** 1739
  effect on pituitary cells (rat), **199,** 1436
  induction of prolactin secretion in GH3 cells, role of tyrosine kinase (rat), **199,** 1447
  potentiating peptide Ps4, and receptors, distribution in brain and peripheral tissues (rat), **200,** 958
  and TRH precursor, levels in anterior pituitary gland (rat), **201,** 1248

Thyroxine
  effects on cholesterol 7α-hydroxylase mRNA and *CYP7* gene expression in HepG2 cells (human), **198,** 546

Time-course curve
  enzyme reactions with dilute substrates, determination from reverse reactions, **203,** 805

Tissue inhibitor of metalloproteinases
  and gelatinase B, *in vitro* modulation in HIV-1-infected macrophages, **204,** 1272
  TIMP and TIMP-2, and BB87, prevention of collagen breakdown in nasal cartilage (bovine), **201,** 94
  TIMP-1
    human recombinant, expression and characterization in baculovirus expression system, **203,** 237
    N-terminal domain, peptide based on, inhibition of stromelysin (human), **205,** 1156
    stimulation of collagenase secretion from skin fibroblasts (human), **203,** 874

Tissues
  S-adenosylhomocysteine and *S*-adenosylmethionine levels, HPLC assay (rat), **205,** 1748
  α1C-adrenergic receptor mRNA distribution, analysis by RNase protection assay and comparison with α1B and α1D (adult rat), **200,** 1177
  adult and fetal, expression of neutrophil gelatinase-associated lipocalin (human), **202,** 1468
  androgenetic and gynogenetic, ABL and BCR gene expression without imprinting (human), **204,** 621
  annexin XI subcellular immunolocalization: development-related and cell type-specific nuclear localization (rat), **202,** 403
  brain and gut, apoptosis after cycad toxicity (mouse), **205,** 327
  cellular, expression of carbohydrate antigens recognized by anti-horseradish peroxidase antiserum (bovine, rat), **204,** 342
  differential β-*N*-acetylhexosaminidase expression (mouse), **199,** 1341
  differentiated adult, and unfertilized oocytes, expression of bFGF sense and antisense RNA transcripts (human), **205,** 577
  distribution of
    lysosomal protective protein (human), **205,** 38
    vascular-type vasopressin receptor (human), **203,** 72
  expression of
    creatine transporter hCRT-BS2M cDNA (human), **204,** 419
    prostacyclin-stimulating factor (rat), **202,** 1490
  fatty acid levels after endotoxin injection, effects of linoleic acid *in vivo* (mouse), **198,** 1107
  kexin-like processing protease PACE4 isoform mRNAs, distribution (rat), **202,** 1215
  localization of zinc finger Br140 homologous to TFIID (human), **198,** 1143
  peripheral, distribution of thyrotropin-releasing hormone-potentiating peptide Ps4 and receptors (rat), **200,** 958
  proadrenomedullin N-terminal 20 peptide immunoreactivity in, characterization (human), **202,** 1081
  prostacyclin synthase mRNA distribution (human), **200,** 1728
  rab3c GTP-binding protein distribution and expression (rat), **200,** 1257
  trophoblastic, invasive phenotype, correlation with inverse expression of laminin-binding proteins 67LR and galectin-3 (human), **201,** 388
  vegetative, α-amylase mRNA in, poly(A) tail shortening (*Oryza sativa*), **202,** 1031
  xanthine dehydrogenase gene expression (human liver), **199,** 998

TNF, *see* Tumor necrosis factor

TNP-470
  effects on DNA synthesis and cyclin D1 and c-myc mRNA expression in vascular endothelial cells (human), **204,** 1067

Tobacco smoke, *see* Cigarette smoke

α-Tocopherol, *see* Vitamin E

Tongue
  intact epithelium, taste receptor proteins, direct extraction by

    liposome (*Rana catesbeiana*), **201,** 415
Tonoplasts
  potassium channels, activation by cytoplasmic ATP (*Arabidopsis thaliana*), **200,** 1143
Topa quinone
  covalently bound cofactor of phenylethylamine oxidase, Tyr-382 as precursor, identification (*Arthrobacter globiformis*), **199,** 1096
Topoisomerase
  related activity, detection in mitochondria (*Saccharomyces cerevisiae*), **198,** 387
Topoisomerase I
  inhibition, enhancement of vitamin D-stimulated CD 14 expression (human), **199,** 531
Topoisomerase II
  independent doxorubicin toxicity in TN-368 insect cells and murine fibroblasts, **198,** 582
  streptonigrin-induced sites, exhibition of base preferences in middle of enzyme stagger (human), **203,** 1259
Nα-p-Tosyl-L-lysine chloromethylketone
  inhibition of interleukin-1β-activated NF-κB in RINm5F cells, **203,** 149
TPA, *see* 12-*O*-Tetradecanoylphorbol 13-acetate
β-Trace
  identification as prostaglandin D synthase (human), **203,** 1110
Trachea
  mucin glycoprotein, viscosity, role of sialic acid (dog), **205,** 402
Tracheal cells
  cytosolic calcium levels *in vitro,* effect of menthol (dog), **201,** 1333
Tracheal gland cells
  serous, increased coexpression of CFTR and S100 calcium binding protein MRP8 and MRP14 mRNAs in cystic fibrosis (human), **201,** 1518
Transactivation
  HIV-1, tat-mediated, inhibition by thiamine disulfide, **205,** 967
  TAR-independent, by Tat from major immediate-early promoter of murine cytomeglaovirus, role of HIV-1 *env* gene sequence, **203,** 1152
  transcriptional, $p185^{neu}$ tyrosine kinase, association with nuclear localization (rat), **203,** 1589
Transcaltachia
  generation by 1α,25-dihydroxyvitamin D_3 analogs with ability to differentiate between vitamin D nuclear and membrane receptors (chicken), **201,** 394
Transcobalamin II deficiency
  nonsense mutations in, detection (human), **204,** 1111
Transcription
  activation of
    interleukin-6 response element in *junB* promoter, mediation by stat family proteins (rat), **202,** 1181
    *ori*λ, role in regulation of λ plasmid replication (*Escherichia coli*), **205,** 802
  activation from GM–CSF promoter in T cells by calcineurin in synergy with κB/AP-1 or protein kinase C (human), **199,** 1064
  apolipoprotein A-II, down-regulation by first intron of gene (human), **202,** 822
  associated regulation of E-cadherin gene in prostate cancer cells: characterization of E-cadherin gene promoter (human), **203,** 1284
  cathepsin B gene, regulatory role in CB expression in B16 melanomas of varying metastatic potential (mouse), **202,** 429
  c-*fos* gene, repression by thyroid hormone and retinoic acid receptors, identification of mediating promoter elements (GH1 cells), **205,** 135
  differential, 17β-hydroxysteroid dehydrogenase I pseudogene: candidate for breast–ovarian susceptibility gene (human), **201,** 1327
  heat shock gene hsp70 in HT-29 cells, effect of staurosporine (human), **202,** 476
  hepatitis delta virus mRNA after polyadenylation, role of ribozyme, **205,** 864
  HTLV-I, Tax-induced, modulation by phosphorylation, **205,** 666
  implications from competition between linker histones and high mobility group protein 1 for binding to four-way junction DNA (bovine, chicken), **203,** 1904
  induction of vascular endothelial growth factor under hypoxia, assay with reverse transcription–PCR (human), **205,** 1474
  inhibition, effects on ubiquitinated histone levels in chromatin in mammalian cell lines, **203,** 344
  KC homolog of human *MGSA/GRO,* negative regulation by glucocorticoids (mouse), **203,** 1809
  mitochondrial RNA processing enzyme gene in stage 1 oocytes, role of novel *cis*-element (*Rana brevipoda, Xenopus laevis*), **202,** 225
  multiple start sites, and 5′ alternate splicing, interleukin-3 β-chain transcripts (mouse), **205,** 886
  p53 mRNA, TPA-induced decrease in rhabdomyosarcoma cells (human), **202,** 17
  positive regulatory element, identification in S1 nuclease sensitive region of PDGF A-chain gene promoter, **198,** 103

  regulation of
    lipoprotein lipase in heart during development (rat), **202,** 838
    yeast *POT1* gene, differential effects of *ADR1* and *SNF1*, **202,** 960
  and translation, *in vitro* activities, increase after separate irradiation of system components with He-Ne laser, **203,** 991
  tyrosine aminotransferase gene in hepatocyte cultures, induction, regulation by ginesenoside-Rg_1 (rat), **205,** 1696
Transcriptional activators
  for copia transposon, responsible for differential copia expression in *Drosophila hydei* and *D. melanogaster* cell lines, identification, **203,** 392
  FNR, role in regulation of *Vitreoscilla* globin gene, **202,** 535
Transcriptional elements
  for fibroblast growth factor receptor 1 gene expression, mapping (mouse), **198,** 1020
Transcription factors
  binding to insulin-1 gene promoter, glucose effects (rat), **203,** 702
  cell type-specific, signaling pathway-modulated, role in herpes simplex virus-1 UL9 gene expression (HeLa, PC12, Vero cells), **205,** 44
  Egr-1, c-fos, and c-jun, angiotensin II-induced expression, preceding increase in TGF-β_1 mRNA in cardiac fibroblasts (neonatal rat), **205,** 105
  Egr-1, phosphorylated and non-phosphorylated forms, efficiency of binding to DNA (NIH3T3 cells), **200,** 1271
  encoded by mutant *mi* locus, loss of DNA binding ability (mouse), **205,** 1299
  κB/AP-1, in synergy with calcineurin, activation of transcription from GM–CSF promoter in T cells (human), **199,** 1064
  mitochondrial transcription factor A, levels in mitochondrial DNA deletion, analysis (human), **200,** 1374
  NF-κB
    activation
      by CD4-mediated signals in T cells stimulated by HIV-1 gp160 (human), **203,** 498
      inhibition in E5510 antagonization of thrombin receptor signals (human), **203,** 1181
      interleukin-1β-induced, inhibition by Nα-*p*-tosyl-L-lysine chloromethylketone (RINm5F cells), **203,** 149
      role in thrombin-induced vascular smooth muscle cell proliferation (human), **204,** 950
    in positive regulation of platelet-activating factor receptor transcript 1 gene expression by PAF (human), **205,** 1137
    subunit binding to HIV-1 enhancer, TNF-α and interleukin-1β effects (human), **203,** 623
  nuclear, *see* Nuclear factors
  Oct-1 and Oct-3, expressed by embryonal carcinoma and embryonic stem cells, binding by Rex-1 promoter octamer motif (human, mouse), **203,** 1795
  Oct-2, C-terminus, function as activation domain in yeast (human), **205,** 1998
  putative, BCL6, DNA recognition sequence, determination (human), **204,** 366
  Sp1, role in induction of murine GM–CSF promoter in human T cells, **205,** 1518
  TFIID, zinc finger Br140 homologous to, cloning, sequencing, and immunolocalization (human), **198,** 1143
  TFIIIA, expression in *Escherichia coli* and purification (*Saccharomyces cerevisiae*), **203,** 1217
  thyroid, type 1, gene structure (rat), **204,** 1358
Transcytosis
  capillary, reduced glutathione in vascular perfused brain (guinea pig), **201,** 402
Transducin
  photoreceptor, as substrate for ubiquitin-dependent proteolysis (bovine), **200,** 1169
  T_α and $T_{\beta\gamma}$ subunits, effects on muscarinic K^+ channels (guinea pig atrial myocytes), **200,** 1484
β-Transducin repeats
  regions of trimeric G proteins containing, binding of β-adrenergic receptor kinase and β-spectrin pleckstrin homology domains, **203,** 29
Transduction
  electromechanical, *see* Electromechanical transduction
Transfection
  mammalian cells by cationic amphiphile diC_{14}-amidine, **203,** 1622
Transferrin receptors
  and intracellular iron content, in epidermoid carcinoma cells, interferon-α effects (human), **203,** 281
  monoclonal antibody, conjugation with adenovirus type 2, for protein delivery into cells (human), **203,** 582
Transforming growth factor α
  in hepatocellular carcinoma cells, regulation by hepatocyte growth factor (human), **200,** 1099
  induced mitogenic transitions, and growth cycle, in primary hepatocytes, associated cyclin D1 mRNA expression (rat), **204,** 91
Transforming growth factor β
  effects on
    human elastin promoter in transgenic mouse, **203,** 485

    5-lipoxygenase induction and activity in HL-60 cells (human), **205,** 1572
  exogenous, enhancement of nerve growth factor family neurotrophin expression in osteoblastic cell line (mouse), **198,** 891
  identification in elastin promoter responsive element (human), **199,** 1049
  isoforms 1–4, expression in limb bud mesenchymal cells, regulation by 1,25-dihydroxyvitamin D_3 (chicken embryo), **204,** 975
  promotion of plasminogen activator inhibitor type 1 production and stimulation of tumor cell attachment *in vitro* (human), **203,** 857
Transforming growth factor β_1
  and acetaldehyde, regulation of undulin and fibronectin synthesis and gene expression in fat-storing cells, comparison (human), **199,** 1019
  and estrogen, in positive and negative regulation of platelet-activating factor receptor transcript 2 (human), **205,** 1130
  expression regulation by TGF-β_1 cDNA (human), **204,** 1061
  growth regulatory effects on neurofibroma cells in neurofibromatosis type 1, **198,** 827
  mRNA, increase in cardiac fibroblasts after angiotensis II-induced expression of transcription factors (neonatal rat), **205,** 105
  post-transcriptional inhibition of growth hormone releasing factor secretion (mouse placenta), **204,** 1206
  production by aortic smooth muscle cells, induction by interleukin-1β (rat), **204,** 1186
  regulation of expression of ryanodine-sensitive Ca^{2+} oscillations in cardiac myocytes (rat), **204,** 678
  responses in MG-63 osteoblastic cells, modulation by 1,25-dihydroxyvitamin D_3 (human), **204,** 918
  and TGF-β_2, binding to α_2-macroglobulin, role of cysteine 949 (human), **200,** 1578
Transforming growth factor β_2
  and TGF-β_1, binding to α_2-macroglobulin, role of cysteine 949 (human), **200,** 1578
Transforming growth factor β receptors
  type I
    homologous with human TGF-βRI, molecular cloning (mouse), **198,** 1054
    requiring type II receptor for binding, isolation (mouse), **198,** 1063
  type II
    promoter, cloning and expression (human), **203,** 1020
    regulation by 1,25-dihydroxyvitamin$_3$, role in modulation of osteoblastic cell responses to TGF-β_1 (human), **204,** 918
Transgenes
  sustained cytoplasmic expression system delivered by cationic liposomes (293 cells), **200,** 1201
Transgenic mouse
  apolipoprotein E-deficient, cellular cholesterol efflux, role of HDL apoE, **205,** 1072
  hepatic lipoprotein profile, effect of expression of cynomolgus monkey cholesteryl ester transfer protein, **205,** 1257
  human elastin promoter activity, transforming growth factor β effects, **203,** 485
  immunological function, suppression by α-fetoprotein, **201,** 1154
Transglutaminase, *see* Protein-glutamine γ-glutamyltransferase
Transglycosylation
  endo-β-*N*-acetylglucosaminidase (*Mucor hiemalis*), **203,** 244
Transin, *see* Stromelysin 1
Translation
  acrosin gene, regulation (rat), **202,** 88
  early growth response gene-1 in myogenic cells, control by mitogenic signals (mouse), **202,** 1337
  hepatitis C virus, initiation, role of complete 5′ noncoding region (human), **199,** 425
  presecretory protein, extent of signal recognition particle-mediated arrest, relationship to protein size, **205,** 603
  and transcription, *in vitro* activities, increase after separate irradiation of system components with He-Ne laser, **203,** 991
  in vitro, D2 dopamine receptors and chimeras, analysis by subtype-specific antibodies (mouse), **205,** 1460
Translation initiation factors
  eIF-2, β-subunit, identification of phosphorylation sites (rabbit reticulocytes), **201,** 1279
  Saccharomyes cerevisiae suil gene-encoded, human isolog, identification with expressed sequence tags, **198,** 288
Translocation
  facilitated by nuclear pore complex, engagement by nuclear localization signal and subsequent intranuclear binding (*Xenopus laevis* oocytes), **205,** 529
  glucokinase in hepatocytes by glucose (rat), **204,** 252
  glucose transporter in muscle, insulin effect (mouse), **199,** 662
  insulin-responsive glucose transporter GLUT4, induction by epidermal growth factor (CHO cells), **205,** 857
  nuclear
    hsp72 in liver cells of halothane-exposed rats, **199,** 647
    mitogen-activated protein kinase in Nb2 lymphoma cells, induction by prolactin (rat), **204,** 1158
  recombinant polypeptides translated from pUMA vector-derived cRNAs through microsomal membranes (*Xenopus laevis*), **204,** 1346

  SecA ATPase, role of protein carboxy-terminal region (*Escherichia coli*), **200,** 1477
Transport, *see specific types*
Transposons
  hobo-like, identification and characterization in *Heliothis virescens* and *Heicoverpa zea* genomes, **203,** 169
TRH, *see* Thyrotropin-releasing hormone
Triacylglycerol lipase
  interfacial binding, role in enzyme kinetics of lipolysis, **200,** 1321
Tri-Calciphor
  effects on glucose metabolism in liver cells (rat), **201,** 1457
1,1,1-Trichloroethane
  oxidation by cytochrome P450$_{CAM}$ (*Pseudomonas putida* G786), **201,** 373
1,1′-(2,2,2-Trichloroethylidene)*bis*[4-chlorobenzene]
  photodegradation, role of reactive oxygen species, **199,** 1284
Trifunctional β-oxidation complex
  large subunit, cardiac mitochondria-associated, primary structure (swine), **198,** 431
3,5,3′-L-Triiodothyronine, *see* Liothyronine
Trilobolide
  inhibition of Ca^{2+}-ATPase, role of hydroxyl moieties (rabbit), **199,** 916
4,5′,8-Trimethylpsoralen, *see* Trioxsalen
Trioxsalen
  photophysical alteration of erythrocyte membrane (rat), **199,** 1413
Trophoblast cells
  differentiation, associated expression of cellular retinoic acid binding protein-II and retinoic acid receptor (human), **202,** 772
  placental, in two-sided culture, directional accumulation and transfer of 2-aminoisobutyrate, differential effects of epidermal growth factor and insulin-like growth factor I (human), **199,** 922
α-Tropomyosin
  isoforms in heart, cloning, sequencing, and expression (*Ambystoma mexicanum*), **203,** 319
Troponins
  TnTs, slow skeletal, mRNA isoform, derivation from alternative splicing of single gene (human), **199,** 841
  TnT and TnI, changes in cardiac hypertrophy (guinea pig), **202,** 384
Trypanosoma cruzi
  invasion of macrophages, effects of protein kinase inhibitors, **203,** 967
Trypanothione reductase
  chinifur as selective inhibitor and subversive substrate (*Trypanosoma congolense*), **204,** 224
Trypsin
  analysis by electrospray–mass spectrometry (bovine), **199,** 694
Tryptase
  localization with CD4 antigen on surface of monocytoid and CD4$^+$ lymphoid cells (human), **201,** 1390
Tryptophan
  hyperproducing strain of *Corynebacterium glutamicum,* 5-methyltryptophan, resistance sequence from, characterization, **201,** 1255
  operon, constitutive internal promoter in, analysis (*Corynebacterium glutamicum*), **203,** 820
  residue 800 in smooth muscle myosin light chain kinase, role in calmodulin-binding site (turkey), **202,** 1329
TSAO
  and other HIV-1-specific reverse transcriptase inhibitors, sensitivity of (138 Glu→Lys) mutated HIV-1 RNA-directed DNA polymerase, **201,** 1305
TSH, *see* Thyrotropin
Tuberous sclerosis
  encoding gene, tight linkage of predisposing gene of Eker rat inherited cancer syndrome, **203,** 1302
Tumor cells
  acute myeloid leukemia, β-1,3-galactosyl-*O*-glycosyl-glycoprotein β-1,6-*N*-acetylglucosaminyltransferase, inhibition by photoreactive nitrophenyl substrate derivatives (human), **198,** 417
  adhesion to endothelial cells, and endothelial E-selectin expression, induction by endothelial cell activation factors released from activated platelets (human, mouse), **203,** 1605
  ascites, biotransformation of sodium nitroprusside into dinitrosyl iron complexes (mouse), **202,** 168
  astrocytoma, T67, HIV gp120-dependent prostaglandin E$_2$ release, regulation by nitric oxide (human), **203,** 87
  basophilic leukemia, RBL-2H3
    A$_3$ adenosine receptor, selective agonist affinity probe (rat), **203,** 570
    phospholipase D activation by phenylarsine oxide (rat), **199,** 792
  bladder carcinoma, EJ-1, 30-kDa major secretory protein, cell adhesion activity (human), **198,** 1046
  B lymphoma, WEHI 231, apoptotic response to anti-immunoglobulin, corticosteroids, and irradiation, mediation by ceramide (mouse), **202,** 710
  brain tumor, cytotoxicity of quaternized ellipticines, cellular uptake as determinant (human), **200,** 1762
  breast cancer
    estrogen receptor-negative MDA-MB-231 stimulating

    - estrogen receptor-positive cells, heregulin-like growth factor secreted by, isolation (human), **202,** 1357
  - MCF-7
    - estrogen-stimulated proliferation, inhibition by insulin-like growth factor binding protein 3 (human), **198,** 292
    - multidrug-resistant, increased phospholipase D activity (human), **202,** 211
    - and multidrug resistant MCF-7/ADR cells, heat shock gene expression during 41°C heating, effect of isoquinolinesulfamides (human), **199,** 714
  - MDA MB231, cell surface-associated precursor form of heparin-binding EGF-like growth factor, biosynthesis and processing by phorbol ester (human), **204,** 592
  - SKBr 3, binding of benzoquinoid ansamycins to p100, correlation with depletion of *erb*B2 gene product p185 (human), **201,** 1313
  - T47D, proliferation, inhibition by cisplatin and taxol (human), **202,** 1413
- Burkitt's lymphoma
  - butyrate-induced apoptosis in, transient hsp70 mRNA overexpression preceding, detection (human), **198,** 257
  - CA46, cell cycle progression, effects of protein kinase C inhibitor ilmofosine (human), **199,** 937
- C6, cytosolic phospholipase A_2 gene, induction by interleukin-1β (rat), **205,** 12
- cervical cancer, HeLa
  - enhancer function of 5′ flanking region of neutrophil elastase gene (human), **204,** 38
  - exposed to arsenite, increase in mRNA levels of ferritin H and metallothionein-II (human), **205,** 590
  - heterogeneous ribonucleoproteins, ADP-ribosylation (human), **204,** 772
  - nucleus, localization of cyclin/cdk2 complexes, **203,** 1527
  - and other cell lines, cell type-specific induction of herpes simplex virus-1 UL9 gene by cell signaling pathway (human), **205,** 44
  - phosphorylation of Rap1GTPase activating protein during cell cycle (human), **202,** 967
- colon adenocarcinoma, HT-29
  - glycosphingolipids in, differentiation-dependent metabolic processing (human), **202,** 992
  - hsp70 heat shock gene transcription, effect of staurosporine (human), **202,** 476
  - MUC2 and MUC3 mRNAs, alteration of expression (human), **199,** 1012
- colon adenocarcinoma, LoVo, gastrin-stimulated growth, role of cholecystokinin-A and CCK-B receptors (human), **202,** 1222
- colon adenocarcinoma, LoVo/Dx, antisense oligonucleotide uptake and degradation, effect of cationic lipids (human), **197,** 818; *erratum,* **200,** 1769
- colon cancer
  - Colo 205, fucosylated structures as ligands for selectins, biosynthetic control: substrate inhibition by precursor structures (human), **201,** 78
  - killing by retrovirus-mediated TNF-α receptor gene transfer into (human), **202,** 1538
  - and normal colonic epithelium, neurotensin receptor protein and mRNA expression, binding studies and RT-PCR (human), **203,** 465
- Ehrlich ascites
  - functional reconstitution of plasma membrane ferricyanide reductase, **205,** 1109
  - mitochondria, associated endoribonuclease, role in mRNA splicing (mouse), **196,** 47; *erratum,* **205,** 2013
- embryonal carcinoma, F9 and NT2/D1, expressed Oct-1 and Oct-3, binding by Rex-1 promoter octamer motif (mouse), **203,** 1795
- embryonal carcinoma, P19
  - cardiac myocyte differentiation and neuronal differentiation, dose-dependent effect of 3,5,3′-triiodo-L-thyronine (mouse), **205,** 652
  - cultures induced for cardiac myogenesis, activation of gene for type-B natriuretic factor (mouse), **199,** 954
  - GM-CSF gene inducibility, associated *cis*-DNA element, identification (human), **198,** 473
  - retinoid X receptor expression (mouse), **200,** 1252
  - 3,5,3′-triiodo-L-thyronine-induced differentiation into cardiac myocytes, associated preferential binding of RGG(T/A)CA direct repeats spaced by 4 base pairs in DNA (mouse), **205,** 1899
- endometrial cancer, Ishikawa, cathepsin D gene insensitivity to estradiol, relationship to estrogen response element sequence (human), **203,** 711
- epidermoid carcinoma
  - A431, proliferation, dual effect of epidermal growth factor, relation to MAP knase activity (human), **203,** 984
  - hypomethylation and hypoexpression of cytochrome P4502E1 gene (human), **205,** 1086
  - KB, transferrin receptor expression and intracellular iron content, interferon-α effects (human), **203,** 281
  - nucleus, selective transport of μ-calpain (human), **204,** 544
- erythroleukemia, DS19, variants, differential expression of protein kinase C isoform genes: implication for chemical-induced differentiation (mouse), **204,** 461
- erythroleukemia, K562
  - antisense *src* RNA expression, effects on cell proliferation

and erythropoietin-induced erythroid differentiation (human), **201,** 1534
cell death induced by cytotoxic effector cells, protection by 3-aminobenzamide and other poly(ADP-ribose)polymerase inhibitors (human), **199,** 525
enhancer function of 5′ flanking region of neutrophil elastase gene (human), **204,** 38
erythroid differentiation, induction by protoporphyrin IX and analogs (human), **198,** 720
phorbol ester-induced TNF-α production, effect of thalidomide (human), **199,** 455
transfection by cationic amphiphile diC$_{14}$-amidine (human), **203,** 1622

esophageal carcinoma, TE1 to TE13, p16 gene, highly frequent homozygous deletion (human), **203,** 1090

Ewing's sarcoma, SK-ES-1, expression of *Dbl:* gene product identification as GDP/GTP exchange protein (human), **198,** 811

fibrosarcoma
- L929, apoptosis induction by human CD40/Fas chimeric receptor (mouse), **204,** 1102
- Meth-A, K252a-induced polyploidization, potentiation by cAMP (mouse), **205,** 746

gastric cancer
- invasive, group II phospholipase A_2 induction by interleukin-6 (human), **198,** 878
- KATO-III, culture medium, soluble form of K-*sam*/fibroblast growth factor receptor protein in, characterization (human), **202,** 1387
- MKN-74, KATO-III, Okajima, and HSC-39, catenins in, association with c-*erbB*-2 gene product (human), **205,** 73
- Okajima, plakoglobin association with adenomatous polyposis coli (human), **203,** 519

glioma
- C6
  - β-amyloid protein precursor mRNA expression in, effect of ciliary neurotrophic factor (rat), **204,** 391
  - cell cycle and protein kinase C activity, effects of simvastatin (rat), **200,** 1143
- G-26, and human U-373, heterogeneity of protein kinase C activity (mouse), **205,** 127
- malignant A172 and U87-MG, growth inhibition and apoptosis, induction by lovastatin (human), **205,** 1681
- U-251 MG, overexpression of protein kinase Cγ and δ isoforms, effects on cell growth properties (human), **201,** 363
- U-373, and murine G-26, heterogeneity of protein kinase C activity (human), **205,** 127

hepatocellular carcinoma, Hep3B, cellular proteins binding central conserved region of human p53, **202,** 490

hepatocellular carcinoma, HepG2
- apolipoprotein A-IV expression, modulation by fenofibric acid (human), **198,** 764
- cholesterol 7α-hydroxylase mRNA and *CYP7* gene expression, effects of bile acids and steroid/thyroid hormones (human), **198,** 546
- cytochrome P4502E1 production and activity, ethanol effects (human), **203,** 727
- liver-specific DNase-hypersensitive sites, presence in intergenic region separating plasminogen and apoprotein(a) genes (human), **205,** 930
- sterol-mediated regulation of sterol regulatory element-binding proteins SREBP-1a, -1b, and -1c and SREBP-2 (human), **202,** 1460
- transforming growth factor α, regulation by hepatocyte growth factor (human), **200,** 1099

hepatoma
- Fao
  - expression of hepatic glucose-6-phosphatase gene, multihormone regulation (rat), **201,** 302
  - histidyl phosphorylation of P36 *in vitro* and *in vivo* (rat), **205,** 899
  - insulin receptor synthesis, effect of dexamethasone (rat), **200,** 852
  - phospho*enol*pyruvate carboxykinase (GTP) gene expression, oleate effects (rat), **203,** 385
- H4EII, insulin-stimulated mitogen-activated protein kinase pathway, inhibition by cAMP (rat), **202,** 1104
- H4II and H5, in functional analysis of bovine serum albumin gene promoter (rat), **203,** 1447
- H4IIEC3, N1S1, and McA-RH7777, very-long-chain fatty acid β-oxidation system, acyl-CoA oxidase as rate-limiting enzyme (rat), **201,** 1541
- Kupffer cell-mediated cytotoxicity, role of nitric oxide (rat), **201,** 1175
- MH1C1, growth, inhibition by phorbol 12-myristate 13-acetate, role of protein kinase C alpha isoenzyme (rat), **205,** 1589

hypercalcemic walker 256 carcinoma, proliferative effect of parathyroid hormone-related protein (rat), **198,** 1281

insulinoma
- HIT-T15, expression of gastric inhibitory polypeptide receptor and analysis of GIP receptor structure and function (hamster), **205,** 1556
- RINm5F, insulin-producing
  - interleukin-1β activation of NF-κB, inhibition by Nα-*p*-tosyl-L-lysine chloromethylketone, **203,** 149
  - interleukin-1β-induced expression of superoxide dismu-

    tase and nitric oxide synthase mRNA, dissociation (rat), **203,** 1542
leukemia
  CHRF-288, megakaryoblast-derived, serum-induced proliferation, inhibition by wortmannin, **202,** 1619
  L1210, lovastatin effects, **203,** 400
leukemic T-lymphoblast, CCRF-CEM/VLB, antisense oligonucleotide uptake and degradation, effect of cationic lipids (human), **197,** 818; *erratum,* **200,** 1769
Lewis lung carcinoma, c108, cdc2/histone H1 kinase activity, hydroxystearic acid effects (mouse), **203,** 1385
lung cancer
  A549, plasminogen activator inhibitor 1 production and tumor cell attachment *in vitro,* effects of thrombospondin and transforming growth factor β (human), **203,** 857
  apoptosis, induction by substance P (human), **199,** 1313
  H69, extracts, suramin effects on $p34^{cdc2}$ kinase (human), **203,** 1574
mammary carcinoma
  FM3A, polyamine transport and spermine restoration of growth, antizyme effects (mouse), **203,** 608
  T47D, viral promoter, glucocorticoid-mediated induction, potentiation by protein kinase C activation (mouse), **198,** 1183
mastocytoma, p815, apoptosis, mediation by nitric oxide (mouse), **204,** 244
medullary thyroid carcinoma, TT, calcitonin/calcitonin gene-related peptide minigene transcripts, alternative RNA splicing (human), **200,** 993
melanoma
  B16
    UV-induced DNA fragmentation and cell death after bromodeoxyuridine sensitization: impaired c-*jun* induction and defective tyrosine phosphorylation signaling (mouse), **203,** 1629
    of varying metastatic potential, cathepsin B expression, transcriptional regulation (mouse), **202,** 429
  cellular and secreted ligands for galectin-3, identification (human), **201,** 1366
  DM150, MAGE gene expression, **202,** 549
  M14, cytoskeleton rearrangement in, induction by 3-aminobenzamide (human), **202,** 915
  M24met, metastasis and adhesion, modulation, role of integrin phosphorylation mediated via protein kinase C (human), **204,** 264
  MZ2-MEL, cytosol, localization of MAGE-1 protein (human), **204,** 710
  SK Mel 28 and SK Mel 30, expression of functional endothelin-1 receptors (human), **201,** 449
monocytic leukemia, P388, drug resistant variants, P-glycoprotein-related protein overexpressed in, identification (mouse), **198,** 804
monocytic leukemia, U937
  differentiation, synergistic induction by all-*trans* retinoic acid and 1α,25-dihydroxyvitamin D_3, association with retinoid X receptor α expression, **203,** 272
  hypoxia-induced expression of vascular endothelial growth factor mRNA in, mediation by adenosine, **204,** 318
myeloblastic leukemia, KG1, apoptosis, selective induction by monoacetone glucose-3 butyrate, **201,** 266
myeloid leukemia
  Kasumi-1, tyrosine phosphorylation of JAK2 protein, effect of granulocyte colony-stimulating factor (human), **203,** 922
  ML1, differentiation, induction by vitamin K_2 (human), **205,** 1305
myelomonocytic leukemia, WEHI-3B D^+, evidence for glycosylation of granulocyte colony-stimulating factor receptor (mouse), **205,** 238
nasopharyngeal carcinoma, KB
  adenovirus-mediated endosome lysis in, mechanism: role of intact capsid structure (human), **205,** 1318
  protein delivery using adenovirus (human), **203,** 582
neuroblastoma
  growth and differentiation, role of plasma membrane ganglioside sialidase (human), **199,** 1188
  IMR 32, surface expression of $\alpha1$ subunit of N-type ω-conotoxin-sensitive Ca^{2+} channels, modulation by anti-$\beta2$ subunit antisense oligonucleotides (human), **201,** 180
  NB-2a, acetylcholine synthesis, synergistic effect of choline and carnitine (mouse), **202,** 354
  NB2a/d1, growth cone morphology, effect of intercellularly delivered anti-GAP-43 antibodies, **203,** 459
  N1E-115, large conductance Ca^{2+}-activated K^+ channels, biophysical and pharmocological properties (mouse), **205,** 596
  SH-SY5Y
    amyloid precursor protein expression, effect of glial conditioned medium (human), **198,** 504
    differentiating, apoptosis, induction by colchicine (human), **199,** 807
    inositol 1,4,5-trisphosphate production, stimulation by synthetic *Rab*3A effector domain peptide (human), **203,** 756
  SK-N-SH, 58-kDa protein, morphine-induced tyrosine

    phosphorylation, **200,** 797
neuroblastoma×glioma, NG108-15
  differentiation
    associated regulation of protein kinase C (mouse), **201,** 135
    role of Ca^{2+}-independent protein kinase C (mouse), **203,** 1423
  seven transmembrane domain receptor subtypes, identification by reverse transcription–PCR (mouse), **205,** 1311
neurofibroma, in neurofibromatosis type 1, growth regulation (rat), **198,** 827
node lymphoma, Nb2
  mitogen-activated protein kinase phosphorylation and nuclear translocation, induction by prolactin (rat), **204,** 1158
  proliferation, role of amino acids in amino terminal region of rat prolactin, **205,** 312
osteoblastic osteosarcoma
  HOS-TE85, mineralization and androgen receptor number, effects of 5α-dihydrotestosterone (human), **204,** 905
  UMR-106
    1,25-dihydroxyvitamin D-24-hydroxylase, synergistic induction by parathyroid hormone and 1,25-dihydroxyvitamin D_3 (rat), **205,** 674
    sodium-dependent phosphate transport by parathyroid hormone-related peptide, stimulation by protein kinase C (rat), **199,** 1216
osteosarcoma, in culture, binding sites for osteogenic protein-1 (human), **201,** 1140; *erratum*, **202,** 1196
osteosarcoma, MG-63
  cellular retinoic acid-binding protein-II, induction by retinoic acid isomers all-*trans* and 9-*cis* (human), **200,** 1125
  transcriptional induction of vascular endothelial growth factor under hypoxic conditions, reverse transcription–PCR assay (human), **205,** 1474
  vitamin D receptor levels, modulation by steroid hormone (human), **205,** 1179
ovarian carcinoma, A2780, P-glycoprotein detection in culture media (human), **203,** 506
pancreatic acinar, AR-42J, PAP mRNA expression in, induction by acute pancreatitis-derived serum *in vitro* (rat), **204,** 238
pancreatic cancer
  COLO-357 and PANC-1, induction and expression of heparin-binding EGF-like growth factor (human), **202,** 1705
  HPAC, carbonic anhydrase II expression, induction by TNF-α (human), **205,** 1815
  invasion, concentration gradient of basic fibroblast growth factor in, analysis (human), **200,** 1435
pheochromocytoma, PC12
  amyloid precursor protein secretion after stimulation with M1-selective agonist AF102B and carbachol, comparison (rat), **203,** 652
  amyloid β protein-induced neurotoxicity, prevention by rifampicin *in vitro* (rat), **204,** 76
  apoptosis induction by bovine brain sialoglycopeptide (rat), **203,** 1554
  Ca^{2+}-dependent exocytosis sites in, localization of Rabphilin-3A (rat), **198,** 158
  detergent-extracted cytoskeletal fractions, actin filament adenine nucleotides, phosphorylation states, **201,** 1490
  expression of carbohydrate antigens recognized by anti-horseradish peroxidase antiserum (rat), **204,** 342
  GAP-43 mRNA, neurite growth factor-induced stabilization, mediation by 3′ untranslated region and carboxy-terminus peptide-encoding segment (rat), **200,** 789
  and other cell lines, cell type-specific induction of herpes simplex virus-1 UL9 gene by cell signaling pathway (rat), **205,** 44
  oxidative stress in, effects of human brain clusterin (rat), **204,** 1131
  protein tyrosine phosphatase inhibition by angiotensin II, role of angiotensin II type 2 receptor (rat), **198,** 60
  rab3c GTP-binding protein expression (rat), **200,** 1257
  Rabphilin-3A-interacting protein, identification as GTP cyclohydrolase I (rat), **205,** 1409
  transfected, expressing neurotensin receptor, neurotensin-induced calcium mobilization in, desensitization (rat), **198,** 400
pituitary
  AtT-20, C-type natriuretic peptide-stimulated cyclic GMP, inhibition by activation of protein kinase C by phorbol ester (mouse), **204,** 1318
  GH_3
    growth response to interleukin-2, role of estrogen receptor (rat), **205,** 1930
    thyrotropin-releasing hormone-induced prolactin secretion, role of tyrosine kinase (rat), **199,** 1447
    tumor-derived, somatostatin receptor mRNA subtype expression, regulation by somatostatin (rat), **202,** 1738
plasma cell, growth stimulation by interleukins 6 and 11, effects on tyrosine phosphorylation of JAK-TYK kinases (human, mouse), **202,** 596
promonocytic leukemia, U937
  apoptosis, selective induction by monoacetone glucose-3 butyrate (human), **201,** 266

- hyperadhesiveness to endothelial cells, induction by oxidized low-density lipoprotein, indomethacin effects (human), **204,** 673
- interleukin-10 secretion, stimulation by HIV-1 infection (human), **202,** 374
- mediated low-density lipoprotein oxidative modification, stimulation by oncostatin M (human), **205,** 60
- phorbol ester-induced TNF-α production, effect of thalidomide (human), **199,** 455
- receptor-mediated endocytosis of thrombin–antithrombin III complex (human), **200,** 1334
- subclone U1, chronically HIV-1 infected: *Salmonella typhimurium* activation of HIV-1 by induction of TNF-α (human), **201,** 16

promyelocytic leukemia, HL-60
- apoptosis, induction by
  - gallic acid (human), **204,** 898
  - inhibition of isoprenoid biosynthesis (human), **199,** 1209
- CD38 induction by retinoic acid, GDP-ribosyl cyclase activity as measure, **205,** 722
- chemoattractant receptor-stimulated G protein activation and functional responses, role of carboxylmethylation, **200,** 1604
- c-*myc* expression, inhibition by 4-hydroxynonenal (human), **203,** 553
- differentiation
  - associated calcium-binding protein pEL98 expression (human), **202,** 94
  - associated proteoglycan synthesis (human), **203,** 1682
  - *in vitro,* myeloblastin and myeloperoxidase expression during, comparison (human), **200,** 1130
- DMSO-induced granulocytic differentiation, increased alkaline phosphate activity, and decreased protein kinase C activity, potentiation by sphinganine, **199,** 888
- expression of β_2 integrins and ICAM-1-mediated endothelial binding, effects of genistein (human), **203,** 443
- glycosylphosphatidylinositol-anchored leukocyte surface glycoproteins, association with ganglioside GM_3, **203,** 1069
- hsp70RY expression, effect of phorbol-induced differentiation, **203,** 577
- 5-lipoxygenase induction and activity, effects of vitamin D_3, retinoic acid, dimethyl sulfoxide, and transforming growth factor β (human), **205,** 1572
- phorbol ester-induced monocytic differentiation, hydroxyl radicals as early signal involved in, **200,** 1650
- phorbol ester-induced TNF-α production, effect of thalidomide (human), **199,** 455
- proliferating, detection of 41-kDa protein inhibiting double-stranded DNA-stimulated protein kinase and purification (human), **202,** 1530
- stimulated, oxidative damage to DNA induced by calyculin A, analysis (human), **205,** 1803
- TNF-α production, enhancement by compounds with phenylphthalimide skeleton (human), **205,** 1992
- topoisomerase I inhibition, enhancement of vitamin D-responsive expression of lippolysaccharide-binding protein receptor CD 14 (human), **199,** 531
- tyrosine phosphorylation of JAK2 protein, effect of granulocyte colony-stimulating factor (human), **203,** 922

promyelocytic leukemia, NB4, apoptosis, selective induction by monoacetone glucose-3 butyrate, **201,** 266

prostate cancer
- DUT-145 heat shock gene expression during heating at 41°C, effect of isoquinolinesulfonamides (human), **199,** 714
- PC-3 and TSU-pr1, E-cadherin gene transcriptional regulation: characterization of E-cadherin gene promoter (human), **203,** 1284

pulmonary carcinoma
- A549, interleukin-1β-inducted cyclooxygenase 2 expression in, suppression by dexamethasone, role of lipocortin-1 (human), **202,** 931
- non-small cell, somatic mutations of multiple tumor suppressor 1/cyclin-dependent kinase-4 inhibitor in, detection (human), **202,** 1426

rat islet tumor, RIN 1056E, functional coupling between cholecystokinin secretion and cAMP pathway, **200,** 1382

renal cell carcinoma, SMKT R-3 adhesion and spreading on Zn-α_2-glycoprotein (human), **201,** 1339

ret proto-oncogene, alternative splicing at intron 4, regulation (human), **205,** 1526

rhabdomyosarcoma, TPA-induced differentiation, role of dephosphorylation and nuclear accumulation of mutant p53 (human), **202,** 17

squamous carcinoma, A-431, plakoglobin association with adenomatous polyposis coli (human), **203,** 519

T cell leukemia, MT-2, 3′azido-3′deoxythymidine-resistant HIV-1 infection *in vitro,* inhibition by dehydroepiandrosterone (human), **201,** 1424

teratocarcinoma, leucine-zipper putative protein kinase, cloning and sequence analysis (human brain), **202,** 613; *erratum,* **205,** 1494

thymoma, HPB-ALL, glycosylphosphatidylinositol-anchored leukocyte surface glycoproteins, association with ganglioside GM_3 (human), **203,** 1069

  thyroid carcinoma, thyroid peroxidase expression and DNA polymorphisms (human), **198,** 948
  T lymphoblastoma, H9
    2′,3′-dideoxycytidine activation by acivicin (human), **202,** 1524
    2′,3′-dideoxycytidine activation in, hydroxyurea effect (human), **205,** 92
  T lymphoma
    BW5147, cell membrane fluctuations, cell filterability, and metastatic potential, direct correlation (mouse), **203,** 899
    HUT-78, cutaneous, psoralen/UVA-treated, interferon-γ mRNA levels, assay by competitive PCR (human), **203,** 935
    recombinant single chain T-cell receptor from Jurkat, construction and serological characterization (human), **201,** 1502
  T lymphoma, Jurkat
    attachment to synthetic [$Tyr^{5,12}$,Lys^{7}]-polyphemusin II peptide (human), **202,** 470
    CD28 crosslinking, effect on protein tyrosine kinase $P56^{lck}$ (human), **199,** 1466
    c-*fos* gene expression, effects of α-lipoic acid and dihydrolipoic acid (human), **200,** 1136
    glycosylphosphatidylinositol-anchored leukocyte surface glycoproteins, association with ganglioside GM_3 (human), **203,** 1069
    HIV-1 Tat enhancement of interleukin-2 promoter activity via synergism with phorbol ester and calcium-mediated activation of NF-AT *cis*-regulatory motif (human), **205,** 467
    interleukin-4 gene, P sequence, nuclear factor NF(P) interacting with, relationship to NF-κB and NF-AT (human), **199,** 439
  various, hsp70RY expression (human), **203,** 577
Tumor necrosis factor
  chronotropic effects on cardiac myocytes, **205,** 992
  production, suppression by α-fetoprotein (transgenic mouse), **201,** 1154
Tumor necrosis factor α
  effects on
    adrenomedullin production and secretion by vascular smooth muscle cells (bovine, rat), **203,** 719
    chemoattractant cytokine gene expression in fibroblasts and osteoblasts (mouse), **198,** 590
    NF-κB subunit binding to HIV-1 enhancer (human), **203,** 623
  expression in
    macrophages, regulation with glycosylphosphatidylinositol by protein-tyrosine kinase-mediated signal transduction (*Trypansoma brucei*), **205,** 984
    murine lupus nephritis, effects of omega-3 and omega-6 lipid-rich diets, **200,** 893
  induction in B cells, inhibition by cyclosporin A (human), **204,** 383
  induction of carbonic anhydrase II expression in pancreatic adenocarcinoma cells (human), **205,** 1815
  inhibition of placental lactogen-II expression via TNF-α type I receptor (mouse), **202,** 1599
  mediated leukocyte adhesion to endothelial cell monolayers, attenuation by tyrosine kinase inhibitors (human), **198,** 359
  modulation of interleukin-8-related KC/gro protein release from hepatocytes (rat), **203,** 1398
  nuclear localization in osteoblast-like cell line HOS TE85 (human), **201,** 1445
  phorbol ester-induced production by leukemia cell lines, effect of thalidomide (human), **199,** 455
  production
    in HL-60 cells, enhancement by compounds with phenylphthalimide skeleton (human), **205,** 1992
    by *Salmonella typhimurium,* in activation of HIV-1 in chronically infected promonocytic cells (human), **201,** 16
  sialoglycopeptide growth regulator in presence of, selective cytotoxicity of transformed and normal fibroblasts (mouse), **205,** 215
Tumor necrosis factor α receptors
  retrovirus-mediated gene transfer into colon cancer cells for cancer treatment (human), **202,** 1538
  type I and type II, role in TNF-α inhibition of placental lactogen-II expression and gestational profile of gene expression, **202,** 1599
Tumors, *see also* Tumor cells
  adenoma, aldosterone-producing, aldosterone responsiveness to angiotensin in, association with RFLP at atrial natriuretic peptide gene locus (human), **204,** 1312
  breast cancer, dosage-related effects of coenzyme Q_{10} treatment (human), **199,** 1504
  breast–ovarian carcinoma, susceptibility gene *BRCA1,* 17β-hydroxysteroid dehydrogenase I gene as candidate: differential pseudogene transcription (human), **201,** 1327
  colorectal adenocarcinoma, CD44 mRNA expression (human), **200,** 1015
  in male germ cells, teratomatous differentiation in, correlation with loss of heterozygosity and decreased expression of *NME* genes (human), **202,** 1096
  precancerous disease states, and tumor progression, clonality in, strategy for, analysis (human), **199,** 511

- prostate adenocarcinoma, detection of microsatellite $CAG_{24\rightarrow18}$ mutations in androgen receptor gene (human), **198,** 74
- renal clear cell carcinoma, asymmetric expression of protein kinase CK2 subunits (human), **202,** 141
- small cell lung carcinoma, and paraneoplastic neurologic syndrome, associated hippocampal autoantigen, isolation (human), **199,** 1200
- squamous cell carcinoma, chromosome 9, q22.3–q31 region microsatellite markers, genetic instability (human), **201,** 1495
- thyroid, thyrotropin receptor expression, Western blot analysis, correlation with thyrotropin-binding assay (human), **205,** 361

Tungsten–tantalum shadowing
- and Pt/C shadowing, in image analysis of cytochrome *c* oxidase in phospholipid liposomes (bovine heart), **203,** 331

Tyrosinase, *see* Monophenol monooxygenase

Tyrosine
- in cellular protein phosphorylation, association with actin stress fiber disorganization induced by vascular endothelial growth factor in BALB/c3T3 cells (mouse), **202,** 1716
- phosphorylated insulin receptor substrate-1 and β subunit, association with p85, disruption by lovastatin (rat), **204,** 399
- phosphorylation
  - aggregated IgG-stimulated, proteins in neutrophils, role of Fcγ receptors (human), **199,** 653
  - defective signaling, role in UV-induced DNA fragmentation and cell death after bromodeoxyuridine sensitization in B16 melanoma cells, **203,** 1629
  - FcγRII, induction by neutrophil binding to immunocomplexes: role of phosphorylation in signaling Fc-mediated phagocytosis (human), **201,** 30
  - 58-kDa protein, induction by morphine in neuroblastoma cells (human), **200,** 797
  - induction by interleukin-6 in hematopoietic cell lines (mouse), **200,** 821
  - JAK2 protein in HL60 and Kasumi-1 cells, granulocyte colony-stimulating factor effects (human), **203,** 922
  - JAK-TYK kinases in malignant plasma cell lines, effects of stimulation by interleukins 6 and 11 (human, mouse), **202,** 596
  - mitogen-activated protein kinase, and activation, thrombin-induced, role in late arachidonic acid release in platelets (human), **198,** 497
  - phospholipase C-γ2, role in Fc receptor activation of phosphoinositide hydrolysis (human neutrophils), **201,** 1100
  - protein kinase Cα in CHO cells: direct interaction of insulin receptor and PKC, **200,** 1570
  - regulation of plakoglobin–adenomatous polyposis coli association (human), **203,** 519
- in protein, thrombin-induced phosphorylation in endothelial cells, inhibition by herbimycin A (human), **202,** 1651
- specificity of tyrosine kinase pp56^{lck}, role of motif at subdomain VIII, **205,** 1114
- Tyr-382 in phenylethylamine oxidase, identification as precursor to covalently bound quinone cofactor (*Arthrobacter globiformis*), **199,** 1096
- Tyr-503, essential role in β-galactosidase activity (*Lactobacillus delbrückii bulgaricus*), **201,** 1167

Tyrosine aminotransferase
- gene transcription in hepatocyte cultures, induction, regulation by ginesenoside-Rg_1 (rat), **205,** 1696

Tyrosine kinase, *see* Protein-tyrosine kinase

Tyrosine kinase receptors
- FLT and KDR, binding domains, specificity of vascular endothelial cell growth factor receptor (human), **201,** 326

Tyrosine-related protein 2
- functional analysis as dopachrome tautomerase and effect of point mutation on catalytic function (mouse), **202,** 1060

Tyrosylglycylglycine
- aminopeptidase-resistant sugar-coupled, Na^+-dependent transport in intestine (rat), **203,** 1412

Tyrosyl radicals
- in prostaglandin endoperoxide synthase-2, characterization (human), **202,** 1592

Tyrphostin A25
- attenuation of capacitative Ca^{2+} influx in pancreatic acinar cells (rat), **202,** 1697

U

Ubiquitin
- dependent proteolysis, photoreceptor G-protein transducin as substrate (bovine), **200,** 1169
- levels in bicep muscle, effects of high-force eccentric exercise (human), **204,** 1193
- mediated degradation of amyloid β protein precursor extracellular form (human), **203,** 1731
- –protein conjugates, 30-kDa hydrolase cleaving, characterization (bovine erythrocytes), **205,** 354

Ubiquitination
- histone H2B in chromatin in mammalian cell lines, role of transcription process, **203,** 344

UDP-*N*-acetylglucosamine–dolichyl-phosphate *N*-acetylglucosaminephosphotransferase

- role in glycosylation defects in carbohydrate-deficient-glycoprotein syndrome (human), **200,** 816

UDP-glucuronosyltransferase
- hepatic microsomal, effects of nonoxynol, *p*-nitrophenol spectrophotometric assay (rabbit), **200,** 1093

Ultraviolet light
- cleavage of nitrobenzyl–protein conjugates, **201,** 1213
- exposed Cockayne syndrome cells, restoration of DNA synthesis and expression of UV resistance in, role of polyamines, **205,** 1018
- induced DNA fragmentation and cell death in B16 melanoma cells after bromodeoxyuridine sensitization: impaired c-*jun* induction and defective tyrosine phosphorylation signaling, **203,** 1629
- induction of excision repair enzymes in *Schizosaccharomyces pombe* protein extracts, **198,** 770
- near-UV, role in epidermal formation of 8-hydroxy-2′-deoxyguanosine (hairless mouse), **201,** 1132
- UVA, and psoralen, treated HUT-78 cells, interferon-γ mRNA levels, assay by competitive PCR (human), **203,** 935
- UVC, and γ-rays and PUVA, cytotoxic response in V79 cells, effect of polyamine depletion, **201,** 1

Ultraviolet light-visible spectroscopy
- in characterization of high oxido-reduction potential rusticyanin from *Thiobacillus ferrooxidans*, **203,** 1655

Umbilical vein
- endothelial cells, thrombomodulin in, inhibition by thrombin receptor agonist peptide (human), **199,** 1262

Undulin
- and fibronectin, synthesis and gene expression, in fat storing cells, regulation by acetaldehyde and transforming growth factor β_1, comparison (human), **199,** 1019

Urease
- discs, immobilized by electron beam irradiation technique, appearance of high enzyme activity, **205,** 962

α-Urease
- dissociation products, detection by fluorescent emission spectroscopy, **201,** 1096

Uridine 1-thiotriphosphate
- synthesis in single reaction vessel, procedure, **204,** 150

Urine
- bradykinin, derivation from plasma low-molecular-weight kininogen in kininogen-deficient rat, **204,** 1219
- proadrenomedullin N-terminal 20 peptide immunoreactivity in, characterization (human), **202,** 1081

Urogenital ridge
- midgestation male embryos, expression of *Xist* gene (mouse), **205,** 334

Uteroglobin
- atrial natriuretic peptide receptor expression during pregnancy (human), **203,** 602
- –blastocyte interactions during implantation, mediation by reactive thiols (mouse), **198,** 150
- gene promoter-binding factor, inhibition, tissue distribution, and hormonal specificity (rabbit), **204,** 273

V

Valproic acid
- associated impairment of carnitine uptake, reversal in cultured skin fibroblasts (human), **204,** 753

Vanadate
- cleavage of phospho*enol*pyruvate, **201,** 155
- oligoanions, interaction with proton ejection by Ca^{2+} pump of sarcoplasmic reticulum (rabbit), **205,** 161

Vascular endothelial growth factor
- induction of actin stress fiber disorganization accompanied by protein tyrosine phosphorylation and morphological rounding in BALB/c3T3 cells (mouse), **202,** 1716
- KDR receptor, bacterially expressed cytosolic domain, biological activity and phosphorylation sites, **205,** 728
- mRNA
  - expression in cardiac cells, stimulation by cobalt (rat), **204,** 794
  - hypoxia-induced expression in U-937 cells, mediation by adenosine, **204,** 318
- transcriptional induction under hypoxic conditions, reverse transcription–PCR assay (mouse), **205,** 1474
- VEGF$_{165}$, binding to VEGF receptors, heparin effect: modulation by variations in heparin size and sulfation, **203,** 1339

Vascular endothelial growth factor receptors
- binding of VEGF$_{165}$, heparin effect: modulation by variations in heparin size and sulfation, **203,** 1339
- specificity of ligand binding domains (human), **201,** 326

Vascular natriuretic peptide receptors
- gene expression, effects of angiotensin-converting enzyme inhibitor and calcium channel blocker in hypertensive rat, **205,** 1595

Vasectomy
- induced autoimmune switch-on: prevention by free radical bombing of spermatozoa in spermatic granuloma (rat), **201,** 472

Vasoactive intestinal polypeptide receptors
- expressed by stably transfected human 239 cells and CHO cells, coupling to distinct signaling pathways, **203,** 141
- gene expression in lymphocytes (rat), **203,** 1599

  - molecular cloning from SUP-T1 lymphoblasts and functional characterization (human), **205,** 1617
  - related proteins, cDNA encoding, cloning and functional expression in COS-7 cells (human), **200,** 769
- Vasopressin
  - arginine, *see* Arginine-vasopressin
  - induced cytoplasmic Ca^{2+} oscillation in single hepatocytes, inhibition by caffeine (rat), **198,** 728
  - induced MAP kinase activation in vascular smooth muscle cells, inhibition by peptide and non-peptide arginine vasopression (rat), **200,** 1155
  - induction of adenosine 3′,5′-monophosphate formation in immortalized TKC2 cells, vasopressin receptor V1 and V2 subtypes, mechanistic comparison (mouse), **202,** 680
  - –oxytocin superfamily, identification of annetocin as member (*Eisenia foetida*), **198,** 393
- Vasopressin receptors
  - and oxytocin receptors, selectivity, analysis, **202,** 1569
  - type V1 and V2, cellular mechanisms in vasopressin-induced adenosine 3′,5′-monophosphate formation in immortalized TKC2 cells (mouse), **202,** 680
  - type V2, gene mutations in patients with congenital nephrogenic diabetes insipidus, **205,** 552
  - vascular-type, cDNA cloning, functional expression, and tissue distribution (human), **203,** 72
- Vasorelaxation
  - endothelium-dependent, and cytosolic Ca^{2+}, in smooth muscle, effects of motilin (pig), **202,** 346
- VEGF, *see* Vascular endothelial growth factor
- Venom
  - α-fibrinogenase, multiple isoforms from rattlesnake *Crotalus atrox,* N-terminal sequence homology with ancrod from Malayan pit viper, **201,** 1414
  - jararhagin-C, inhibition of collagen- and ADP-induced platelet aggregation (*Bothrops jararaca*), **201,** 331
  - pentapeptide sequence in, N-terminally protected penta- and tetrapeptides based on, evaluation as opioid antagonists (cobra), **202,** 1285
  - protease with β-fibrinogenase activity, purification and cDNA sequence analysis (Taiwan habu), **205,** 1707
- Venombin A
  - ancrod, from Malayan pit viper, N-terminal sequence homology with α-fibrinogenase isoforms from rattlesnake *Crotalus atrox,* **201,** 1414
  - fibrin formed by, stimulation of prostacyclin production by endothelial cells via *de novo* cyclooxygenase synthesis (human umbilical vein), **203,** 1920
- Venturicidin
  - -sensitive and K$^+$-selective conductances of F$_0$ purified from mitochondria and reconstituted in planar lipid bilayers (bovine heart), **203,** 1005
- Venules
  - postcapillary, P-selectin-dependent leukocyte rolling and adhesion in, induction *in vivo* by mast cell activation (rat), **203,** 1043
- Verapamil
  - and calcium, modulation of 12-*O*-tetradecanoylphorbol 13-acetate-induced epidermal ornithine decarboxylase activity (mouse), **199,** 582
  - and α-tocopherol, antioxidant activity against low-density lipoprotein oxidation *in vitro,* comparison (human), **203,** 1803
- Veratridine
  - modification of conductance and channel gating by sodium channel subtypes in brain, heart, and skeletal muscle (rat), **199,** 1305
- Vesicles, *see also* Germinal vesicles; Synaptic vesicles
  - membrane, superoxide production, enhancement in hyposaline environment (*Halobacterium halobium*), **205,** 1736
  - phospholipid, lipid bilayers, traversal by SecA protein (*Escherichia coli*), **203,** 326
- Vesicular stomatitis virus
  - entry into cells, inhibition by concanamycin A, **201,** 1270
  - infected BHK cells, intracellular transport of viral G glycoprotein in, blockade by SS33410, **199,** 1073
- Vesiculation
  - ATP-induced, erythrocyte ghosts, effect of incorporation of phospholipid analogs into plasma membrane (human), **199,** 881
- *Vibrio fischeri*
  - ATCC 7744, FMN-containing NAD(P)H-flavin oxidoreductase from, hydride transfer stereospecificity and substrate specificity for, **205,** 275
  - bioluminescence, effects of 60-Hz magnetic fields, **198,** 40
- Video capture technique
  - from X-ray film images, in determination of DNA concentrations, **203,** 834
- Viruses, *see specific types*
- Viscosity
  - tracheal mucin glycoprotein, role of sialic acid (dog), **205,** 402
- Vitamin A
  - regulation of expression of apolipoprotein AI and CIII genes (rat), **205,** 1510
- Vitamin B$_6$
  - deficiency, effect on *S*-adenosylhomocysteine and *S*-adenosylmethionine levels in liver (rat), **205,** 1748
- Vitamin D
  - metabolites, regulation of calcium currents in hemocytes

(land snail), **204,** 1096
  stimulation of CD 14 expression by topoisomerase I inhibition (human), **199,** 531
Vitamin D_3
  effects on 5-lipoxygenase induction and activity in HL-60 cells (human), **205,** 1572
Vitamin D receptors
  homodimer-type response element in calcitriol 24-hydroxylase gene promoter, identification (rat), **202,** 1366
Vitamin D_3 receptors
  mRNA, expression and regulation in MG-63 osteosarcoma cells, characterization (human), **205,** 1179
Vitamin E
  and calcium antagonists, antioxidant activity against low-density lipoprotein oxidation *in vitro,* comparison (human), **203,** 1803
Vitamin E deficiency
  symptoms, prevention by α-lipoic acid supplementation (mouse), **204,** 98
Vitamin K_2
  induction of differentiation of myeloid leukemia cell lines (human), **205,** 1305
Vitellogenin
  activin and follistatin affinity for, and localization of activin and follistatin in *Xenopus* oocyte, **202,** 484
  estrogen-induced, characterization: identification as zinc protein (*Xenopus laevis* serum), **200,** 1407
Vitreoscilla
  vgb globulin gene, oxygen-dependent regulation, evidence for positive regulation by transcriptional activator FNR, **202,** 535
Vitreous body
  procollagen type II alternatively spliced variants, identification (bovine), **203,** 289
Vitronectin receptors
  αvβ3, and GPIIb/IIIa, effects of RGDS and tetrafibricin, comparison (human), **204,** 325
Von Willebrand factor
  Asp^{514} in A1 domain, requirement for interaction with human platelet glycoprotein Ib (bovine), **203,** 881
  interaction with glycoprotein Ib, inhibition by echicetin β subunit, **205,** 68
VSV, *see* Vesicular stomatitis virus

W

W-7
  interference with amylase secretion in pancreatic acinar signal transduction (rat), **201,** 1470
Warfarin
  derivatives, competitive inhibition of HIV-1 protease, **201,** 290
Water
  crosslinked subtilisin Carlsberg in, X-ray crystal structure, **198,** 675
WD40/β repeats
  regions of trimeric G proteins containing, binding of β-adrenergic receptor kinase and β-spectrin pleckstrin homology domains, **203,** 29
Weight loss
  rapid, malignancy-associated, role of adipocyte apoptosis (human), **205,** 625
Western blotting
  in analysis of thyrotropin receptor expression in thyroid tumors, correlation with thyrotropin-binding assay (human), **205,** 361
  detection of non-covalent interactions of poly(ADP-ribose) and cellular proteins, **198,** 45
  two-dimensional, in determination of immunological identity of purified and recombinant fatty acid-binding protein and cytosolic heme-binding protein (rat liver), **204,** 163
Wheat germ peroxidase
  effect of heme–apoprotein interactions, **204,** 1
Wilson disease
  rat homolog gene, identification as gene responsible for Long Evans Cinnamon hepatitis located on chromosome 16, **202,** 512
Wortmannin
  effect on increased glucose transport by insulin and norepinephrine in primary culture of brown adipocytes (rat), **202,** 660
  inhibition of
    insulin-like effects of growth hormone (rat adipocytes), **203,** 306
    serum-induced phosphoinositide 3-kinase activation and proliferation of CHRF-288 cells, **202,** 1619
  myosin light-chain kinase-inhibiting effect on wound repair of cultured gastric mucosal cells (rabbit), **199,** 799
  sensitive pathway activating mitogen-activated protein kinase: mechanism of cytosolic phospholipase A_2 activation in CHO cells carrying somatostatin receptor, **205,** 18
Wound repair
  cultured gastric epithelial cells, role of extracellular matrix (rabbit), **202,** 285
  gastric mucosal cells *in vitro,* effect of
    hepatocyte growth factor (rabbit), **199,** 1453
    myosin light-chain kinase inhibitor wortmannin (rabbit), **199,** 799

X

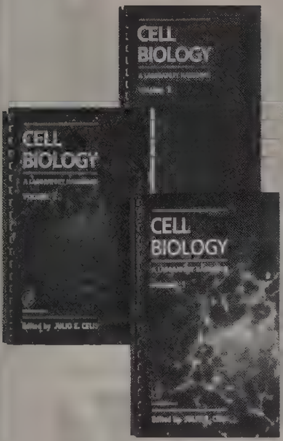
Xanthine dehydrogenase
  cDNA cloning and tissue expression (human liver), **199,** 998
Xenografts
  rejection, role of E-selectin, evidence from molecular and functional analysis (pig), **204,** 763
X-Pro aminopeptidase
  immunoaffinity purification from lung, kidney, and serum (guinea pig), **205,** 1796
  membrane-bound, identification as proline peptidase family member (guinea pig), **205,** 1790
X-ray analysis
  reduced superoxide dismutase (bovine), **202,** 1088
X-ray crystallography
  cross-linked subtilisin Carlsberg in water and acetonitrile, **198,** 675
X-ray diffraction
  whole heart during anoxic perfusion (rat), **202,** 1244

Y

Yeast, *see also* specific types
  ATPase subunit D, overexpression in *Escherichia coli:* use of recombinant subunit D-directed polyclonal antibodies, **200,** 877
  Brewers, component colupulone, and chromium, effects on glucose tolerance and hepatic cytochrome P450 in diabetic and nondiabetic mice, **200,** 1455
  PMS1 genes, human genes homologous to, cloning, characterization, and chromosomal localization, **204,** 1257
  POT1 gene, transcriptional regulation, differential effects of *ADR1* and *SNF1,* **202,** 960
Yeast artificial chromosomes
  hypoxanthine phosphoribosyltransferase gene-containing, transfer into human cells by four methods and role of homologous recombination, **200,** 1693
Yeast transcription activator
  LAC9, zinc finger-type, inhibition by nitric oxide, **200,** 1105

Z

Zidovudine
  resistant HIV-1 infection, inhibition by dehydroepiandrosterone *in vitro* (human), **201,** 1424
Zinc
  cooperative binding to aminoacyl-tRNA synthetase, **201,** 1079
  in dopachrome tautomerase binding sites, determination (mouse), **204,** 1243
  role in competitive binding of P1 and P2 protamines to DNA (human spermatozoa), **201,** 1197
  –sulfur clusters, destruction by nitric oxide, effects on metallothionein Zn release and yeast transcription activator LAC9, **200,** 1105
Zinc finger proteins
  Br140 cDNA, homologous to TFIID TAF250 subunit, cloning, sequencing, and immunolocalization (human), **198,** 1143
  FIII/YY1, binding exon 1 of L1 and L14 ribosomal protein genes, characterization (*Xenopus laevis*), **205,** 1236
Zinc proteins
  Xenopus laevis vitellogenin identification as, **200,** 1407
Zinostatin
  generation of free radicals, mediation by NADPH/cytochrome P450 reductase via activation of enediyne chromophore, **205,** 1716
Zona pellucida
  binding property, 38-kDa protein with, purification and characterization from epididymal sperm (pig), **196,** 196; *erratum,* **198,** 408



CELL BLOCK AP

Cell Biology

A Laboratory Handbook

Edited by

Julio E. Celis

From the Pre-Publication Reviews

> *"The layout is admirably clear, and the quality of the illustrations is superb. The compendium will undoubtedly prove invaluable to cell biologists and to molecular biologists who wish to study the role of macromolecules in cell function.* **Cell Biology: A Laboratory Handbook** *should become the bible of established cell biological methods."*
>
> — TONY HUNTER, Salk Institute, La Jolla, California

A practical, inclusive laboratory companion, this handbook provides cell biologists and other life scientists with the most up-to-date instructions for basic and advanced cell biological techniques. Nearly 200 articles by leading scientists from around the world are conveniently organized into 15 parts in three separate volumes. Hundreds of handsome diagrams, halftones, and photographs, plus 33 color plates enhance the design and usefulness of this new work. Uniform style and editing by an experienced cell biology laboratory course instructor and research group leader ensure quality and accessibility to a large and growing international audience of cell, developmental, and molecular biologists, plus others who need these methods in their laboratory research.

Volume 1

- Tissue Culture and Associated Techniques
- Viruses
- Organelles, Cellular Structures, Macromolecules, and Functional Assays

Volume 2

- Microscopy Techniques
- Microdissection Techniques
- Histochemistry
- Antibodies
- Immunocytochemistry and Vital Staining of Cells
- Intracellular Measurements
- Cytogenetics and *in Situ* Hybridization

Volume 3

- Transfer of Macromolecules and Small Molecules
- Cloning of Embryos, Transgenics, and Gene Targeting
- Cell-Free Extracts, Permeabilized Cell Systems, and Expression Systems
- Proteins
- Appendices

Prepublication Price: $99.00*
Three–Volume Comb Bound Set $120 00 (tentative)/ISBN· 0-12-164714-5
October 1994, c. 1600 pp
*Price expires on the final day of month of publication

Flow Cytometry

Second Edition

Edited by

Zbigniew Darzynkiewicz, J. Paul Robinson, and Harry A. Crissman

Volumes 41 and 42 in the METHODS IN CELL BIOLOGY Series

Part A

Comb Bound: $59.95 (tentative)/ISBN· 0-12-203051-6
Casebound: $110.00 (tentative)/ISBN 0-12-564142-7
October 1994, c. 534 pp

Part B

Comb Bound: $59.95 (tentative)/ISBN 0-12-203052-4
Casebound: $110 00 (tentative)/ISBN 0-12-564143-5
November 1994, c 627 pp

Physical Forces and the Mammalian Cell

Edited by

John A. Frangos

1993, 400 pp., $105.00/ISBN: 0-12-265330-0

Cell Lipids

Edited by

Dick Hoekstra

Volume 40 in the CURRENT TOPICS IN MEMBRANES Series
March 1994, 672 pp., $145.00/ISBN 0-12-153340-9

The Cytokine Handbook

Second Edition

Edited by

Angus W. Thomson

August 1994, 704 pp., $95 00/ISBN 0-12-689661-5

International Review of Cytology

A Survey of Cell Biology

Volume 154

Edited by

Kwang W. Jeon and Jonathan Jarvik

1994, 400 pp., $85.00/ISBN 0-12-364557-3

An International Journal

Editor-in-Chief

Edward R.B. McCabe
Baylor College of Medicine, Houston, Texas

Associate Editor

Chandra Mohan
University of Southern California, Los Angeles

The primary goal of Biochemical and *Molecular Medicine* is the improvement in the understanding of the metabolic basis of disease. The journal publishes articles describing investigations using the tools of biochemistry and molecular biology for studies of the normal and diseased state. In addition to original research articles, occasional mini-reviews reporting timely advances, as well as brief communications and letters to the editor, will be considered for publication.

Research Areas Include

Inherited Metabolic Diseases

- Biochemical studies of the primary enzymatic defect
- Molecular genetic analyses of the mutations
- Pathogenesis of these disorders including not only primary but also secondary, metabolic alterations

Intercellular and Intracellular Metabolic Relationships

- Biochemical interactions between cells
- Functional roles of, and interactions between, subcellular compartments and distinct regions within these cellular spaces, termed microcompartments
- Metabolic relations between individual enzymes and pathways

Cellular Catalysts

- Protein and nonprotein catalysts in normal and deranged cellular metabolism
- Relationships between the structure and function of catalytic molecules
- Interaction of these catalysts with other cellular components

Disease Pathogenesis

- Underlying mechanisms of inherited and acquired diseases
- Relationships between genotype and phenotype at the bio-chemical and molecular levels
- Strategies for the metabolic improvement of patients through classical drug and dietary intervention, as well as more novel approaches such as transplantation and gene therapy

Volumes 54–56 (1995), 6 issues
(including annual subject index)
